Audience Specific Information

Dealer Appendix ............................................................................................................................ 26

Seller / Servicer Appendix .......................................................................................................... 34
This document is not an offer to sell any Freddie Mac securities. Offers for any given security are made only through applicable offering circulars and related supplements, which incorporate Freddie Mac's most recent Annual Report on Form 10-K filed with the Securities and Exchange Commission (SEC); all other reports Freddie Mac may file with the SEC pursuant to Section 13(a) of the Securities Exchange Act of 1934 (Exchange Act) since the end of the year covered by such Annual Report, excluding any information "furnished" to the SEC on Form 8-K; and all documents that Freddie Mac files with the SEC pursuant to Sections 13(a), 13(c) or 14 of the Exchange Act, excluding any information "furnished" to the SEC on Form 8-K.

This document may contain forward-looking statements. A description of factors that could cause actual developments to differ materially from the expectations expressed in these and other forward-looking statements can be found in Freddie Mac's Annual Report on Form 10-K for the year ended December 31, 2016, and its reports on Form 10-Q and Form 8-K, filed with the SEC and available on the Investor Relations page of Freddie Mac's Web site at www.FreddieMac.com/investors and the SEC's Web site at www.sec.gov.

This document does not provide, and is not intended to provide, legal or tax advice. Readers should consult their own legal and tax advisors.

No Offer or Solicitation Regarding Securities. This document is for general information purposes only. No part of this document may be duplicated, reproduced, distributed or displayed in public in any manner or by any means without the written permission of Freddie Mac. The document is neither an offer to sell nor a solicitation of an offer to buy any Freddie Mac security mentioned herein or any other Freddie Mac security. Freddie Mac securities are offered only in jurisdictions where permissible by offering documents available through qualified securities dealers or banks.

No Warranties; Opinions Subject to Change; Not Advice. This document is based upon information and assumptions (including financial, statistical, or historical data and computations based upon such data) that we consider reliable and reasonable, but we do not represent that such information and assumptions are accurate or complete, or appropriate or useful in any particular context, including the context of any investment decision, and it should not be relied upon as such. Opinions and estimates expressed herein constitute Freddie Mac's present judgment and are subject to change without notice. They should not be construed as either projections or predictions of value, performance, or results, nor as legal, tax, financial, or accounting advice. No representation is made that any strategy, performance, or result illustrated herein can or will be achieved or duplicated. The effect of factors other than those assumed, including factors not mentioned, considered or foreseen, by themselves or in conjunction with other factors, could produce dramatically different performance or results. We do not undertake to update any information, data or computations contained in this document, or to communicate any change in the opinions, limits, requirements and estimates expressed herein. Investors considering purchasing a Freddie Mac security should consult their own financial and legal advisors for information about such security, the risks and investment considerations arising from an investment in such security, the appropriate tools to analyze such investment, and the suitability of such investment in each investor's particular circumstances.

Fannie Mae securities, together with interest thereon, are not guaranteed by the United States and do not constitute a debt or obligation of the United States or of any agency or instrumentality thereof other than Fannie Mae.
1 Introduction and Features

1.1 Purpose of the Document

The purpose of this document is to provide an explanation of impending changes to the security programs of Fannie Mae and Freddie Mac (the Enterprises) associated with the Single Security Initiative. The intent is to clarify the characteristics of the new securities that the Enterprises will be issuing, "Uniform Mortgage-Backed Securities™" or "UMBS™" and "Supers™", and to provide more detailed information about how the transition to these securities will affect the day-to-day operations of key market segments. The document is a playbook in the sense that it identifies possible actions market participants should consider taking to ensure a smooth transition to TBA trading in the new securities. This document should serve as a tool to help you plan to adapt your business policies, procedures, and processes to the introduction of UMBS and Supers when the Single Security Initiative is implemented in Q2 2019.

For more details on the Single Security Initiative, refer to either of the Enterprise’s websites:

- [http://www.freddiemac.com/single_security](http://www.freddiemac.com/single_security)
- [http://www.fanniemae.com/singlesecurity](http://www.fanniemae.com/singlesecurity)

Please direct any questions, comments and feedback to single_security@freddiemac.com or single_security@fanniemae.com.

1.2 Introduction

The Single Security Initiative will create a new mortgage-backed security (MBS) to be issued and guaranteed by either Fannie Mae or Freddie Mac and backed by fixed-rate 30-, 20-, 15- and 10-year single-family mortgage loans. The security will be called the “Uniform MBS” or “UMBS.” Single Class resecuritizations of UMBS will be called “Supers.” The Single Security Initiative is expected to strengthen the U.S. mortgage market by supporting liquidity in the To-Be-Announced (TBA) market, thereby maintaining or possibly lowering the cost of housing finance and benefiting borrowers, taxpayers, and investors.
### Key Features of the UMBS and Supers

</tr>
<tr>
<td><strong>Loan Buy-outs</strong></td>
<td>Accelerate buy-outs to occur at 120 days of delinquency</td>
</tr>
<tr>
<td><strong>Investor Remittance Date</strong></td>
<td>Payment date will be the 25th (55-day delay) of the month for all product types; if the 25th falls on a holiday or weekend, the payment date will be the next business day after the 25th.</td>
</tr>
<tr>
<td><strong>Disclosures</strong></td>
<td>The disclosure framework for the UMBS or Supers will be similar to the current Freddie Mac Participation Certificate (PC) loan- and security-level disclosures.</td>
</tr>
<tr>
<td><strong>Servicing and Selling Guides</strong></td>
<td>The Enterprises will maintain their separate Servicing and Selling Guides.</td>
</tr>
<tr>
<td><strong>Loan Removal Policies and Practices</strong></td>
<td>The Enterprises have agreed to substantially align the following policies and practices for new securities prior to the implementation of the Single Security Initiative: Reasonably Foreseeable Default (Imminent Default), Removal Permitted Due to Servicer Performance Error, Compliance with Law, and Optional Removal Delinquency Status. For additional details on the changes, please see the FHFA Appendix D (May 2015) found here - <a href="http://www.freddiemac.com/mbs/docs/d_loan_removal_policies_practices.pdf">http://www.freddiemac.com/mbs/docs/d_loan_removal_policies_practices.pdf</a></td>
</tr>
</tbody>
</table>
2 Single Security Initiative Go-live Timeline

