

June 2020 Data Release

The Home Purchase Sentiment Index[®] (HPSI) is a composite index designed to track consumers' housing-related attitudes, intentions, and perceptions, using six questions from the National Housing Survey[®] (NHS).

The Home Purchase Sentiment Index

The HPSI increased by 9 points to 76.5 in June, rising for the second straight month after record declines in March and April.

Components of the HPSI

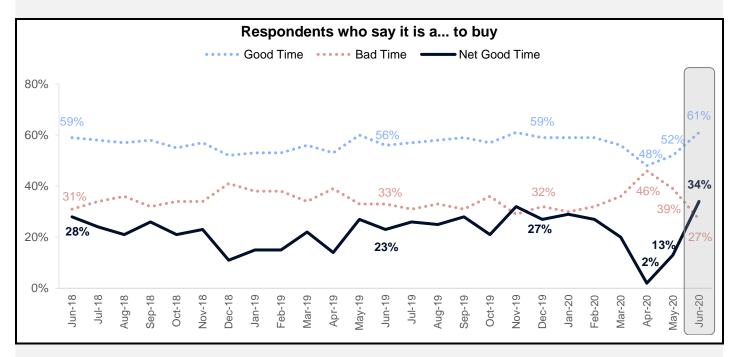

The increase in the HPSI can be attributed to net increases in four components: Selling Conditions, Buying Conditions, Home Price Outlook, and Change in Household Income. Two components saw net decreases this month: Mortgage Rate Outlook and Job Loss Concern.

	June 2020				Net Change	
		Julie 2020				
Buying Conditions	Good Time	Bad Time	Net Good Time to Buy	. 04		
Buying Conditions	61%	27%	34%	+21	+11	
Colling Conditions	Good Time	Bad Time	Net Good Time to Sell	. 00	50	
Selling Conditions	41%	48%	-7%	+23	-50	
Home Price Outlook	Go Up	Go Down	Net Go Up	. 10	-29	
(next 12 months)	34%	25%	9%	+18	-29	
Mortgage Rate Outlook	Go Down	Go Up	Net Go Down	45		
(next 12 months)	17%	32%	-15%	-15	+14	
Job Loss Concern	Not Concerned	Concerned	Net Not Concerned	0	05	
(next 12 months)	74%	26%	48%	-3	-25	
Change in Household Income	Significantly Higher	Significantly Lower	Net Significantly Higher	. 10	11	
(past 12 months)	25%	16%	9%	+10	-11	

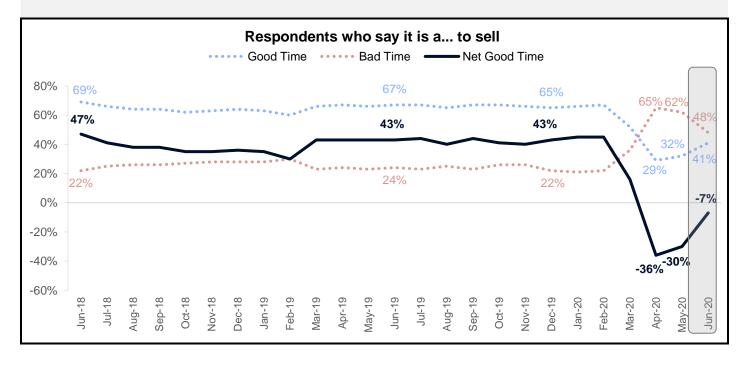

Components of the HPSI – Good/Bad Time to Buy and Sell a Home

In June, the net share of Americans who say it is a good time to buy increased by 21 percentage points – the largest single month increase in survey history.

