

Fannie Mae Quarterly Financial Supplement

Q3 2018

November 2, 2018

- Some of the terms and other information in this presentation are defined and discussed more fully in Fannie Mae’s Form 10-Q for the quarter ended September 30, 2018 (“Q3 2018 10-Q”) and Form 10-K for the year ended December 31, 2017 (“2017 Form 10-K”). This presentation should be reviewed together with the Q3 2018 10-Q and the 2017 Form 10-K, which are available at www.fanniemae.com in the “About Us—Investor Relations—SEC Filings” section. Information on or available through the company’s website is not part of this supplement.
- Some of the information in this presentation is based upon information from third-party sources such as sellers and servicers of mortgage loans. Although we generally consider this information reliable, we do not independently verify all reported information.
- Due to rounding, amounts reported in this presentation may not add to totals indicated (or 100%).
- Unless otherwise indicated, data labeled as "YTD 2018" is as of September 30, 2018 or for the first nine months of 2018. Data for prior years is as of December 31 or for the full year indicated.
- Note references are to endnotes, appearing on pages 22 to 24.
- Terms used in presentation
 - CAS: Connecticut Avenue Securities®
 - CIRT™: Credit Insurance Risk Transfer™
 - CRT: credit risk transfer
 - DTI ratio: Debt-to-income ratio
 - DUS®: Fannie Mae’s Delegated Underwriting and Servicing program
 - GDP: U.S. gross domestic product
 - HARP®: Home Affordable Refinance Program, which allows eligible Fannie Mae borrowers with high LTV ratio loans to refinance into more sustainable loans
 - LTV ratio: loan-to-value ratio
 - MSA: metropolitan statistical area
 - MTMLTV ratio: mark-to-market loan-to-value ratio
 - OLTV ratio: origination loan-to-value ratio
 - Refi Plus™: our Refi Plus initiative, which offers refinancing flexibility to eligible Fannie Mae borrowers
 - REO: real estate owned
 - TCCA: Temporary Payroll Tax Cut Continuation Act of 2011
 - UPB: unpaid principal balance

Other comprehensive income (loss)	(36)	2	(38)
Total comprehensive income	\$3,975	\$4,459	(\$484)

Sources of Net Interest Income and Retained Mortgage Portfolio Balance

Key Highlights

- Fannie Mae reported net income of \$4.0 billion for Q3 2018 reflecting the strength of the company's business fundamentals. Fannie Mae's pre-tax income was \$5.1 billion for Q3 2018.
- The decrease in net income in Q3 2018 was driven primarily by a decrease in credit-related income due primarily to a reduction in the benefit from the redesignation of loans from held-for-investment to held-for-sale and a smaller improvement in home prices compared with Q2 2018. The decrease was partially offset by higher fair value gains in Q3 2018 compared with Q2 2018.

Market Liquidity

Key Highlights: Liquidity Provided

Fannie Mae provided \$389 billion in liquidity to the mortgage market in the first nine months of 2018, through its purchases of loans and guarantees of loans and securities, which enabled the financing of:

910K
Home Purchases

571K
Refinancings

Q3 2018 Market Share: New Single-Family Mortgage-Related Securities Issuances

Key Highlights

- Single-Family net income was \$3.5 billion in Q3 2018, compared with \$4.0 billion in Q2 2018. The decrease in net income in Q3 2018 was driven primarily by a decrease in credit-related income due to a reduction in the benefit from the redesignation of loans from held-for-investment to held-for-sale and a smaller improvement in home prices compared with Q2 2018.
- The decrease was partially offset by higher fair value gains due to an increase in rates in Q3 2018 compared with Q2 2018.
- The single-family guaranty book of business continued to grow in Q3 2018, while the average charged guaranty fee (net of TCCA fees) on the single-family guaranty book was relatively consistent with the prior quarter at 43 basis points.

Guaranty Book of Business⁽¹⁾

Multifamily Guaranty Fee and Credit Loss (Benefit) Ratio⁽²⁾

Key Highlights

- Multifamily net income was \$549 million in Q3 2018, compared with \$504 million in Q2 2018. The increase in net income was driven primarily by an increase in guaranty fee revenue as the multifamily guaranty book grew during the quarter.
- Fannie Mae continued to share credit risk with lenders on nearly 100% of the company's new business through its Delegated Underwriting and Servicing (DUS[®]) program. To complement this program, in August the company completed its third multifamily CIRT[™] transaction, which covered loans with a UPB of \$11.1 billion.
- The multifamily guaranty book of business continued to grow in Q3 2018, while the average charged guaranty fee on the multifamily guaranty book decreased slightly from June 30, 2018 to 77 basis points as of September 30, 2018.