The Single Security Initiative go-live date is the first day that the Enterprises will issue new UMBS. The timeline below displays relevant dates to market participants in relation to the first new UMBS issuance. We recognize that different dates within the go-live timeframe will be of particular importance to different stakeholder groups. We have provided some additional context for some of the key dates below:

- **Forward Trading Date** – Of interest to Investors and Traders, forward trading will begin 75 days prior to go-live.
- **Guarantor Contract Date** – For Seller / Servicers, this is the first date a contract can be entered for a 55-day UMBS to settle on or after go-live.
- **Go-live** – This is the first day that the Enterprises will issue new UMBS. We assume this will be the first business day of the month.
- **First UMBS Reg Settlement** – The first opportunity to settle TBA trades with the new UMBS will be approximately 15 days after go-live. The first Reg settlement will occur approximately 90 days after the start of forward trading.
- **Exchange** - Exchange of Freddie Mac Gold PCs may be made available to the market prior to the first new UMBS issuance.

Single Security – Sample Transition Dates & Relative Timing for Scheduled Q2 2019 Implementation

* - Currently evaluating the appropriate timeframe. This date could be significantly earlier.  
** - Market consensus is that forward trading for the single security will commence 90-days before the first UMBS Reg Settlement Day which makes it approximately 75-days prior to go-live.
3 Illustrative Implementation Timeline for Market Stakeholders

This sample implementation schedule illustrates the time you may need to get ready for go-live in Q2 2019. The examples below do not include all changes that may be required.

</tbody>
</table>

Strong Recommendation: Test and deploy system changes and implement updates by year-end 2018.
4 Single Security Initiative Naming Conventions

Implementation of the Single Security Initiative will affect the naming conventions for TBA-eligible and non-TBA-eligible securities issued by both Enterprises. All new or exchanged 55-day TBA-eligible securities issued by either Enterprise will be named UMBS or Supers. Freddie Mac 55-day non-TBA-eligible securities will be referred to as MBS or Giant MBS. Fannie Mae 55-day non-TBA-eligible securities will be referred to as MBS or Megas. Freddie Mac will no longer issue Gold PC’s after implementation.

The new naming conventions will be reflected on the Enterprises’ documentation, disclosures, and marketing materials with the implementation of the Single Security Initiative. Market participants should familiarize themselves with the changes and update their internal processes and documentation if necessary.

<table>
<thead>
<tr>
<th>Security Payment Delay</th>
<th>Naming Conventions</th>
</tr>
</thead>
</table>
| All new or exchanged 55-day TBA-eligible securities | ▪ Uniform MBS/UMBS  
▪ Supers (singular or plural) |

<table>
<thead>

<th>Naming Conventions</th>
</tr>
</thead>
</table>
| 45-day securities  
Legacy Golds | ▪ Freddie Mac Gold PC® (no new issuances once single security initiative is implemented)  
▪ Freddie Mac Giant PC® |
| 55-day securities  
non-TBA-eligible | ▪ Freddie Mac MBS  
▪ Freddie Mac Giant MBS |
| 75-day securities  
ARMs/Legacy 75-day fixed-rate | ▪ Freddie Mac ARM PCs  
▪ Freddie Mac ARM Giant PCs  
▪ Freddie Mac PCs (remaining 75-day fixed-rate) |
| 55-day securities  
ARMs/non-TBA-eligible | ▪ Fannie Mae MBS  
▪ Fannie Mae Megas® |
5 Prefixes and Pool Numbers

Key Changes

- TBA prefixes for UMBS and resecuritizations of UMBS issued by either Enterprise will align to the current prefix convention for Fannie Mae TBA-eligible securities.

<table>
<thead>
<tr>
<th>Product</th>
<th>UMBS and Supers Prefixes</th>
<th>Reverse REMIC Prefixes</th>

<td>CN</td>
<td>ZN</td>
</tr>
</tbody>
</table>

- Freddie Mac will also move to a 55-day delay for non-TBA-eligible fixed-rate pools; these will also follow Fannie Mae’s current structure of separate prefix and pool number fields.
- To avoid confusion or duplication for non-TBA-eligible fixed-rate pools, Freddie Mac will assign new prefixes to all 55-day delay non-TBA-eligible products using the Numeric + Alpha format.
  - Freddie Mac will use the Numeric + Alpha format for all prefix assignments, but will exclude any Numeric + Alpha prefixes already in use by Fannie Mae.
  - This will eliminate any Freddie Mac/Fannie Mae prefix overlap going forward.
- Pool numbers will be divided between the Enterprises to ensure uniqueness.
  - Fannie Mae will be allotted pool numbers beginning with A-I, and M.
  - Freddie Mac will be allotted pool numbers beginning with Q-Z.
- The tables below detail the current prefix and pool number conventions and the conventions that will be used after the Single Security Initiative implementation. Refer to each Enterprise’s Prefix Guide for additional details. Freddie Mac’s Prefix Guide can be found here. Fannie Mae’s Pool Prefix Glossary can be found here.

Current State of Prefixes and Pool Numbers

<table>
<thead>
<tr>
<th>Approach</th>

<tr>
<td>Non-TBA example (15-yr biweekly)</td>
<td>M51234</td>
<td>BI AD2222</td>
</tr>
</tbody>
</table>

As of August 25, 2017

Freddie Mac will implement the new prefix field as of August 25, 2017. Freddie Mac will begin populating the new field with the first 2 characters of the pool number for all legacy securities (both TBA-eligible and non-TBA-eligible. For example, C0 C04846 for TBA-eligible and M5 M51234 for non-TBA-eligible.
### Future State (new issue 55-day securities at Single Security Initiative Implementation)

