

## September 2017 Data Release

The Home Purchase Sentiment Index® (HPSI) is a composite index designed to track consumers' housing-related attitudes, intentions, and perceptions, using six questions from the National Housing Survey® (NHS).

### The Home Purchase Sentiment Index

The HPSI rose 0.3 points in September to 88.3 – once again matching the all-time survey high.

### Components of the HPSI

The increase in the HPSI can be attributed to the increases in three of the six HPSI components. The increases were in “Good Time to Buy” (+10), “Good Time to Sell” (+2), and “Confidence About Not Losing Job” (+1).

	September 2017*	Change Since Last Month	Change Since Last Year
<b>September 2017 HPSI</b>	<b>88.3</b>	<b>+0.3</b>	<b>+5.5</b>
Good Time To <b>Buy</b>	28	+10	-1
Good Time To <b>Sell</b>	38	+2	+23
<b>Home Prices</b> Will Go Up (next 12 months)	40	-8	+6
<b>Mortgage Rates</b> Will Go Down (next 12 months)	-47	-2	-3
Confidence About Not Losing <b>Job</b> (next 12 months)	75	+1	+5
Household <b>Income</b> Is Significantly Higher (past 12 months)	15	-1	+3

\* Net percentages of the component questions used to calculate HPSI, e.g. (Percent Good Time to Buy – Percent Bad Time to Buy) = 28

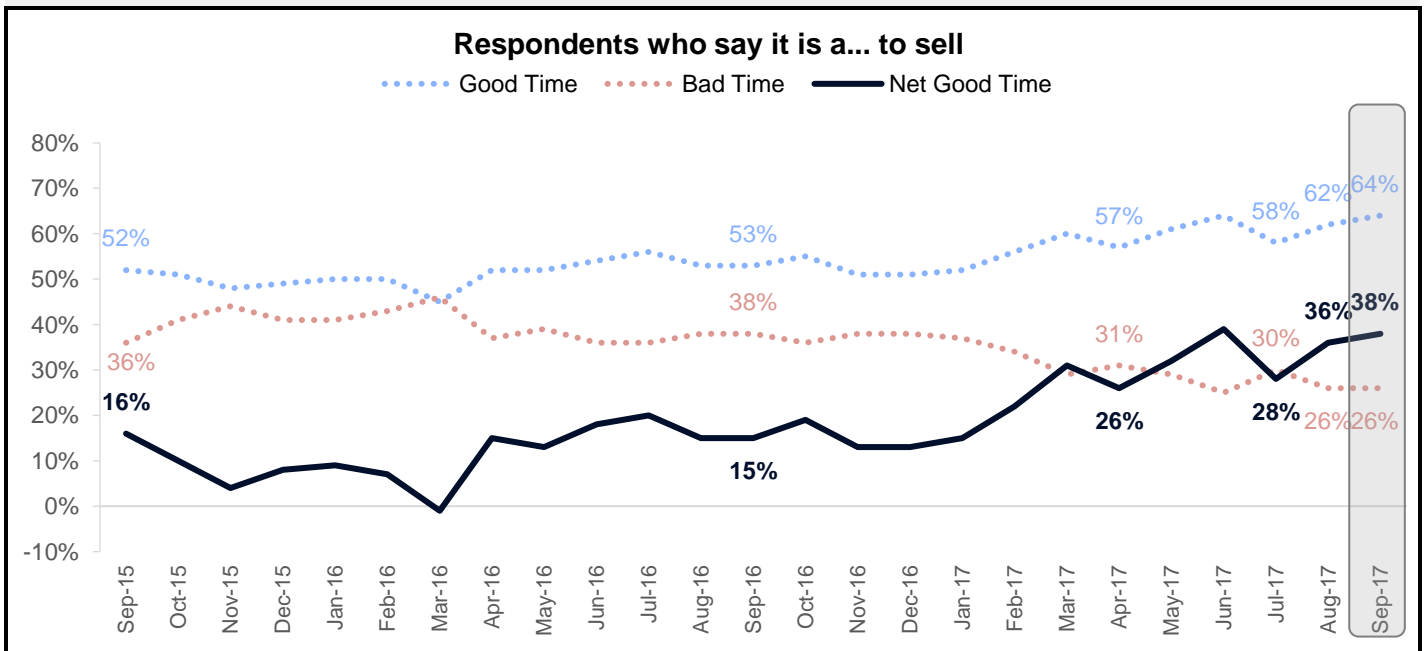

## Components of the HPSI – Good/Bad Time to Buy and Sell a Home

The net share of Americans who say it is a good time to buy a home rose 10 percentage points to 28%, reversing the decreasing trend of the last two months.