Endnotes

Financial Overview Endnotes

- (1) Guaranty fee income includes the impact of a 10 basis point guaranty fee increase implemented in 2012 pursuant to the Temporary Payroll Tax Cut Continuation Act of 2011, the incremental revenue from which is remitted to Treasury and not retained by the company.
- (2) Home price estimates are based on purchase transactions in Fannie-Freddie acquisition and public deed data available through the end of September 2018. Including subsequent data may lead to materially different results. Home price change is not seasonally adjusted. UPB estimates are based on data available through the end of September 2018, and the top 10 states are reported by UPB in descending order.
- (3) Source: Bureau of Economic Analysis. GDP growth rate is calculated using the quarterly annualized growth rate for the most recent period and the annual growth rate for prior periods.
- (4) Under the terms of the senior preferred stock purchase agreement, dividend payments we make to Treasury do not offset our prior draws of funds from Treasury, and we are not permitted to pay down draws we have made under the agreement except in limited circumstances.
- (5) Treasury draws are shown in the period for which requested, not when the funds were received by us. Draw requests have been funded in the quarter following a net worth deficit.

Single-Family Business Endnotes

- (1) Single-family conventional loan population consists of: (a) single-family conventional mortgage loans of Fannie Mae; (b) single-family conventional mortgage loans underlying Fannie Mae MBS; and (c) other credit enhancements that we provide on single-family mortgage assets, such as long-term standby commitments. It excludes non-Fannie Mae single-family mortgage-related securities held in our retained mortgage portfolio for which we do not provide a guaranty. Conventional refers to mortgage loans and mortgage-related securities that are not guaranteed or insured, in whole or in part, by the U.S. government or one of its agencies.
- (2) Calculated based on the average guaranty fee rate for our single-family guaranty arrangements during the period plus the recognition of any upfront cash payments over an estimated average life. Excludes the impact of a 10 basis point guaranty fee increase implemented in 2012 pursuant to the TCCA, the incremental revenue from which is remitted to Treasury and not retained by us.
- (3) FICO credit score is as of loan origination, as reported by the seller of the mortgage loan.
- (4) Population excludes HARP and other Refi Plus loans acquired under our Refi Plus™ initiative.
- (5) Calculated based on the aggregate unpaid principal balance of single-family loans for each category divided by the aggregate unpaid principal balance of loans in our single-family conventional guaranty book of business. Loans with multiple product features are included in all applicable categories.
- (6) For a description of our Alt-A loan classification criteria, refer to Fannie Mae's 2017 Form 10-K. We discontinued the purchase of newly originated Alt-A loans in 2009, except for those that represent the refinancing of a loan we acquired prior to 2009, which has resulted in our acquisitions of Alt-A mortgage loans remaining low and the percentage of the book of business attributable to Alt-A to continue to decrease over time.
- (7) "Serious delinquency rate" refers to single-family conventional loans that are 90 days or more past due or in the foreclosure process in the applicable origination year, product feature, or state, divided by the number of loans in our single-family conventional guaranty book of business in that origination year, product feature, or state.
- (8) The average estimated mark-to-market LTV ratio is based on the unpaid principal balance of the loan divided by the estimated current value of the property, which we calculate using an internal valuation model that estimates periodic changes in home value. Excludes loans for which this information is not readily available.
- (9) Percentage of loans in our single-family conventional guaranty book of business, measured by unpaid principal balance, included in an agreement used to reduce credit risk by requiring collateral, letters of credit, mortgage insurance, corporate guarantees, inclusion in a credit risk transfer transaction reference pool, or other agreement that provides for our compensation to some degree in the event of a financial loss relating to the loan. Because we include loans in reference pools for our Connecticut Avenue Securities and Credit Insurance Risk Transfer credit risk transfer transactions on a lagged basis (typically about six months to one year after we initially acquire the loans), we expect the percentage of our 2017 and 2018 single-family loan acquisitions with credit enhancement will increase in the future.
- (10) The aggregate estimated mark-to-market LTV ratio is based on the unpaid principal balance of the loan as of the end of each period divided by the estimated value of the property as of the end of the period.
- (11) Refers to loans included in an agreement used to reduce credit risk by requiring primary mortgage insurance, collateral, letters of credit, corporate guarantees, or other agreements to provide an entity with some assurance that it will be compensated to some degree in the event of a financial loss. Excludes loans covered by credit risk transfer transactions unless such loans are also covered by primary mortgage insurance.
- (12) Outstanding unpaid principal balance represents the underlying loan balance, which is different from the reference pool balance for CAS and some lender risk-sharing transactions.
- (13) Includes mortgage pool insurance transactions covering loans with an unpaid principal balance of approximately \$3 billion at issuance and approximately \$5 billion outstanding as of September 30, 2018.
- (14) Measured from the borrowers' last paid installment on their mortgages to when the related properties were added to our REO inventory for foreclosures completed during the first nine months of 2018. Home Equity Conversion Mortgages insured by the Department of Housing and Urban Development are excluded from this calculation.
- (15) Consists of (a) short sales, in which the borrower, working with the servicer and Fannie Mae, sells the home prior to foreclosure for less than the amount owed to pay off the loan, accrued interest and other expenses from the sale proceeds and (b) deeds-in-lieu of foreclosure, which involve the borrower's voluntarily signing over title to the property.
- (16) Consists of (a) modifications, which do not include trial modifications, loans to certain borrowers who have received bankruptcy relief that are accounted for as troubled debt restructurings, or repayment plans or forbearances that have been initiated but not completed; (b) repayment plans, reflects only those plans associated with loans that were 60 days or more delinquent; and (c) forbearances, not including forbearances associated with loans that were less than 90 days delinquent when entered.
- (17) Based on the unpaid principal balance (UPB) of the single-family conventional guaranty book of business as of period end.
- (18) Credit losses consist of (a) charge-offs net of recoveries and (b) foreclosed property expense (income). Percentages exclude the impact of recoveries that have not been allocated to specific loans.
- (19) Defaults include loan foreclosures, short sales, sales to third parties at the time of foreclosure and deeds-in-lieu of foreclosure. Cumulative Default Rate is the total number of single-family conventional loans in the guaranty book of business originated in the identified year that have defaulted, divided by the total number of single-family conventional loans in the guaranty book of business originated in the identified year. Data as of September 30, 2018 is not necessarily indicative of the ultimate performance of the loans and performance is likely to change, perhaps materially, in future periods.