<table>
<thead>
<tr>
<th>Approach: Changes in Red Italics</th>
<th>Freddie Mac</th>
<th>Fannie Mae</th>
</tr>
</thead>
<tbody>
<tr>
<td>▪ One 3-character (two are used) prefix field plus a separate 6-character pool number field</td>
<td>One 3-character (two used) prefix field plus a separate 6-character pool number field</td>
<td></td>
</tr>
<tr>
<td>▪ Use FNM prefixes for TBA-eligible securities</td>
<td>Majority but not all prefixes are alpha-alpha</td>
<td></td>
</tr>
<tr>
<td>▪ To avoid confusion, FRE is changing prefixes for non-TBA-eligible products to number-alpha construct</td>
<td>Pool number is generally 2 alpha + 4 numeric</td>
<td></td>
</tr>
<tr>
<td>▪ Prefix contains logic for product type and term</td>
<td>Logic is found in prefix</td>
<td></td>
</tr>
<tr>
<td>▪ Pool number ranges will denote execution path and securitization level (e.g., UMBS vs. Supers)</td>
<td>Pool numbers divided between Enterprises to ensure uniqueness - FNM has been allotted pool numbers beginning in A-I, M</td>
<td></td>
</tr>
<tr>
<td>▪ Pool numbers divided between Enterprises to ensure uniqueness</td>
<td></td>
<td></td>
</tr>
<tr>
<td>▪ FRE legacy securities will copy the first 2 characters of the pool number into the new prefix field</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<tbody>
<tr>
<td>Non-TBA example (15-yr biweekly)</td>
<td>5V QJ5050</td>
<td>BI AD2222</td>
</tr>
</tbody>
</table>

Red font denotes changes.

**Actions Market Participants Should Consider**

- Update and test systems, reporting, and other processes or activities to be compatible with new prefix and pool number content and structure (most significant updates for Freddie Mac securities).
6 Disclosures

Key Changes

- Disclosures for UMBS and Supers issued by Fannie Mae or Freddie Mac will be aligned, based on Freddie Mac’s disclosure format with some minor enhancements.
- Disclosure specifications and sample files for Level 1, Level 2, and Level 3 securities, as well as the PC exchange, were published by both Enterprises in 2016. This data can be found on the Freddie Mac Single Security website or the Fannie Mae Single Security website.
- Freddie Mac will adopt the Single Security Disclosure format for current Single Family PC and Giant securities on August 25, 2017; test files were released in March 2017.
- After the Single Security Initiative is implemented, disclosures will be available via file download from FannieMae.com or FreddieMac.com. Users can subscribe to notifications when files are ready to be retrieved.
- Timing and Types
  - At issuance files will be provided up to 3 times a day
  - A consolidated monthly issuance file will be provided on the first business day after the issuance month.
  - A correction file for changes to at-issuance data will be provided for each of the two months following the issuance month.
  - Ongoing files will be provided on the fourth business day of the month at 4:30 P.M.
- At-Issuance and Ongoing files will be in the same format consisting of three files:
  - Loan-Level File
  - Security Core File (factors)
  - Supplemental (Stratifications, Quartiles)
- Legacy PC Exchange Activity Files (Daily, Cumulative, Level 1 Aggregate) will also be available.

Actions Market Participants Should Consider

- Review the joint Single Security Initiative disclosure specifications and the related sample and test files
- Update and test internal systems, reports, analytics and similar processes or activities to be compatible with new disclosure files, data, and formats as needed
- Discuss disclosure changes with your disclosure vendor.
7 Exchange Transactions

7.1 Exchange

**Key Changes**

- Freddie Mac will provide holders of the 45-day participation agreements (PC) the option to exchange their PC for a 55-day delay UMBS. The cash flows of the exchanged UMBS will be ultimately backed by the same loans as the original 45-day delay PC.
- All non-ARM, 45-day PCs that are not 100% committed to one or more resecuritizations can be exchanged.
- Freddie Mac will offer an exchange that will be open to holders of legacy 45-day PCs. Freddie Mac will not charge a fee to exchange.
  - Exchange will be initiated at the option of investors and will not be mandatory.
  - Holders of TBA-eligible securities will receive 55-day UMBS or Supers in the exchange, while holders of non-TBA-eligible securities will receive a Freddie Mac 55-day non-TBA-eligible PC.
  - Investors will also receive compensation for the approximate fair value of 10 days’ delay in payment.
  - All investors who exchange portions of the same PC will receive portions of the corresponding 55-day security in return. Each investor can decide to exchange their portion independently of other holders of the same PC.

- Dealers participating in Freddie Mac’s **Giant Dealer Group** will conduct exchanges on behalf of investors. Exchanges will be processed through the Freddie Mac online portal, Freddie Mac Dealer Direct℠.
  - The Dealer will simply upload a file listing the Pool/CUSIP to be exchanged along with the amount of original par they wish to exchange.
  - A Dealer may create a new 55-day Supers with exchanged mirror securities as soon as the exchange transaction is completed. In theory, both transactions could occur on the same business day, however the Dealer should understand the operational risks related to delivering both the 45-day securities and the subsequent 55-day mirrors.

- The Exchange offer will open on or prior to the implementation date for the new UMBS products and will stay open for the foreseeable future.
- If any of the 45-day collateral is not delivered against an exchange transaction on the settlement date, that transaction will automatically be carried over to the next business day with available capacity.
  - The exchange transaction is not DVP.
- Freddie Mac anticipates that capacity on a given day will be up to 50,000 exchange trades (some additional capacity can be made available if necessary).
- More details are available in Freddie Mac’s **Exchange and Float Compensation paper**, published in October 2016.
Actions Market Participants Should Consider

- Identify internal exchange process, accountabilities, and decision criteria.
- Adjust and test systems, queries, reports, and other processes or activities as necessary.
- Prepare for exchange of Freddie Mac Gold PCs for 55-day UMBS either at or prior to UMBS launch.
- Confirm how your exchange transactions will be treated with your own accounting and tax advisors.