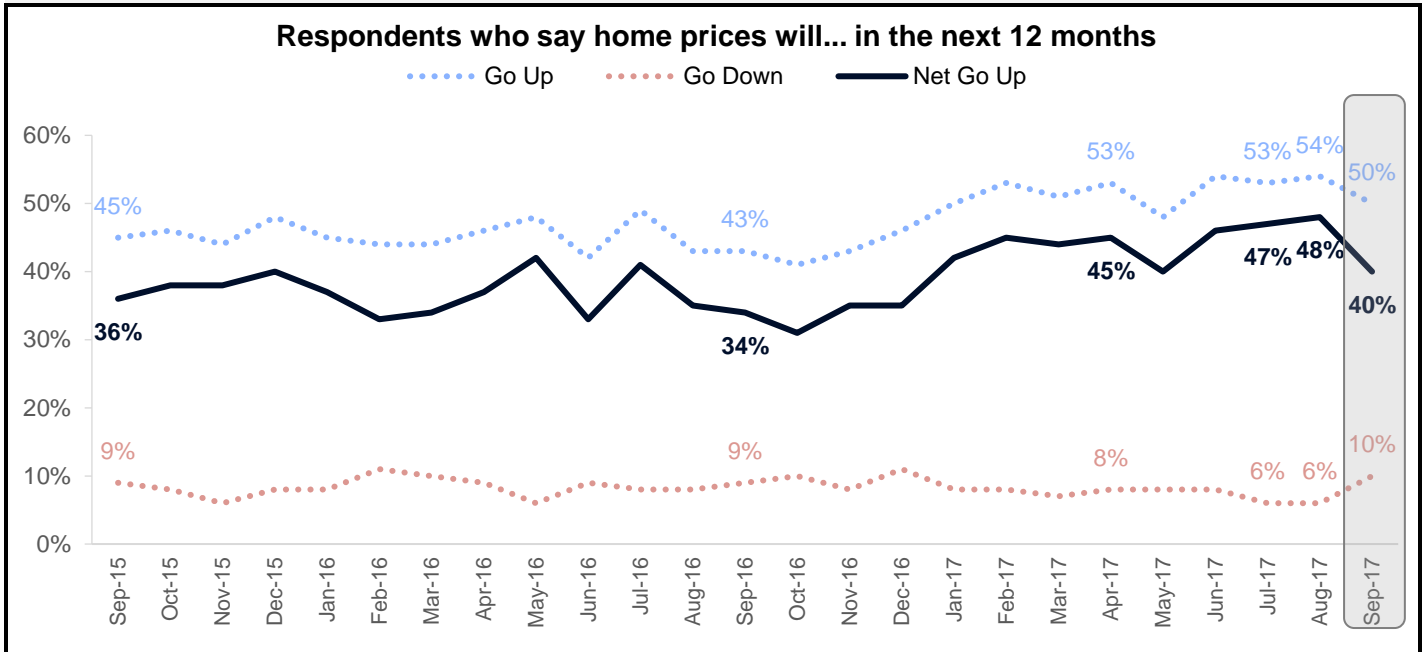

In September, the net percentage of those who say it is a good time to sell increased by 2 percentage points to 38%, 1 percentage point away from the survey high of 39%.

