

Horizon DaaS– Requesting software from software center

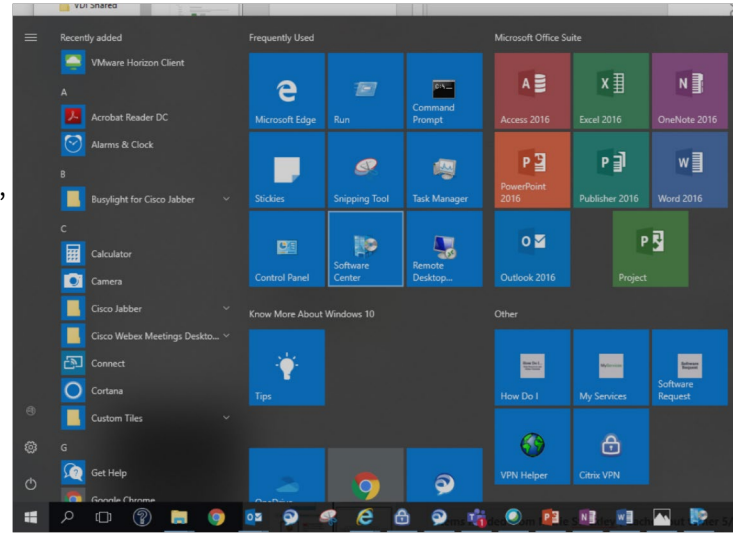

Provisioned Software

If your desktop has a hyphen name, use the steps below to provision any additional software

If you had software on your previous desktop, you can re-download from Software Center. This can take some time depending on the amount of applications you use.

1. Click on the Windows start menu
 2. Open **Software Center** on new computer
 3. Click on Applications on the left-hand side
 4. Under Sort by, click on the pull down and change to 'Status'
 5. Highlight the needed application by clicking once and click 'install'
1. Once setup is complete, restart DaaS

How to request additional software

To request additional software for your DaaS desktop, submit a [MyServices Software Installation Request](#)

1. Go to Homesite
2. Go to MyServices
3. In the search field, type **Software Installation**
4. Fill out request and under **What operating systems (OS) will this software be installed on?**
5. Select **My-Desktop,My-Desktop-SPX-X**
6. Finish form and select **Order**.

* What operating system (OS) will this software be installed on?

-- None --

-- None --