Decisions Needed

- The Enterprises have submitted a letter to the IRS asking them to confirm that an exchange transaction is not a taxable event and they are awaiting a response.
- The Enterprises submitted a pre-clearance letter on July 5, 2017 to request treatment of the exchange as a minor modification of debt and the 10 days’ delay compensation payment as a basis adjustment. They are awaiting the SEC’s view of an exchange from an accounting perspective.
- Freddie Mac expects to open the exchange window a short period before Single Security Initiative implementation. Details will be announced soon.
7.2 Mirror Securities

- **Key Changes**
  - Freddie Mac will create mirror 55-day Single Securities and mirror non-TBA-eligible 55-day securities on a one-for-one basis for all exchange eligible 45-day PCs. More details are available in Freddie Mac's [Exchange and Float Compensation paper](#), published in October 2016.
    - Most security characteristics, such as issuance UPB and factor, of the new 55-day securities will mirror their corresponding 45-day PCs.
    - The 55-day security will be backed by the same loans that back the exchanged 45-day security.
    - However, the mirror securities will have new CUSIPs, prefixes, pool numbers, and issuance date. (Note: this means that mirror securities will be issued with a factor of less than 1.)
    - 15-year securities that were backed 100% by 10-year collateral at their time of issuance will be mirrored as 10-year 55-day securities.
    - Mirror securities will appear on the Daily New Issue File on the day they are created.
    - Mirror securities will be issued through the Federal Reserve Bank of New York, but Freddie Mac will hold each mirror security until an exchange of the corresponding 45-day security is executed. Thus, exchange transactions will not increase the aggregate supply outstanding.
    - All investors who exchange portions of the same 45-day PC will receive corresponding portions of the respective 55-day mirror security in return.
    - Exchanges are only permitted from 45-day securities to 55-day securities. There is no mechanism planned to reverse exchanges once they settle.

- A new disclosure, called the Cumulative Exchange Activity, will list all mirror securities, their related 45-day securities, and the amount of Original Par exchanged to date. This disclosure will be updated daily.

- When the exchange opens, the Daily Exchange Activity disclosure will report on all exchange activity settling on a given day. Similarly, the Level-1 Aggregate Exchange Activity disclosure will break down all exchanges to date to their lowest level PC collateral; this will show how much of each Level 1 PC is outstanding as 45- and 55-day securities to facilitate calculations by market participants of supply and prepayments.

### Actions Market Participants Should Consider

- Understand the new exchange disclosure elements and how tradeable supply will be calculated. As exchanges occur, the portion of the 45-day security that has been exchanged will be removed from tradable supply and the corresponding portion of the 55-day security will be added.

7.3 10-Days’ Delay Compensation Payment

- **Key Changes**
  - Freddie Mac will provide approximate fair value compensation to investors for the additional 10 days’ delay in receipt of payments, representing the difference in payment cycle between 45-day and 55-day securities.
  - Freddie Mac will offer a schedule of proposed payment rates that will be informed by fair value, with at least one proposed payment for every term/coupon combination.
    - Freddie Mac may also offer pay-ups for specified security characteristics.
  - Freddie Mac will use an option-adjusted spread (OAS) valuation method, leveraging models from Dealers and analytics providers, to determine the proposed payments by valuing the difference between the 45-day and 55-day securities.
Payments offered to the market could differ from model values. Freddie Mac reserves the right to change values over time.

Payment amounts will be published through the Freddie Mac website and other sources.

**Actions Market Participants Should Consider**

- You may need to create systems to allocate 10 days’ delay compensation payments to different investors or accounts.
- You may want to update your internal systems so that they can automatically load the rate schedule for the 10 days’ delay compensation.
- Consult with your accounting and tax advisors on how the 10 days’ delay payment will be treated.

**Decisions Needed**

- We have asked the IRS how the compensation associated with 10-days’ delay compensation payment will be treated and are awaiting a decision.
8 Exchange Disclosures

Key Changes

- Freddie Mac will produce three new disclosures and a tie out table to inform the market of the progress of the exchanges.
  - **Daily 45-Day to 55-Day Exchange Activity** – Freddie Mac will provide information on all exchange transactions on the preceding business day where a 45-day PC is exchanged for its corresponding 55-day mirror, including original par exchanged and the CUSIPs and security identifiers of the 45-day and 55-day securities.
  - **Cumulative 45-Day to 55-Day Exchange Activity** – Freddie Mac will publish the daily status of all exchange-eligible PCs, regardless of whether any exchange activity has occurred. Freddie Mac will begin to publish this report upon mirror issuance so market participants can map 45-day and 55-day securities and cohorts.
  - **Aggregate Level 1 Collateral Exchange Activity** – Freddie Mac will break down all exchanges to date to their lowest level PC collateral; this will show how much of each Level 1 PC is outstanding as 45- and 55-day securities to facilitate calculations by market participants of supply and prepayments.
  - **Exchange Tie Out Table** – Freddie Mac will provide a daily table with data on the available supply of 45- and 55-day securities on a cohort level to facilitate trading.
  - The exchange disclosure test files can be found here.

Actions Market Participants Should Consider

- Update and test systems and reports to be compatible with Exchange Disclosure data.
9 Trading

9.1 TBA CUSIP

❖ Key Changes

- The TBA CUSIP starting with ‘01F’ will be used for both Freddie Mac- and Fannie Mae-issued UMBS. (Currently, ‘01F’ is used only for Fannie Mae-issued securities.)
- The TBA CUSIP starting with ‘02R’ will continue to be the identifier for trading Freddie Mac 45-day securities.
- **CUSIP Global Services**
  - The definition for the product code “01” and agency code “F” combination will be updated from FNMA to Uniform MBS for the 10-year, 15-year, 20-year and 30-year products on the published TBA Grid found at: [https://www.cusip.com/cusip/tba.htm](https://www.cusip.com/cusip/tba.htm).
- **FICC**
  - FICC will update their description for the TBA CUSIP starting with “01F” from FNMA to Uniform MBS for the 10-year, 15-year, 20-year and 30-year MBSD clearing eligible securities listed on their MBSD website at [http://www.dtcc.com/clearing-services/ficc-mbsd/ficc-mbsd-user-documentation](http://www.dtcc.com/clearing-services/ficc-mbsd/ficc-mbsd-user-documentation).

❖ Actions Market Participants Should Consider

- Update and test systems if 01F identifier is hard coded as a Fannie Mae only identifier.
- Update and test allocation and validation rules for UMBS as needed.

9.2 TBA Trading Screens

❖ Key Changes

- Freddie Mac will begin issuing 55-day securities on the first business day of the month of implementation of the Single Security Initiative. The first TBA settlement will follow on the scheduled Reg A and Reg B dates for that month.
- Three months prior to the first UMBS Reg settlement, the trading screens will begin to transition - continuing to use the Fannie Mae label for the ‘01F’ TBA and transitioning to the new UMBS label per the table below.
- 30 days prior to the first UMBS TBA Reg settlement, the Fannie Mae label for the ‘01F’ TBA will be used for UMBS.
- The Freddie Mac 45-day TBA contracts will continue to be available until activity indicates they are no longer needed. Trading platforms will continue to display screens and pricing for the 45-day ‘02R’ TBA contracts as they see fit.
9.3 Bloomberg

- **Key Changes**
  - All UMBS (regardless of issuer) will leverage Fannie Mae’s existing TBA Bloomberg generics, per the table below.
  - Freddie Mac Legacy will continue to reflect the existing Bloomberg generics.