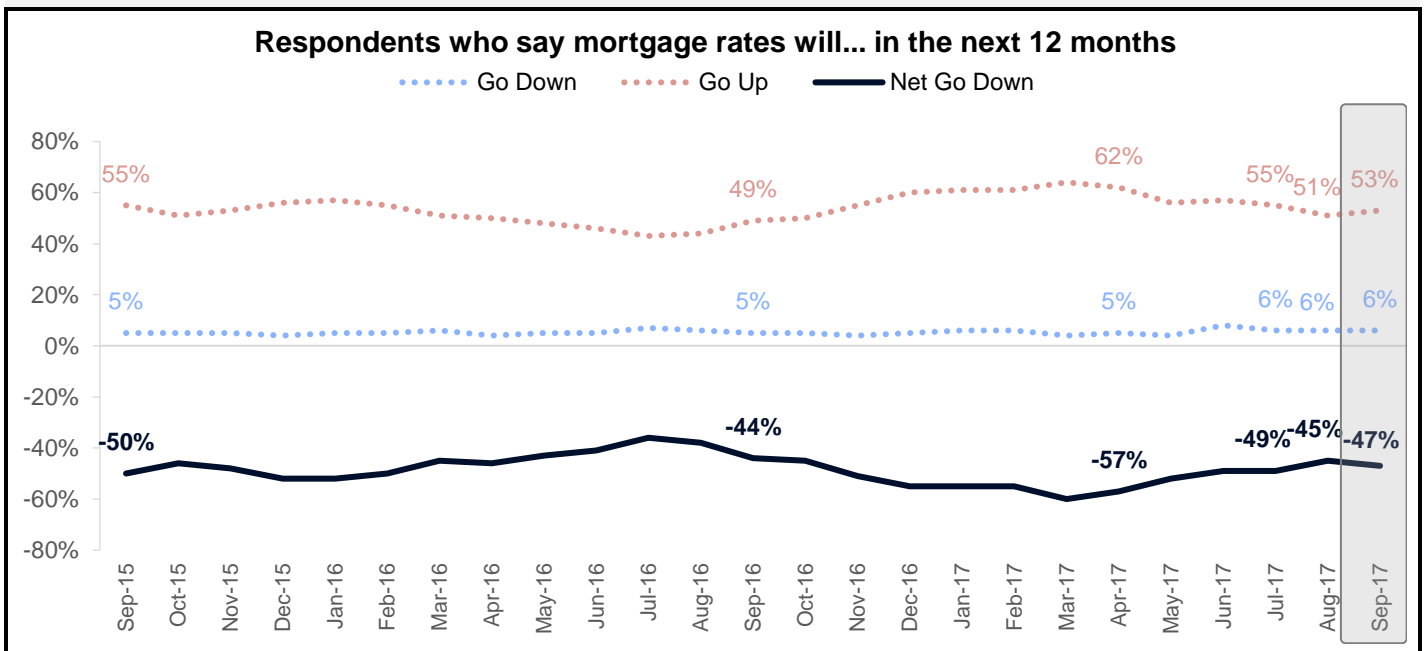

## Components of the HPSI – Home Price and Mortgage Rate Expectations

The net share of Americans who say that home prices will go up decreased by 8 percentage points in September to 40%, breaking from the upward trend earlier this quarter.

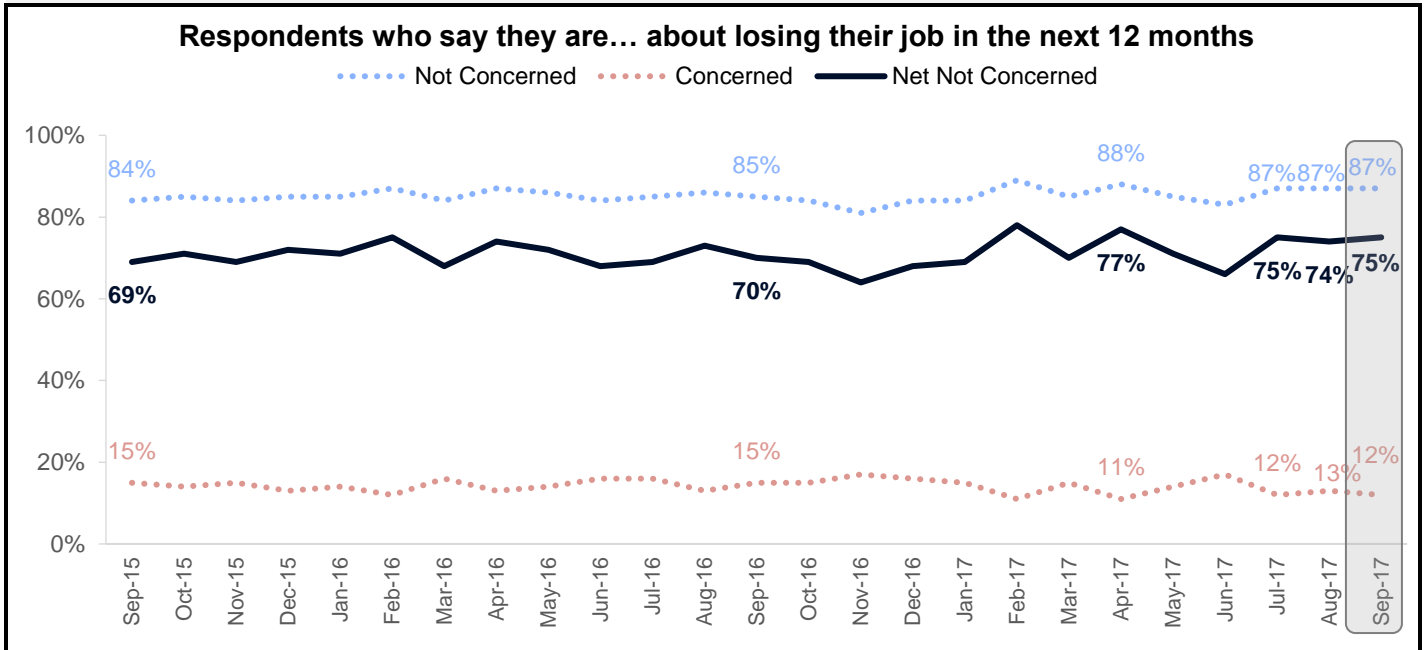

The net share of those who say mortgage rates will go down over the next twelve months fell 2 percentage points to -47%.

