
UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Form 10-Q

- ☒ **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended September 30, 2025

OR

- ☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission file number: 0-50231

Federal National Mortgage Association

(Exact name of registrant as specified in its charter)

Fannie Mae

Federally chartered corporation	52-0883107	1100 15th Street, NW	800 232-6643
		Washington, DC 20005	
<i>(State or other jurisdiction of incorporation or organization)</i>	<i>(I.R.S. Employer Identification No.)</i>	<i>(Address of principal executive offices, including zip code)</i>	<i>(Registrant's telephone number, including area code)</i>

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
None	N/A	N/A

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

As of October 10, 2025, there were 1,158,087,567 shares of common stock of the registrant outstanding.

PART I—FINANCIAL INFORMATION

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

You should read this Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”) in conjunction with our unaudited condensed consolidated financial statements and related notes in this report and the more detailed information in our annual report on Form 10-K for the year ended December 31, 2024 (“2024 Form 10-K”). You can find a “Glossary of Terms Used in This Report” in MD&A in our 2024 Form 10-K.

This report includes forward-looking statements based on management’s current expectations that are subject to significant uncertainties. Future events and our results may differ materially from those reflected in our forward-looking statements due to a variety of factors, including those discussed in “Forward-Looking Statements” and elsewhere in this report and in “Risk Factors” and elsewhere in our 2024 Form 10-K.

About Fannie Mae

Fannie Mae is a leading source of financing for residential mortgages in the United States. We provided \$286.7 billion in liquidity to the mortgage market in the first nine months of 2025, which enabled the financing of approximately 1.1 million home purchases, refinancings, and rental units.

We are a government-sponsored, stockholder-owned corporation, chartered by Congress to provide liquidity and stability to the U.S. housing market and to promote access to mortgage credit. We primarily do this by buying residential mortgage loans that are originated by lenders. We place these loans into trusts and issue guaranteed mortgage-backed securities (“MBS” or “Fannie Mae MBS”) that global investors buy from us. We do not originate mortgage loans or lend money directly to borrowers.

We provide a guaranty on the MBS that we issue. If a borrower fails to make a payment on a mortgage loan that is included in a Fannie Mae MBS, we pay the shortfall amount to the MBS investor. In exchange for providing this guaranty, we receive a guaranty fee. Guaranty fees are the primary source of our revenues.

Because we assume the credit risk for mortgage loans in our MBS, our earnings are affected by the credit performance of these loans. Credit risk management is therefore key to our business and financial results. To help manage our mortgage credit risk exposure, and in response to capital and other requirements, we transfer some of our credit risk exposure to third parties through credit risk transfer and mortgage insurance. For a discussion of how we manage credit risk, see “MD&A—Single-Family Business—Single-Family Mortgage Credit Risk Management” and “MD&A—Multifamily Business—Multifamily Mortgage Credit Risk Management” in this report and in our 2024 Form 10-K.

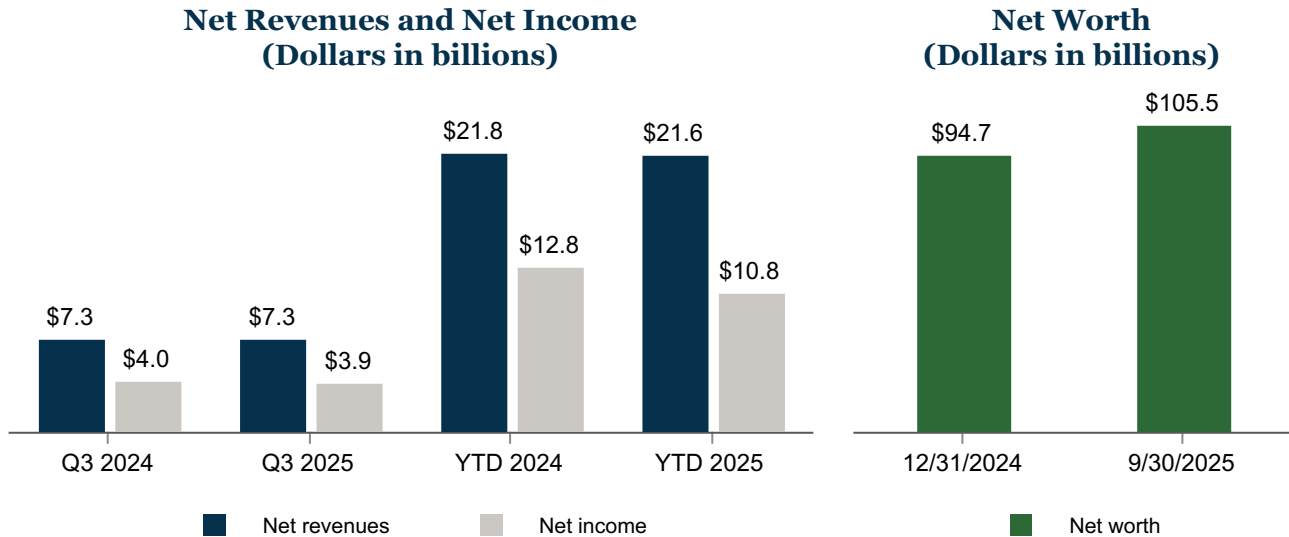

We support both single-family and multifamily housing. Our Single-Family business provides financing for properties that have four or fewer residential units. Our Multifamily business provides financing for residential buildings with five or more units. As of June 30, 2025 (the latest date for which information is available), Fannie Mae owned or guaranteed an estimated 25% of single-family mortgage debt outstanding and an estimated 21% of multifamily mortgage debt outstanding in the United States.

We have been in conservatorship since 2008. The Federal Housing Finance Agency (“FHFA”) is our conservator. During conservatorship, our Board has no fiduciary duties to the company or its stockholders, as they owe their fiduciary duties of care and loyalty solely to FHFA as conservator. Since March 17, 2025, the FHFA Director has served as the Chairman of our Board, and FHFA’s General Counsel has also served as a member of our Board. Conservatorship and our agreements with the U.S. Department of the Treasury (“Treasury”) significantly restrict our business activities and stockholder rights. For more information about the impact of conservatorship and these agreements on our business, stockholders, and our uncertain future, see “Business—Conservatorship and Treasury Agreements” and “Risk Factors—GSE and Conservatorship Risk” in our 2024 Form 10-K and “Legislation and Regulation” in this report.

Financial Results Summary

Please read this summary together with our MD&A, our condensed consolidated financial statements as of September 30, 2025 and the accompanying notes.

Overview of Financial Results

Summary of Financial Results

Quarterly Results

- *Net revenues* of \$7.3 billion in the third quarter of 2025 were relatively flat compared with the third quarter of 2024. Net revenues consist of net interest income and fee and other income.
- *Provision for credit losses* was \$338 million in the third quarter of 2025, which consists of a \$269 million single-family provision for credit losses and a \$69 million multifamily provision for credit losses. Our single-family provision for credit losses was primarily driven by provision associated with loans that we acquired during the period, which primarily consisted of purchase loans. Our multifamily provision for credit losses was primarily driven by increased delinquencies.
- *Net income* of \$3.9 billion in the third quarter of 2025 decreased by \$185 million compared with the third quarter of 2024, primarily driven by a \$365 million shift from a benefit for credit losses to a provision for credit losses, partially offset by a \$161 million shift from other expense in the third quarter of 2024 to other income in the third quarter of 2025.

Year-to-Date Results

- *Net revenues* of \$21.6 billion in the first nine months of 2025 decreased by \$139 million compared with the first nine months of 2024.
- *Provision for credit losses* was \$1.3 billion in the first nine months of 2025, which consists of a \$1.0 billion single-family provision for credit losses and a \$278 million multifamily provision for credit losses. Our single-family provision for credit losses was primarily driven by provision associated with loans that we acquired during the period, which primarily consisted of purchase loans, and by weaker-than-expected home price growth. Our multifamily provision for credit losses was primarily driven by increased delinquencies.
- *Net income* of \$10.8 billion in the first nine months of 2025 decreased by \$2.0 billion compared with the first nine months of 2024, primarily driven by a \$1.8 billion shift from a benefit for credit losses to a provision for credit losses and a \$632 million decrease in fair value gains.
- *Net worth* increased by \$10.8 billion in the first nine months of 2025 to \$105.5 billion as of September 30, 2025. The increase is attributable to \$10.8 billion of comprehensive income for the first nine months of 2025.

For more information on the drivers of our financial results, see "Consolidated Results of Operations."

Legislation and Regulation

This section updates and supplements information regarding legislative, regulatory, conservatorship and other related matters affecting our business set forth in “Business—Conservatorship and Treasury Agreements” and “Business—Legislation and Regulation” in our 2024 Form 10-K, as well as in “MD&A—Legislation and Regulation” in our Form 10-Q for the quarter ended March 31, 2025 (“First Quarter 2025 Form 10-Q”) and in our Form 10-Q for the quarter ended June 30, 2025 (“Second Quarter 2025 Form 10-Q”). Also see “Risk Factors” in our 2024 Form 10-K for discussions of risks relating to legislative and regulatory matters.

Administration Comments Regarding Our Future

In recent months, the Administration has made public comments suggesting it is considering various options for the future of Fannie Mae and Freddie Mac. We cannot predict the likelihood, timing or nature of administrative or legislative actions relating to our future. See “Risk Factors—GSE and Conservatorship Risk” in our 2024 Form 10-K for a discussion of risks relating to our uncertain future.

Proposed 2026–2028 Housing Goals

We are subject to housing goals, which require that a specified amount of the mortgage loans we acquire meet requirements relating to affordability or location. Our housing goals are set by FHFA in accordance with the Federal Housing Enterprises Financial Safety and Soundness Act of 1992, as amended (the “GSE Act”). In October 2025, FHFA published a proposed rule that would establish housing goals for Fannie Mae and Freddie Mac for 2026 through 2028, replacing goals previously established for 2026 and 2027. For single-family loans, the proposed rule would reduce our requirements for low-income home purchase loans and very low-income home purchase loans, maintain our requirement for low-income refinance loans, and establish one subgoal for single-family low-income areas home purchase loans to replace the two current area-based subgoals. For multifamily loans, FHFA’s proposed goals for 2026 through 2028 are unchanged from the multifamily housing goals previously approved for 2025 through 2027. Comments on the proposed rule are due in November 2025. See “Business—Legislation and Regulation—Housing Goals” and “Risk Factors—GSE and Conservatorship Risk” in our 2024 Form 10-K for more information on our housing goals and how pursuing them may affect our business, results of operations and financial condition.

2024 Housing Goals Performance

In October 2025, FHFA notified us that it had determined that we met five of our six 2024 single-family housing goals and subgoals, and all of our 2024 multifamily housing goals and subgoals. FHFA determined that we missed the single-family very low-income home purchase goal. FHFA also determined not to require us to submit a housing plan because we missed the goal by a narrow margin. See “Business—Legislation and Regulation—Housing Goals” in our 2024 Form 10-K for more information regarding our 2024 housing goals requirements.

Stress Testing

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) requires certain financial companies to conduct annual stress tests. Under FHFA regulations, each year we are required to conduct a stress test using two different scenarios of financial conditions provided by FHFA—baseline and severely adverse—and to publish a summary of our stress test results for the severely adverse scenario by August 15. In August 2024, FHFA temporarily waived the requirement that we publish our 2024 stress test results by August 15, 2024. On August 15, 2025, we published on our website the results of the severely adverse scenarios for 2024 and 2025.

Key Market Economic Indicators

In “MD&A—Key Market Economic Indicators” in our 2024 Form 10-K, we discuss how varying macroeconomic conditions can influence our financial results across different business and economic environments, and we provide forecasts and expectations with respect to some of these macroeconomic conditions. Below we provide an update to these forecasts and expectations, as well as updates to certain macroeconomic information. Our forecasts and expectations are based on many assumptions, subject to many uncertainties and may change, perhaps substantially, from our current forecasts and expectations. See “Risk Factors” in our 2024 Form 10-K and “Forward-Looking Statements” in this report for a discussion of factors that could cause actual results to differ materially from our current forecasts and expectations.

Market Interest Rates

Selected Market Interest Rates

(1) Refers to the U.S. weekly average fixed-rate mortgage rate according to Freddie Mac's Primary Mortgage Market Survey®. These rates are reported using the latest available data for a given period.

(2) According to Bloomberg.

(3) Refers to the daily rate per the Federal Reserve Bank of New York.

The U.S. weekly average 30-year fixed-rate mortgage rate decreased to 6.30% at the end of the third quarter of 2025, compared to 6.77% at the end of the second quarter of 2025 and 6.85% at the end of the fourth quarter of 2024.

Home Prices

Single-Family Quarterly Home Price Growth (Decline) Rate⁽¹⁾

(1) Calculated internally using property data on loans purchased by Fannie Mae, Freddie Mac and other third-party home sales data. Fannie Mae's home price index is a weighted repeat-transactions index, measuring average price changes in repeat sales on the same properties. Fannie Mae's home price index excludes prices on properties sold in foreclosure. Fannie Mae's home price growth rates represent estimates based on non-seasonally adjusted preliminary data and are subject to change as additional data becomes available.

Home prices on a national basis grew by an estimated 3.4% in the first nine months of 2025. Based on our expectation of a decrease in home prices in the fourth quarter of 2025, we forecast national home price growth of 2.5% for the full year of 2025. We also expect regional variation in the timing and rate of home price changes.

Economic Activity

GDP and Unemployment Rate

⁽¹⁾ Real GDP growth (decline) is based on the quarterly series calculated by the Bureau of Economic Analysis and is subject to revision.

⁽²⁾ According to the U.S. Bureau of Labor Statistics and subject to revision.

U.S. gross domestic product ("GDP") increased by 3.8% in the second quarter of 2025. Bureau of Economic Analysis GDP data for the third quarter of 2025 was not available at the time of filing this report. We expect GDP will grow for the full year of 2025, but at a slower pace than in 2024. The unemployment rate increased to 4.3% in August 2025, compared with 4.1% in the second quarter of 2025. U.S. Bureau of Labor Statistics data for the third quarter of 2025 was not available at the time of filing this report. We expect the unemployment rate to continue to increase modestly in the fourth quarter of 2025.

The impact of trade, fiscal, regulatory and immigration policies is uncertain and could materially impact our outlook for interest rates, home price growth and economic growth. In addition, it remains unknown what impact, if any, the ongoing government shutdown will have on broad economic activity, including GDP and labor market conditions. See "Risk Factors—Market and Industry Risk" and "Risk Factors—Credit Risk" in our 2024 Form 10-K for further discussion of risks to our business and financial results associated with these factors.

Consolidated Results of Operations

This section discusses our condensed consolidated results of operations and should be read together with our condensed consolidated financial statements and the accompanying notes.

In the third quarter of 2025, a change in accounting principle was made that is reflected on the condensed consolidated balance sheets and condensed consolidated statements of cash flows on a retrospective basis. Additionally, a presentation change was made to the condensed consolidated statements of operations and other comprehensive income, which we recast for the prior periods presented. Refer to “Note 1, Summary of Significant Accounting Policies” in the Notes to Condensed Consolidated Financial Statements for further details.

Summary of Condensed Consolidated Results of Operations

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2025	2024	Variance	2025	2024	Variance
(Dollars in millions)						
Net interest income ⁽¹⁾	\$ 7,184	\$ 7,275	\$ (91)	\$ 21,340	\$ 21,566	\$ (226)
Fee and other income	123	66	57	293	206	87
Net revenues	7,307	7,341	(34)	21,633	21,772	(139)
(Provision) benefit for credit losses	(338)	27	(365)	(1,308)	507	(1,815)
Fair value gains (losses), net	13	52	(39)	347	979	(632)
Investment gains (losses), net	(1)	12	(13)	(9)	(28)	19
Non-interest expense:						
Administrative expenses ⁽²⁾	(819)	(884)	65	(2,658)	(2,672)	14
Legislative assessments ⁽³⁾	(943)	(948)	5	(2,813)	(2,817)	4
Credit enhancement expense ⁽⁴⁾	(409)	(411)	2	(1,288)	(1,235)	(53)
Other income (expense), net ⁽⁵⁾	25	(136)	161	(331)	(416)	85
Total non-interest expense	(2,146)	(2,379)	233	(7,090)	(7,140)	50
Income before federal income taxes	4,835	5,053	(218)	13,573	16,090	(2,517)
Provision for federal income taxes	(976)	(1,009)	33	(2,736)	(3,242)	506
Net income	\$ 3,859	\$ 4,044	\$ (185)	\$ 10,837	\$ 12,848	\$ (2,011)
Total comprehensive income	\$ 3,849	\$ 4,047	\$ (198)	\$ 10,828	\$ 12,848	\$ (2,020)

(1) Includes net interest income generated by the 10 basis point guaranty fee increase we implemented pursuant to the Temporary Payroll Tax Cut Continuation Act of 2011 (“TCCA”), and as extended by the Infrastructure Investment and Jobs Act, which is paid to Treasury and not retained by us. We refer to this as TCCA fees, or income related to TCCA.