<table>
<thead>
<tr>
<th>Bloomberg Generics</th>
<th>Payment Delay</th>
<th>Agency</th>
<th>Product</th>
<th>UMBS details</th>
</tr>
</thead>
</table>
| FNCL               | 55            | Fannie Mae & Freddie Mac | 30-yr Fixed Rate Conventional | to include:  
- Fannie Mae past issuance (55-day)  
- Fannie Mae new UMBS issuance (55-day)  
- Freddie Mac new UMBS issuance (55-day)  
- *Freddie Mac 45-day exchanged for 55-day UMBS |
| FNCT               | 55            | Fannie Mae & Freddie Mac | 20-yr Fixed Rate Conventional |  |
| FNCI               | 55            | Fannie Mae & Freddie Mac | 15-yr Fixed Rate Conventional |  |
| FNCN               | 55            | Fannie Mae & Freddie Mac | 10-yr Fixed Rate Conventional |  |
| FGLMC              | 45            | Freddie Mac               | 30-yr Fixed Rate Conventional | Will continue to reflect Freddie Mac legacy Gold product (45-day) that has not been exchanged for UMBS. |
| FGTW               | 45            | Freddie Mac               | 20-yr Fixed Rate Conventional |  |
| FGCI               | 45            | Freddie Mac               | 15-yr Year Fixed Rate Conventional |  |

*The exchanged PCs will continue to be reflected in the original cohort year. For example, a 45-day PC originally issued in 2013, and exchanged in 2019, would still be reflected in the 2013 cohort under FNCL. (That is, it would move from FGLMC 4 2013 to FNCL 4 2013 despite the mirror security having a 2018 issuance date and an actual exchange date of 2019. Generics are based on loan age.)
Bloomberg will assign a new two-character pool level agency code ‘FR’ to Freddie Mac for all 55-day MBS fixed rate pools.

Bloomberg “Generic” support will reflect a UMBS view, including Freddie Mac new issue 55-day, Freddie Mac legacy exchanged, and Fannie Mae 55-day new issue or legacy.

Bloomberg will allow users to execute a pool look-up for a UMBS pool using either ‘FR’ or ‘FN’. Users will not have to know the issuer to do a pool look-up.

- For example, if a user is looking up a UMBS issued by Freddie Mac but enters “FN+pool number”, the ‘FR’ pool will be returned and vice versa.
- Users will need to continue to specify ‘FG’ or ‘FH’ for Freddie Mac 45-day and/or 75-day pools, similar to current practice.
- Users will need to continue to specify ‘FR’ or ‘FN’ for non-TBA 55-day pools.

Actions Market Participants Should Consider

- Understand the new Bloomberg screens, formats and labeling for UMBS.
- Provide internal training, materials, and other processes or activities as needed.
- Determine if hard coding around ticker symbols in system needs to be updated and tested.

Decisions Needed

- Timing of Bloomberg publishing the new screens and formats is TBD.
### 9.4 Trades over Transition Period to UMBS

#### Key Changes

- During the transition period, we anticipate that investors will have different options to close out or roll their open positions depending on the trade type.
- The following table outlines the current assumptions about how TBA trading in FNCL and FGLMC products will be affected by the implementation of the Single Security. In the following trading scenarios, Single Security Implementation takes place in Month 4. *(Please note – the following scenarios are not finalized and can be affected by SIFMA decisions regarding the fungibility of Fannie Mae-issued and Freddie Mac-issued UMBS and Supers for delivery into TBA contracts.)*

<table>

<td>trade, Month 5 settle) **</td>
<td>Freddie Mac PCs</td>
<td></td>
</tr>
</tbody>
</table>

* UMBS TBA contracts may be satisfied by delivery of existing Fannie Mae MBS or new Fannie Mae-issued UMBS, legacy Freddie Mac PCs that have been exchanged for their 55-day mirror securities, new issue 55-day Freddie Mac-issued UMBS, and single-issuer or commingled Supers issued by either Enterprise. These securities trading groupings may be impacted by SIFMA decisions regarding TBA fungibility.

** This trade may not be possible because it is not certain that dealers will continue to make markets in legacy 45-day products after Single Security Implementation.

*** To convert this to a Single Security position, investor would need to close the FGLMC position and open a new position using UMBS TBA, or dealers might offer a roll swap contract whereby investors buy Freddie Mac TBA in the front month and sell UMBS TBA in the back month.
22

Actions Market Participants Should Consider

- Work with vendors to adapt and test your trading systems to accept either Fannie Mae or Freddie Mac collateral as the result of an FNCL trade.

Decisions Needed

- The resolution of fails while the supply of Gold PCs is diminishing during exchange.
- Changes to Reuters instrument codes (RIC) and similar vendor codes that market participants rely are yet to be determined.

9.5 Indices

Key Changes

- How index providers will treat UMBS vs. today’s FRE/FNM securities is TBD.

Decisions Needed

- Treatment of the new UMBS by index providers.
- Index composition by program after UMBS implementation. Currently indices include all TBA-eligible securities without regard to payment delay.
- If indices will provide a view broken out by payment delay.
- Frequency of index updates during the transition to UMBS.

9.6 Investment Limits and Concentration Risks

Key Changes

- U.S. regulation
  - Potential changes could be made to rules and regulations (IRC §817(h) for insurance companies and ’40 Act for mutual funds), but specifics are still TBD.
  - Current §817(h) limits are 55% in any one issuer, 70% in any two issuers, 80% in any three issuers, and 90% in any four issuers.
  - The proposal is TBD.
- Foreign regulation changes are TBD.