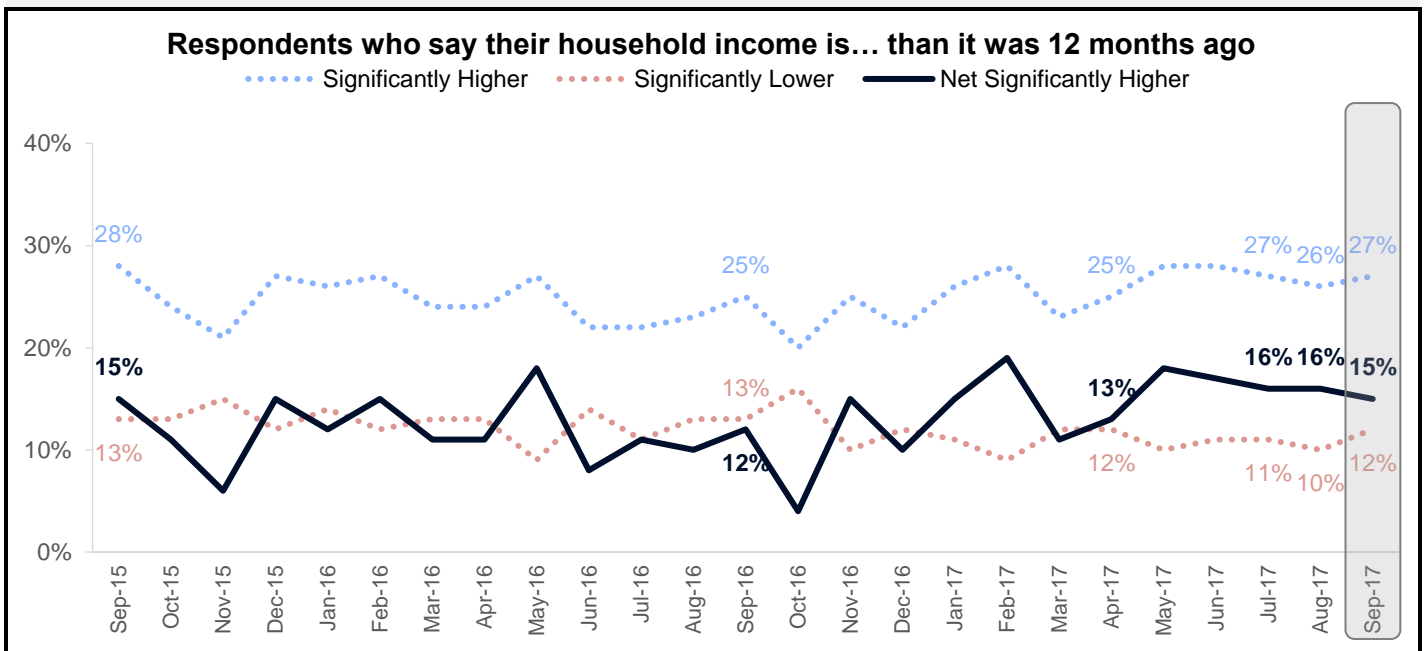

## Components of the HPSI – Job Concerns and Household Incomes

The net share of Americans who say they are not concerned about losing their job rose by 1 percentage point to 75%.

