

## **The Digital eMortgage Transition continues with our new eVault**

August 8, 2017

Earlier this year, we announced a decision to retire our existing eVault and replace it with a new eVault platform. We are pleased to announce that this transition is now complete and we are introducing a new modern and scalable eVault solution that supports a fully digital mortgage experience.

Borrower expectations about the ease and speed of the mortgage experience are changing, resulting in lenders seeking competitive advantages by offering a comprehensive digital mortgage experience. With this launch, our new eVault will make it even easier to securely and efficiently deliver eNotes to Fannie Mae.

This next generation eVault makes it easier for you to do business with us – providing a *seamless, safe, and worry-free* process.

The new eVault enhancements include:

- Up-to-date functionality configuration with MERS®
- Integration and acceptance of the new MISMO SMART Doc™ Version 3.0 format that Fannie Mae will begin accepting in 2018
- Support for a new Bailee process that works with the eVault
- Improved testing mechanisms to support implementations
- Flexibility to support further enhancements as technology continues to evolve

Looking ahead, we are excited to partner with you in providing a paperless experience for your borrowers and are committed to helping you achieve a seamless, fully digital mortgage experience.