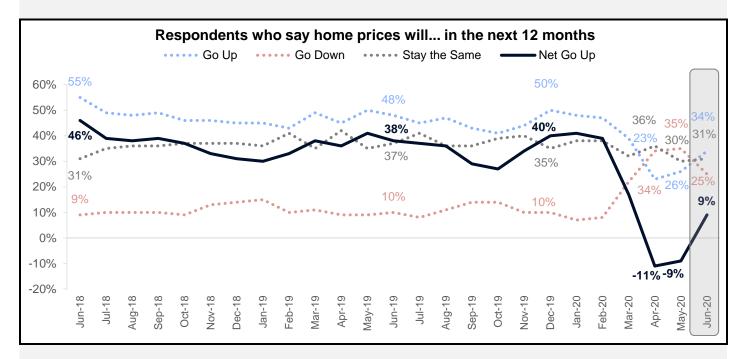

The net percentage of those who say it is a good time to sell increased by 23 percentage points in June – the largest single month increase in survey history.

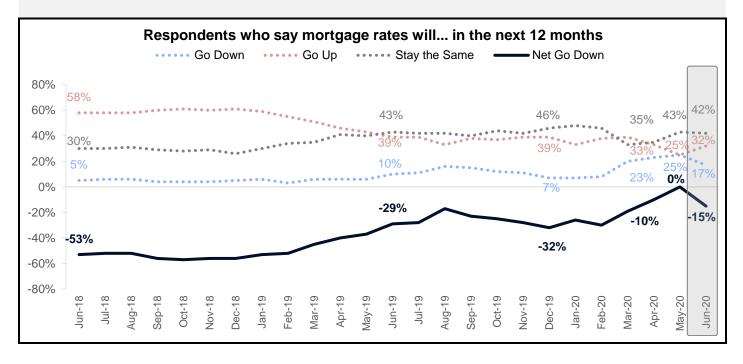

Components of the HPSI – Home Price and Mortgage Rate Expectations

The net share of Americans who say home prices will go up increased by 18 percentage points – the largest single month increase in survey history.

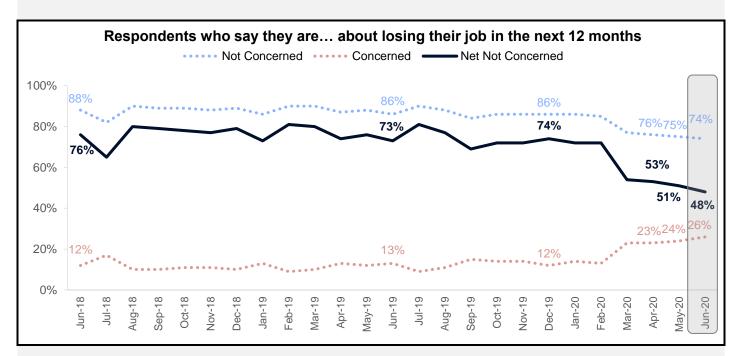

This month, the net share of those who say mortgage rates will go down over the next 12 months fell 15 percentage points – the largest single month decrease in survey history.

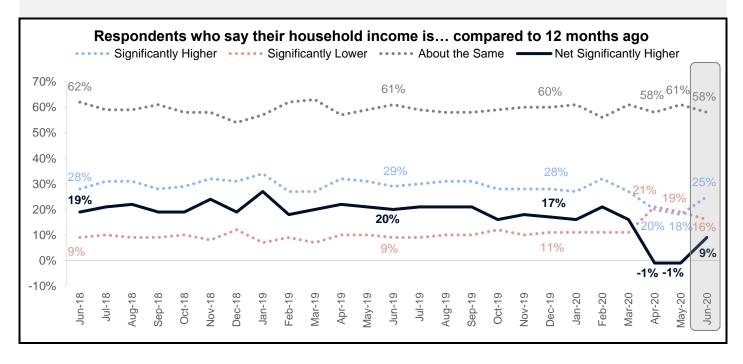

Components of the HPSI – Job Concerns and Household Incomes

This month, the net share of Americans who say they are not concerned about losing their job fell 3 percentage points, continuing the decline that began in March.

