Executive Summary

Lenders view Application Program Interfaces (APIs) as the technology with the greatest potential to streamline business processes. Ease of integration and competitive advantages are the most important criteria for API adoption cited by lenders. The most appealing API ideas to lenders are borrower qualification verification and appraisal value and comparables.

Top Two Technology Areas with Greatest Potential to Streamline Business Processes and Most Likely to be Rolled Out Broadly

- 63% say Application Programming Interfaces (APIs)
- 62% say Document Management and Optical Character Recognition (OCR)

Top Two Most Important Criteria in Deciding to Adopt a Third-Party API

- 47% say ease of technology integration or adoption
- 41% say competitive advantages brought by API adoption

Most Appealing API Ideas to Improve Business Processes

1. **Borrower Qualification Verification**: Enter a borrower’s personal identifiable information (e.g. name & social security number) and the API will return this borrower’s income, assets, employment history, and credit profile.

2. **Appraisal**: Enter a home address and the API will tell the appraisers’ appraisal value and comparables.
Business Context and Research Questions

Business Context

Businesses are increasingly leveraging digital technologies to reduce errors and costs, speed up transactions, and drive richer and better customer service. Over the past few years, technology advancements such as Artificial Intelligence (AI) with Machine Learning (ML), Application Program Interfaces (APIs), and document digitization have gained traction, enabling digital transformation.

Fannie Mae’s Economic & Strategic Research (ESR) Group surveyed senior mortgage executives in February 2019 through its quarterly Mortgage Lender Sentiment Survey® to understand lenders’ views on various technologies, their criteria for adoption of a third-party API, and to gauge their interests in various API ideas.

Research Questions

1. What technologies do lenders view as having the greatest potential to improve or streamline business processes? Technologies we asked about included AI/ML, APIs, document management and OCR (Optical Character Recognition), RPA (Robotic Process Automation), DLT (Distributed Ledger Technology), and chatbots. For each technology, what do lenders view as the status of adoption in two years?

2. What are the most important criteria lenders use in deciding to adopt a third-party API?

3. What API ideas are most appealing to lenders to improve or streamline business processes? Ideas tested included borrower qualification verification, appraisals, loan data submission quality, loan program eligibility, loan underwriting status, loan closing status, and loan limits.
Q1 2019 Respondent Sample and Groups
The current analysis is based on first quarter 2019 data collection. For Q1 2019, a total of 202 senior executives completed the survey during February 6 - 17, representing 184 lending institutions.*

<table>
<thead>
<tr>

Sample Q1 2019

<table>
<thead>
<tr>
<th>Sample Size</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Lending Institutions</td>
</tr>
<tr>
<td>The “Total” data throughout this report is an average of the means of the three lender-size groups listed below.</td>
</tr>
<tr>
<td>Larger Institutions</td>
</tr>
<tr>
<td>Lenders in the Fannie Mae database who were in the top 15% of lending institutions based on their total 2017 loan origination volume (above $1.18 billion)</td>
</tr>
<tr>
<td>Mid-sized Institutions</td>
</tr>
<tr>
<td>Lenders in the Fannie Mae database who were in the next 20% (16%-35%) of lending institutions based on their total 2017 loan origination volume (between $400 million and $1.18 billion)</td>
</tr>
<tr>
<td>Smaller Institutions</td>
</tr>
<tr>
<td>Lenders in the Fannie Mae database who were in the bottom 65% of lending institutions based on their total 2017 loan origination volume (less than $400 million)</td>
</tr>
</tbody>
</table>

Institution Type***

<table>
<thead>
<tr>
<th>Sample Size</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mortgage Banks (non-depository)</td>
</tr>
<tr>
<td>Depository Institutions</td>
</tr>
<tr>
<td>Credit Unions</td>
</tr>
</tbody>
</table>

* The results of the Mortgage Lender Sentiment Survey are reported at the lending institutional parent-company level. If more than one individual from the same institution completes the survey, their responses are averaged to represent their parent institution.

** The 2017 total loan volume per lender used here includes the best available annual origination information from Fannie Mae, Freddie Mac, and Marketrac. Lenders in the Fannie Mae database are sorted by their firm’s total 2017 loan origination volume and then assigned into the size groups, with the top 15% of lenders being the “larger” group, the next 20% of lenders being the “mid-sized” group and the rest being the “small” group.

