

## <u>Important Information About Personal Devices</u>

Follow these steps when returning to an office with personal devices.

If you previously connected your personal device, such as your mobile phone, to the on-site Fannie Mae network, then you must do this one-time network forgetting/enabling process on your first day:

- 1. Disable Wi-Fi before entering any Fannie Mae office.
- 2. When you arrive at your desk, re-enable Wi-Fi.
- 3. Forget the network on your Windows, Apple, iOS and/or Android devices
- 4. Re-add the A\_User Network to your mobile device using your AD credentials (userID).
- 5. Certificate opens and click Trust.
- 6. A\_User is now connected.