Actions Market Participants Should Consider

- Update and test trading logic with new limits/rules, or adapt to how issuer is identified for UMBS and Supers
- Consult with internal compliance, legal, investment boards, and client services to determine impact of the new UMBS and update investment guidelines as needed.
- Investors should consult with their regulators regarding any possible changes or restrictions to investment limits or concentration risk. In addition, investors may want to consult their regulators to confirm any possible changes.
9.7 Electronic Pool Notification (EPN)

- Decisions Needed
  - How the issuer will be identified on 48-hour day via the EPN system.
    - Entities can execute a look-up using the Security CUSIP (FICC would have to make Security CUSIP a mandatory field)
    - FICC may introduce a new agency identifier to EPN

9.8 Tax & Accounting

- Key Changes
  - Tax
    - We anticipate that the exchange of Freddie Mac 45-day PCs for 55-day UMBS will be nontaxable transactions.
    - The tax treatment of 10 days’ delay payment is TBD.

- Decisions Needed
  - The Enterprises have requested guidance on both above matters to the IRS and to the SEC.
10 Legal and Compliance

Key Changes

- New Master Trust Agreements (MTA) and new Offering Circulars will be drafted for Freddie Mac 55-day products. These new documents will largely be based on the current Freddie Mac legal documents governing Freddie Mac 45-day securities, but will be adapted to account for the change in payment delay, commingling (if applicable), and other Single Security features.
- Fannie is expected to have minor changes to their Mega/Supers MTA and Prospectus.
- Freddie Mac will draft an Exchange Offer Circular that will describe the terms of the exchange transaction.
- Freddie Mac Selling and Servicing Guides will be adapted to account for new Single Security features.
- Both Freddie Mac and Fannie Mae legal documents governing single and multi-class resecuritizations will be adapted to account for commingling.
  - Securities purchase agreements with Dealers will also be changed to allow for purchase of securities from both Freddie Mac and Fannie Mae in commingled resecuritizations.

Decisions Needed

- SIFMA update of documents, including the Good Delivery Guidelines and possibly Master Securities Forward Transaction Agreement (MSFTA).
Freddie Mac and Fannie Mae

Single Security Initiative Market Adoption Playbook

Dealer Appendix

Exchange Process of Freddie Mac PCs
Dealer Appendix

This section is intended to give added details around the exchange process of legacy 45-day PC securities to 55-day UMBS securities. Dealers will access Freddie Mac Dealer DirectSM to initiate, modify, and monitor exchange transactions.

Transaction Overview

Dealers will initiate an exchange of their internal holdings or on behalf of an investor. At a minimum, an exchange transaction can be executed across three business days, but settlement can be chosen as far as two months in the future. The exchange process has been designed to mimic today’s Giant creation process. The diagram on the next page displays the process flow of an exchange from initiation to settlement.
**Exchange Trade Booking**

- Dealer Back Office / Custodian Bank
  - Decide to exchange Dealer holdings
  - Enter exchange trade in Dealer Direct
  - Review & accept 10-days' delay payment value
  - Choose settlement date
  - Provide exchange instructions*

**Exchange Trade Settlement**

- Dealer Front Office
  - Deliver 45-day collateral (by 11 AM)
  - Receive 55-day security
  - Receive payment for 10-days' delay
  - Match 55-day security and cash payment
  - With expect files

- Investors
  - Distribute to appropriate IOSCO as needed**
  - Receive cash payment in account

- Federal Reserve
  - Update book entry on 45-day PC
  - Update book entry on 55-day UMIES
  - Process cash wire

- Freddie Mac
  - Generate expect file
  - Auto-match to expect file
  - Deliver 55-day wire instructions
  - Deliver cash wire for 10-days' delay payment value (by 6 PM)

*Process can occur anytime prior to settlement
**If Dealer is exchanging their own holdings, both 55-day security and cash payment will remain in Dealer account
Exchange Trade Booking

How to enter an exchange trade

- To enter an exchange trade, you will login to Freddie Mac Dealer Direct in the same way and use the same ID/Password that you use today to create Giants.
- Freddie Mac will work with all exchange Dealers to ensure appropriate access prior to the opening of the exchange.
After successfully logging into Dealer Direct, you will land on the “My Transactions” page shown below.

Next, you will select “I want to create… An Exchange” under the “Action” drop down menu.
- The template for uploading an exchange transaction will be the same template that you will use to create a Giant via Bulk Upload. Data will be validated upon upload.
- The template has 4 data fields:
  - Pool Number
  - CUSIP
  - Par of the 45-day securities you will be exchanging
  - Comment (optional)

- Once the exchange file is uploaded, you will be presented with a settlement date calendar. The calendar will take exchange capacity and current scheduled trades into account and present available settlement dates for your exchange.
  - Exchange trades cannot settle during the first four business days of the month because current month factors are not yet available.
  - You will be allowed to book an exchange for future settlement as far as two months into the future.
  - Capacity
    - Capacity for each day is managed internally by the Freddie Mac team
    - Freddie Mac anticipates that capacity on a given day will be set at 50,000 exchange trades to start (some additional capacity can be made available if necessary).
    - The exchange settlement calendar will be dynamic. As trades are booked, available capacity decreases. Conversely, if an exchange trade is cancelled the capacity will increase accordingly.
    - There will be no charge or penalty for cancelled exchange trades.
After the settlement date is chosen, you will be directed to the “10 Days’ Delay Payment” page. Here you will see the amount being offered as compensation for the payment delay moving from 45-days to 55-days. The Delay Payment page is currently being updated and will be shared in this document when updates are complete.

The next screen displays the final transaction details for the exchange. If you agree to all the details, you will accept the exchange transaction here.
Exchange Trade Settlement

- The 45-day collateral will be delivered via the Fed wire. This process is unchanged from how collateral is delivered to create a Giant today.
- The 45-day collateral will be auto-matched to the corresponding 55-day security within Freddie Mac systems.
- Upon a successful match, the 55-day security will be immediately wired back to the Dealer or Custodian Bank.
- The transaction is not DVP. Once the 55-day security is delivered, a separate cash wire for the 10 days’ delay compensation is sent via the Fed.
- Dealers or Custodian Banks will be responsible for distributing the 55-day securities and the 10 days’ delay compensation to the appropriate accounts.
- What if a transaction or part of a transaction fails?
  - The 45-day collateral that fails to match will be DK’d back to the submitting Dealer. Therefore, no collateral will be held overnight.
  - Any transaction or portion of a transaction that fails will be automatically rolled over to settle the next day with available capacity, unless it is cancelled.