(2) Consists of salaries and employee benefits and professional services, technology and occupancy expenses.

(3) Consists of TCCA fees, affordable housing allocations and FHFA assessments.

(4) Single-family credit enhancement expense consists of costs associated with our freestanding credit enhancements, which primarily include our Connecticut Avenue Securities® (“CAS”) and Credit Insurance Risk Transfer™ (“CIRT™”) programs, enterprise-paid mortgage insurance (“EPMI”) and certain lender risk-sharing programs. Multifamily credit enhancement expense primarily consists of costs associated with our Multifamily CIRT™ (“MCIRT™”) and Multifamily Connecticut Avenue Securities® (“MCAS™”) programs as well as amortization expense for certain lender risk-sharing programs. Excludes CAS transactions accounted for as debt instruments and credit risk transfer programs accounted for as derivative instruments.

(5) Primarily consists of debt extinguishment gains (losses), foreclosed property income (expense), change in the expected benefits from our freestanding credit enhancements, and gains (losses) from partnership investments.

Net Interest Income

Overview

Our primary source of net interest income is guaranty fees we receive for assuming the credit risk on mortgage loans underlying Fannie Mae MBS held by third parties in our guaranty book of business. We also recognize net interest income on the difference between interest income earned on the assets in our retained mortgage portfolio and our corporate liquidity portfolio (collectively, our “portfolios”) and the interest expense associated with our funding debt. In addition, income or expense from hedge accounting is a component of our net interest income. See “MD&A—

Consolidated Results of Operations—Net Interest Income” in our 2024 Form 10-K for information about the sources of our net interest income.

Components of Net Interest Income

The table below displays the components of our net interest income from our guaranty book of business, from our portfolios, as well as from hedge accounting.

Components of Net Interest Income

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2025	2024	Variance	2025	2024	Variance
(Dollars in millions)						
Net interest income from guaranty book of business:						
Base guaranty fee income excluding TCCA	\$ 4,263	\$ 4,159	\$ 104	\$ 12,694	\$ 12,357	\$ 337
Base guaranty fee income related to TCCA	855	862	(7)	2,570	2,581	(11)
Net deferred guaranty fee income	794	831	(37)	2,396	2,475	(79)
Total net interest income from guaranty book of business	5,912	5,852	60	17,660	17,413	247
Net interest income from portfolios ⁽¹⁾	1,417	1,624	(207)	4,170	4,817	(647)
Income (expense) from hedge accounting ⁽²⁾	(145)	(201)	56	(490)	(664)	174
Total net interest income	\$ 7,184	\$ 7,275	\$ (91)	\$ 21,340	\$ 21,566	\$ (226)

⁽¹⁾ Includes interest income from assets held in our retained mortgage portfolio and our corporate liquidity portfolio, as well as other assets used to support lender liquidity. Also includes interest expense on our funding debt, including outstanding CAS debt.

⁽²⁾ For more information about our hedge accounting program, see “Note 9, Derivative Instruments.”

Net interest income decreased by \$91 million in the third quarter of 2025 compared with the third quarter of 2024, and by \$226 million in the first nine months of 2025 compared with the first nine months of 2024, primarily driven by lower net interest income from portfolios, partially offset by higher base guaranty fee income.

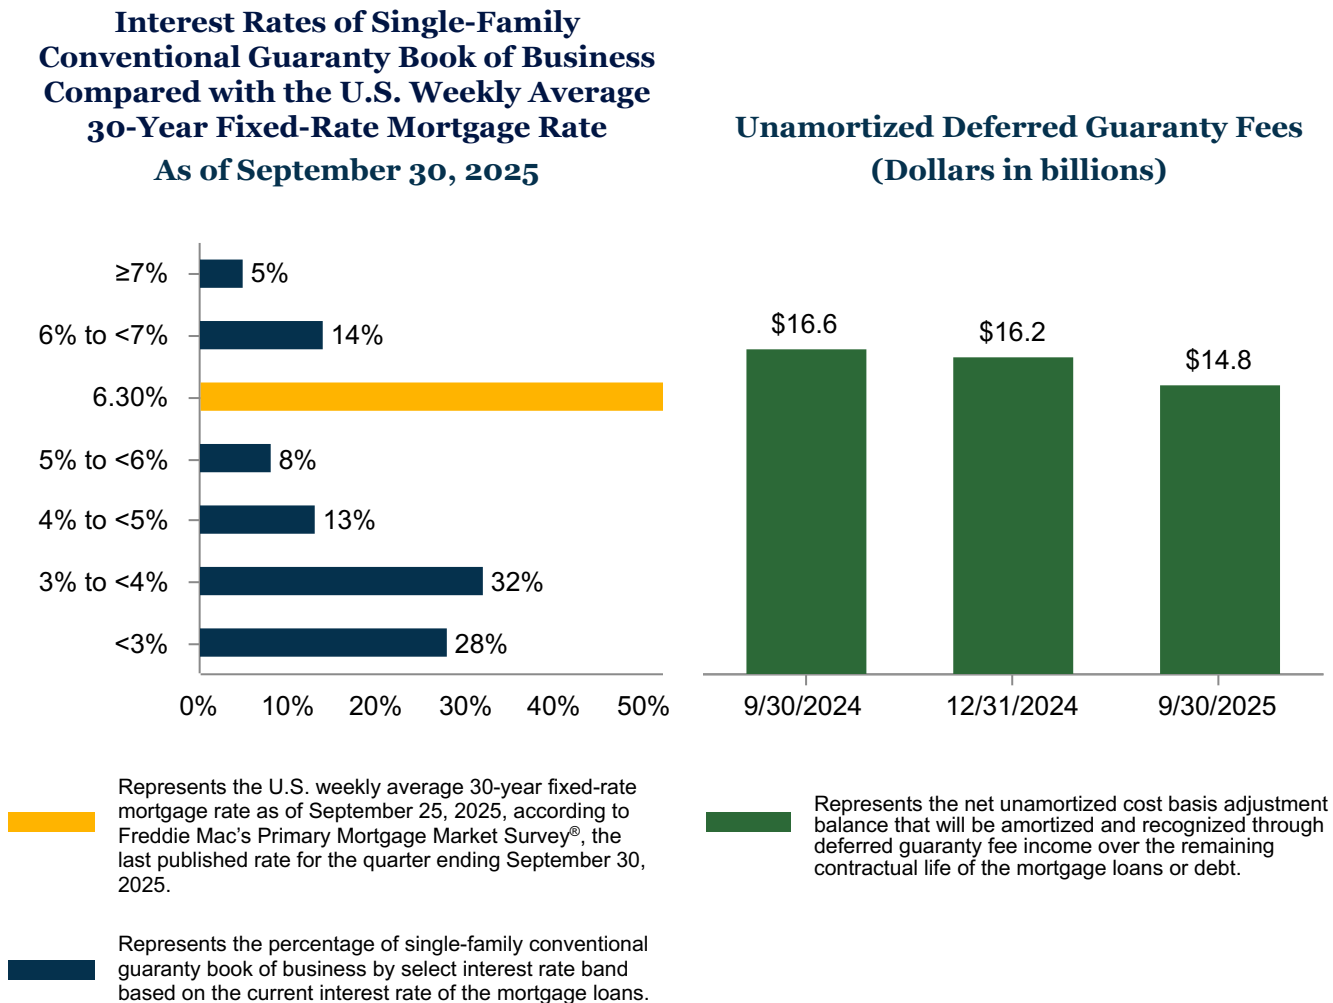

- *Lower net interest income from portfolios.* Lower net interest income from portfolios in the third quarter and first nine months of 2025 compared with the third quarter and first nine months of 2024 was primarily driven by higher average rates on our long-term funding debt as we issued debt in a higher-interest rate environment relative to maturing long-term debt.
- *Higher base guaranty fee income.* Higher base guaranty fee income in the third quarter and first nine months of 2025 compared with the third quarter and first nine months of 2024 was primarily driven by higher average guaranty fees on recent single-family acquisitions.

Analysis of Unamortized Deferred Guaranty Fees

The following charts present information about the interest rates of the loans in our single-family conventional guaranty book of business as well as information about our deferred guaranty fees.

As shown in the chart below (on the left), most of our single-family conventional guaranty book of business as of September 30, 2025 had an interest rate lower than the U.S. weekly average 30-year fixed-rate mortgage rate. Per Freddie Mac's Primary Mortgage Market Survey®, as of September 25, 2025, the U.S. weekly average interest rate for a single-family 30-year fixed-rate mortgage was 6.30%. Accordingly, even if interest rates decline to 5%, most of the borrowers whose mortgage loans are in our single-family conventional guaranty book of business still would not be incentivized to refinance.

The other chart below (on the right) presents guaranty fees that will be amortized into deferred guaranty fee income in future periods, which we refer to as "unamortized deferred guaranty fees," as described in "MD&A—Consolidated Results of Operations—Net Interest Income—Analysis of Unamortized Deferred Guaranty Fees" in our 2024 Form 10-K.

The amount of deferred guaranty fee income we record can vary and is primarily impacted by: (1) the amount of upfront fees we charge on single-family mortgage loans, (2) changes in interest rates, which affect the premiums and discounts we record on newly acquired mortgage loans and newly created debt of consolidated trusts, and (3) the amount by which premiums and discounts on existing loans and debt of consolidated trust are different compared to newly acquired loans and debt. The balance of our unamortized deferred guaranty fees decreased as of September 30, 2025, compared with December 31, 2024, largely as a result of amortization of existing upfront fees on single-family loans and premiums of existing MBS debt. In addition, interest-rate-driven pricing changes resulted in fewer premiums on newly issued MBS debt relative to MBS debt that amortized, which further reduced the balance of unamortized deferred guaranty fees.

Analysis of Net Interest Income

The table below displays an analysis of our net interest income, average balances and related yields earned on assets and incurred on liabilities. For most components of the average balances, we use a daily weighted average of unpaid principal balance net of unamortized cost basis adjustments. When daily average balance information is not available, such as for mortgage loans, we use monthly averages.

Analysis of Net Interest Income and Yield⁽¹⁾

	For the Three Months Ended September 30,					
	2025			2024		
	Average Balance	Interest Income/ (Expense)	Average Rates Earned/ Paid (Dollars in millions)	Average Balance	Interest Income/ (Expense)	Average Rates Earned/ Paid
Interest-earning assets:						
Cash	\$ 11,618	\$ 129	4.44 %	\$ 11,633	\$ 158	5.43 %
Securities purchased under agreements to resell	75,484	844	4.47	77,314	1,057	5.47
Investments in securities	76,745	614	3.20	57,212	350	2.45
Mortgage loans:

Net interest income/net interest yield		\$ 21,340	0.66 %		\$ 21,566	0.67 %

⁽¹⁾ Includes the effects of discounts, premiums and other cost basis adjustments, including basis adjustments related to hedge accounting.

⁽²⁾ Average balance includes mortgage loans on nonaccrual status. Interest income includes loan fees of \$767 million and \$2.2 billion for the third quarter of 2025 and first nine months of 2025, respectively, compared with \$711 million and \$2.1 billion for the third quarter of 2024 and first nine months of 2024, respectively. Loan fees primarily consist of yield maintenance revenue we recognized on the prepayment of multifamily mortgage loans and the amortization of upfront cash fees exchanged when we acquire the mortgage loan.

(Provision) Benefit for Credit Losses

The table below presents our single-family and multifamily benefit or provision for credit losses and the change in expected credit enhancement recoveries. The benefit or provision for credit losses includes our benefit or provision for loan losses, advances of pre-foreclosure costs, accrued interest receivable losses, our guaranty loss reserves, and credit losses on our available-for-sale (“AFS”) debt securities.

(Provision) Benefit for Credit Losses and Change in Expected Credit Enhancement Recoveries by Segment

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2025	2024	2025	2024
(Dollars in millions)				
(Provision) benefit for credit losses:				
Single-family (provision) benefit for credit losses	\$ (269)	\$ 451	\$ (1,030)	\$ 1,334
Multifamily (provision) benefit for credit losses	(69)	(424)	(278)	(827)
Total (provision) benefit for credit losses	<u>\$ (338)</u>	<u>\$ 27</u>	<u>\$ (1,308)</u>	<u>\$ 507</u>
Change in expected credit enhancement recoveries:⁽¹⁾				
Single-family	\$ (11)	\$ (45)	\$ (23)	\$ (134)
Multifamily	57	134	119	323
Change in expected credit enhancement recoveries	<u>\$ 46</u>	<u>\$ 89</u>	<u>\$ 96</u>	<u>\$ 189</u>

⁽¹⁾ Consists of estimated changes in benefits from our freestanding credit enhancements, which are recognized as a component of “Other income (expenses), net” in our condensed consolidated statements of operations and comprehensive income.

Single-Family (Provision) Benefit for Credit Losses

Our single-family provision for credit losses in the third quarter of 2025 was primarily driven by provision associated with loans that we acquired during the period, which primarily consisted of purchase loans. Purchase loans generally have higher original loan-to-value (“LTV”) ratios than refinance loans; therefore, purchase loans have a higher estimated risk of default and loss severity in the allowance than refinance loans and a correspondingly higher credit loss provision at the time of acquisition.

Our single-family provision for credit losses in the first nine months of 2025 was primarily driven by provision associated with loans that we acquired during the period, which primarily consisted of purchase loans, and by weaker-than-expected home price growth. Lower home prices increase the likelihood that loans will default and increase the amount of losses on loans that do default, which impacts our estimate of losses and ultimately increases our loss reserves and provision for credit losses.

See “Key Market Economic Indicators” in our 2024 Form 10-K for additional information about how home prices affect our credit loss estimates. See “Key Market Economic Indicators” in this report for a discussion of home price growth and our home price forecast. Also see “Critical Accounting Estimates” in this report for more information about our home price forecast and how it can impact our single-family (provision) benefit for credit losses.

Our single-family benefit for credit losses in the third quarter of 2024 was primarily driven by a benefit from forecasted home price growth and a benefit from actual and projected interest rates, partially offset by a provision from changes in loan activity, as described below. Additionally, our allowance for loan losses as of September 30, 2024 considered the potential impact of Hurricane Helene.

- *Benefit from forecasted home price growth.* During the third quarter of 2024, our forecast of future home prices improved. Higher home prices decrease the likelihood that loans will default and reduce the amount of losses on loans that do default, which impacts our estimate of losses and ultimately reduces our loss reserves and provision for credit losses.
- *Benefit from actual and projected interest rates.* Actual and projected interest rates decreased in the third quarter of 2024, which reduced the probability of default, resulting in a benefit for credit losses.
- *Provision from changes in loan activity.* This includes provision on newly acquired loans and was primarily driven by the credit risk profile of our single-family acquisitions for the third quarter of 2024, which primarily consisted of purchase loans.

Our single-family benefit for credit losses in the first nine months of 2024 was primarily driven by a benefit from actual and forecasted home price growth, partially offset by a provision from changes in loan activity.

- *Benefit from actual and forecasted home price growth.* During the first nine months of 2024, actual home prices appreciated more than originally projected and our forecast of future home prices also improved.
- *Provision from changes in loan activity.* This includes provision on newly acquired loans and was primarily driven by the credit risk profile of our single-family acquisitions for the first nine months of 2024, which primarily consisted of purchase loans.

Multifamily (Provision) Benefit for Credit Losses

Our multifamily provision for credit losses in the third quarter and first nine months of 2025 was primarily driven by an increase in delinquencies including provision from seriously delinquent loans that were written down to the net recoverable amount of the loans' collateral during the period.