*** Lenders that are not classified into mortgage banks or depository institutions or credit unions are mostly housing finance agencies.
Technology Areas with Greatest Potential and Expected Adoption Status in Two Years

Lenders see APIs and document management/OCR as having the greatest potential to help improve or streamline processes. They also cite these two technology areas as the most likely to be rolled out broadly in the next two years.

<table>
<thead>
<tr>
<th>Technology Area</th>
<th>Greatest Potential</th>
<th>2nd Greatest Potential</th>
</tr>
</thead>
<tbody>
<tr>
<td>Application Programming Interfaces (APIs)</td>
<td>43%</td>
<td>20%</td>
</tr>
<tr>
<td>Document Management and Optical Character Recognition (OCR)</td>
<td>24%</td>
<td>38%</td>
</tr>
<tr>
<td>Artificial Intelligence (AI) or Machine Learning</td>
<td>16%</td>
<td>13%</td>
</tr>
<tr>
<td>Robotic Process Automation (RPA)</td>
<td>10%</td>
<td>18%</td>
</tr>
<tr>
<td>Chatbots</td>
<td>5%</td>
<td>8%</td>
</tr>
<tr>
<td>Distributed Ledger Technology</td>
<td>6%</td>
<td></td>
</tr>
</tbody>
</table>

Larger and mid-sized institutions are more likely than smaller ones to plan to roll out APIs (65%, 44% v. 15%) and document management/OCR (47%, 46% v. 22%) more broadly in the next two years.

Larger and mid-sized institutions are more likely than smaller ones to say robotic process automation has most potential to help (37%, 33% v. 13%).

Smaller institutions are more likely than larger and mid-sized institutions to say chatbots have most potential to help (17% v. 2%, 3%).

"Other" answer choice specified by respondents include: "EVault", "New LOS"
**Interest Levels for API Ideas**

An API to verify borrower qualification is enormously valued by lenders. An API to obtain property appraisal value and comparables is also highly valued by lenders.

### Relative Value of API Ideas (with 100 = average)

Relative Value Scores derived from MaxDiff Analysis (see pg. 12 for additional information)

<table>
<thead>
<tr>
<th>API Development Idea</th>
<th>Relative Value Score</th>

</thead>
<tbody>
<tr>
<td><strong>Borrower Qualification Verification:</strong></td>
<td>284</td>
</tr>
<tr>
<td>Enter a borrower’s personal identifiable information (e.g. name &amp; social security number) and the API will return this borrower’s income, assets, employment history, and credit profile.</td>
<td></td>
</tr>
<tr>
<td><strong>Appraisal:</strong></td>
<td>150</td>
</tr>
<tr>
<td>Enter a home address and the API will tell the appraisal value and comparables.</td>
<td></td>
</tr>
<tr>
<td><strong>Loan Program Eligibility:</strong></td>
<td>86</td>
</tr>
<tr>
<td>Enter key loan and borrower characteristics and the API will tell the types of loan programs (e.g., conventional conforming, jumbo, 97% LTV) this borrower could be qualified for.</td>
<td></td>
</tr>
<tr>
<td><strong>Loan Data Submission Quality:</strong></td>
<td>84</td>
</tr>
<tr>
<td>Enter a loan reference number and the API will provide details on data quality and consistency across systems throughout the entire loan manufacturing process with secondary market investors to identify data issues and edits.</td>
<td></td>
</tr>
<tr>
<td><strong>Loan Underwriting Status:</strong></td>
<td>48</td>
</tr>
<tr>
<td>Enter a loan reference number and the API will inform the current status of the loan being processed/reviewed/underwritten by the secondary market investor and call out outstanding items needed.</td>
<td></td>
</tr>
<tr>
<td><strong>Loan Closing Status:</strong></td>
<td>42</td>
</tr>
<tr>
<td>Enter a loan reference number and the API will inform the closing status such as what documents/disclosures have been e-delivered to the borrower, timing of document delivery, and the status indicating if the borrower has e-signed.</td>
<td></td>
</tr>
<tr>
<td><strong>Loan Limit:</strong></td>
<td>6</td>
</tr>
<tr>
<td>Enter a zip code and the API will tell the mortgage loan limit for conventional conforming, FHA, and VA loans.</td>
<td></td>
</tr>
</tbody>
</table>

*Q: In this section, you will see some API development ideas that your organization might leverage in the future to improve or streamline its mortgage business processes. Many of these ideas do not exist yet. These ideas will be presented in a total of 7 sets. Each set will show 3 ideas. Among the 3 ideas in each set, please choose the idea that is the MOST appealing and the idea that is the LEAST appealing to your organization.*
**Most Important Criteria for Adopting a Third-Party API**

Ease of technology adoption and competitive advantages from API adoption matter the most to lenders when deciding to adopt a third-party API. Lenders say GSEs can help set clear industry standards, provide guidance on best practices, and create user-friendly environments in order to ease integration.