Multifamily Business Endnotes

- (1) Our multifamily guaranty book of business consists of: (a) multifamily mortgage loans of Fannie Mae; (b) multifamily mortgage loans underlying Fannie Mae MBS; and (c) other credit enhancements that we provide on multifamily mortgage assets. It excludes non-Fannie Mae multifamily mortgage-related securities held in our retained mortgage portfolio for which we do not provide a guaranty.
- (2) Credit loss (benefit) ratio represents the credit loss or benefit for the period divided by the average unpaid principal balance of the multifamily guaranty book of business for the period. Credit benefits are the result of recoveries on previously charged-off amounts.
- (3) Represents the percentage of loans with lender risk-sharing agreements in place, measured by unpaid principal balance.
- (4) Under the Delegated Underwriting and Servicing (DUS) program, Fannie Mae acquires individual, newly originated mortgages from specially approved DUS lenders using DUS underwriting standards and/or DUS loan documents. Because DUS lenders generally share the risk of loss with Fannie Mae, they are able to originate, underwrite, close and service most loans without our pre-review.
- (5) See <https://www.fanniemae.com/multifamily/products> for definitions. Loans with multiple product features are included in all applicable categories.
- (6) The Multifamily Affordable Business Channel focuses on financing properties that are under an agreement that provides long-term affordability, such as properties with rent subsidies or income restrictions.
- (7) Multifamily loans with an original unpaid balance of up to \$3 million nationwide or up to \$5 million in high cost markets.
- (8) Multifamily loans are classified as seriously delinquent when payment is 60 days or more past due.
- (9) Cumulative credit loss rate is the cumulative credit losses (gains) through September 30, 2018 on the multifamily loans that were acquired in the applicable period, as a percentage of the total acquired unpaid principal balance of multifamily loans in the applicable period.
- (10) Credit loss (benefit) ratio is annualized for the most recent period.