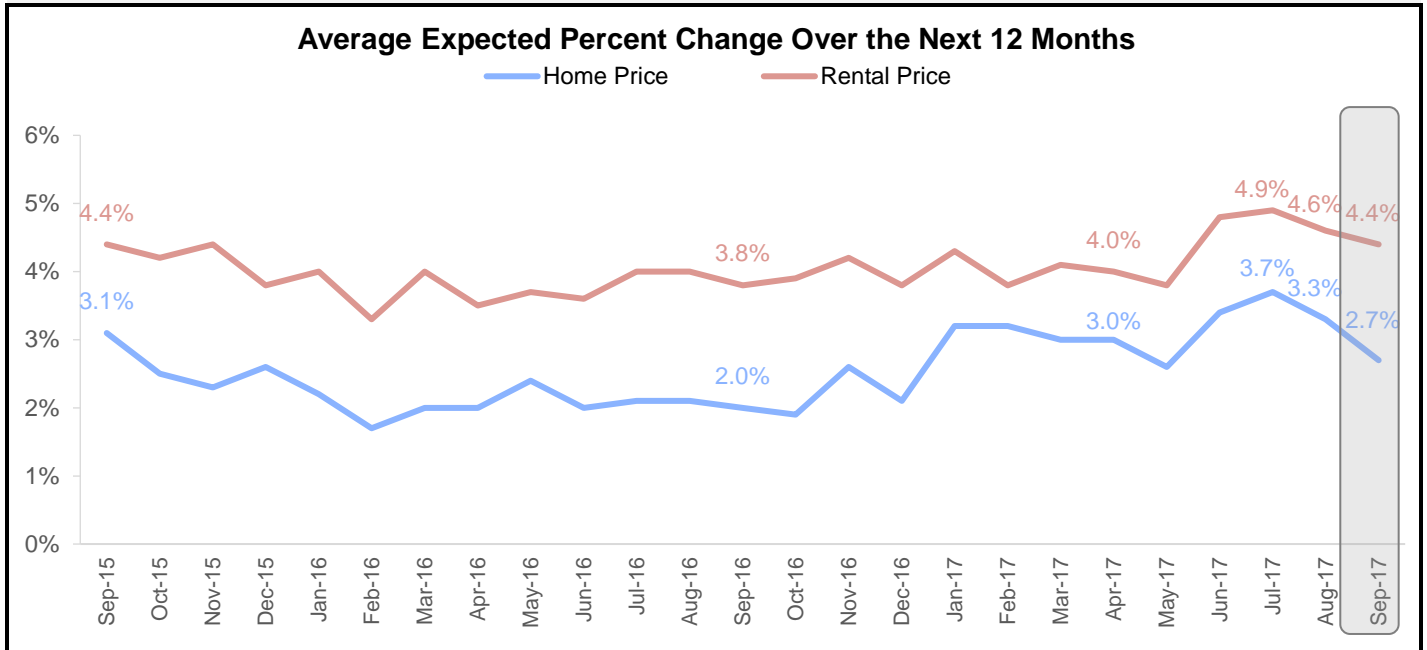

The net share of Americans who say their household income is significantly higher than it was 12 months ago fell 1 percentage point from August to 15%.

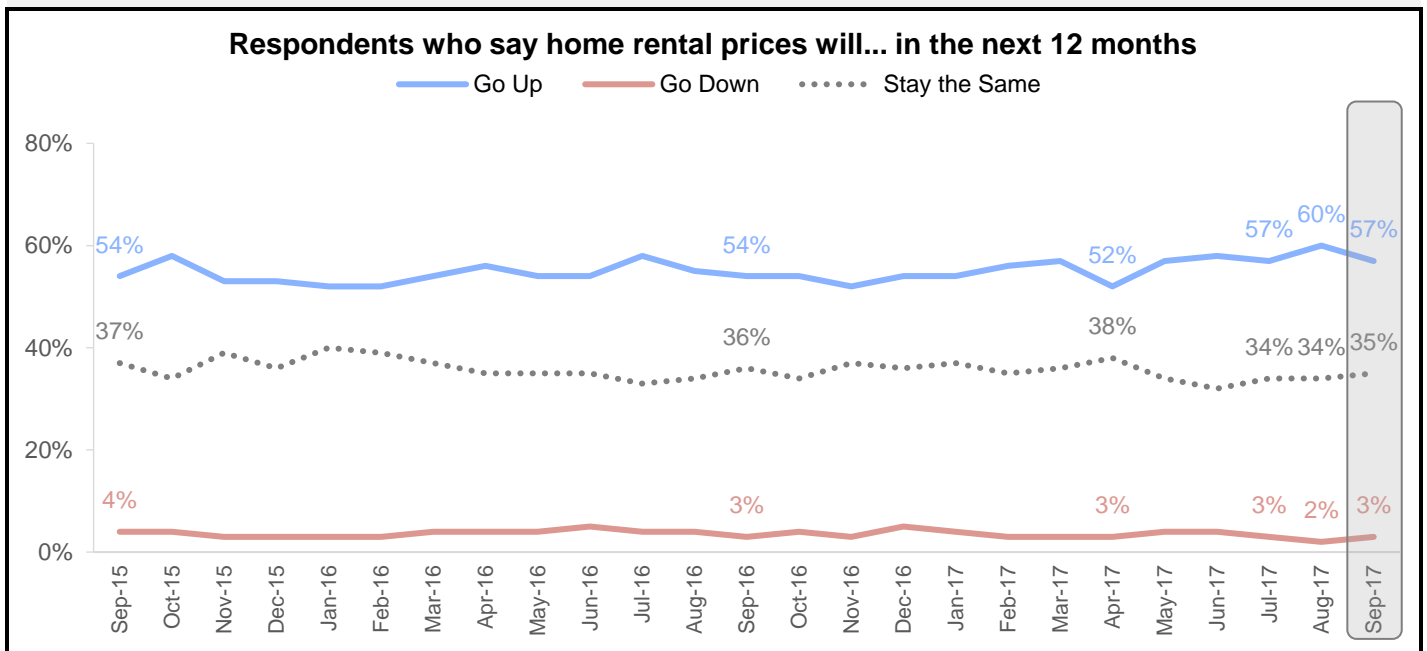

## Additional National Housing Survey Key Indicators

On average, Americans expect rental prices to rise 4.4% over the next 12 months, a decrease of 0.2 percentage points since last month. They expect home prices to rise 2.7% over the next 12 months, a 0.6 percentage point decrease since last month.

