Some of the terms and other information in this presentation are defined and discussed more fully in our Form 10-Q for the quarter ended March 31, 2020 ("Q1 2020 Form 10-Q") and Form 10-K for year ended December 31, 2019 ("2019 Form 10-K"). This presentation should be reviewed together with the Q1 2020 Form 10-Q, and the 2019 Form 10-K, which are available at www.fanniemae.com in the “About Us—Investor Relations—SEC Filings” section. Information on or available through our website is not part of this supplement.

Some of the information in this presentation is based upon information from third-party sources such as sellers and servicers of mortgage loans. Although we generally consider this information reliable, we do not independently verify all reported information.

Due to rounding, amounts reported in this presentation may not sum to totals indicated (ie. 100%), or amounts shown as 100% may not reflect the entire population.

Unless otherwise indicated "YTD 2020" data is as of is as of March 31, 2020 or for the first three months of 2020. Data for prior years is as of December 31 or for the full year indicated.

Note references are to endnotes, appearing on pages 23 to 27.

Impacts of COVID-19 outbreak are not reflected in most of the data reported in this supplement, because the data is as of or for the period ended March 31, 2020. Fannie Mae expects the COVID-19 outbreak will impact future periods.

Terms used in presentation

CAS: Connecticut Avenue Securities®
CIRT™: Credit Insurance Risk Transfer™
CRT: credit risk transfer
DTI ratio: Debt-to-income ("DTI") ratio refers to the ratio of a borrower’s outstanding debt obligations (including both mortgage debt and certain other long-term and significant short-term debts) to that borrower’s reported or calculated monthly income, to the extent the income is used to qualify for the mortgage
DUS®: Fannie Mae’s Delegated Underwriting and Servicing program
HARP®: Home Affordable Refinance Program®, registered trademarks of the Federal Housing Finance Agency, which allowed eligible Fannie Mae borrowers with high LTV ratio loans to refinance into more sustainable loans
LTV ratio: loan-to-value ratio
MSA: metropolitan statistical area
MTMLTV ratio: mark-to-market loan-to-value ratio, which refers to the current unpaid principal balance of a loan at period end, divided by the estimated current home price at period end
OLTV ratio: origination loan-to-value ratio, which refers to the unpaid principal balance of a loan at the time of origination of the loan, divided by the home price at origination of the loan
Refi Plus™: our Refi Plus initiative, which offered refinancing flexibility to eligible Fannie Mae borrowers
REO: real estate owned
TCCA: Temporary Payroll Tax Cut Continuation Act of 2011
UPB: unpaid principal balance

Overview
Our Mission, Our Response

Fannie Mae took quick action to ensure our people, our customers, the mortgage market, and those who rely on it can continue to operate and recover from the COVID-19 outbreak.

**People**
- ~7,500 employees (nearly all) working remotely
- Enhanced support for employees and families
- Employees donated more than $90,000 in March, including company matching funds
- Continued to pay most contractors (e.g. cafeteria staff) and accelerated payments to identified small businesses

**Customers**
- Provided $82.9 billion in liquidity to the SF and MF mortgage markets in March, including $40.1 billion through whole-loan conduit, to support lenders, including community lenders
- Provided mortgage originators temporary flexibilities for employment verification, appraisals and more
- Limited the duration of P&I advances by SF servicers to four months
- Purchasing from lenders recently originated SF mortgages in forbearance that meet eligibility criteria

**Homeowners and Renters**
- Suspended foreclosures and foreclosure-related evictions for homeowners
- Provided mortgage payment relief through forbearance on over 1 million SF loans, and we expect the volume to grow substantially
- No late fees for homeowners in a forbearance plan
- Will provide homeowners repayment plans, payment deferral and loan modification options to help them after forbearance period ends
- Homeowners who comply with their forbearance plan and were current prior to receiving COVID-19-related forbearance will be reported as current to credit bureaus
- Updated KnowYourOptions.com to inform and explain options available to homeowners and renters
- Offered MF borrowers mortgage forbearance with the condition that they suspend all evictions for renters unable to pay rent
Fannie Mae reported net income of $461 million for first quarter of 2020 compared to net income of $4.4 billion for fourth quarter of 2019. The decrease in net income was due primarily to a shift from credit-related income to credit-related expense. The $2.7 billion of credit-related expense for the quarter reflected a $4.1 billion increase in the allowance for loan losses as a result of the economic disruption caused by the COVID-19 outbreak.
Market Liquidity

Key Highlights: Liquidity Provided In Q1 2020

Fannie Mae provided $204.6 billion in liquidity to the mortgage market in the first quarter of 2020, including $86.1 billion through its whole loan conduit, enabling the financing of approximately 854,000 home purchases, refinancings, or rental units.

