

January 2019 Data Release

The Home Purchase Sentiment Index® (HPSI) is a composite index designed to track consumers' housing-related attitudes, intentions, and perceptions, using six questions from the National Housing Survey® (NHS).

The Home Purchase Sentiment Index

The HPSI rose 1.2 points in January to 84.7, reversing the decrease seen in December.

Components of the HPSI

The increase in the HPSI can be attributed to increases in three components: Household Income is Significantly Higher (+8), Good Time to Buy (+4), and Mortgage Rates Will Go Down (+3). Three components decreased: Confidence About Not Losing Job (-6), Home Prices Will Go Up (-1), and Good Time to Sell (-1).

	January 2019*	Change Since Last Month	Change Since Last Year
January 2019 HPSI	84.7	+1.2	-4.8
Good Time To Buy	15	+4	-12
Good Time To Sell	35	-1	-3
Home Prices Will Go Up (next 12 months)	30	-1	-22
Mortgage Rates Will Go Down (next 12 months)	-53	+3	-3
Confidence About Not Losing Job (next 12 months)	73	-6	0
Household Income Is Significantly Higher (past 12 months)	27	+8	+11

* Net percentages of the component questions used to calculate HPSI, e.g. (Percent Good Time to Buy – Percent Bad Time to Buy) = 15

Components of the HPSI – Good/Bad Time to Buy and Sell a Home

The net share of Americans who say it is a good time to buy rose 4 percentage points from last month's survey low to 15%.

The net percentage of those who say it is a good time to sell fell 1 percentage point to 35%.

Components of the HPSI – Home Price and Mortgage Rate Expectations

The net share of Americans who say home prices will go up fell 1 percentage point to 30%, declining for the fourth consecutive month.

In January, the net share of those who say mortgage rates will go down over the next 12 months rose three percentage points to -53%.

Components of the HPSI – Job Concerns and Household Incomes

The net share of Americans who say they are not concerned about losing their jobs fell 6 percentage points in January to 73%.

The net share of those who say their household income is significantly higher than it was 12 months ago rose 8 percentage points from last month to a new survey high of 27%.

Additional National Housing Survey Key Indicators

On average, Americans expect rental prices to increase 3.8% over the next 12 months, 0.9 percentage points lower than last month. They expect home prices to rise 1.6% over the next 12 months, a 0.7 percentage point decline from last month.

The share of Americans who expect home rental prices to go up remained at 58%, while the share who expect them to stay the same rose 1 percentage point to 34%.

Additional National Housing Survey Key Indicators

The share of Americans who say they would buy if they were going to move rose two percentage points to 68%, and the share who say they would rent fell two percentage points to 27%.

The share of Americans who say getting a mortgage would be easy remained at 55%, while the share who say it would be difficult fell 1 percentage point to 42%.

Additional National Housing Survey Key Indicators

The share of Americans who expect their personal financial situations to get better rose 3 percentage points to 51%. The share who expect it to stay the same remained the same at 38%, while the share who expect it to get worse fell 1 percentage point to 11%.

The share of Americans who say the economy is on the right track fell 1 percentage point to 49%. Additionally, the share who say it is on the wrong track rose 3 percentage points to 43%.

The National Housing Survey®

January 2019

APPENDIX

About the Survey

The National Housing Survey® polled a nationally representative sample of 1,001 household financial decision makers (margin of error ±3.1%) aged 18 and older between January 2, 2019 and January 23, 2019. Most of the data collection occurred during the first two weeks of this period.

Interviews were conducted by PSB, in coordination with Fannie Mae.

The statistics in this release were estimated from sample surveys and are subject to sampling variability as well as nonsampling error, including bias and variance from response, nonreporting, and undercoverage. Averages of expected price changes were calculated after converting responses of “stay the same” to 0% and after excluding outliers, which were defined to be responses that were more than two standard deviations from the means.

How the Home Purchase Sentiment Index (HPSI) is Calculated*	
Net Good Time to Buy <i>Very or Somewhat Good Time To Buy – Very or Somewhat Bad Time To Buy</i>	Q12
Net Good Time to Sell <i>Very or Somewhat Good Time To Sell – Very or Somewhat Bad Time To Sell</i>	Q13
Net Home Prices Will Go Up (next 12 months) <i>Home Prices Will Go Up – Home Prices Will Go Down</i>	Q15
Net Mortgage Rates Will Go Down (next 12 months) <i>Mortgage Rates Will Go Down – Mortgage Rates Will Go Up</i>	Q20B
Net Confident About Not Losing Job (next 12 months) <i>Not at All or Not Very Concerned about Losing Job – Very or Somewhat Concerned about Losing Job</i>	Q112B
Net Household Income is Significantly Higher (past 12 months) <i>Income is Significantly Higher – Income is Significantly Lower</i>	Q116
$HPSI = \frac{Q12 + Q13 + Q15 + Q20B + Q112B + Q116}{6} + 63.5$	
* The HPSI calculation includes the addition of a constant of 63.5 in order to set the index's initial value at 60 as of March 2011, in range with the Index of Consumer Sentiment and the Consumer Confidence Index