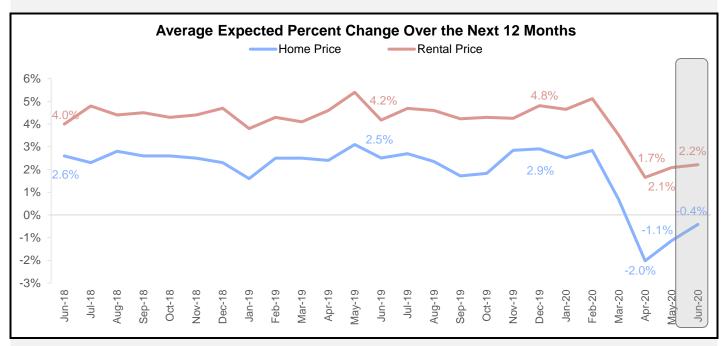

The net share of those who say their household income is significantly higher than it was 12 months ago increased by 10 percentage points in June, becoming net positive again after two months of being net negative.

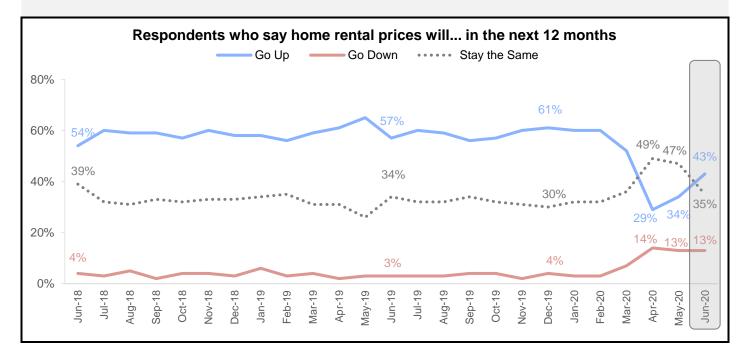

Additional National Housing Survey Key Indicators

On average, Americans expect rental prices to increase 2.2% over the next 12 months, 0.1 percentage points higher than last month. They expect home prices to fall 0.4% over the next 12 months, a 0.7 percentage point decrease from last month.

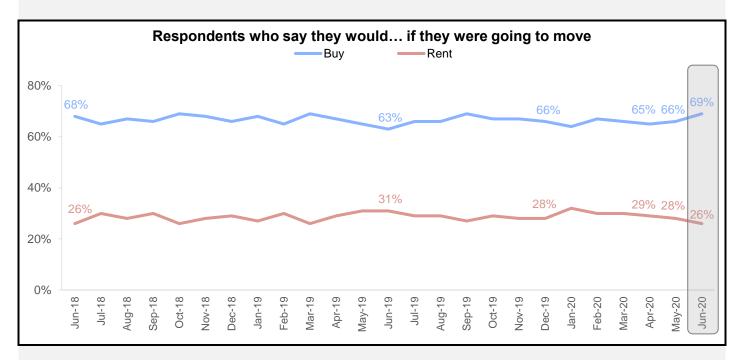

The share of Americans who expect home rental prices to go up increased by 9 percentage points to 43%, continuing to rise after reaching a survey low in April.

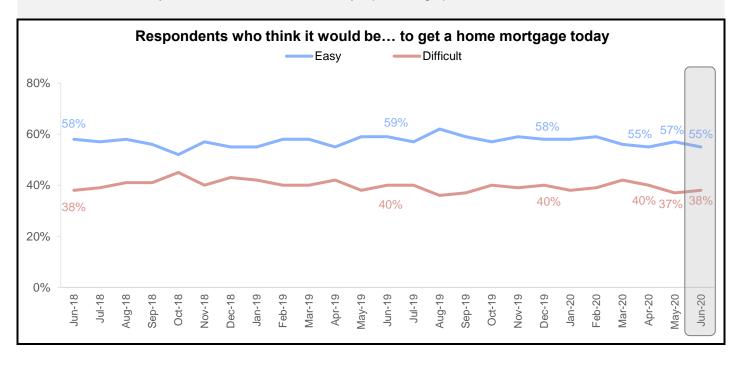

Additional National Housing Survey Key Indicators

The share of Americans who say they would buy a home if they were going to move rose 3 percentage points to 69%, while the share who say they would rent fell 2 percentage points to 26%.