Modifying an exchange transaction

- The Dealer will be allowed to make any of the following modifications after an exchange has been agreed to:
  - Change the settlement date
  - Upload more collateral
  - Overwrite existing collateral
  - Cancel the exchange
  - Reprice the exchange (if the price grids are updated)
- Modification will only affect the settlement date in the following two scenarios:
  - It is explicitly modified by the Dealer.
  - The Dealer uploads or overwrites collateral that requires them to pick a new date with capacity for exchange.

Reporting will be available for exchange activity via Dealer Direct

- Details of each exchange transaction can be accessed via Dealer Direct.
- Reports displaying the same information from the “My Transactions” page can be run in Dealer Direct. Reports can be filtered by date range or any status (confirmed, locked, settled, failed, and cancelled).
Freddie Mac and Fannie Mae

Single Security Initiative Market Adoption Playbook

Seller / Servicer Appendix
Seller / Servicer Appendix

This appendix provides additional detail around the impact of the Single Security Initiative implementation to Seller / Servicers. One of the Initiative’s goals is to minimize effects on the business practices of Seller / Servicers. Nevertheless, the Initiative entails certain changes to TBA-eligible securities, non-TBA-eligible securities, and the loans that go into those products, as highlighted in the sections below.

The details below pertain only to Freddie Mac product changes. Fannie Mae does not anticipate any product changes in connection with the Single Security Initiative since UMBS will adopt the features of Fannie Mae MBS. Therefore, Seller / Servicer partners will continue to interact with Fannie Mae in the same manner as today.
Timeline

The timeline below shows relevant dates to Seller / Servicers in relation to the first new UMBS issuance in Q2 2019. Details on these items are provided in the following sections.
Effects of the Single Security Initiative Implementation on Freddie Mac Seller / Servicers

Items not changing with Implementation

- Taking out Guarantor and Cash contracts in the Selling System®
- Delivering loans through the Selling System.
- Using Loan Product Advisor and Loan Quality Advisor.
- Receiving their securities in a Guarantor or MultiLender transaction for the loans they sell to Freddie Mac.
- The process of servicing loans that are sold to Freddie Mac will not change as a result of the Single Security Initiative implementation. However, please be aware of the Investor Reporting Change Initiative, details can be found at: [http://www.freddiemac.com/singlefamily/service/investor_reporting_changes.html](http://www.freddiemac.com/singlefamily/service/investor_reporting_changes.html).

Description of New Security Products from the Seller’s Perspective

When the Single Security initiative is implemented in Q2 2019, Freddie Mac will replace its current 45-day securities program with new 55-day UMBS as well as 55-day non-TBA-eligible (Freddie Mac MBS) security products. Freddie Mac will also introduce a new 55-day 10-year TBA-eligible security product. The following sections describe the overall changes, followed by specific changes to the Guarantor/MultiLender execution path and the cash execution path.

Key Changes - Overall

Effective Now

- Freddie Mac has created a new prefix field for the 55-day securities.
  - A new prefix field appeared on screens in the Selling System as of Freddie Mac’s Mirror Contracting Release, which deployed in late August 2017, when Freddie Mac adopted the Single Security disclosure format for its single-family securities, including Participation Certificates (PCs). The new prefix field is now also available for customizable export to Sellers. The new UMBS and 55-day Freddie Mac MBS prefix values will not take effect until the UMBS implementation in 2019.
  - Until the new products are offered, the prefix value reflected in the new field will be the same as the first 2 characters of the existing pool number. For example, a pool number of C04846 for a TBA-eligible security will now be C0 C04846.
- In preparation for the Single Security Initiative implementation, the Loan Age calculation was modified as of August 28, 2017. The modified calculation uses the scheduled first payment date instead of the note date. The change means more loans are eligible for allocation to the 0-2 WALA MultiLender pools.

Effective Before or At Implementation

- Freddie Mac will publish a list of new 55-day security products (and their Selling System Product IDs) closer to the implementation of the UMBS.
- The minimum pooling size of Single Issue Guarantor non-TBA-eligible loans will increase to $1 million effective for settlements on/after the implementation date. Currently Freddie Mac’s 45-day products allow mini-pools with a minimum pooling size of $250,000.
o After implementation, non-TBA-eligible pools below $1,000,000 may only be allowed on a waiver/exception basis.
o MultiLender products will still have a minimum contract amount of $1,000 after implementation of the UMBS.

- Pricing will be displayed to Sellers the same way it is currently in the Selling System. Any changes in pricing of the new products will be reflected in the Selling System and will not affect the way Sellers interact with the system.
- Freddie Mac will add a buy-up/buy-down grid for the 10-year products.
- Freddie Mac will work with affected Sellers ahead of the UMBS implementation to ensure that any required Master Commitment updates are completed. The updates are anticipated to be mostly related to addition of the 10-year mortgage product.

Key Changes – Guarantor/MultiLender Products

Product Changes

- Freddie Mac will add equivalent 55-day Guarantor/MultiLender products for most of the 45-day Guarantor/MultiLender products we have today.
- Specific security products will be added for 30-year, 20-year, and 15-year non-TBA-eligible High LTV loans.
- Freddie Mac will introduce a new 55-day, 10-year TBA-eligible security. Freddie Mac will not introduce a 10-year non-TBA eligible security product.
- 10-year loans with special characteristics, such as high LTV ratios (over 105%) and super-conforming loan amounts, will continue to be pooled into 15-year security products.

Pricing and Contracting Changes

- Today, Sellers receive the price of a 15-year mortgage when they deliver 10-year loans. With the implementation of UMBS, Freddie Mac will offer pricing for 10-year mortgages different from the pricing applied to 15-year mortgages.
- For Guarantor execution, 10-year loans for delivery into TBA-eligible securities will be priced as 10-year loans. However, loans with special characteristics, such as high LTV ratios (over 105%) and super-conforming loans, delivered into non-TBA-eligible securities will receive a 15-year price, as they do today.
- Sellers will receive a new rate sheet, buy-up/buy-down grid, and Credit Fee in Yield for the delivery of 10-year loans.
- Only Sellers with Master Commitments that allow them to take out 15-year Guarantor/MultiLender contracts will need to have these Master Commitments amended to include the new 10-year Guarantor/MultiLender product. Note – the 10-year product will be added to Seller Master Commitments where the current Master Commitments permit 15-year.
Key Changes – Cash Contract Products

Product Changes
- Freddie Mac will introduce a new 10-year cash contract product when the Single Security Initiative is implemented.