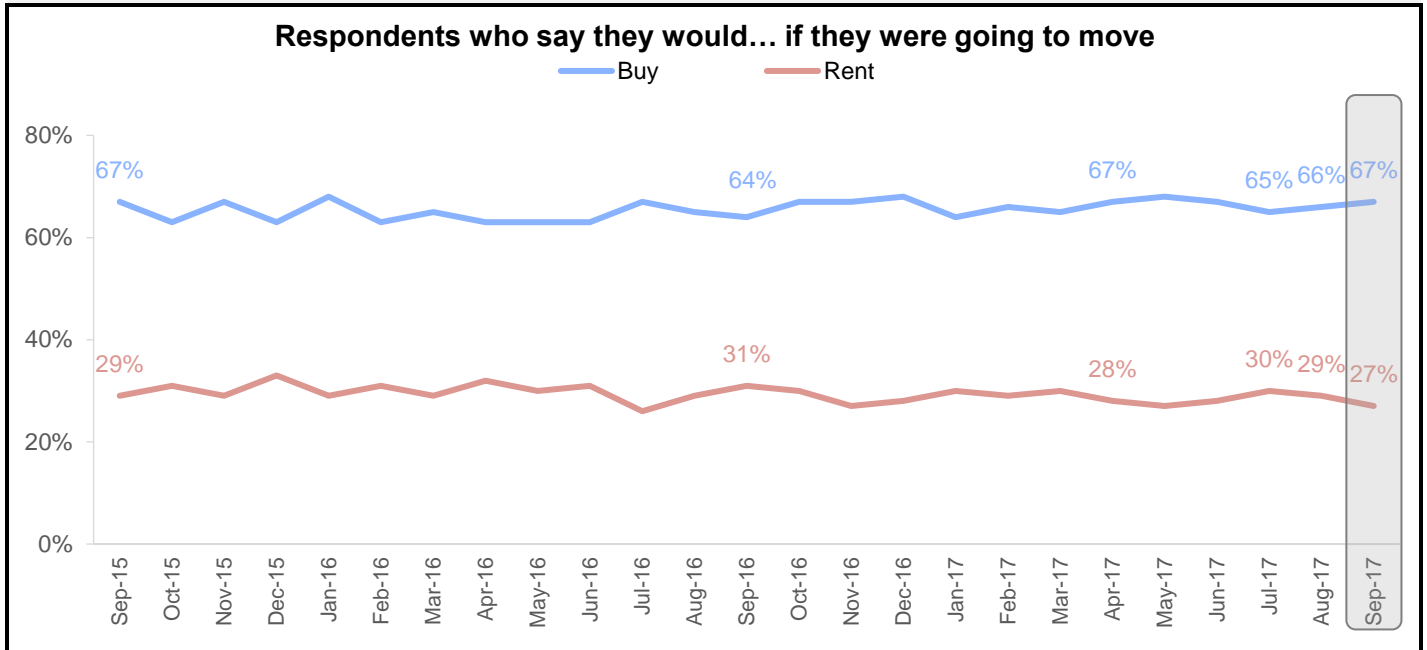

The percentage of Americans who expect home rental prices to go up fell 3 percentage points from last month's survey high to 57%, while the share of Americans who expect home rental prices to go down rose by 1 percentage point to 3%.

