

## April 2025 Data Release

The Home Purchase Sentiment Index® (HPSI) is a composite index designed to track consumers' housing-related attitudes, intentions, and perceptions, using six questions from the National Housing Survey® (NHS).

### The Home Purchase Sentiment Index

The HPSI increased by 1.1 points to 69.2 in April.

### Components of the HPSI

Three out of six HPSI components increased this month, namely Job Loss Concern, Change in Household Income, and Home Price Outlook. These increases were offset by net decreases in Selling Conditions and Mortgage Rate Outlook. Buying Conditions was the only HPSI component with no change this month.

	April 2025			Net Change	
	Good Time	Bad Time	Net Good Time to Buy	MoM	YoY
<b>Buying Conditions</b>	23%	77%	-55%	0	+4
<b>Selling Conditions</b>	58%	41%	17%	-13	-18
<b>Home Price Outlook (next 12 months)</b>	44%	23%	21%	+3	-2
<b>Mortgage Rate Outlook (next 12 months)</b>	26%	36%	-9%	-1	-3
<b>Job Loss Concern (next 12 months)</b>	74%	25%	49%	+15	-3
<b>Change in Household Income (past 12 months)</b>	20%	8%	12%	+4	+7

**Note:** Calculations are made using unrounded and weighted response level data to help ensure precision in NHS data results from wave to wave. As a result, minor differences in calculated data (summarized results, net calculations, etc.) of up to 1 percentage point may occur due to rounding.

## Components of the HPSI – Good/Bad Time to Buy and Sell a Home

The net share of consumers (-55%) who say it is a good time to buy a home was unchanged since last month. The share who say it is a good time to buy increased 1 percentage point (23%), while the share who say it is a bad time to buy (77%) remained unchanged.

The net share of consumers who say it is a good time to sell decreased 13 percentage points month over month to 17%. Nearly 3 in 5 consumers (58%) say it's a good time to sell, while 41% say it's a bad time to sell.

## Components of the HPSI – Home Price and Mortgage Rate Expectations

The net share of consumers who say home prices will go up (21%) increased 3 percentage points month over month. Over 2 in 5 consumers (44%, unchanged since last month) expect home prices to go up, while nearly a quarter (23%, down 2 percentage points from last month) expect home prices to go down.

The net share of consumers who say mortgage rates will go down in the next 12 months decreased 1 percentage point to -9% in April, marking the fifth consecutive month-over-month decline since its survey high in November 2024.

## Components of the HPSI – Job Loss Concern and Household Incomes

In April, the net share of employed consumers who say they are not concerned about losing their job increased 15 percentage points to 49%, bouncing back from last month's survey low.

The net share who say their household income is significantly higher than a year ago increased 4 percentage points to 12%. Over 2 in 3 consumers (70%) say their household income is about the same as it was a year ago.

## Additional National Housing Survey Key Indicators

Over the next year, consumers expect rental prices to increase 6.4% on average (a 1.1 percentage-point increase month over month) and home prices to increase 2.2% on average (a 0.9 percentage-point increase from last month).

The share of consumers who expect home rental prices to go up (66%) increased 3 percentage points from last month, while the share who expect rental prices to go down decreased 1 percentage point to 9%. A quarter (25%) of consumers expect home rental prices to stay the same (a 1-percentage-point decrease from last month).

## Additional National Housing Survey Key Indicators

The share of consumers who say they would buy a home if they were going to move (65%) remained unchanged month over month. The share who say they would rent if they were going to move increased 1 percentage point from last month (35%).

The share of consumers who say getting a mortgage would be difficult stayed the same since last month (54%), while the share who say getting a mortgage would be easy decreased 1 percentage point to 45%.

## Additional National Housing Survey Key Indicators

The share of consumers who expect their personal financial situation to get better (33%) decreased 4 percentage points from last month. The share who expect their situation to get worse increased 4 percentage points to 31%, matching the survey high last seen in June 2022. The share who expect their personal financial situation to stay the same remained unchanged since last month (36%).

### Respondents who expect their personal financial situation to... over the next 12 months

The share of consumers who say the economy is on the right track decreased 2 percentage points to 32%, while the share who say the economy is on the wrong track increased 1 percentage point to 67%.

### Respondents who say the economy is on the...

# The National Housing Survey®

April 2025  
APPENDIX

## About the Survey

The National Housing Survey® polled a nationally representative sample of 1,181 household financial decision makers (margin of error ± 3.95 percentage points) aged 18 and older between April 1<sup>st</sup> and April 18<sup>th</sup>, 2025. Most of the data collection occurred during the first two weeks of this period.

The survey was fielded through AmeriSpeak®, NORC at the University of Chicago’s probability-based panel, in coordination with Fannie Mae and PSB Insights.

The statistics in this release were estimated from sample surveys and are subject to sampling variability as well as non-sampling error, including bias and variance from response, nonreporting, and under-coverage, though weighting corrections have been applied. Averages of expected price changes were calculated after converting responses of “stay the same” to 0% and after excluding outliers, which were defined to be responses that were more than two standard deviations from the mean.

How the Home Purchase Sentiment Index (HPSI) is Calculated*	
Net Good Time to <b>Buy</b> <i>Very or Somewhat Good Time To Buy – Very or Somewhat Bad Time To Buy</i>	Q12
Net Good Time to <b>Sell</b> <i>Very or Somewhat Good Time To Sell – Very or Somewhat Bad Time To Sell</i>	Q13
Net <b>Home Prices</b> Will Go Up (next 12 months) <i>Home Prices Will Go Up – Home Prices Will Go Down</i>	Q15
Net <b>Mortgage Rates</b> Will Go Down (next 12 months) <i>Mortgage Rates Will Go Down – Mortgage Rates Will Go Up</i>	Q20B
Net Confident About Not Losing <b>Job</b> (next 12 months) <i>Among Employed Respondents, Not at All or Not Very Concerned about Losing Job – Very or Somewhat Concerned about Losing Job</i>	Q112B
Net Household <b>Income</b> is Significantly Higher (past 12 months) <i>Income is Significantly Higher – Income is Significantly Lower</i>	Q116
$HPSI = \frac{Q12 + Q13 + Q15 + Q20B + Q112B + Q116}{6} + 63.5$	
<small>* The HPSI calculation includes the addition of a constant of 63.5 in order to set the index's initial value at 60 as of March 2011, in range with the <b>Index of Consumer Sentiment</b> and the <b>Consumer Confidence Index</b></small>