Our multifamily provision for credit losses in the third quarter of 2024 was largely driven by certain adjustable-rate conventional loans that were written down during the period. We also recognized provision for credit losses because, compared to our previous forecast, our third quarter of 2024 forecast expected further slight decreases in projected multifamily property values and a longer period of time for projected multifamily property values to improve. Our multifamily allowance and estimate for credit losses as of September 30, 2024 also considered uncertainty. This included uncertainty relating to multifamily property values, as well as uncertainty due to the investigation of multifamily lending transactions with suspected fraud, which may increase the risk of default.

Our multifamily provision for credit losses in the first nine months of 2024 was primarily driven by loan delinquencies in our multifamily guaranty book of business, including provision attributable to adjustable-rate conventional loans that became seriously delinquent and were written down to the net recoverable amount, declines in estimated actual and projected multifamily property values, and provision for uncertainty.

Change in Expected Credit Enhancement Recoveries

Change in expected credit enhancement recoveries consists of the change in expected and realized benefits from our freestanding credit enhancements, including any realized amounts. Change in expected credit enhancement recoveries decreased in third quarter and first nine months of 2025 compared with the third quarter and first nine months of 2024, driven by the decreased multifamily provision for credit losses. The decrease in estimated credit losses on our multifamily guaranty book of business decreased the amount we expect to receive from our multifamily loss sharing arrangements.

Fair Value Gains (Losses), Net

The estimated fair value of our derivatives, trading securities and other financial instruments carried at fair value may fluctuate substantially from period to period because of changes in interest rates, the yield curve, mortgage and credit spreads and implied volatility, as well as activity related to these financial instruments.

The table below displays the components of our fair value gains and losses.

Fair Value Gains (Losses), Net

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2025	2024	2025	2024
(Dollars in millions)				
Risk management derivatives fair value gains (losses) ⁽¹⁾	\$ 43	\$ (470)	\$ (241)	\$ (29)
Impact of hedge accounting ⁽²⁾	74	215	374	471
Risk management derivatives fair value gains (losses), net	117	(255)	133	442
Mortgage commitment derivatives fair value gains (losses), net	(295)	(567)	(684)	(266)
Credit enhancement derivatives fair value gains (losses), net	3	(38)	(25)	(52)
Total derivatives fair value gains (losses), net	(175)	(860)	(576)	124
Trading securities gains (losses), net	296	1,267	1,279	1,127
Long-term debt fair value gains (losses), net	(203)	(471)	(582)	(343)
Other, net ⁽³⁾	95	116	226	71
Fair value gains (losses), net	\$ 13	\$ 52	\$ 347	\$ 979

⁽¹⁾ Includes net change in fair value in the period and net contractual interest income (expense) on interest-rate swaps, which is primarily impacted by changes in interest rates and changes in the composition of our interest-rate swaps portfolio.

⁽²⁾ The "Impact of hedge accounting" reflected in this table shows the net gain or loss from swaps in hedging relationships plus any accrued interest during the applicable periods, which are recognized in "Net interest income."

⁽³⁾ Consists primarily of fair value gains and losses on mortgage loans held at fair value.

Fair value activity in the third quarter of 2025 was primarily driven by declining interest rates, resulting in gains on fixed-rate trading securities, mortgage loans held at fair value, and risk management derivatives, which were more than offset by losses on mortgage commitment derivatives and long-term debt of consolidated trusts held at fair value.

Fair value activity in the first nine months of 2025 was primarily driven by declining interest rates, resulting in gains on fixed-rate trading securities, which were more than offset by losses on mortgage commitment derivatives, long-term debt of consolidated trusts held at fair value, and risk management derivatives.

Fair value activity in the third quarter of 2024 was primarily driven by declining interest rates, resulting in gains on fixed-rate trading securities, which were more than offset by losses on mortgage commitment derivatives, long-term debt of consolidated trusts held at fair value, and risk management derivatives.

Fair value activity in the first nine months of 2024 was primarily driven by declining interest rates, resulting in gains on fixed-rate trading securities, which were partially offset by losses on mortgage commitment derivatives, long-term debt of consolidated trusts held at fair value, and risk management derivatives.

The impact of hedge accounting resulted in incremental gains for each of the respective periods. Our hedge accounting program is designed to hedge our exposure to changes in benchmark interest rates and, therefore, offsets a portion of the fair value volatility we would otherwise experience. The fair value gains and losses after the impact of hedge accounting primarily relate to spreads, convexity, and other components that are not effectively or intended to be captured by our hedge accounting program.

Legislative Assessments

The table below displays the components of our legislative assessments.

Legislative Assessments

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2025	2024	2025	2024
(Dollars in millions)				
TCCA fees ⁽¹⁾	\$ 855	\$ 862	\$ 2,570	\$ 2,581
FHFA assessments ⁽²⁾	42	41	123	121
Affordable housing allocations: ⁽³⁾				
Treasury's Capital Magnet Fund	16	15	42	40
HUD's Housing Trust Fund	30	30	78	75
Total affordable housing allocations	46	45	120	115
Total legislative assessments	\$ 943	\$ 948	\$ 2,813	\$ 2,817

⁽¹⁾ TCCA fees are expenses recognized as a result of the 10 basis point increase in guaranty fees on all single-family mortgages delivered to us on or after April 1, 2012 pursuant to the Temporary Payroll Tax Cut Continuation Act of 2011 and as extended by the Infrastructure Investment and Jobs Act, which we pay to Treasury.

⁽²⁾ FHFA assessments are expenses relating to our obligation under the GSE Act to pay FHFA to cover a portion of its costs, expenses and working capital.

⁽³⁾ Affordable housing allocations relates to the GSE Act requirement to set aside each year an amount equal to 4.2 basis points of the unpaid principal balance of our new business purchases and to pay this amount to specified U.S. Department of Housing and Urban Development ("HUD") and Treasury funds in support of affordable housing. In March 2025, we paid \$160 million to the funds based on our new business purchases in 2024. For the first nine months of 2025, we recognized an expense of \$120 million related to this obligation based on \$285.8 billion in new business purchases during the period. We expect to pay this amount to the funds in 2026, plus additional amounts to be accrued based on our new business purchases in the fourth quarter of 2025.

Administrative Expenses

Administrative expenses decreased from \$884 million in the third quarter of 2024 to \$819 million in the third quarter of 2025, primarily driven by fewer employees and contractors. Administrative expenses decreased by \$14 million from the first nine months of 2024 to the first nine months of 2025, primarily driven by fewer employees and contractors partially offset by an increase in severance costs.

Other Income (Expense), Net

Other income (expense), net, shifted from an expense of \$136 million in the third quarter of 2024 to income of \$25 million in the third quarter of 2025. Other expense decreased from \$416 million in the first nine months of 2024 to \$331 million in the first nine months of 2025. The shift to other income for the third quarter of 2025 and the decline in other expense for the first nine months of 2025 were primarily driven by an increase in debt extinguishment gains as a result of our purchase of single-family Fannie Mae MBS in the third quarter of 2025, as well as a decrease in our single-family foreclosed property expense as a result of a reduction of our REO properties and reduced repair costs. This was partially offset by a decrease in our expected credit enhancement recoveries on multifamily loans. See "(Provision) Benefit for Credit Losses" for a discussion of our changes in expected credit enhancement recoveries.

Consolidated Balance Sheet Analysis

This section discusses our condensed consolidated balance sheets and should be read together with our condensed consolidated financial statements and the accompanying notes.

Summary of Condensed Consolidated Balance Sheets

	As of		
	September 30, 2025	December 31, 2024	Variance
	(Dollars in millions)		
Assets			
Cash	\$ 12,155	\$ 13,477	\$ (1,322)
Restricted cash	27,220	25,059	2,161
Securities purchased under agreements to resell	61,525	56,250	5,275
Investments in securities, at fair value	71,656	79,197	(7,541)
Mortgage loans:			
Of Fannie Mae	54,567	50,408	4,159
Of consolidated trusts	4,077,069	4,095,305	(18,236)
Allowance for loan losses	(8,246)	(7,707)	(539)
Mortgage loans, net of allowance for loan losses	4,123,390	4,138,006	(14,616)
Deferred tax assets, net	10,000	10,545	(545)
Other assets	29,910	27,197	2,713
Total assets	\$ 4,335,856	\$ 4,349,731	\$ (13,875)

Debt:			
Of Fannie Mae	\$ 126,390	\$ 139,422	\$ (13,032)
Of consolidated trusts	4,076,945	4,088,675	(11,730)
Other liabilities	27,036	26,977	59
Total liabilities	4,230,371	4,255,074	(24,703)
Total stockholders' equity	105,485	94,657	10,828
Total liabilities and equity	\$ 4,335,856	\$ 4,349,731	\$ (13,875)

Securities Purchased Under Agreements to Resell and Investments in Securities, at Fair Value

The primary driver of the increase in securities purchased under agreements to resell as well as the decrease in investments in securities, at fair value from December 31, 2024 to September 30, 2025, was the reinvestment of proceeds from sales and maturities of U.S. Treasury securities into securities purchased under agreements to resell and Fannie Mae MBS held in our retained mortgage portfolio.

Mortgage Loans, Net of Allowance for Loan Losses

The mortgage loans reported in our condensed consolidated balance sheets are classified as either held for sale ("HFS") or held for investment ("HFI") and include loans owned by Fannie Mae and loans held in consolidated trusts.

Mortgage loans, net of allowance for loan losses decreased from December 31, 2024 to September 30, 2025, driven primarily by loan paydowns, liquidations and sales outpacing acquisitions during the first nine months of 2025.

For additional information on our mortgage loans, see "Note 4, Mortgage Loans," and for additional information on changes in our allowance for loan losses, see "Note 5, Allowance for Loan Losses."

Debt

Debt of Fannie Mae decreased from December 31, 2024 to September 30, 2025 as our funding needs were primarily satisfied by earnings retained from our operations. The decrease in debt of consolidated trusts from December 31, 2024 to September 30, 2025 was primarily driven by liquidations and extinguishments outpacing issuance activities, offset by sales of MBS held in our retained mortgage portfolio. See "Liquidity and Capital Management—Liquidity Management—

Debt Funding” for a summary of activity in debt of Fannie Mae and information on our outstanding short-term and long-term debt. Also see “Note 8, Short-Term and Long-Term Debt” for additional information on our total outstanding debt.

Retained Mortgage Portfolio

Our retained mortgage portfolio consists of mortgage loans and mortgage-related securities that we own, including Fannie Mae MBS and non-Fannie Mae mortgage-related securities. Assets held by consolidated MBS trusts that back mortgage-related securities owned by third parties are not included in our retained mortgage portfolio.

We use our retained mortgage portfolio primarily to provide liquidity to the mortgage market through portfolio securitization transactions and to support our loss mitigation activities.

We classify our retained mortgage portfolio into three categories:

- *Lender liquidity* includes balances related to our portfolio securitization activity, which supports our efforts to provide liquidity to the single-family and multifamily mortgage markets.
- *Loss mitigation* includes delinquent mortgage loans from our MBS trusts, which enables us to initiate certain loss mitigation efforts.
- *Other* primarily represents assets that we previously purchased for investment purposes.

The following table displays the components of our retained mortgage portfolio. Based on the nature of the asset, these balances are included in either “Investments in securities, at fair value” or “Mortgage loans, net of allowance for loan losses” in our “Summary of Condensed Consolidated Balance Sheets.”

Retained Mortgage Portfolio

	As of	
	September 30, 2025	December 31, 2024
	(Dollars in millions)	
Lender liquidity:		
Agency securities ⁽¹⁾	\$ 40,431	\$ 40,550
Mortgage loans	6,962	8,093
Total lender liquidity	47,393	48,643
Loss mitigation mortgage loans⁽²⁾	46,168	40,194
Other:		
Reverse mortgage loans and securities ⁽³⁾	2,863	3,542
Other mortgage loans and securities ⁽⁴⁾	2,355	2,502
Total other	5,218	6,044
Total retained mortgage portfolio	\$ 98,779	\$ 94,881
Retained mortgage portfolio by segment:		
Single-family mortgage loans and mortgage-related securities	\$ 92,621	\$ 89,308
Multifamily mortgage loans and mortgage-related securities	\$ 6,158	\$ 5,573

⁽¹⁾ Consists of Fannie Mae, Freddie Mac and Ginnie Mae mortgage-related securities, including Freddie Mac securities guaranteed by Fannie Mae. Excludes Fannie Mae and Ginnie Mae reverse mortgage securities and Fannie Mae-wrapped private-label securities.

⁽²⁾ Includes single-family loans on nonaccrual status of \$11.8 billion and \$10.3 billion as of September 30, 2025 and December 31, 2024, respectively. Also includes multifamily loans on nonaccrual status of \$2.5 billion and \$2.9 billion as of September 30, 2025 and December 31, 2024, respectively.

⁽³⁾ Includes Fannie Mae and Ginnie Mae reverse mortgage securities. We stopped acquiring newly originated reverse mortgage loans in 2010.

⁽⁴⁾ Other mortgage loans primarily includes multifamily loans on accrual status and single-family loans that are not included in the loss mitigation or lender liquidity categories. Other mortgage securities primarily includes private-label securities and mortgage revenue bonds.

The amount of mortgage assets that we may own is capped at \$225 billion under the terms of our senior preferred stock purchase agreement with Treasury. We are also subject to specified limitations on the composition of our retained mortgage portfolio pursuant to FHFA guidance.

We include 10% of the notional value of the interest-only securities we hold in calculating the size of the retained mortgage portfolio for the purpose of determining compliance with the senior preferred stock purchase agreement mortgage assets cap and associated FHFA instructions. As of September 30, 2025, 10% of the notional value of our interest-only securities was \$1.7 billion, which is not included in the table above.

Under the terms of our MBS trust documents, we have the option or, in some instances, the obligation, to purchase mortgage loans that meet specific criteria from an MBS trust. FHFA has also provided us with instruction on our single-family delinquent loan buyout policy. The purchase price for these loans is the unpaid principal balance of the loans plus accrued interest. In support of our loss mitigation strategies, we purchased \$11.7 billion of loans from our single-family MBS trusts in the first nine months of 2025, the substantial majority of which were delinquent, compared with \$9.6 billion of loans in the first nine months of 2024.

Guaranty Book of Business

When we securitize mortgage loans originated by lenders into Fannie Mae mortgage-backed securities, we issue guarantees, assuming the credit risk for those mortgage loans. Our guaranty book of business offers insight into both the guarantees we've issued and the credit risk of the loans we've acquired that back our MBS outstanding or that are held in our retained mortgage portfolio.

Our "guaranty book of business" consists of: (1) Fannie Mae MBS outstanding, excluding the portions of any structured securities we issue that are backed by Freddie Mac securities, (2) mortgage loans of Fannie Mae held in our retained mortgage portfolio, and (3) other credit enhancements that we provide on mortgage assets. These components are categorized as either conventional or government based on whether the underlying mortgage loans or securities are fully or partially guaranteed or insured by the U.S. government (referred to as "government") or are not fully or partially guaranteed or insured by the U.S. government (referred to as "conventional").

We use the term "Fannie Mae MBS" or "our MBS" to refer to any type of mortgage-backed security that we issue, including Fannie Mae-issued uniform mortgage-backed securities, or "UMBS®" and structured securities such as Supers® and Real Estate Mortgage Investment Conduit securities ("REMICs").

We and Freddie Mac each issue single-family UMBS. In some instances, our MBS are resecuritizations of securities backed in whole or in part by Freddie Mac-issued UMBS, in which case our guaranty extends to the underlying Freddie Mac securities, shown as "Freddie Mac securities guaranteed by Fannie Mae" in the table below. The Freddie Mac securities guaranteed by Fannie Mae are excluded from our "guaranty book of business" because Freddie Mac continues to guarantee the payment of principal and interest on the underlying Freddie Mac securities, but included in "Total Fannie Mae guarantees" as presented in the table below.

The table below displays the composition of our guaranty book of business and our total Fannie Mae guarantees based on unpaid principal balance.