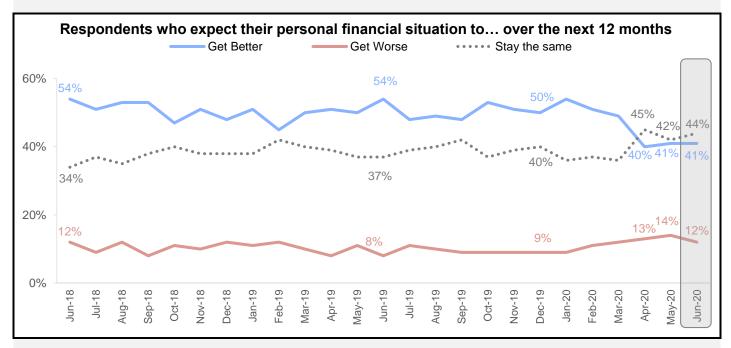

The share of Americans who say getting a mortgage would be easy fell by 2 percentage points to 55%, while the share of those who say it would be difficult increased by 1 percentage point to 38%.

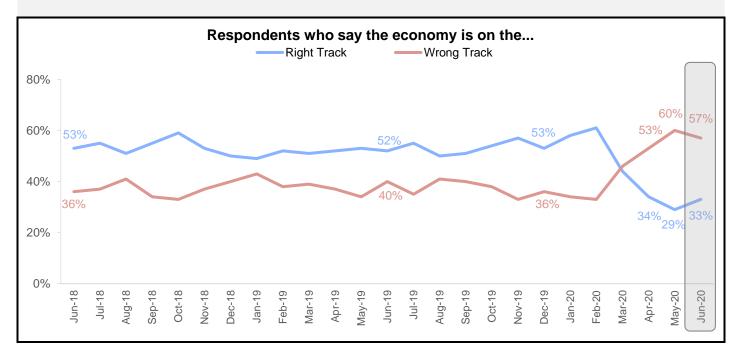

Additional National Housing Survey Key Indicators

The share of Americans who expect their personal financial situation to get better remained the same as last month at 41%. The share who expect it to stay the same increased by 2 percentage points to 44%, while the share who expect it to get worse fell by 2 percentage points to 12%.

The share of Americans who say the economy is on the right track increased by 4 percentage points to 33% after declining for three months. The share who say it is on the wrong track fell 3 percentage points to 57%.

The National Housing Survey®

June 2020 APPENDIX

About the Survey

The National Housing Survey[®] polled a nationally representative sample of 1,007 household financial decision makers (margin of error $\pm 3.1\%$) aged 18 and older between June 1, 2020 and June 21, 2020. Most of the data collection occurred during the first two weeks of this period.

Interviews were conducted by PSB, in coordination with Fannie Mae.

The statistics in this release were estimated from sample surveys and are subject to sampling variability as well as nonsampling error, including bias and variance from response, nonreporting, and undercoverage. Averages of expected price changes were calculated after converting responses of "stay the same" to 0% and after excluding outliers, which were defined to be responses that were more than two standard deviations from the mean.

How the Home Purchase Sentiment Index (HPSI) is Calculated*				
Net Good Time to Buy Very or Somewhat Good Time To Buy – Very or Somewhat Bad Time To Buy	Q12			
Net Good Time to Sell Very or Somewhat Good Time To Sell – Very or Somewhat Bad Time To Sell	Q13			
Net Home Prices Will Go Up (next 12 months) <i>Home Prices Will Go Up – Home Prices Will Go Down</i>	Q15			
Net Mortgage Rates Will Go Down (next 12 months) Mortgage Rates Will Go Down – Mortgage Rates Will Go Up	Q20B			
Net Confident About Not Losing Job (next 12 months) Not at All or Not Very Concerned about Losing Job – Very or Somewhat Concerned about Losing Job	Q112B			
Net Household Income is Significantly Higher (past 12 months) Income is Significantly Higher – Income is Significantly Lower	Q116			
$HPSI = \frac{Q12 + Q13 + Q15 + Q20B + Q112B + Q116}{6} + 63.5$				
* The HPSI calculation includes the addition of a constant of 63.5 in order to set the index's initial value at 60 as of March 2011, in range with the Index of Consumer Sentiment and the Consumer Confidence Index