Single-Family Business
Single-Family Highlights

Q1 2020

$4,541M Net interest income

$(152)M Investment losses, net

$(460)M Fair value losses, net

$2,250M Credit-related expense

$68M Net income

Single-Family net income was $68 million in the first quarter of 2020 compared with $3.8 billion in the fourth quarter of 2019. The decrease in net income in the first quarter of 2020 was primarily driven by:

- a shift from credit-related income to credit-related expense. The $2.3 billion of credit-related expense for the quarter reflected a $3.4 billion increase in the allowance for loan losses related to the economic disruption caused by the COVID-19 outbreak;
- investment losses as a result of the decrease in the fair value of held-for-sale loans; and
- fair value losses in the first quarter compared with fair value gains in the fourth quarter, driven by decreases in interest rates.

Single-Family Cumulative Default Rates

Cumulative Default Rates of Single-Family Conventional Guaranty Book of Business by Origination Year (22)

As of March 31, 2020, cumulative default rates on the loans originated in each individual year from 2009-2020 were less than 1%
Multifamily Business
## Multifamily Highlights

### Multifamily Loan Acquisitions

- **Q1 2020**: $806M Net interest income
- **Q1 2019**: $156M Fee and other income
- **Q1 2020**: $184M Fair value gains, net
- **Q1 2019**: $(413)M Credit-related expense
- **Q1 2020**: $393M Net income

### Multifamily Guaranty Book of Business

- **Average charged guaranty fee on multifamily guaranty book of business, at end of period (bps)**
- **UPB outstanding of multifamily guaranty book of business**

### Multifamily Credit Risk Transfer

- **UPB outstanding of multifamily loans in a CRT transaction**
- **UPB outstanding of multifamily loans in a Multifamily Connecticut Avenue Securities™ transaction**

### Key Highlights

- Multifamily net income was $393 million in the first quarter of 2020, compared with $547 million in the fourth quarter of 2019.
- The decrease in net income was attributable primarily to a shift to credit-related expense in the first quarter of 2020 from credit-related income in the fourth quarter of 2019. The $413 million of credit-related expense for the quarter reflected a $636 million increase in the allowance for loan losses related to the economic disruption caused by the COVID-19 outbreak.

© 2020 Fannie Mae
Endnotes
Financial Overview Endnotes

(1) Prior period amounts have been adjusted to reflect the current year change in presentation related to the yield maintenance fees. As of January 1, 2020, all yield maintenance fees have been reported in interest income. For consolidated loans, the portion of the fee passed through to the holders of the trust certificates are classified as interest expense.

(2) Previously included in Other expenses, net. Primarily consists of costs associated with the CIRT and CAS programs as well as enterprise-paid mortgage insurance. Excluded from this expense are costs related to the CAS transactions accounted for as debt instruments and credit risk transfer programs accounted for as derivative instruments.

(3) Guaranty fee income includes the impact of a 10 basis point guaranty fee increase implemented in 2012 pursuant to the Temporary Payroll Tax Cut Continuation Act of 2011, the incremental revenue from which is remitted to Treasury and not retained by the company.

(4) Includes interest income from assets held in the company’s retained mortgage portfolio and other investments portfolio, as well as other assets used to generate lender liquidity. Also includes interest expense on the company’s outstanding corporate debt and Connecticut Avenue Securities® debt.

(5) Refers to the U.S. weekly average fixed-rate mortgage rate according to Freddie Mac’s Primary Mortgage Market Survey®. These rates are reported using the latest available data for a given period.

(6) U.S. Gross Domestic Product ("GDP") growth is the quarterly series calculated by the Bureau of Economic Analysis and is subject to revision. GDP growth rate for YTD 2020 is the Advance Estimate published on April 29, 2020.

(7) Home price estimates are based on purchase transactions in Fannie-Freddie acquisition and public deed data available through the end of March 2020. Including subsequent data may lead to materially different results. Home price change is not seasonally adjusted. UPB estimates are based on data available through the end of March 2020, and the top 10 states are reported by UPB in descending order.

(8) Aggregate amount of dividends Fannie Mae has paid to Treasury on the senior preferred stock from 2008 through March 31, 2020. Under the terms of the senior preferred stock purchase agreement, dividend payments made to Treasury do not offset prior draws of funds from Treasury.