Composition of Fannie Mae Guaranty Book of Business

	As of					
	September 30, 2025			December 31, 2024		
	Single-Family	Multifamily	Total	Single-Family	Multifamily	Total
	(Dollars in millions)					
Conventional guaranty book of business	\$ 3,604,657	\$ 523,211	\$4,127,868	\$ 3,632,700	\$ 502,080	\$4,134,780
Government guaranty book of business	4,929	475	5,404	5,705	490	6,195
Guaranty book of business	3,609,586	523,686	4,133,272	3,638,405	502,570	4,140,975
Freddie Mac securities guaranteed by Fannie Mae ⁽¹⁾	187,870	—	187,870	200,086	—	200,086
Total Fannie Mae guarantees	\$ 3,797,456	\$ 523,686	\$4,321,142	\$ 3,838,491	\$ 502,570	\$4,341,061

⁽¹⁾ Represents the unpaid principal balance of Freddie Mac-issued UMBS backing Fannie Mae-issued Supers and REMICs. Because we do not have the power to direct matters (primarily the servicing of mortgage loans) that impact the credit risk to which we are exposed, which constitute control of these securitization trusts, we do not consolidate these trusts in our condensed consolidated balance sheet, giving rise to off-balance sheet exposure. See "Liquidity and Capital Management—Liquidity Management—Off-Balance Sheet Arrangements" and "Note 7, Financial Guarantees for more information regarding our maximum exposure to loss on unconsolidated Fannie Mae MBS and Freddie Mac securities.

Presentation of Guaranty Book of Business in the Single-Family Business and Multifamily Business sections

We present the guaranty book of business in this section and in our Monthly Summary reports, which are available on our website, based on the unpaid principal balance of our MBS outstanding. In the “Single-Family Business” and “Multifamily Business” sections of this report, we present our single-family conventional guaranty book of business and our multifamily guaranty book of business, respectively, based on the unpaid principal balance of mortgage loans underlying our MBS. These amounts differ primarily as a result of payments we receive on underlying loans that have not yet been paid to the MBS holders or in instances where we have advanced missed borrower payments on mortgage loans to make required distributions to MBS holders. The difference in these measurements is less than 1%. Using these two presentations allows us to base the disclosure in this section and in our Monthly Summary reports based on the MBS measurement, and disclosures about the composition of loans in our guaranty book of business based on the loan measurement.

Business Segment Financial Results

We have two reportable business segments: Single-Family and Multifamily. This section discusses the primary components of net income for our Single-Family Business and Multifamily Business segments. This information complements the discussion of our condensed consolidated financial results in “Consolidated Results of Operations.”

Quarterly Business Segment Financial Results⁽¹⁾

	For the Three Months Ended September 30,					
	2025		2024		Segment Variance	
	Single-Family	Multifamily	Single-Family	Multifamily	Single-Family	Multifamily
	(Dollars in millions)

⁽¹⁾ See "Note 10, Segment Reporting" for information about our segment allocation methodology.

⁽²⁾ For single-family, includes net interest income generated by the 10 basis point guaranty fee increase we implemented pursuant to the Temporary Payroll Tax Cut Continuation Act of 2011, and as extended by the Infrastructure Investment and Jobs Act, which is paid to Treasury and not retained by us.

⁽³⁾ Consists of salaries and employee benefits and professional services, technology and occupancy expenses.

⁽⁴⁾ For single-family, consists of the portion of our single-family guaranty fees that is paid to Treasury pursuant to the TCCA, affordable housing allocations and FHFA assessments. For multifamily, consists of affordable housing allocations and FHFA assessments.

⁽⁵⁾ Single-family credit enhancement expense consists of costs associated with our freestanding credit enhancements, which primarily include our Connecticut Avenue Securities® ("CAS") and Credit Insurance Risk Transfer™ ("CIRT™") programs, enterprise-paid mortgage insurance programs and certain lender risk-sharing programs. Multifamily credit enhancement expense primarily consists of costs associated with our Multifamily CIRT™ ("MCIRT™") and Multifamily Connecticut Avenue Securities® ("MCAS™") programs as well as amortization expense for certain lender risk-sharing programs. Excludes CAS transactions accounted for as debt instruments and credit risk transfer programs accounted for as derivative instruments.

⁽⁶⁾ Primarily consists of debt extinguishment gains (losses), foreclosed property income (expense), change in the expected benefits from our freestanding credit enhancements and gains (losses) from partnership investments.

Net Interest Income (Dollars in millions)

Single-Family

Net interest income decreased by \$139 million in the third quarter of 2025 compared with the third quarter of 2024, and by \$251 million in the first nine months of 2025 compared with the first nine months of 2024, primarily driven by lower net interest income from portfolios, partially offset by higher base guaranty fee income.

Multifamily

Net interest income increased by \$48 million in the third quarter of 2025 compared with the third quarter of 2024, and by \$25 million in the first nine months of 2025 compared with the first nine months of 2024, primarily driven by higher guaranty fee income as a result of an increase in the size of our multifamily guaranty book of business and higher yield maintenance income, partially offset by lower average charged guaranty fees.

(Provision) Benefit for Credit Losses (Dollars in millions)

See "Consolidated Results of Operations—(Provision) Benefit for Credit Losses" for a discussion of our single-family and multifamily (provision) benefit for credit losses.

Fair Value Gains (Losses), Net (Dollars in millions)

Single-Family

Fair value losses, net in the third quarter of 2025 were primarily driven by losses on our mortgage commitment derivatives and long-term debt of consolidated trusts held at fair value, all of which were primarily due to falling interest rates during the third quarter of 2025, which were offset by gains on our trading securities.

Fair value gains in the first nine months of 2025 were primarily driven by declining interest rates, resulting in gains on fixed-rate trading securities, which were offset by losses on mortgage commitment derivatives, long-term debt of consolidated trusts held at fair value and risk management derivatives.

Fair value losses, net in the third quarter of 2024 were primarily driven by losses on mortgage commitment derivatives, long-term debt of consolidated trusts held at fair value and risk management derivatives, all of which were primarily due to falling interest rates during the third quarter of 2024. These fair value losses were substantially offset by fair value gains on fixed-rate trading securities during the third quarter of 2024, which were also primarily due to falling interest rates during the third quarter of 2024.

Fair value gains, net in the first nine months of 2024 were driven by gains on fixed-rate trading securities and risk management derivatives, partially offset by losses on long-term debt of consolidated trusts held at fair value and mortgage commitment derivatives.

Other Income (Expense), Net (Dollars in millions)

Single-Family

Other expense, net, decreased \$216 million in the third quarter of 2025 compared with the third quarter of 2024, and by \$320 million in the first nine months of 2025 compared with the first nine months of 2024, primarily driven by an increase in debt extinguishment gains as a result of our purchase of single-family Fannie Mae MBS in the third quarter of 2025, as well as a decrease in our single-family foreclosed property expense as a result of a reduction in our REO properties and reduced repair costs.

Multifamily

The shift to other expense, net of \$7 million in the first nine months of 2025 from other income, net of \$228 million in the first nine months of 2024 was primarily driven by a decline in our expected credit enhancement recoveries on multifamily loans. The decrease in estimated credit losses subject to credit enhancements on our multifamily guaranty book of business decreased the amount we expect to receive from our multifamily loss sharing arrangements.

Single-Family Business

This section supplements and updates information regarding our Single-Family business segment in our 2024 Form 10-K. See “MD&A—Single-Family Business” in our 2024 Form 10-K for additional information regarding the primary business activities, lenders, investors and competition of our Single-Family business.

Single-Family Mortgage Market

Total housing activity modestly increased in the third quarter of 2025 compared with the second quarter of 2025. Existing home sales averaged 4.02 million units annualized in the third quarter of 2025, compared with 3.99 million units in the second quarter of 2025, according to data from the National Association of REALTORS®. According to the October forecast from our Economic and Strategic Research Group, new single-family home sales are estimated to average an annualized rate of approximately 692,000 units in the third quarter of 2025, compared with approximately 670,000 units in the second quarter of 2025.

The U.S. weekly average 30-year fixed mortgage rate was 6.30% as of September 25, 2025, compared with 6.77% as of June 26, 2025, and averaged 6.57% in the third quarter of 2025, compared with 6.79% in the second quarter of 2025, according to Freddie Mac’s Primary Mortgage Market Survey®.

Single-family mortgage market originations increased from an estimated \$456 billion in the third quarter of 2024 to an estimated \$493 billion in the third quarter of 2025. According to the October forecast from our Economic and Strategic Research Group, total originations in the U.S. single-family mortgage market in 2025 are forecasted to increase from 2024 levels by approximately 11%, from an estimated \$1.70 trillion in 2024 to \$1.88 trillion in 2025, and the amount of refinance originations in the U.S. single-family mortgage market are forecasted to increase from an estimated \$364 billion in 2024 to \$497 billion in 2025. Our Economic and Strategic Research Group’s October forecast is based on data available as of October 10, 2025. See “Key Market Economic Indicators” in our 2024 Form 10-K and this report for additional discussion of how housing activity can affect our financial results and the uncertainties that may affect our forecasts and expectations.

Single-Family Mortgage-Related Securities Issuances Share

Our single-family Fannie Mae MBS issuances were \$90.1 billion for the third quarter of 2025, compared with \$92.3 billion for the third quarter of 2024. Based on the latest data available, the charts below display our estimated share of single-family mortgage-related securities issuances as compared with that of our primary competitors for the issuance of single-family mortgage-related securities for the periods indicated.

Single-Family Mortgage-Related Securities Issuances Share

Third Quarter of 2024

■ Ginnie Mae
■ Fannie Mae

Third Quarter of 2025

■ Private-label securities
■ Freddie Mac

Our market share is influenced by various factors, including the pricing of single-family loans and the competitive market environment. When making pricing and acquisition decisions for single-family loans, we must consider a mix of often competing factors, such as competitive market dynamics, our capital requirements, our housing mission requirements and UMBS market liquidity objectives. Balancing these considerations can sometimes create challenges that impact our ability to compete effectively in the marketplace. For a discussion of factors that affect or could affect our business, our competitive environment, demand for our MBS, or the liquidity and market value of our MBS, as well as the risks associated with our conservatorship, our higher capital requirements relative to that of our primary competitor, our housing mission requirements, the UMBS market and the performance of our MBS, see “Business—Conservatorship and Treasury Agreements,” “Business—Legislation and Regulation,” “Risk Factors” and “MD&A—Single-Family Business—Single-Family Competition” in our 2024 Form 10-K, as well as “Legislation and Regulation” in our First and Second Quarter 2025 Form 10-Qs and in this report.

Single-Family Business Metrics

Select Business Metrics

The charts below display our average charged guaranty fees, net of TCCA fees, on our single-family conventional guaranty book of business and on new single-family conventional loan acquisitions, along with our average single-family conventional guaranty book of business and our single-family conventional loan acquisitions for the periods presented.

Select Single-Family Business Metrics⁽¹⁾ (Dollars in billions)

⁽¹⁾ For information reported in this “Single-Family Business” section, our single-family conventional guaranty book of business is measured using the unpaid principal balance of our mortgage loans underlying Fannie Mae MBS outstanding.

⁽²⁾ Excludes the impact of a 10 basis point guaranty fee increase implemented pursuant to the TCCA, the incremental revenue from which is paid to Treasury and not retained by us.

⁽³⁾ Our single-family conventional guaranty book of business primarily consists of single-family conventional mortgage loans underlying Fannie Mae MBS outstanding. It also includes single-family conventional mortgage loans of Fannie Mae held in our retained mortgage portfolio, and other credit enhancements that we provide on single-family conventional mortgage assets. Our average single-family conventional guaranty book of business is based on the average of quarter-end balances.

Our single-family conventional loan acquisition volumes remained at low levels in the third quarter of 2025. Housing affordability constraints, limited supply, and market competition continued to put downward pressure on the volume of purchase loans we acquired. In addition, the average 30-year fixed-rate mortgage rate in third quarter of 2025 remained higher than the interest rates of most outstanding single-family loans, resulting in low refinancing volumes.

Average charged guaranty fee on newly acquired conventional single-family loans is a metric management uses to measure the amount we earn as compensation for the credit risk we manage and to assess our return. Average charged guaranty fee represents, on an annualized basis, the average of the base guaranty fees charged during the period for our single-family conventional guaranty arrangements, which we receive monthly over the life of the loan, plus the recognition of any upfront cash payments, including loan-level price adjustments, based on an estimated average life at the time of acquisition.

Our average charged guaranty fee on newly acquired conventional single-family loans, net of TCCA fees increased in the third quarter of 2025 compared with the third quarter of 2024, primarily as a result of a shift in the profile of loans we acquired to loans with higher upfront fees, as well as higher base guaranty fees on new single-family loan acquisitions.

Single-Family Mortgage Credit Risk Management

This section updates our discussion of single-family mortgage credit risk management in our 2024 Form 10-K. For additional information on our single-family acquisition and servicing policies, underwriting and servicing standards, quality control process, repurchase requests, and representation and warranty framework, see “MD&A—Single-Family Business—Single-Family Mortgage Credit Risk Management” in our 2024 Form 10-K.

Single-Family Acquisition and Servicing Policies and Underwriting and Servicing Standards

New Credit Score Models

Fannie Mae uses credit scores to provide a foundation for risk-based pricing, and support disclosures to investors. We currently use the “classic FICO® Score” from Fair Isaac Corporation as our credit score model, which FHFA has approved.

In October 2022, FHFA announced the validation and approval of two new credit score models for use by Fannie Mae and Freddie Mac: the FICO® Score 10T credit score model and the VantageScore® 4.0 credit score model. In July 2025, FHFA announced that Fannie Mae and Freddie Mac are moving forward with an interim phase in the transition to the new credit score models, in which we will permit lenders to deliver mortgage loans using a credit score generated by either the classic FICO Score model or the VantageScore 4.0 model as we continue to work towards full implementation of modernized credit scoring and credit reporting. FHFA also announced that implementation efforts are underway with respect to the FICO 10T credit score model, and that Fannie Mae and Freddie Mac expect to be able to publish historical FICO 10T data and adopt scores from the model at a later date.

We will update our Selling Guide and make additional changes to support the adoption of VantageScore 4.0 in the near future. During the interim phase, we will accept either classic FICO Score or VantageScore 4.0 credit scores on a given loan, but not both. FHFA has advised that the inclusion of VantageScore 4.0 credit scores during the interim phase will not change our current tri-merge credit reporting requirement.

Single-Family Guaranty Book Diversification and Monitoring

The following table displays our single-family conventional business volumes and our single-family conventional guaranty book of business, based on certain key risk characteristics that we use to evaluate the risk profile and credit quality of our single-family loans. For a description of the key risk characteristics of our single-family conventional guaranty book of business, see “MD&A—Single-Family Business—Single-Family Mortgage Credit Risk Management—Single-Family Guaranty Book Diversification and Monitoring—Overview” in our 2024 Form 10-K.

We provide additional information on the credit characteristics of our single-family loans in our quarterly earnings presentations and financial supplements, which we furnish to the Securities and Exchange Commission (the “SEC”) with current reports on Form 8-K and make available on our website. Information in our quarterly earnings presentations and financial supplements is not incorporated by reference into this report.

* Represents less than 0.5% of single-family conventional business volume or guaranty book of business.

- (1) Second-lien mortgage loans held by third parties are not reflected in the original LTV or the estimated mark-to-market LTV ratios in this table.
- (2) Calculated based on the unpaid principal balance of single-family loans for each category at time of acquisition.
- (3) Calculated based on the aggregate unpaid principal balance of single-family loans for each category divided by the aggregate unpaid principal balance of loans in our single-family conventional guaranty book of business as of the end of each period.
- (4) The original LTV ratio generally is based on the original unpaid principal balance of the loan divided by the appraised property value reported to us at the time of acquisition of the loan. Excludes loans for which this information is not readily available.
- (5) The aggregate estimated mark-to-market LTV ratio is based on the unpaid principal balance of the loan as of the end of each reported period divided by the estimated current value of the property, which we calculate using an internal valuation model that estimates periodic changes in home value. Excludes loans for which this information is not readily available.
- (6) Loans with unavailable FICO credit scores represent less than 0.5% of single-family conventional business volume or guaranty book of business, and therefore are not presented separately in this table.
- (7) Excludes loans for which this information is not readily available.
- (8) Long-term fixed-rate consists of mortgage loans with maturities greater than 15 years, while intermediate-term fixed-rate loans have maturities equal to or less than 15 years.
- (9) Midwest consists of IL, IN, IA, MI, MN, NE, ND, OH, SD and WI. Northeast consists of CT, DE, ME, MA, NH, NJ, NY, PA, PR, RI, VT and VI. Southeast consists of AL, DC, FL, GA, KY, MD, MS, NC, SC, TN, VA and WV. Southwest consists of AZ, AR, CO, KS, LA, MO, NM, OK, TX and UT. West consists of AK, CA, GU, HI, ID, MT, NV, OR, WA and WY.