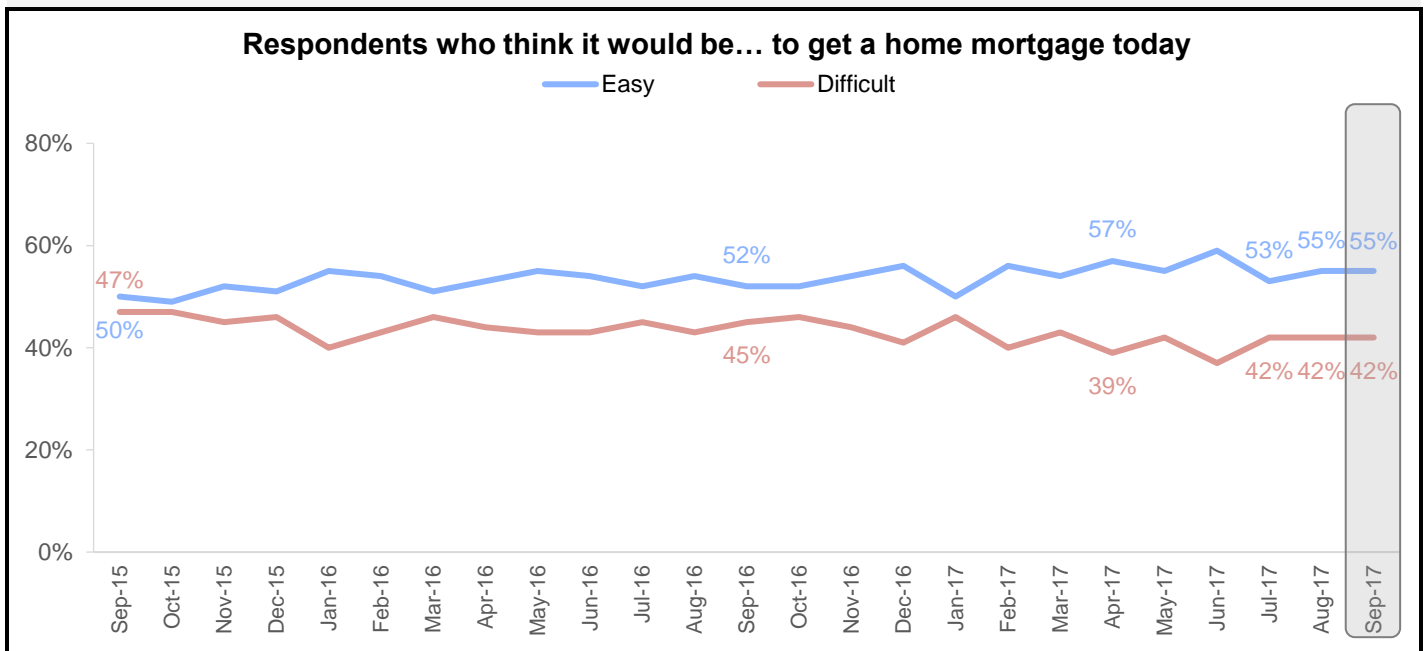

## Additional National Housing Survey Key Indicators

The share of Americans who say they would buy if they were going to move rose by 1 percentage point to 67%, while the share who say they would rent fell by 2 percentage points to 27%.

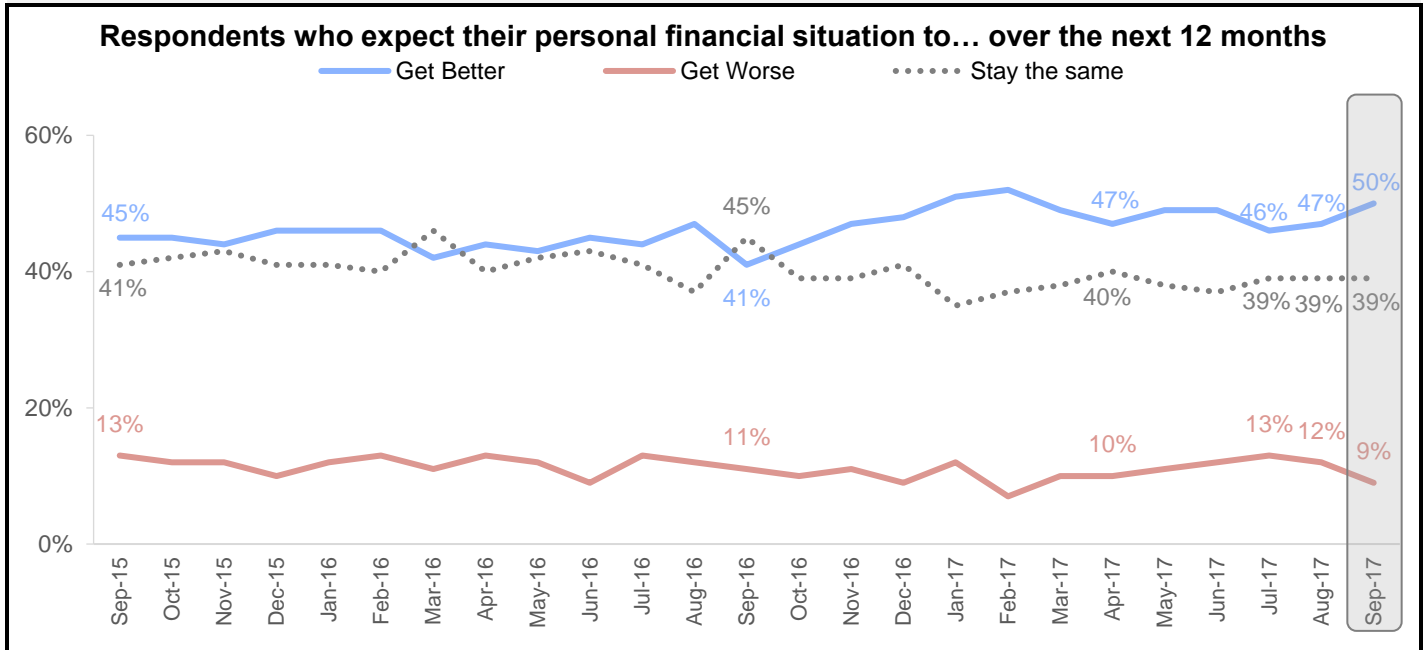

The share of Americans who say getting a mortgage would be easy remained at 55%, while the share who say it would be difficult also remained unchanged from August at 42%.