**How Secondary-market Investors Can Help with Technology Integration**

<table>
<thead>
<tr>
<th>N=33</th>
</tr>
</thead>
<tbody>
<tr>
<td>“Establish standards for industry data and best practices. It is a better industry if all players are efficient.” – Larger Institution</td>
</tr>
<tr>
<td>“Promoting firms which adopt &amp; adopt GSE standards.” – Smaller Institution</td>
</tr>
<tr>
<td>“Advise sellers of new IT innovations, after you have tested them for capabilities, cost-effectiveness, reliability and ease of integration.” – Mid-sized Institution</td>
</tr>
<tr>
<td>“Create a user friendly environment that allows for technologies to talk to each other more freely. There are also too many options on the market right now. Providing guidance on best use and best practices is important.” – Smaller Institution</td>
</tr>
<tr>
<td>“There are many competing projects for resources. Significant, time-consuming integrations pull valuable resources from projects with a greater ROI.” – Larger Institution</td>
</tr>
</tbody>
</table>

---

**Q:** When deciding whether or not to adopt an API developed by a third party, what are your organization’s most important criteria? Listed below are some possible criteria. Please select up to two and rank them in order of importance. / **Q:** You mentioned that “ease of technology integration” is an important criterion for API adoption. Please share your thoughts on how secondary-market investors like the GSEs could help for this area?

© 2019 Fannie Mae
Research Objectives

- The survey is unique because it is used not only to track lenders’ current impressions of the mortgage industry, but also their insights into the future.
- The Mortgage Lender Sentiment Survey®, which debuted in March 2014, is a quarterly online survey among senior executives in the mortgage industry, designed to:

Track insights and provide benchmarks into current and future mortgage lending activities and practices.

<table>
<thead>
<tr>
<th>Quarterly Regular Questions</th>

</tr>
</tbody>
</table>

- A quarterly 10-15 minute online survey of senior executives, such as CEOs and CFOs, of Fannie Mae’s lending institution customers.
- The results are reported at the lending institution parent-company level. If more than one individual from the same institution completes the survey, their responses are averaged to represent their parent company.
Mortgage Lender Sentiment Survey®

Survey Methodology
- A quarterly, 10- to 15-minute online survey among senior executives, such as CEOs and CFOs, of Fannie Mae’s lending institution partners.
- To ensure that the survey results represent the behavior and output of organizations rather than individuals, the Fannie Mae Mortgage Lender Sentiment Survey is structured and conducted as an establishment survey.
- Each respondent is asked 40-75 questions.

Sample Design
- Each quarter, a random selection of approximately 3,000 senior executives among Fannie Mae’s approved lenders are invited to participate in the study.

Data Weighting
- The results of the Mortgage Lender Sentiment Survey are reported at the institutional parent-company level. If more than one individual from the same parent institution completes the survey, their responses are averaged to represent their parent institution.
MaxDiff Methodology for Q1 2019 MLSS

What is MaxDiff?

• Maximum Difference Scaling, or simply MaxDiff, is an approach to measure preference or importance scores on a number of items or “attributes” (e.g., product ideas and product features).

• Each respondent goes through a number of exercises, and, for each exercise/set, chooses the most important (most preferred) option and the least important (least preferred) option. In the Q1 2019 MLSS, we asked about 7 different API ideas that could help streamline business processes. Respondents were shown randomly preselected sets of 3 ideas each for a total of 7 sets. An example set that respondents were shown is below:

Interpreting MaxDiff Results

• MaxDiff analysis produces a “utility” value for each attribute. To help ease the interpretation, utility scores are converted and expressed as index values, with 100 = average. Higher scores above the average of 100 indicate stronger preferences or higher importance.
Lending Institution Characteristics

Fannie Mae’s customers invited to participate in the Mortgage Lender Sentiment Survey represent a broad base of different lending institutions that conducted business with Fannie Mae in 2017. Institutions were divided into three groups based on their 2017 total industry loan volume – Larger (top 15%), Mid-sized (top 16%-35%), and Smaller (bottom 65%). The data below further describe the composition and loan characteristics of the three groups of institutions.

