

What is UMDP? The Uniform Mortgage Data Program® (UMDP®) is an ongoing multifaceted program, jointly established by Fannie Mae and Freddie Mac (the GSEs) under the direction of the Federal Housing Finance Agency (FHFA) in 2010. Since its inception, UMDP has improved the mortgage industry's adoption of data standards and enhanced the accuracy and the overall quality of loan data for home mortgages.

What UMDP Does for Mortgage Lenders

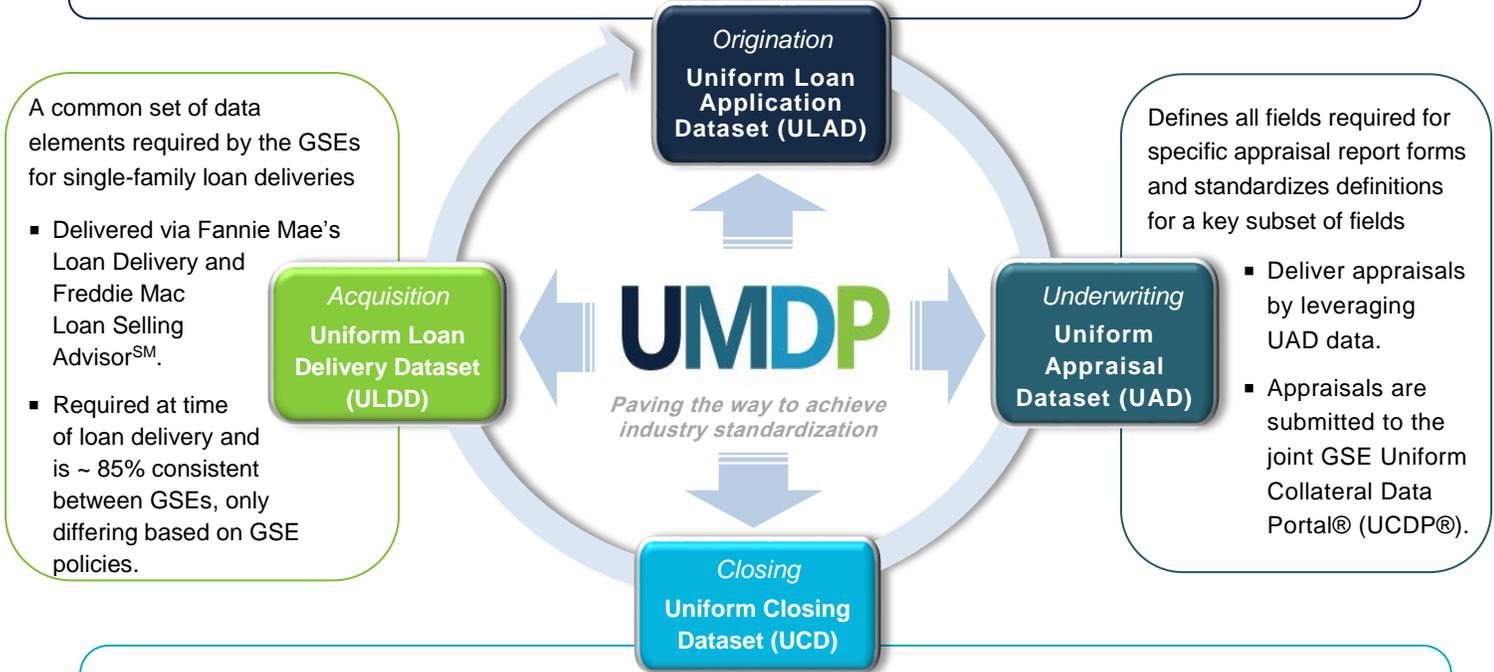

- Creates operational efficiencies.
- Improves quality, consistency, and accuracy of loan, borrower, and property data throughout the mortgage life cycle.
- Reduces ambiguities in data names/definitions through the specific MISMO® standard associated with each dataset, while providing consistency in business terms and loan data.
- Offers more certainty regarding the eligibility of a loan for sale in the secondary market to the GSEs.
- Promotes transparency, better controls, and trustworthy data exchanges between business partners.

Through the UMDP, the GSEs foster data standardization, data exchange efficiencies, and enhanced risk management capabilities for mortgage lenders.