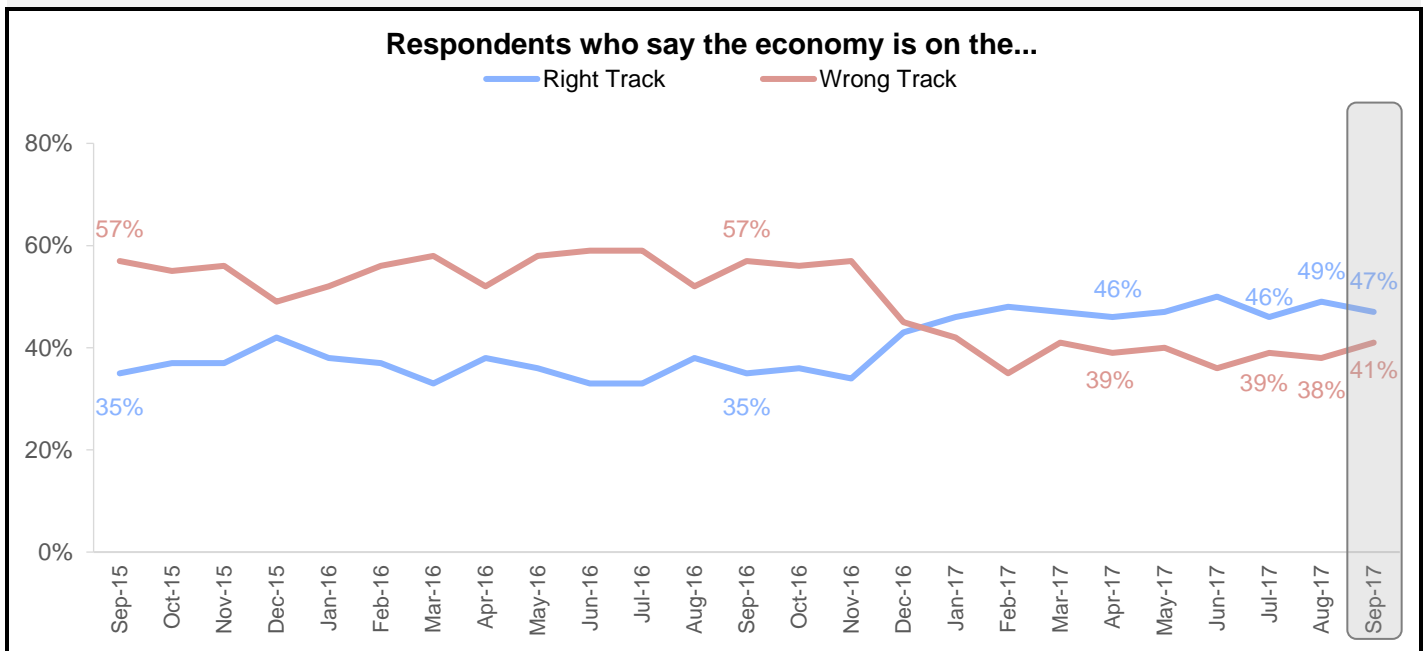

## Additional National Housing Survey Key Indicators

The share of Americans who expect their personal financial situation to get better rose by 3 percentage points to 50%, and the share who expect it to stay the same remained unchanged at 39%. The share who expect it to get worse over the next 12 months decreased 3 percentage points to 9%.

The share of Americans who say the economy is on the right track fell by 2 percentage points to 47% and the share who say it is on the wrong track increased by 3 percentage points to 41%, reversing last month's changes and narrowing the gap between right track and wrong track.

# The National Housing Survey®

September 2017

## APPENDIX

### About the Survey

The National Housing Survey® polled a nationally representative sample of 1,004 household financial decision makers (margin of error ±3.1%) aged 18 and older between September 1, 2017 and September 25, 2017. Most of the data collection occurred during the first two weeks of this period.

Interviews were conducted by PSB, in coordination with Fannie Mae.

The statistics in this release were estimated from sample surveys and are subject to sampling variability as well as nonsampling error, including bias and variance from response, nonreporting, and undercoverage. Averages of expected price changes were calculated after converting responses of “stay the same” to 0% and after excluding outliers, which were defined to be responses that were more than two standard deviations from the means.

How the Home Purchase Sentiment Index (HPSI) is Calculated*	
Net Good Time to <b>Buy</b> <i>Very or Somewhat Good Time To Buy – Very or Somewhat Bad Time To Buy</i>	Q12
Net Good Time to <b>Sell</b> <i>Very or Somewhat Good Time To Sell – Very or Somewhat Bad Time To Sell</i>	Q13
Net <b>Home Prices</b> Will Go Up (next 12 months) <i>Home Prices Will Go Up – Home Prices Will Go Down</i>	Q15
Net <b>Mortgage Rates</b> Will Go Down (next 12 months) <i>Mortgage Rates Will Go Down – Mortgage Rates Will Go Up</i>	Q20B
Net Confident About Not Losing <b>Job</b> (next 12 months) <i>Not at All or Not Very Concerned about Losing Job – Very or Somewhat Concerned about Losing Job</i>	Q112B
Net Household <b>Income</b> is Significantly Higher (past 12 months) <i>Income is Significantly Higher – Income is Significantly Lower</i>	Q116
$HPSI = \frac{Q12 + Q13 + Q15 + Q20B + Q112B + Q116}{6} + 63.5$	
* The HPSI calculation includes the addition of a constant of 63.5 in order to set the index's initial value at 60 as of March 2011, in range with the <b>Index of Consumer Sentiment</b> and the <b>Consumer Confidence Index</b>