For a discussion of factors that may impact the volume and credit characteristics of loans we acquire in the future, see “MD&A—Single-Family Business—Single-Family Mortgage Credit Risk Management—Single-Family Guaranty Book Diversification and Monitoring” in our 2024 Form 10-K. In this section of our 2024 Form 10-K, we also provide more information on the credit characteristics of loans in our single-family conventional guaranty book of business, including high-balance loans and adjustable-rate mortgages.

Single-Family Credit Enhancement and Transfer of Mortgage Credit Risk

Our charter generally requires credit enhancement on any single-family conventional mortgage loan that we purchase or securitize if it has an LTV ratio over 80% at the time of acquisition. We generally achieve this through primary mortgage insurance. We also enter into various other types of transactions in which we transfer mortgage credit risk to third parties. For a discussion of our exposure to and management of the counterparty credit risk associated with the providers of these credit enhancements, see “MD&A—Risk Management—Institutional Counterparty Credit Risk Management,” “Note 14, Concentrations of Credit Risk” and “Risk Factors—Credit Risk” in our 2024 Form 10-K.

The table below displays information about loans in our single-family conventional guaranty book of business covered by one or more forms of credit enhancement, including mortgage insurance or a credit risk transfer transaction. The risk in force of our back-end credit risk transfer transactions, which refers to the maximum amount of losses that could be absorbed by investors in those transactions, was approximately \$41 billion as of September 30, 2025, compared with approximately \$43 billion as of December 31, 2024. Our mortgage insurance risk in force, which refers to our maximum potential loss recovery under the applicable mortgage insurance policies in force, was approximately \$202 billion as of September 30, 2025 and December 31, 2024.

Single-Family Loans with Credit Enhancement

	As of			
	September 30, 2025		December 31, 2024	
	Unpaid Principal Balance	Percentage of Single-Family Conventional Guaranty Book of Business	Unpaid Principal Balance	Percentage of Single-Family Conventional Guaranty Book of Business
(Dollars in billions)				
Primary mortgage insurance	\$ 758	21 %	\$ 761	21 %
Connecticut Avenue Securities	873	24	850	23
Credit Insurance Risk Transfer	431	12	419	12
Other	29	1	45	1
Less: Loans covered by multiple credit enhancements	(419)	(11)	(408)	(11)
Total single-family loans with credit enhancement	\$ 1,672	47 %	\$ 1,667	46 %

As of September 30, 2025 and December 31, 2024, the loans in our single-family conventional guaranty book of business that were currently without credit enhancement consisted primarily of loans with an LTV ratio less than or equal to 60% or loans with an original maturity of 20 years or less. See "MD&A—Single-Family Business—Single-Family Credit Enhancement and Transfer of Mortgage Credit Risk" in our 2024 Form 10-K for more information about our single-family loans without credit enhancements.

Transfer of Mortgage Credit Risk

In addition to primary mortgage insurance, our Single-Family business has developed other risk-sharing capabilities to transfer portions of our single-family mortgage credit risk to the private market. Our two primary single-family credit risk transfer programs are Connecticut Avenue Securities® ("CAS") and Credit Insurance Risk Transfer™ ("CIRT™"). For a description of our single-family credit risk transfer transactions, see "MD&A—Single-Family Business—Single-Family Mortgage Credit Risk Management—Single-Family Credit Enhancement and Transfer of Mortgage Credit Risk" in our 2024 Form 10-K.

In the first nine months of 2025, we transferred a portion of the mortgage credit risk on single-family mortgage loans with an unpaid principal balance of \$162.6 billion at the time of the transactions.

We provide a portion of the guaranty fee to investors in our credit risk transfer transactions as compensation for their taking on a share of the credit risk of the related loans. We record the substantial majority of expenses related to our credit risk transfer transactions in "Credit enhancement expense" within our condensed consolidated statements of operations and comprehensive income. In the first nine months of 2025, we paid \$1.1 billion in premiums on our outstanding single-family credit risk transfer transactions.

Single-Family Problem Loan Management

Overview

Our problem loan management strategies focus primarily on reducing defaults to avoid losses that would otherwise occur and pursuing foreclosure alternatives to mitigate the severity of the losses we incur. See "MD&A—Single-Family Business—Single-Family Mortgage Credit Risk Management—Single-Family Problem Loan Management" in our 2024 Form 10-K for a discussion of delinquency statistics on our problem loans, efforts undertaken to manage our problem loans, metrics regarding our loan workout activities, real estate owned ("REO") management and other single-family credit-related information. The discussion below updates some of that information. We also provide ongoing credit performance information on loans underlying single-family Fannie Mae MBS and loans covered by single-family credit risk transfer transactions. For loans backing Fannie Mae MBS, see the "Forbearance and Delinquency Dashboard" available in the MBS section of our Data Dynamics® tool, which is available at www.fanniemae.com/datadynamics. For loans covered by credit risk transfer transactions, see the "Deal Performance Data" report available in the CAS and CIRT sections of the tool. Information on our website is not incorporated into this report. Information in Data Dynamics may differ from similar measures presented in our financial statements and other public disclosures for a variety of reasons, including as a result of variations in the loan population covered, timing differences in reporting and other factors.

Delinquency

The tables below display the delinquency status of loans and changes in the volume of seriously delinquent loans in our single-family conventional guaranty book of business based on the number of loans. Single-family seriously delinquent loans are loans that are 90 days or more past due or in the foreclosure process. Our single-family serious delinquency rate is expressed as a percentage of our single-family conventional guaranty book of business based on loan count. Management monitors the single-family serious delinquency rate as an indicator of potential future credit losses and loss mitigation activities. Serious delinquency rates are reflective of our performance in assessing and managing credit risk associated with single-family loans in our guaranty book of business. A higher serious delinquency rate may result in a higher allowance for loan losses.

Delinquency Status and Activity of Single-Family Conventional Loans

	As of		
	September 30, 2025	December 31, 2024	September 30, 2024
Delinquency status:			
30 to 59 days delinquent	1.00 %	1.05 %	1.02 %
60 to 89 days delinquent	0.27	0.29	0.26
Seriously delinquent ("SDQ"):	0.54	0.56	0.52
Percentage of SDQ loans that have been delinquent for more than 180 days	45	41	44
Percentage of SDQ loans that have been delinquent for more than two years	5	5	7
		For the Nine Months Ended September 30,	
		2025	2024
Single-family SDQ loans (number of loans):			
Beginning balance		97,129	96,479
Additions		135,778	128,936
Removals:			
Modifications and other loan workouts		(60,234)	(56,872)
Liquidations and sales		(32,986)	(21,699)
Cured or less than 90 days delinquent		(47,761)	(57,340)
Total removals		(140,981)	(135,911)
Ending balance		91,926	89,504

Our single-family serious delinquency rate as of September 30, 2025 increased by 2 basis points compared with September 30, 2024, but decreased by 2 basis points compared with December 31, 2024, and continues to remain low relative to historic levels. The increase in our single-family serious delinquency rate compared to the prior-year period was primarily driven by higher delinquencies in states impacted by hurricane activity toward the end of 2024, which reached its peak in the first quarter of 2025. For information about factors that affect our single-family serious delinquency rate, see “MD&A—Single-Family Business—Single-Family Mortgage Credit Risk Management—Single-Family Problem Loan Management” in our 2024 Form 10-K. See “Note 11, Concentrations of Credit Risk” and the table below for additional information on the delinquency status and serious delinquency rates for specified loan categories of our single-family conventional guaranty book of business.

The table below displays the serious delinquency rates for, and the percentage of our seriously delinquent single-family conventional loans represented by, the specified loan categories.

Single-Family Conventional Seriously Delinquent Loan Concentration Analysis

	As of								
	September 30, 2025			December 31, 2024			September 30, 2024		
	Percentage of Book Outstanding ⁽¹⁾	Percentage of Seriously Delinquent Loans ⁽²⁾	Serious Delinquency Rate	Percentage of Book Outstanding ⁽¹⁾	Percentage of Seriously Delinquent Loans ⁽²⁾	Serious Delinquency Rate	Percentage of Book Outstanding ⁽¹⁾	Percentage of Seriously Delinquent Loans ⁽²⁾	Serious Delinquency Rate
States:									
California	18 %	9 %	0.43 %	19 %	9 %	0.41 %	19 %	10 %	0.39 %
Florida	6	10	0.81	6	11	0.96	6	9	0.68
Illinois	3	5	0.68	3	5	0.69	3	5	0.66

60.01% to 70%	11	14	0.92	12	14	0.94	12	14	0.83
70.01% to 80%	10	10	0.81	10	10	0.85	10	9	0.74
80.01% to 90%	7	7	0.94	6	6	0.97	5	6	0.85
90.01% to 100%	4	3	0.87	3	3	0.77	3	2	0.62
Greater than 100%	*	*	3.46	*	*	2.82	*	*	3.43
Credit enhanced:⁽³⁾									
Primary MI & other ⁽⁴⁾	21	35	1.16	21	34	1.17	21	33	1.05
Credit risk transfer ⁽⁵⁾	37	32	0.57	36	32	0.61	37	31	0.52
Non-credit enhanced	53	49	0.42	54	49	0.44	54	50	0.42

* Represents less than 0.5% of single-family conventional guaranty book of business.

(1) Percentage of book amounts represent the unpaid principal balance of loans for each category divided by the unpaid principal balance of our total single-family conventional guaranty book of business.

(2) Calculated based on the number of single-family loans that were seriously delinquent for each category divided by the total number of single-family conventional loans that were seriously delinquent.

(3) The credit-enhanced categories are not mutually exclusive. A loan with primary mortgage insurance that is also covered by a credit risk transfer transaction will be included in both the "Primary MI & other" category and the "Credit risk transfer" category. As a result, the "Credit enhanced" and "Non-credit enhanced" categories do not sum to 100%. The total percentage of our single-family conventional guaranty book of business with some form of credit enhancement as of September 30, 2025 was 47%.

(4) Refers to loans included in an agreement used to reduce credit risk by requiring primary mortgage insurance, collateral, letters of credit, corporate guarantees, or other agreements to provide an entity with some assurance that it will be compensated to some degree in the event of a financial loss. Excludes loans covered by credit risk transfer transactions unless such loans are also covered by primary mortgage insurance.

(5) Refers to loans included in reference pools for credit risk transfer transactions, including loans in these transactions that are also covered by primary mortgage insurance. For CAS and some lender risk-sharing transactions, this represents the outstanding unpaid principal balance of the underlying loans on the single-family mortgage credit book, not the outstanding reference pool, as of the specified date.

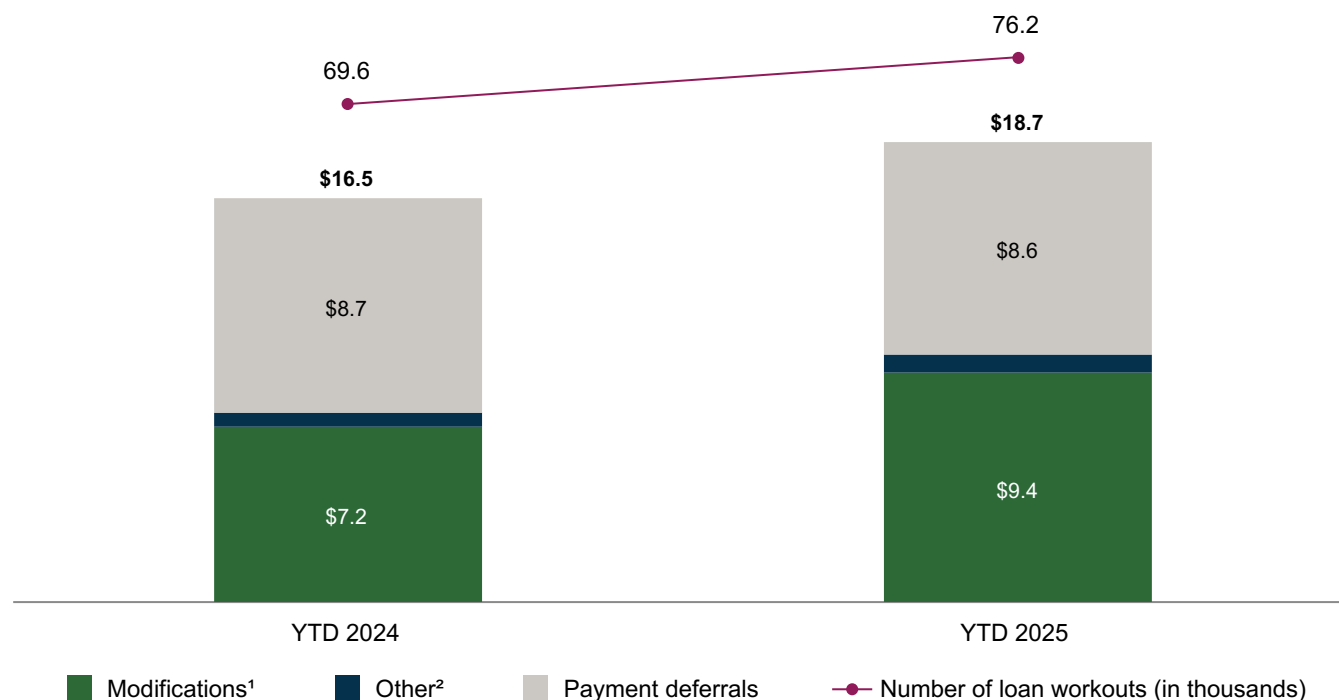

Forbearance Plans and Loan Workouts

As a part of our credit risk management efforts, we offer several types of loss mitigation options to help homeowners stay in their home or to otherwise avoid foreclosure. Loss mitigation options can consist of a forbearance plan or a loan workout. Our loan workouts reflect additional types of home retention solutions that help reinstate loans to current status, including repayment plans, payment deferrals, and loan modifications. Our loan workouts also include foreclosure alternatives, such as short sales and deeds-in-lieu of foreclosure.

As of September 30, 2025, the unpaid principal balance of single-family loans in forbearance was \$5.2 billion, or 0.1% of our single-family conventional guaranty book of business, compared with \$8.0 billion, or 0.2% of our single-family conventional guaranty book of business, as of December 31, 2024.

The chart below displays the unpaid principal balance of our completed single-family loan workouts by type, as well as the number of loan workouts. This table does not include loans in an active forbearance arrangement, trial modifications, and repayment plans that have been initiated but not completed.

Completed Loan Workout Activity (Dollars in billions)

⁽¹⁾ Excludes approximately 22,300 loans and 17,500 loans in a trial modification period that was not yet complete as of September 30, 2025 and 2024, respectively.

⁽²⁾ Other was \$714 million and \$578 million for the first nine months of 2025 and the first nine months of 2024, respectively. Other includes repayment plans and foreclosure alternatives. Repayment plans reflect only those plans associated with loans that were 60 days or more delinquent at the execution of the plan.

Single-Family REO Management

If a loan defaults, we may acquire the property through foreclosure or a deed-in-lieu of foreclosure. The table below displays our REO activity by region. Regional REO acquisition trends generally follow a pattern that is similar to, but lags, that of regional delinquency trends.

Single-Family REO Properties

	For the Nine Months Ended September 30,	
	2025	2024
Single-family REO properties (number of properties):		
Beginning of period inventory of single-family REO properties ⁽¹⁾	5,895	8,403
Acquisitions by geographic area:⁽²⁾		
Midwest	517	702
Northeast	252	389
Southeast	556	491
Southwest	556	461
West	268	271
Total REO acquisitions ⁽¹⁾	2,149	2,314
Dispositions of REO	(3,548)	(4,236)
End of period inventory of single-family REO properties ⁽¹⁾	4,496	6,481
Carrying value of single-family REO properties (dollars in millions)	\$ 831	\$ 1,157
Single-family foreclosure rate ⁽³⁾	0.02 %	0.02 %
REO net sales price to unpaid principal balance ⁽⁴⁾	140 %	142 %
REO net sales price to unpaid principal balance and costs to repair ⁽⁵⁾	82 %	91 %
Short sales net sales price to unpaid principal balance ⁽⁶⁾	84 %	90 %

(1) Consists of held-for sale and held-for-use properties, which are reported in our condensed consolidated balance sheets as a component of "Other assets."

(2) See footnote 9 to the "Key Risk Characteristics of Single-Family Conventional Business Volume and Guaranty Book of Business" table for states included in each geographic region.

(3) Estimated based on the annualized total number of properties acquired through foreclosure or deeds-in-lieu of foreclosure as a percentage of the total number of loans in our single-family conventional guaranty book of business as of the end of each period.