Note: Government loans include FHA loans, VA loans and other non-conventional loans from Marketrac.
## 2019 Q1 Cross-Subgroup Sample Sizes

<table>
<thead>
<tr>

</tbody>
</table>
How to Read Significance Testing

On slides where significant differences between three groups are shown:

- Each group is assigned a letter (L/M/S, M/D/C).
- If a group has a significantly higher % than another group at the 95% confidence level, a letter will be shown next to the % for that metric. The letter denotes which group the % is significantly higher than.

Example:

For each of the technologies listed below, what do you think the status of your organization's adoption for your mortgage business would be in two years?

Application Programming Interfaces (APIs)

<table>
<thead>
<tr>
<th>Technology</th>
<th>Total</th>
<th>LOAN VOLUME</th>
<th>INSTITUTION TYPE</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>Larger (L)</td>
<td>Mid-sized (M)</td>
</tr>
<tr>
<td>N=</td>
<td>184</td>
<td>49</td>
<td>43</td>
</tr>
<tr>
<td>Roll out more broadly</td>
<td>41%</td>
<td>65%&lt;sup&gt;L&lt;/sup&gt;</td>
<td>44%&lt;sup&gt;M&lt;/sup&gt;</td>
</tr>
<tr>
<td>Use on a trial basis</td>
<td>21%</td>
<td>14%</td>
<td>23%</td>
</tr>
<tr>
<td>Investigate</td>
<td>21%</td>
<td>8%</td>
<td>25%&lt;sup&gt;L&lt;/sup&gt;</td>
</tr>
<tr>
<td>Wait and see</td>
<td>8%</td>
<td>8%</td>
<td>3%</td>
</tr>
<tr>
<td>Don't know/not sure</td>
<td>9%</td>
<td>5%</td>
<td>5%</td>
</tr>
</tbody>
</table>

65% is significantly higher than 44% (mid-sized institutions) and 15% (smaller institutions)

50% is significantly higher than 26% (depository institutions)
The “Total” data presented in this report is an average of the means of the three loan origination volume groups (see an illustrated example below). Please note that percentages are based on the number of financial institutions that gave responses other than “Not Applicable.” Percentages below may add not sum to 100% due to rounding.

Example:

First, listed below are some technology areas. In your view, which ones have the greatest potential to help your mortgage business improve or streamline processes over the next two years? Please select up to two areas and rank them in order of potential levels.

<table>
<thead>
<tr>
<th>Showing Greatest + 2nd Greatest Potential</th>
<th>Total</th>
<th>LOAN VOLUME</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>Larger (L)</td>
</tr>
<tr>
<td>N=</td>
<td>184</td>
<td>49</td>
</tr>
<tr>
<td>Application Programming Interfaces (APIs)</td>
<td>63%</td>
<td>61%</td>
</tr>
<tr>
<td>Document Management and Optical Character Recognition (OCR)</td>
<td>62%</td>
<td>62%</td>
</tr>
<tr>
<td>Artificial Intelligence (AI) or Machine Learning</td>
<td>29%</td>
<td>30%</td>
</tr>
</tbody>
</table>

“Total” of 62% is
(61% + 55% + 74%) / 3
Other API Ideas Suggested by Lenders

Lenders suggested other APIs, including one that references borrower information against historical performance and another for new construction appraisals. Some also suggest more use of big data and working through the current API ideas available.

Q: Are there any API ideas that you would like to be developed to help improve or streamline your organization’s mortgage business processes? Please share your thoughts. (Optional)

Other API Ideas Suggested by Lenders to Help Improve/Streamline Business Processes

N=17

“An API that references borrower/loan program characteristics against [historical performance and] a projected credit model to highlight probability of default and loss given default.” – Smaller Institution

“The API ideas that are currently a WIP are enough to try and grasp and integrate for awhile!” – Larger Institution

“Markets are so different and also differ by counties for API appraisal info…API would be good to use for what programs are available to buyers and show the differences.” – Smaller Institution

“Less dependence on appraisers...more use of Big Data as it applies to property valuation.” – Mid-Sized Institution

“Something for new construction appraisals.” – Larger Institution

“Loan eligibility with estimated closing date based on GSE standards.” – Smaller Institution