(9) Aggregate amount of funds the company has drawn from Treasury pursuant to the senior preferred stock purchase agreement from 2008 through March 31, 2020.
Single-Family Business Endnotes

(1) Single-family conventional loan population consists of: (a) single-family conventional mortgage loans of Fannie Mae; (b) single-family conventional mortgage loans underlying Fannie Mae MBS other than loans underlying Freddie Mac securities that Fannie Mae has resecuritized; and (c) other credit enhancements that Fannie Mae provided on single-family mortgage assets, such as long-term standby commitments. It excludes non-Fannie Mae single-family mortgage-related securities held in the retained mortgage portfolio for which Fannie Mae does not provide a guaranty. Conventional refers to mortgage loans and mortgage-related securities that are not guaranteed or insured, in whole or in part, by the U.S. government or one of its agencies.

(2) Represents the sum of the average guaranty fee rate for the company's single-family conventional guaranty arrangements during the period plus the recognition of any upfront cash payments relating to these guaranty arrangements over an estimated average life at the time of acquisition. Excludes the impact of a 10 basis point guaranty fee increase implemented pursuant to the TCCA, the incremental revenue from which is remitted to Treasury and not retained by the company.

(3) FICO credit score is as of loan origination, as reported by the seller of the mortgage loan.

(4) Excludes loans for which this information is not readily available. From time to time, the company revises its guidelines for determining a borrower's DTI ratio. The amount of income reported by a borrower and used to qualify for a mortgage may not represent the borrower's total income; therefore, the DTI ratios reported may be higher than borrowers' actual DTI ratios.

(5) Refers to HomeReady® mortgage loans, a low down payment mortgage product offered by the company that is designed for creditworthy low-income borrowers. HomeReady allows up to 97% loan-to-value ratio financing for home purchases. The company offers additional low down payment mortgage products that are not HomeReady loans; therefore, this category is not representative of all high LTV single-family loans acquired or in the single-family conventional guaranty book of business for the periods shown. See the "OLTV Ratio > 95%" category for information on the single-family loans acquired or in the single-family conventional guaranty book of business with origination LTV ratios greater than 95%.

(6) "Refi Plus" refers to loans acquired under Fannie Mae's Refi Plus initiative, which offered refinancing flexibility to eligible Fannie Mae borrowers who were current on their loans and who applied prior to the initiative's December 31, 2018 sunset date. Refi Plus had no limits on maximum LTV ratio and provided mortgage insurance flexibilities for loans with LTV ratios greater than 80%.

(7) Calculated based on the aggregate unpaid principal balance of single-family loans for each category divided by the aggregate unpaid principal balance of loans in the single-family conventional guaranty book of business. Loans with multiple product features are included in all applicable categories.

(8) Percentage of loans in the single-family conventional guaranty book of business, measured by unpaid principal balance, included in an agreement used to reduce credit risk by requiring collateral, letters of credit, mortgage insurance, corporate guarantees, inclusion in a credit risk transfer transaction reference pool, or other agreement that provides for our compensation to some degree in the event of a financial loss relating to the loan.

(9) "Serious delinquency rate" refers to single-family conventional loans that are 90 days or more past due or in the foreclosure process in the applicable origination year, product feature, or state, divided by the number of loans in the single-family conventional guaranty book of business in that origination year, product feature, or state.

(10) Amortized origination loan-to-value ratio, is calculated based on the current UPB of a loan at period end, divided by the home price at origination of the loan.
Single-Family Business Endnotes

(11) The average estimated mark-to-market LTV ratio is based on the unpaid principal balance of the loan divided by the estimated current value of the property at period end, which the company calculates using an internal valuation model that estimates periodic changes in home value. Excludes loans for which this information is not readily available.

(12) Refers to loans included in an agreement used to reduce credit risk by requiring primary mortgage insurance, collateral, letters of credit, corporate guarantees, or other agreements to provide an entity with some assurance that it will be compensated to some degree in the event of a financial loss. Excludes loans covered by credit risk transfer transactions unless such loans are also covered by primary mortgage insurance.

(13) Outstanding unpaid principal balance represents the underlying loan balance, which is different from the reference pool balance for CAS and some lender risk-sharing transactions.

(14) Includes mortgage pool insurance transactions covering loans with an unpaid principal balance of approximately $7 billion at issuance and approximately $3 billion outstanding as of March 31, 2020.

(15) Based on the unpaid principal balance (UPB) of the single-family conventional guaranty book of business as of period end.

(16) Measured from the borrowers’ last paid installment on their mortgages to when the related properties were added to our REO inventory for foreclosures completed during three months ended March 31, 2020. Home Equity Conversion Mortgages insured by the Department of Housing and Urban Development are excluded from this calculation.