(4) Calculated as the amount of sale proceeds received on disposition of REO properties during the respective periods, excluding those subject to repurchase requests made to our sellers or servicers, divided by the aggregate unpaid principal balance of the related loans at the time of foreclosure. Net sales price represents the contract sales price less selling costs for the property and other charges paid by the seller at closing, and excludes the costs associated with any property repairs.

(5) Calculated as the amount of sale proceeds received on disposition of REO properties during the respective periods, excluding those subject to repurchase requests made to our sellers or servicers, divided by the aggregate unpaid principal balance of the related loans at the time of foreclosure and costs to repair the property. Net sales price represents the contract sales price less selling costs for the property and other charges paid by the seller at closing.

(6) Calculated as the amount of sale proceeds received on properties sold in short sale transactions during the respective periods divided by the aggregate unpaid principal balance of the related loans. Net sales price includes borrower relocation incentive payments and subordinate lien(s) negotiated payoffs.

Our REO net sales price to unpaid principal balance, excluding costs to repair, remained elevated at 140% for the first nine months of 2025 compared to 142% for the first nine months of 2024. As a result of our previous approach to REO repairs, we made investments in the condition of properties, resulting in higher selling prices relative to the balance of the loans. When considering these costs to repair, our REO net sales price to unpaid principal balance was 82% for the first nine months of 2025 compared with 91% for the first nine months of 2024. In March 2025, FHFA directed us to revise our approach to repairing REO properties. We expect our revised approach will result in lower costs to repair REO properties than we would have incurred under our prior approach.

Single-Family Credit Loss Performance Metrics and Loan Sale Performance

The single-family credit loss performance metrics and loan sale performance measures below present information about losses or gains we realized on our single-family loans during the periods presented. For the purposes of our single-family credit loss performance metrics, credit losses or gains represent write-offs net of recoveries and foreclosed property income or expense. The amount of these losses or gains in a given period is driven by foreclosures, pre-

foreclosure sales, post-foreclosure REO activity, mortgage loan redesignations, and other events that trigger write-offs and recoveries. The single-family credit loss metrics we present are not defined terms and may not be calculated in the same manner as similarly titled measures reported by other companies. Management uses these measures to evaluate the effectiveness of our single-family credit risk management strategies in conjunction with leading indicators such as serious delinquency and forbearance rates, which are potential indicators of future realized single-family credit losses. We believe these measures provide useful information about our single-family credit performance and the factors that impact it.

The table below displays the components of our single-family credit loss performance metrics. Because sales of nonperforming and reperforming loans are a part of our credit loss mitigation strategy, we also provide information in the table below on our loan sale performance through the “Gains (losses) on sales and other valuation adjustments” line item.

Single-Family Credit Loss Performance Metrics and Loan Sale Performance

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2025	2024	2025	2024
	(Dollars in millions)			
Write-offs	\$ (143)	\$ (135)	\$ (407)	\$ (357)
Recoveries	48	25	134	184
Foreclosed property income (expense)	(43)	(102)	(198)	(294)
Credit gains (losses)	(138)	(212)	(471)	(467)
Write-offs on the redesignation of mortgage loans from HFI to HFS ⁽¹⁾	(97)	(101)	(187)	(139)
Net credit gains (losses) and write-offs on redesignations	(235)	(313)	(658)	(606)
Gains (losses) on sales and other valuation adjustments ⁽²⁾	(2)	3	(14)	(13)
Net credit gains (losses), write-offs on redesignations and gains (losses) on sales and other valuation adjustments	\$ (237)	\$ (310)	\$ (672)	\$ (619)
Credit gain (loss) ratio (in bps) ⁽³⁾	(1.5)	(2.3)	(1.7)	(1.7)
Net credit gains (losses), write-offs on redesignations and gains (losses) on sales and other valuation adjustments ratio (in bps) ⁽⁴⁾	(2.6)	(3.4)	(2.5)	(2.3)

⁽¹⁾ Consists of the lower of cost or fair value adjustment at time of redesignation.

⁽²⁾ Consists of gains or losses realized on the sales of nonperforming and reperforming mortgage loans during the period and temporary lower-of-cost-or-market adjustments on HFS loans, which are recognized in “Investment gains (losses), net” in our condensed consolidated statements of operations and comprehensive income.

⁽³⁾ Calculated based on the annualized amount of “Credit gains (losses)” divided by the average single-family conventional guaranty book of business during the period.

⁽⁴⁾ Calculated based on the annualized amount of “Net credit gains (losses), write-offs on redesignations and gains (losses) on sales and other valuation adjustments” divided by the average single-family conventional guaranty book of business during the period.

Multifamily Business

This section supplements and updates information regarding our Multifamily business segment in our 2024 Form 10-K. See “MD&A—Multifamily Business” in our 2024 Form 10-K for additional information regarding the primary business activities, lenders, investors and competition of our Multifamily business.

LIHTC Investment Limit Increase

We make equity investments in low income housing tax credit (“LIHTC”) partnerships that support the creation and preservation of affordable rental housing units throughout the country, as described in our 2024 Form 10-K in “MD&A—Multifamily Business—Multifamily Primary Business Activities—Multifamily Activities Supporting Affordable Rental Housing—Equity Investments in Low Income Housing Tax Credit Projects.” On August 5, 2025, FHFA doubled our annual LIHTC investment limit from \$1 billion to \$2 billion. The increase in the LIHTC investment limit enables us to expand support for Duty to Serve-designated rural areas by directing additional equity capital to underserved and rural communities, enhancing affordable housing development in areas with limited access to traditional financing.

Multifamily Mortgage Market

The multifamily market saw rental demand slow moderately along with continued elevated levels of new supply entering markets in the third quarter of 2025. Modestly decreasing interest rates were associated with an increase in multifamily property sales transactions, but property valuations declined slightly during the quarter.

- *Vacancy rates.* Based on preliminary data from Moody’s Analytics, the national multifamily vacancy rate for institutional investment-type apartment properties remained steady at around 6.5% as of September 30, 2025, compared with 6.5% as of June 30, 2025, and up from 6.1% as of September 30, 2024. The estimated average national multifamily vacancy rate over the last 15 years is approximately 5.1%.
- *Rents.* Based on preliminary Moody’s Analytics data, effective rents decreased approximately 0.1% during the third quarter of 2025, compared to increases of 0.8% during the second quarter of 2025 and 0.5% during the third quarter of 2024. Effective rents have increased 1.2% from the third quarter of 2024.
- *Absorption.* Absorption of new and existing multifamily rental units declined in the third quarter of 2025. Based on preliminary Moody’s Analytics data, absorption for the three-months ended August 2025 declined 33% compared with the three-months ended May 2025 and 39% compared with the three-months ended August 2024.
- *Property sales volumes.* Based on preliminary MSCI RCA data, multifamily property sales for the first nine months of 2025 were \$111.2 billion, higher than the volume during the same period in 2024, but remaining below the 2015 to 2019 average levels of \$117 billion for the first three quarters of the year.
- *Property values.* According to data from the MSCI RCA Commercial Property Price Index (“RCA CPPI™”), multifamily property values declined 19% from their peak in the second quarter of 2022 to the third quarter of 2025. Property values decreased less than 1% from the second quarter to the third quarter of 2025.

Vacancy rates and rents are important to loan performance because multifamily loans are generally repaid from the cash flows generated by the underlying property. Several years of strong property fundamentals, low vacancy rates and rising rents helped to increase property values in most metropolitan areas, but that rent growth and vacancy rate trend reversed starting in early 2023.

We estimate that more than 600,000 multifamily rental units were delivered to the U.S. housing market in 2024, which is well above the past 10-year average of 409,000 units delivered annually. Additionally, there were approximately 817,000 multifamily rental units underway as of August 2025, and based on recent historical trends we expect between 450,000 and 500,000 units will be completed in 2025.

Despite elevated levels of new supply, we expect vacancy rates will remain generally steady for the remainder of 2025, and we expect cumulative rent growth below 2.0% for the year if renter household formation continues at its recent pace and elevated single-family housing prices in many places continue to keep a number of tenants renting longer. If job growth slows substantially, lower demand could push up vacancies and limit rent growth potential.

Property value is important to credit quality because when a multifamily loan matures, a borrower may be required to make up any value shortfalls if the value estimate has declined below the unpaid principal balance and the borrower needs new financing for the property. A borrower may default on its loan if the unpaid principal balance of the loan is significantly higher than the current property value.

Multifamily property capitalization rates, the indicated rate of return on investment for commercial properties sold during the quarter, were estimated at 5.6% in the third quarter of 2025, up slightly from the second quarter of 2025, but the same level as in the third quarter of 2024. Multifamily capitalization rates increased substantially between the first

quarter of 2022 and 2024 but have averaged around 5.5% since then, with the spread between multifamily capitalization rates and 10-year Treasury rates, which is an important consideration for commercial real estate investors, remaining significantly narrower than the spread that was observed prior to 2022.

Multifamily Business Metrics

Multifamily New Business Volume

The chart below displays our new multifamily loan acquisitions by unpaid principal balance and number of units financed.

Multifamily New Business Volume (Dollars in billions)

⁽¹⁾ Reflects unpaid principal balance of new multifamily loans securitized or purchased as well as credit enhancements provided during the period. These figures will not agree to Fannie Mae MBS issued during the period, as Fannie Mae MBS issued also include portfolio securitizations and certain conversions that result in a new Fannie Mae MBS issuance without a newly created loan and exclude bond or mortgage loan credit enhancements.

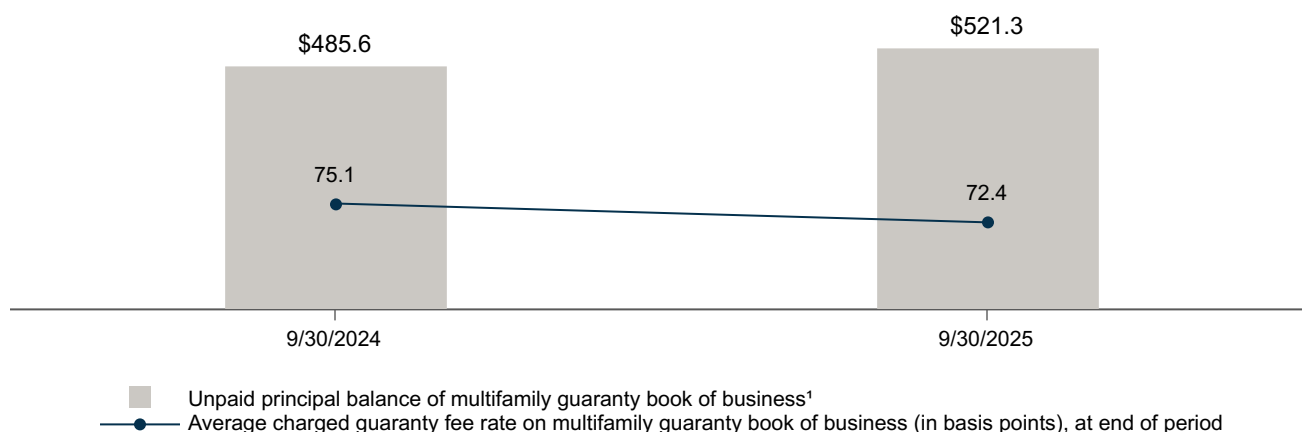

⁽²⁾ Reflects new units financed by first liens and excludes manufactured housing rentals.

Multifamily business volumes increased by 47% in the first nine months of 2025 compared with the first nine months of 2024, primarily reflecting increased market activity. For 2025, FHFA has capped our multifamily loan purchases at \$73 billion. FHFA has exempted from the volume cap loans financing workforce housing properties meeting specified criteria that preserve long-term affordability for the properties.

Multifamily Guaranty Book of Business and Average Charged Guaranty Fee

The chart below displays the unpaid principal balance and average charged guaranty fee related to our multifamily guaranty book of business.

Multifamily Guaranty Book of Business and Charged Fee (Dollars in billions)

⁽¹⁾ Our multifamily guaranty book of business primarily consists of multifamily mortgage loans underlying Fannie Mae MBS outstanding, multifamily mortgage loans of Fannie Mae held in our retained mortgage portfolio, and other credit enhancements that we provide on multifamily mortgage assets. It does not include non-Fannie Mae multifamily mortgage-related securities held in our retained mortgage portfolio for which we do not provide a guaranty.

Our multifamily guaranty book of business grew to \$521.3 billion as of September 30, 2025, a 7.3% increase from September 30, 2024. The average charged guaranty fee on our multifamily guaranty book of business decreased 2.7 bps as of September 30, 2025 compared with September 30, 2024, due to lower average charged fees on our acquisitions for the fourth quarter of 2024 and the first nine months of 2025 as compared with loans in our multifamily guaranty book of business as of September 30, 2024. For additional information regarding our average charged guaranty fee, see “MD&A—Multifamily Business—Multifamily Business Metrics—Multifamily Guaranty Book of Business and Average Charged Guaranty Fee” in our 2024 Form 10-K.

Multifamily Mortgage Credit Risk Management

This section supplements and updates our discussion of multifamily mortgage credit risk management in our 2024 Form 10-K in “MD&A—Multifamily Business—Multifamily Mortgage Credit Risk Management.” For additional information on the primary components of our strategy for managing multifamily credit risk, the factors that influence the credit risk profile of our multifamily guaranty book of business, our multifamily acquisition policy and underwriting standards, our multifamily guaranty book diversification and monitoring, and our transfer of multifamily mortgage credit risk, as well as our reliance on representations from lenders and servicers regarding the accuracy of credit information on loans in our guaranty book of business, see the discussion in our 2024 Form 10-K.

Multifamily Guaranty Book Diversification and Monitoring

The following table displays our multifamily business volumes and our multifamily guaranty book of business, based on certain key risk characteristics that we use to evaluate the risk profile and credit quality of our multifamily loans. For additional information on our multifamily guaranty book diversification and monitoring see “MD&A—Multifamily Business—Multifamily Mortgage Credit Risk Management—Multifamily Guaranty Book Diversification and Monitoring” in our 2024 Form 10-K.

We provide additional information on the credit characteristics of our multifamily loans in our quarterly earnings presentations and financial supplements, which we furnish to the SEC with current reports on Form 8-K and make available on our website. Information in our quarterly earnings presentations and financial supplements is not incorporated by reference into this report.

Key Risk Characteristics of Multifamily Business Volume and Guaranty Book of Business

	Multifamily Business Volume at Acquisition ⁽¹⁾				Multifamily Guaranty Book of Business ⁽²⁾

Total	100 %	100 %	100 %	100 %	100 %	100 %

* Represents less than 0.5% of multifamily business volume or guaranty book of business.

⁽¹⁾ Calculated based on the unpaid principal balance of multifamily loans for each category divided by the aggregate unpaid principal balance at time of acquisition, excluding small balance loans which is calculated based on loan count rather than unpaid principal balance.

- (2) Calculated based on the aggregate unpaid principal balance of multifamily loans for each category divided by the aggregate unpaid principal balance of loans in our multifamily guaranty book of business as of the end of each period, excluding small balance loans which is calculated based on loan count rather than unpaid principal balance.
- (3) For our business volumes, the DSCR is calculated using the actual debt service payments for the loan. For our book of business, our estimates of current DSCRs are based on the latest available income information, including the related debt service covering a 12-month period, from quarterly and annual statements for these properties. When an annual statement is the latest statement available, it is used. When operating statement information is not available, the underwritten DSCR is used. Co-op loans are excluded from this metric.
- (4) Consists of mortgage loans that were underwritten with an interest-only term, regardless of whether the loan is currently in its interest-only period.
- (5) Represents Multifamily Affordable Housing (“MAH”) loans, which are defined as financing for properties that are under an agreement that provides long-term affordability, such as properties with rent subsidies or income restrictions. MAH loans are included within the asset class categories referenced above.
- (6) Small balance loans refer to multifamily loans with an original unpaid principal balance of up to \$9 million. Small balance loans are included within the asset class categories referenced above. We present this metric in the table based on loan count rather than unpaid principal balance. Small balance loans comprised 10% of our multifamily guaranty book of business as of both September 30, 2025 and December 31, 2024, based on unpaid principal balance of the loans.
- (7) Midwest consists of IL, IN, IA, MI, MN, NE, ND, OH, SD and WI. Northeast consists of CT, DE, ME, MA, NH, NJ, NY, PA, PR, RI, VT and VI. Southeast consists of AL, DC, FL, GA, KY, MD, MS, NC, SC, TN, VA and WV. Southwest consists of AZ, AR, CO, KS, LA, MO, NM, OK, TX and UT. West consists of AK, CA, GU, HI, ID, MT, NV, OR, WA and WY.

