

Get the best experience with DaaS

- 1 **Strong home network**
- 2 **Internet usage**
 - ✓ How are **you** using the internet?
 - ✓ How **many** are using the internet?
- 3 **25 Mbps recommended per user**

15 Mbps is the minimum per user
- 4 **Wired connection**

5 **Internet bandwidth vs. Speed**

Think about the internet like a road and the data like the cars on the road. Internet speed is the speed at which cars can travel, and bandwidth is the number of lanes they have.

Concurrent Users	Concurrent Devices	Minimum Bandwidth	High Usage Bandwidth
1-2	<10	25 Mbps	100 Mbps
2-4	10 – 30	100 Mbps	300 Mbps
5+	30+	300 Mbps	1 Gbps