(17) Consists of (a) short sales, in which the borrower, working with the servicer and Fannie Mae, sells the home prior to foreclosure for less than the amount owed to pay off the loan, accrued interest and other expenses from the sale proceeds and (b) deeds-in-lieu of foreclosure, which involve the borrower’s voluntarily signing over title to the property.

(18) Consists of (a) modifications, which do not include trial modifications, loans to certain borrowers who have received bankruptcy relief that are accounted for as troubled debt restructurings, or repayment plans or forbearances that have been initiated but not completed; (b) repayment plans, reflects only those plans associated with loans that were 60 days or more delinquent; and (c) forbearances, not including forbearances associated with loans that were less than 90 days delinquent when entered.

(19) Credit losses consist of (a) charge-offs net of recoveries and (b) foreclosed property expense (income). Percentages exclude the impact of recoveries that have not been allocated to specific loans.

(20) For a description of our Alt-A loan classification criteria, refer to the glossary in Fannie Mae’s 2019 Form 10-K. The company discontinued the purchase of newly originated Alt-A loans in 2009, except for those that represent the refinancing of a loan acquired prior to 2009, which has resulted in the acquisitions of Alt-A mortgage loans remaining low and the percentage of the book of business attributable to Alt-A to continue to decrease over time.

(21) Total amount of single-family credit losses includes those not directly associated with specific loans. Single-family credit losses by state exclude the impact of recoveries that have not been allocated to specific loans. The states presented have the highest credit losses of the ten states with the highest concentration of our single-family conventional guaranty book of business.

(22) Defaults include loan foreclosures, short sales, sales to third parties at the time of foreclosure and deeds-in-lieu of foreclosure. Cumulative Default Rate is the total number of single-family conventional loans in the guaranty book of business originated in the identified year that have defaulted, divided by the total number of single-family conventional loans in the guaranty book of business originated in the identified year. Data as of March 31, 2020 is not necessarily indicative of the ultimate performance of the loans and performance is likely to change, perhaps materially, in future periods.
Multifamily Business Endnotes

(1) The multifamily guaranty book of business consists of: (a) multifamily mortgage loans of Fannie Mae; (b) multifamily mortgage loans underlying Fannie Mae MBS; and (c) other credit enhancements that the company provided on multifamily mortgage assets. It excludes non-Fannie Mae multifamily mortgage-related securities held in the retained mortgage portfolio for which Fannie Mae does not provide a guaranty. Data reflects the latest available information.

(2) Represents the percentage of loans with lender risk-sharing agreements in place, measured by unpaid principal balance.

(3) Under the Delegated Underwriting and Servicing (DUS) program, Fannie Mae acquires individual, newly originated mortgages from specially approved DUS lenders using DUS underwriting standards and/or DUS loan documents. Because DUS lenders generally share the risk of loss with Fannie Mae, they are able to originate, underwrite, close and service most loans without a pre-review by the company.

(4) Includes any loan that was underwritten with an interest-only term less than the term of the loan, regardless of whether it is currently in its interest-only period.

(5) See https://www.fanniemae.com/multifamily/products for definitions. Loans with multiple product features are included in all applicable categories.

(6) The Multifamily Affordable Business Channel focuses on financing properties that are under an agreement that provides long-term affordability, such as properties with rent subsidies or income restrictions.

(7) Weighted average debt service coverage ratio, or DSCR, is calculated using the most recent property financial operating statements. When operating statement information is not available, the DSCR at the time of acquisition is used. If both are unavailable, the underwritten DSCR is used. Co-op loans are excluded from this metric.

(8) In Q1 2019, the DUS program updated the definition of small multifamily loans to any loan with an original unpaid balance of up to $6 million nationwide. The updated definition has been applied to all loans in the current multifamily guaranty book of business, including loans that were acquired under the previous small loan definition.

(9) Multifamily loans are classified as seriously delinquent when payment is 60 days or more past due.

(10) Cumulative net credit loss rate is the cumulative net credit losses (gains) through March 31, 2020 on the multifamily loans that were acquired in the applicable period, as a percentage of the total acquired unpaid principal balance of multifamily loans in the applicable period. Net credit losses include expected benefit of freestanding credit enhancements, primarily multifamily DUS lender-risk sharing transactions.

(11) Credit loss (benefit) ratio, net represents the annualized net credit loss or benefit for the period divided by the average unpaid principal balance of the multifamily guaranty book of business for the period. Net credit benefits are the result of recoveries on previously charged-off amounts. Net credit losses include expected benefit of freestanding credit enhancements, primarily multifamily DUS lender-risk sharing transactions.