Multifamily Transfer of Mortgage Credit Risk

Front-End Credit Risk Sharing

We primarily transfer credit risk on the multifamily loans we guarantee through our Delegated Underwriting and Servicing (“DUS[®]”) program, which delegates to DUS lenders the ability to underwrite and service multifamily loans, in accordance with our standards and requirements. Loans serviced by DUS lenders and their affiliates represented substantially all of our multifamily guaranty book of business as of September 30, 2025 and December 31, 2024. See “MD&A—Multifamily Business—Multifamily Mortgage Credit Risk Management—Multifamily Transfer of Mortgage Credit Risk” in our 2024 Form 10-K for a description of our DUS program.

Back-End Credit Risk Sharing

To complement our DUS front-end lender-risk sharing program, we also engage in back-end credit risk transfer transactions through our Multifamily CIRT[™] (“MCIRT[™]”) and Multifamily Connecticut Avenue Securities[®] (“MCAS[™]”) programs. Our back-end MCIRT and MCAS credit risk transfer programs transfer a portion of the credit risk associated with a reference pool of multifamily mortgage loans to insurers, reinsurers, or investors. During the first nine months of 2025, we entered into two multifamily credit risk transfer transactions through our MCIRT and MCAS programs.

The table below displays the total unpaid principal balance of multifamily loans and the percentage of our multifamily guaranty book of business, based on unpaid principal balance, that is covered by a back-end credit risk transfer transaction. The table does not reflect front-end lender risk-sharing arrangements, as only a small portion of our multifamily guaranty book of business is not covered by these arrangements.

Multifamily Loans in Back-End Credit Risk Transfer Transactions

	As of			
	September 30, 2025		December 31, 2024	
	Unpaid Principal Balance	Percentage of Multifamily Guaranty Book of Business	Unpaid Principal Balance	Percentage of Multifamily Guaranty Book of Business
	(Dollars in millions)			
MCIRT	\$ 107,712	21 %	\$ 101,181	20 %
MCAS	67,929	13	56,142	11
Total	\$ 175,641	34 %	\$ 157,323	31 %

Multifamily Problem Loan Management

Credit Performance Statistics on Multifamily Problem Loans

The percentage of loans in our multifamily guaranty book of business that were criticized was 6% as of September 30, 2025, compared with 7% as of December 31, 2024. Our criticized loan population remains elevated, reflecting the continued impact of the high interest rate environment on adjustable-rate mortgages. The criticized loans category substantially consists of loans classified as “Substandard” and also includes loans classified as “Special Mention” or “Doubtful.” Substandard loans are loans that have a well-defined weakness that could impact their timely full repayment. While the majority of the substandard loans in our multifamily guaranty book of business are currently making timely payments, we continue to monitor the performance of our substandard loan population. For more information on our credit quality indicators, including our population of substandard loans, see “Note 4, Mortgage Loans.”

Our multifamily serious delinquency rate increased to 0.68% as of September 30, 2025, compared with 0.57% as of December 31, 2024. The new entrants to the seriously delinquent population consisted primarily of fixed-rate conventional loans. The impact of these new entrants was partially offset by the foreclosure of the remaining loans in a specific seniors housing portfolio that was written off in 2023. Our multifamily serious delinquency rate consists of multifamily loans that were 60 days or more past due based on unpaid principal balance, expressed as a percentage of our multifamily guaranty book of business.

Management monitors the multifamily serious delinquency rate as an indicator of potential future credit losses and loss mitigation activities. Serious delinquency rates are reflective of our performance in assessing and managing credit risk associated with multifamily loans in our guaranty book of business. A higher serious delinquency rate may result in a higher allowance for loan losses. The percentage of loans in our multifamily guaranty book of business that were 180 days or more delinquent was 0.51% as of September 30, 2025, compared with 0.44% as of December 31, 2024.

In addition to the credit performance information on our multifamily loans provided in this report, we provide additional information about the performance of our multifamily loans that back MBS and whole loan REMICs in the “Data Collections” section of our DUS Disclose® tool, available at www.fanniemae.com/dusdisclose. Information on our website is not incorporated into this report. Information in Data Collections may differ from similar measures presented in our financial statements and other public disclosures for a variety of reasons, including as a result of variations in the loan population covered, timing differences in reporting and other factors.

Multifamily REO Management

As of September 30, 2025, we held 188 multifamily REO properties with a carrying value of \$1.0 billion, compared with 139 properties with a carrying value of \$638 million as of December 31, 2024. The increase in foreclosure activity was primarily driven by the remaining properties from a specific seniors housing portfolio that was written off in 2023.

Multifamily Credit Loss Performance Metrics

The amount of multifamily credit losses or gains we realize in a given period is driven by foreclosures, pre-foreclosure sales, post-foreclosure REO activity and other events that trigger write-offs and recoveries. Our multifamily credit loss performance metrics are not defined terms and may not be calculated in the same manner as similarly titled measures reported by other companies. For the purposes of our multifamily credit loss performance metrics, credit losses or gains represent write-offs net of recoveries and foreclosed property income or expense. We believe our multifamily credit losses, and our multifamily credit losses net of freestanding loss-sharing arrangements, provide useful information about our multifamily credit performance because they display our multifamily credit losses in the context of our multifamily guaranty book of business, including changes to the benefit we expect to receive from loss-sharing arrangements. Management views multifamily credit losses, net of freestanding loss-sharing arrangements, as a key metric related to our multifamily business model and our strategy to share multifamily credit risk.

The table below displays the components of our multifamily credit loss performance metrics, as well as our multifamily initial write-off severity rate and write-off loan count.

Multifamily Credit Loss Performance Metrics

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2025	2024	2025	2024
	(Dollars in millions)			
Write-offs ⁽¹⁾	\$ (167)	\$ (224)	\$ (350)	\$ (395)
Recoveries	25	48	86	81
Foreclosed property income (expense)	(19)	(47)	(109)	(92)
Credit gains (losses)	(161)	(223)	(373)	(406)
Change in expected benefits from freestanding loss-sharing arrangements ⁽²⁾	60	56	125	109
Credit gains (losses), net of freestanding loss-sharing arrangements	\$ (101)	\$ (167)	\$ (248)	\$ (297)
Credit gain (loss) ratio (in bps) ⁽³⁾	(12.5)	(18.5)	(9.8)	(11.3)
Credit gain (loss) ratio, net of freestanding loss-sharing arrangements (in bps) ⁽²⁾⁽³⁾	(7.8)	(13.8)	(6.5)	(8.3)
Multifamily initial write-off severity rate on liquidated loans ⁽⁴⁾⁽⁵⁾	22.2 %	16.3 %	26.0 %	21.1 %
Multifamily write-off loan count on liquidated loans ⁽⁶⁾	23	5	55	16

⁽¹⁾ Represents write-offs at a liquidation event, which includes foreclosure, a deed-in-lieu of foreclosure or a short-sale, as well as write-offs prior to a liquidation event. Write-offs associated with non-REO sales are net of loss sharing.

⁽²⁾ Represents changes to the benefit we expect to receive only from write-offs as a result of certain freestanding loss-sharing arrangements, primarily multifamily DUS lender risk-sharing transactions. Changes to the expected benefits we will receive are recorded in "Other income (expense), net" in our condensed consolidated statements of operations and comprehensive income.

⁽³⁾ Calculated based on the annualized amount of "Credit gains (losses)" and "Credit gains (losses), net of freestanding loss-sharing arrangements," divided by the average multifamily guaranty book of business during the period.

⁽⁴⁾ Rate is calculated as the initial write-off amount divided by the unpaid principal balance of the loans written off.

⁽⁵⁾ Based on write-offs associated with a liquidation event. The rate excludes any costs, gains or losses associated with REO after initial acquisition through final disposition. The rate also excludes write-offs when a loan is determined to be uncollectible prior to a liquidation event. Write-offs are net of lender loss-sharing agreements.

⁽⁶⁾ Represents the number of loans that experienced write-offs associated with a liquidation event during the period.

Consolidated Credit Ratios and Select Credit Information

The table below displays select credit ratios on our single-family conventional guaranty book of business and our multifamily guaranty book of business, as well as the inputs used in calculating these ratios.

Consolidated Credit Ratios and Select Credit Information

	As of					
	September 30, 2025			December 31, 2024		
	Single-Family	Multifamily	Consolidated Total	Single-Family	Multifamily	Consolidated Total
	(Dollars in millions)					
Credit loss reserves as a percentage of:						
Guaranty book of business	0.16 %	0.46 %	0.20 %	0.15 %	0.48 %	0.19 %
Nonaccrual loans at amortized cost	22.33	83.38	28.39	19.95	95.27	26.43
Nonaccrual loans as a percentage of:						
Guaranty book of business	0.73 %	0.56 %	0.71 %	0.74 %	0.50 %	0.71 %
Select financial information used in calculating credit ratios:						
Credit loss reserves ⁽¹⁾	\$ (5,866)	\$ (2,413)	\$ (8,279)	\$ (5,332)	\$ (2,398)	\$ (7,730)
Guaranty book of business ⁽²⁾	3,584,937	521,323	4,106,260	3,617,267	499,652	4,116,919
Nonaccrual loans at amortized cost	26,271	2,894	29,165	26,728	2,517	29,245

⁽¹⁾ Credit loss reserves are comprised of our allowance for loan losses, allowance for accrued interest receivable, and reserve for guaranty losses.

⁽²⁾ Guaranty book of business is as of period end. For single-family, represents the conventional guaranty book of business.

Write-offs, net of recoveries	\$ 460	\$ 264	\$ 724	\$ 312	\$ 314	\$ 626
Average guaranty book of business ⁽²⁾	\$ 3,599,040	\$ 509,068	\$ 4,108,108	\$ 3,628,443	\$ 478,264	\$ 4,106,707

⁽¹⁾ Represents write-offs when a loan is determined to be uncollectible. For single-family, also includes any write-offs upon the redesignation of mortgage loans from HFI to HFS.

⁽²⁾ Average guaranty book of business is based on the average of quarter-end balances.

Liquidity and Capital Management

Liquidity Management

This section supplements and updates information regarding liquidity management in our 2024 Form 10-K. See “MD&A—Liquidity and Capital Management—Liquidity Management” in our 2024 Form 10-K for additional information, including discussions of our primary sources and uses of funds, our liquidity risk management practices and contingency planning, our liquidity requirements, factors that influence our debt funding activity, factors that may impact our access to or the cost of our debt funding and factors that could adversely affect our liquidity and funding. As of September 30, 2025, we were in compliance with all four components of the liquidity requirements outlined in our 2024 Form 10-K. Also see “Risk Factors—Liquidity Risk” in our 2024 Form 10-K for a discussion of liquidity risks.

Debt Funding

The unpaid principal balance of our aggregate indebtedness was \$129.2 billion as of September 30, 2025. Pursuant to the terms of the senior preferred stock purchase agreement with Treasury, we are prohibited from issuing debt without the prior consent of Treasury if it would result in our aggregate indebtedness exceeding our outstanding debt limit, which

is set to \$270 billion. The calculation of our indebtedness for purposes of complying with our debt limit reflects the unpaid principal balance and excludes debt basis adjustments and debt of consolidated trusts.

Outstanding Debt

Total outstanding debt of Fannie Mae includes short-term and long-term debt and excludes debt of consolidated trusts. Short-term debt of Fannie Mae consists of borrowings with an original contractual maturity of one year or less and, therefore, does not include the current portion of long-term debt. Long-term debt of Fannie Mae consists of borrowings with an original contractual maturity of greater than one year.

The following chart and table display information on our outstanding short-term and long-term debt based on original contractual maturity. Our outstanding debt decreased in the first nine months of 2025 as our funding needs were primarily satisfied by earnings retained from our operations.

Debt of Fannie Mae⁽¹⁾ (Dollars in billions)

⁽¹⁾ Outstanding debt balance consists of the unpaid principal balance, premiums and discounts, fair value adjustments, hedge-related basis adjustments and other cost basis adjustments. Reported amounts include net discount unamortized cost basis adjustments and fair value adjustments of \$2.8 billion and \$3.7 billion as of September 30, 2025 and December 31, 2024, respectively.

Selected Debt Information

	As of	
	September 30, 2025	December 31, 2024
	(Dollars in billions)	
Selected Weighted-Average Interest Rates⁽¹⁾		
Interest rate on short-term debt	4.16 %	4.33 %
Interest rate on long-term debt, including portion maturing within one year	3.87	3.30
Interest rate on callable debt	3.58	2.83
Selected Maturity Data		
Weighted-average maturity of debt maturing within one year (in days)	150	160
Weighted-average maturity of debt maturing in more than one year (in months)	44	43
Other Data		
Outstanding callable debt ⁽²⁾	\$ 34.0	\$ 41.0
Connecticut Avenue Securities debt ⁽³⁾	1.5	2.1

- (1) Excludes the effects of fair value adjustments and hedge-related basis adjustments.
- (2) Includes no short-term callable debt as of September 30, 2025 and \$95 million in short-term callable debt as of December 31, 2024.
- (3) Represents CAS debt issued prior to November 2018. See “MD&A—Single-Family Business—Single-Family Mortgage Credit Risk Management—Single-Family Credit Enhancement and Transfer of Mortgage Credit Risk—Credit Risk Transfer Transactions” in our 2024 Form 10-K for information regarding our Connecticut Avenue Securities®.

We intend to repay our short-term and long-term debt obligations as they become due primarily through cash from business operations, the sale of assets in our corporate liquidity portfolio and the issuance of additional debt securities.

For information on the maturity profile of our outstanding long-term debt, see “Note 8, Short-Term and Long-Term Debt” in this report and in our 2024 Form 10-K.

Debt Funding Activity

The table below displays activity in debt of Fannie Mae. This activity excludes the debt of consolidated trusts and intraday borrowing. The reported amounts of debt issued and paid off during each period represent the face amount of the debt at issuance and redemption.

Activity in Debt of Fannie Mae

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2025	2024	2025	2024
	(Dollars in millions)			
Issued during the period:				
Short-term:				
Amount	\$ 103,018	\$ 54,196	\$ 280,878	\$ 195,354
Weighted-average interest rate	4.20 %	5.21 %	4.23 %	5.27 %
Long-term:				
Amount	\$ 8,344	\$ 13,605	\$ 18,667	\$ 23,462
Weighted-average interest rate	3.91 %	5.22 %	4.35 %	5.19 %
Total issued:				
Amount	\$ 111,362	\$ 67,801	\$ 299,545	\$ 218,816
Weighted-average interest rate	4.18 %	5.21 %	4.24 %	5.26 %
Paid off during the period:⁽¹⁾				
Short-term:				
Amount	\$ 94,149	\$ 54,804	\$ 272,097	\$ 201,263
Weighted-average interest rate	4.00 %	4.69 %	4.13 %	4.73 %
Long-term: ⁽²⁾				
Amount	\$ 19,280	\$ 10,600	\$ 41,384	\$ 20,558
Weighted-average interest rate	2.00 %	2.88 %	2.25 %	3.20 %
Total paid off:				
Amount	\$ 113,429	\$ 65,404	\$ 313,481	\$ 221,821
Weighted-average interest rate	3.66 %	4.40 %	3.88 %	4.59 %

- (1) Consists of all payments on debt, including regularly scheduled principal payments, payments at maturity, payments resulting from calls and payments for any other repurchases. Repurchases of debt and early retirements of zero-coupon debt are reported at original face value, which does not equal the amount of actual cash payment.
- (2) Includes credit risk-sharing securities issued as CAS debt prior to November 2018. For information on our credit risk transfer transactions, see “MD&A—Single-Family Business—Single-Family Mortgage Credit Risk Management—Single-Family Credit Enhancement and Transfer of Mortgage Credit Risk—Credit Risk Transfer Transactions” in our 2024 Form 10-K.

Corporate Liquidity Portfolio

The chart below displays information on the composition of our corporate liquidity portfolio. The balance and composition of our corporate liquidity portfolio fluctuates as a result of changes in our cash flows, liquidity in the fixed-income markets, and our liquidity risk management framework and practices. Our corporate liquidity portfolio decreased in the first nine months of 2025, primarily due to the maturity of debt of Fannie Mae that was not replaced given our reduced funding needs.