Pricing and Contracting Changes
- Today, Sellers receive a 15-year price when they deliver 10-year loans for cash. With the implementation of the Single Security Initiative, Freddie Mac will begin offering a 10-year price for 10-year cash loan delivery.
- For cash executions, all 10-year loans, including loans with special characteristics such as high LTV ratios and super-conforming, will receive 10-year pricing. (Note: For loans with special characteristics and are not eligible for TBA pooling, if Freddie Mac includes them in a cash pool, they will still be pooled into 15-year non-TBA-eligible securities, even if these loans were priced for 10-year loans upon delivery.)
- Sellers will receive a new rate sheet for cash delivery of 10-year loans.
- Only Sellers with Master Commitments that allow them to deliver 15-year loans for specified cash products will need to have these Master Commitments amended to include the new 10-year cash contract products. If a Seller’s current contracting only refers to eligible products in the Freddie Mac Single Family Seller/Servicer Guide (Guide), then an update of the Master Commitment is not required.

Key Changes - Changes to Maturity Terms with the Introduction of 10-year Products

<table>
<thead>
<tr>
<th>Guarantor Products</th>
<th>Current State</th>
<th>Future State (After Single Security Implementation)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum (months)</td>
<td>Maximum (months)</td>
<td>Minimum (months)</td>
</tr>
<tr>
<td>15-year</td>
<td>-</td>
<td>180</td>
</tr>
<tr>
<td>10-year</td>
<td>N/A</td>
<td>180</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>

</tr>
<tr>
<td>10-year</td>
<td>N/A</td>
<td>180</td>
</tr>
</tbody>
</table>

- For new UMBS / Freddie Mac MBS securities (Guarantor and MultiLender transactions):
  - The 10-year UMBS maturity term will be 85 - 120 months (Non-TBA-eligible 10-year securities will not be offered).
  - The 15-year UMBS and 55-day Freddie Mac MBS maturity term will be 85 – 180 months (adding an 85-month minimum, which does not exist today).

- For Freddie Mac cash contract products:
  - The 15-year cash contract product maturity term will be 121-180 months which represents a change to the 15-year cash contract product with the addition of a 121-month minimum maturity to prevent overlap with the new 10-year offering. The 10-year cash contract product maturity term will be 85-120 months.
Actions Market Participants Should Consider

- Evaluate effects of new products, naming conventions, prefixes, and Selling System Security Product IDs for loan delivery, pooling systems, and reporting tools.
- Evaluate the effects of new cash contract products for systems or business areas involved in cash loan delivery.
- Ensure that import specification uses the correct Selling System Security Product IDs for new 55-day products.
- Update and test systems, reporting, etc. to account for the new 10-year products, and the accompanying addition of the 85-month minimum on 15-year products.
- Adjust and test systems and reporting as necessary to accommodate new $1M minimum pooling sizes for non-TBA-eligible Guarantor pools.
- Adjust and test systems, analytics, and processes as needed for new 10-year pricing.
- Adjust and test pooling systems, analytics, and processes as needed to account the change in loan age calculation and which loans can be allocated to 0-2 WALA pools.
- Sellers should expect to work with their existing Freddie Mac relationship managers to update Master Commitments where applicable.
- Schedule internal changes early enough to account for internal policies and funding cycles to ensure readiness for the UMBS implementation in Q2 2019.
- Discuss changes with vendors.
- Determine testing timeline for updates required to systems affected.

Decisions Needed

- Freddie Mac will determine when the Selling System testing environment will be opened to the Seller/Servicers.
Transition from 45-day to 55-day products

Key Changes

The following section refers to fixed-rate security products only. Our 75-day ARM products will continue to be offered as they are today.

<table>
<thead>
<tr>
<th>&gt;45 Days to Implementation</th>
<th>45 – 1 Days to Implementation</th>
<th>Implementation (Q2 2019)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Only 45-day products will be offered. This is the same product offering as today.</td>
<td>Both 45-day and the new 55-day securities (including 10-year) will be offered. The security available for contracting will be determined by the settlement date chosen. Any date after the Implementation date will return a 55-day security. This applies to Guarantor and MultiLender transactions.</td>
<td>Only 55-day securities will be available for contracting. Additionally, the 10-year cash product will be available.</td>
</tr>
</tbody>
</table>

- There are 3 phases of transition to the UMBS for Freddie Mac fixed-rate security products:
  - Until 45 days before the Single Security Initiative implementation date – only 45-day products will be available, the same as today.
  - Inside 45 days of the Single Security implementation date – both 45-day and 55-day products are available. The security product available for any given delivery during this period depends on the settlement date chosen.
    - If the settlement date is prior to Single Security Initiative implementation, the Seller will be able to deliver loans against a 45-day security.
    - If the settlement is after implementation, the Seller will be able to deliver loans against a 55-day security.
  - On or after implementation date – only 55-day securities will be available for contracting.

- During the transition period, Sellers will see two versions of a single Product ID – one for 45-day products (to be selected when the settlement date is prior to Single Security Initiative implementation date) and the other for corresponding 55-day products (to be selected when the settlement date is on/after the Single Security Initiative implementation date).
  - Note: This information applies to Guarantor and MultiLender contracts. Cash contract products remain unchanged until the introduction of the 10-year mortgage at Single Security Initiative implementation.

- Upon implementation of the Single Security Initiative, 10-year cash products will become available and Freddie Mac will modify the maturity terms permitted for the 15-year cash contracts.
- Freddie Mac will publish Guide updates which give added detail around the transition period.

Actions Market Participants Should Consider

- Sellers should ensure that they schedule any outstanding or planned 45-day Guarantor and MultiLender transactions to settle prior to the Single Security Initiative implementation date.
Servicing Buyers

❖ Key Changes
  - For each of the new 10-year cash products, servicing buyers will need to determine the following:
    - Bid or no bid option
    - Pricing for products they choose to bid on

❖ Actions Market Participants Should Consider
  - Servicing buyers will need to decide whether to bid on 10-year Guarantor and cash products and whether to change current bidding options on GRH mortgages.