Corporate Liquidity Portfolio (Dollars in billions)

Off-Balance Sheet Arrangements

We enter into certain business arrangements to facilitate our statutory purpose of providing liquidity to the secondary mortgage market and to reduce our exposure to interest rate fluctuations. Some of these arrangements are not recorded in our condensed consolidated balance sheets or may be recorded in amounts different from the full contract or notional amount of the transaction, depending on the nature or structure of, and the accounting required to be applied to, the arrangement. These arrangements are commonly referred to as “off-balance sheet arrangements” and expose us to potential losses in excess of the amounts recorded in our condensed consolidated balance sheets.

Our off-balance sheet arrangements result primarily from the following:

- our guaranty of mortgage loan securitization and resecuritization transactions over which we have no control, which are reflected in our unconsolidated Fannie Mae MBS net of any beneficial ownership interest we retain, and other financial guarantees that we do not control;
- liquidity support transactions; and
- partnership interests.

The total amount of our off-balance sheet exposure related to unconsolidated Fannie Mae MBS net of any beneficial interest that we retain, and other financial guarantees was \$199.2 billion as of September 30, 2025 and \$211.5 billion as of December 31, 2024. The majority of the other financial guarantees consists of Freddie Mac securities backing Fannie Mae structured securities. See “Guaranty Book of Business” and “Note 7, Financial Guarantees” for more information regarding our maximum exposure to loss on unconsolidated Fannie Mae MBS and Freddie Mac securities.

Our total outstanding liquidity commitments to advance funds for securities backed by multifamily housing revenue bonds totaled \$3.7 billion as of September 30, 2025 and \$4.3 billion as of December 31, 2024. These commitments require us to advance funds to third parties that enable them to repurchase tendered bonds or securities that are unable to be remarketed.

We have investments in various limited partnerships and similar legal entities, which consist of LIHTC investments, community investments and investments in other entities. When we do not have a controlling financial interest in those entities, our condensed consolidated balance sheets reflect only our investment rather than the full amount of the partnership’s assets and liabilities. See “Note 3, Consolidations and Transfers of Financial Assets—Unconsolidated VIEs” for information regarding our investments in limited partnerships and similar legal entities.

Cash Flows

Nine Months Ended September 30, 2025. Cash and restricted cash increased from \$38.5 billion as of December 31, 2024 to \$39.4 billion as of September 30, 2025. The increase was primarily driven by cash inflows from (1) proceeds from repayments of loans, (2) the sale of Fannie Mae MBS to third parties, (3) proceeds from issuance of debt of Fannie Mae, and (4) proceeds from the disposition of acquired property and insurance proceeds.

Largely offsetting these cash inflows were cash outflows primarily from (1) payments on outstanding debt of Fannie Mae and consolidated trusts (2) purchases of loans acquired as held for investment, (3) advances to lenders, and (4) purchases of securities purchased under agreements to resell.

Nine Months Ended September 30, 2024. Cash and restricted cash increased from \$34.0 billion as of December 31, 2023 to \$37.9 billion as of September 30, 2024. The increase was primarily driven by cash inflows from (1) proceeds from repayments of loans, (2) the sale of Fannie Mae MBS to third parties, and (3) investments in securities purchased under agreements to resell.

Partially offsetting these cash inflows were cash outflows from (1) payments on outstanding debt of consolidated trusts, (2) purchases of loans held for investment, and (3) advances to lenders.

Credit Ratings

The table below displays our credit ratings issued by the three major credit rating agencies.

Fannie Mae Credit Ratings

	As of September 30, 2025		
	S&P	Moody's	Fitch
Long-term senior debt	AA+	Aa1	AA+
Short-term senior debt	A-1+	P-1	F1+
Preferred stock	D	Ca(hyb)	C/RR6
Outlook	Stable	Stable	Stable

On May 19, 2025, Moody's Ratings ("Moody's") downgraded our long-term senior unsecured debt rating to Aa1 from Aaa and changed the outlook to stable from negative. This action followed Moody's downgrade of the U.S. Government's long-term issuer and senior unsecured ratings to Aa1 from Aaa and change in outlook to stable from negative on May 16, 2025.

We have no covenants in our existing debt agreements that would be violated by a downgrade in our credit ratings. However, in connection with certain derivatives counterparties, we could be required to provide additional collateral to or terminate transactions with certain counterparties in the event that our senior unsecured debt ratings are downgraded. For a discussion of additional risks to our business relating to a decrease in our credit ratings, which could include an increase in our borrowing costs and limits on our ability to issue debt, see "MD&A—Liquidity and Capital Management—Liquidity Management—Credit Ratings" and "Risk Factors" in our 2024 Form 10-K.

Capital Management

Capital Requirements

For a description of our capital requirements under the enterprise regulatory capital framework, see “Business—Legislation and Regulation—Capital Requirements” in our 2024 Form 10-K. Although the enterprise regulatory capital framework went into effect in February 2021, we are not required to hold capital according to the framework’s requirements until the date of termination of our conservatorship, or such later date as may be ordered by FHFA.

The table below sets forth information about our capital requirements under the standardized approach of the enterprise regulatory capital framework. As of September 30, 2025, we had a deficit in available capital for purposes of the enterprise regulatory capital framework even though we had positive net worth under U.S. generally accepted accounting principles (“GAAP”) of \$105.5 billion primarily because the \$120.8 billion stated value of the senior preferred stock does not qualify as regulatory capital. Our deficit in available capital for purposes of our risk-based adjusted total capital requirement declined \$12 billion in the first nine months of 2025 from \$37 billion as of December 31, 2024 to \$25 billion as of September 30, 2025.

As of September 30, 2025, we had a \$215 billion shortfall to our risk-based adjusted total capital requirement including buffers of \$190 billion, and a \$135 billion shortfall to our minimum risk-based adjusted total capital requirement excluding buffers of \$110 billion. From December 31, 2024 to September 30, 2025, our capital shortfall including buffers declined by \$12 billion and our shortfall excluding buffers declined by \$11 billion. These declines were primarily driven by increased retained earnings, which more than offset the modest rise in minimum capital requirements associated with higher risk-weighted assets during the first nine months of 2025. The increase in risk-weighted assets during the first nine months of 2025 was largely driven by loans we acquired during the period that carried higher credit risk-weights compared to seasoned loans that liquidated, as well as higher market risk associated with retained mortgage assets. The impact of these factors was partially offset by the benefit from credit risk transfer transactions.

Capital Metrics under the Enterprise Regulatory Capital Framework as of September 30, 2025⁽¹⁾

(Dollars in billions)			
		Stress capital buffer	\$ 33

Adjusted total capital	8.0	109	(37)	(146)	81	190	(227)
Leverage capital:							
Core capital (statutory)	2.5	111	(26)	(137)	N/A	111	(137)
Tier 1 capital	2.5	111	(37)	(148)	24	135	(172)

⁽¹⁾ Ratios are calculated as a percentage of risk-weighted assets for risk-based capital metrics and as a percentage of adjusted total assets for leverage capital metrics.

⁽²⁾ The capital shortfall in these columns represents the difference between the applicable capital requirement (without or with buffers, as applicable) and the available capital deficit.

⁽³⁾ Prescribed capital conservation buffer amount ("PCCBA") for risk-based capital and prescribed leverage buffer amount ("PLBA") for leverage capital.

As of September 30, 2025, our maximum payout ratio under the enterprise regulatory capital framework was 0%. See "Note 15, Regulatory Capital Requirements" for information on our capital ratios as of September 30, 2025 and December 31, 2024 under the enterprise regulatory capital framework.

The table below presents certain components of our regulatory capital.

Regulatory Capital Components

	As of	
	September 30, 2025	December 31, 2024
	(Dollars in millions)	
Total equity	\$ 105,485	\$ 94,657
Less:		
Senior preferred stock	120,836	120,836
Preferred stock	19,130	19,130
Common equity	(34,481)	(45,309)
Less: deferred tax assets arising from temporary differences that exceed 10% of common equity tier 1 capital and other regulatory adjustments	10,000	10,545
Common equity tier 1 capital (deficit)	(44,481)	(55,854)
Add: perpetual, noncumulative preferred stock	19,130	19,130
Tier 1 capital (deficit)	(25,351)	(36,724)
Tier 2 capital adjustments	—	—
Adjusted total capital (deficit)	\$ (25,351)	\$ (36,724)

The table below presents certain components of our core capital.

Statutory Capital Components

	As of	
	September 30, 2025	December 31, 2024
	(Dollars in millions)	
Total equity	\$ 105,485	\$ 94,657
Less:		
Senior preferred stock	120,836	120,836
Accumulated other comprehensive income (loss), net of taxes	20	29
Core capital (deficit)	(15,371)	(26,208)
Less: general allowance for foreclosure losses	(8,457)	(7,876)
Total capital (deficit)	\$ (6,914)	\$ (18,332)

Capital Activity

Under the terms governing the senior preferred stock, no dividends were payable to Treasury for the third quarter of 2025 and none are payable for the fourth quarter of 2025.

Under the terms governing the senior preferred stock, through and including the capital reserve end date, any increase in our net worth during a fiscal quarter results in an increase of the same amount in the aggregate liquidation preference of the senior preferred stock in the following quarter. The capital reserve end date is defined as the last day of the second consecutive fiscal quarter during which we have had and maintained capital equal to, or in excess of, all of the capital requirements and buffers under the enterprise regulatory capital framework.

As a result of these terms governing the senior preferred stock, the aggregate liquidation preference of the senior preferred stock increased to \$223.1 billion as of September 30, 2025 from \$219.8 billion as of June 30, 2025, due to the increase in our net worth in the second quarter of 2025. The aggregate liquidation preference of the senior preferred stock will further increase to \$227.0 billion as of December 31, 2025, due to the increase in our net worth in the third quarter of 2025. See “Business—Conservatorship and Treasury Agreements—Treasury Agreements” in our 2024 Form 10-K for more information on the terms of our senior preferred stock, including how the aggregate liquidation preference is determined.

Treasury Funding Commitment

Treasury made a commitment under the senior preferred stock purchase agreement to provide funding to us under certain circumstances if we have a net worth deficit. As of September 30, 2025, the remaining amount of Treasury’s funding commitment to us was \$113.9 billion. See “Note 2, Conservatorship, Senior Preferred Stock Purchase

Agreement and Related Matters” in our 2024 Form 10-K for more information on Treasury’s funding commitment under the senior preferred stock purchase agreement.

Risk Management

We are exposed to the following principal risk categories: credit risk (including mortgage credit risk and institutional counterparty credit risk), market risk (including interest-rate risk), liquidity risk, operational risk (including cyber and other information security risk), model risk, strategic risk, compliance risk and reputational risk. See “MD&A—Risk Management,” “MD&A—Single-Family Business—Single-Family Mortgage Credit Risk Management,” “MD&A—Multifamily Business—Multifamily Mortgage Credit Risk Management” and “MD&A—Liquidity and Capital Management” in our 2024 Form 10-K for a discussion of our management of the categories of risk we have determined present the most significant exposure. This section, “Single-Family Business—Single-Family Mortgage Credit Risk Management,” “Multifamily Business—Multifamily Mortgage Credit Risk Management” and “Liquidity and Capital Management” in this report supplement and update that discussion, but do not address all of these risk management categories.

Institutional Counterparty Credit Risk Management

Mortgage Servicers

On October 1, 2025, Rocket Companies, Inc., the parent company of Rocket Mortgage, LLC announced the completion of its acquisition of Mr. Cooper Group. As a result of this acquisition, our single-family servicing concentration is increasing. As of September 30, 2025, Rocket Mortgage serviced approximately 7%, and Mr. Cooper serviced approximately 9%, of our single-family guaranty book of business, excluding loans they service on behalf of other servicers. Including loans serviced on behalf of other servicers, Rocket Mortgage serviced approximately 7%, and Mr. Cooper serviced approximately 16%, of our single-family guaranty book of business, as of September 30, 2025. These servicing concentrations are based on unpaid principal balance. See “Risk Factors—Credit Risk” in our 2024 Form 10-K for information about the potential impact if mortgage servicers fail to perform their obligations.

Market Risk Management, including Interest-Rate Risk Management

We are subject to market risk, which includes interest-rate risk and spread risk. These risks arise primarily from our mortgage asset investments. Interest-rate risk is the risk that movements in interest rates will adversely affect the value of our assets or liabilities or our future earnings or capital. Spread risk is the risk from changes in an instrument’s value that relate to factors other than changes in interest rates. We do not currently actively manage or hedge, on an economic basis, our spread risk, or the interest-rate risk arising from cost basis adjustments and float income associated with mortgage assets held by our consolidated MBS trusts. See “MD&A—Risk Management—Market Risk Management, including Interest-Rate Risk Management” and “Risk Factors—Market and Industry Risk” in our 2024 Form 10-K for additional information, including our sources of interest-rate risk exposure, business risks posed by changes in interest rates, and our strategy for managing interest-rate risk. For additional information on the impact of interest-rate risk on our earnings, see “Earnings Exposure to Interest-Rate Risk” below.

Measurement of Interest-Rate Risk

The table below displays the pre-tax market value sensitivity of our net portfolio to changes in the level of interest rates and the slope of the applicable yield curve as measured on the last day of each period presented. We collectively define our net portfolio as: our retained mortgage portfolio assets; our corporate liquidity portfolio; outstanding debt of Fannie Mae used to fund the retained mortgage portfolio assets and corporate liquidity portfolio; mortgage commitments; and risk management derivatives. The table below also provides the daily average, minimum, maximum and standard deviation values for duration gap and for the most adverse market value impact on the net portfolio to changes in the level of interest rates and the slope of the applicable yield curve for the three months ended September 30, 2025 and 2024. Our practice is to allow interest rates to go below zero in the downward shock models unless otherwise prevented through contractual floors.

For information on how we measure our interest-rate risk, see “MD&A—Risk Management—Market Risk Management, including Interest-Rate Risk Management” in our 2024 Form 10-K.

Interest-Rate Sensitivity of Net Portfolio to Changes in Interest-Rate Level and Slope of Yield Curve

	As of ⁽¹⁾⁽²⁾	
	September 30, 2025	December 31, 2024
	(Dollars in millions)	
Rate level shock:		
-100 basis points	\$ 324	\$ 83
-50 basis points	158	33
+50 basis points	(135)	(18)
+100 basis points	(255)	(29)
Rate slope shock:		
-25 basis points (flattening)	(2)	(4)
+25 basis points (steepening)	(3)	4

	For the Three Months Ended September 30, ⁽¹⁾⁽³⁾					
	2025			2024		
	Duration Gap	Rate Slope Shock 25 bps	Rate Level Shock 50 bps	Duration Gap	Rate Slope Shock 25 bps	Rate Level Shock 50 bps
	Market Value Sensitivity			Market Value Sensitivity		
	(In years)	(Dollars in millions)		(In years)	(Dollars in millions)	
Average	0.06	\$ (6)	\$ (51)	0.03	\$ (4)	\$ (20)
Minimum	0.03	(11)	(135)	(0.01)	(11)	(59)
Maximum	0.17	—	(20)	0.09	(1)	4
Standard deviation	0.03	2	23	0.02	2	15

⁽¹⁾ Computed based on changes in SOFR interest-rates swap curve.

⁽²⁾ Measured on the last business day of each period presented.

⁽³⁾ Computed based on daily values during the period presented.

The market value sensitivity of our net portfolio varies across a range of interest-rate shocks depending upon the duration and convexity profile of our net portfolio. The market value sensitivity of the net portfolio is measured by quantifying the change in the present value of the cash flows of our financial assets and liabilities that would result from an instantaneous shock to interest rates, assuming spreads are held constant.

We use derivatives to help manage the residual interest-rate risk exposure between the assets and liabilities in our net portfolio. Derivatives have enabled us to keep our economic interest-rate risk exposure at consistently low levels in a wide range of interest-rate environments. The table below displays an example of how derivatives impacted the net market value exposure for a 50 basis point parallel interest-rate shock. For additional information on our derivative positions, see “Note 9, Derivative Instruments” in our 2024 Form 10-K and in this report.

Derivative Impact on Interest-Rate Risk (50 Basis Points)

	As of ⁽¹⁾	
	September 30, 2025	December 31, 2024
	(Dollars in millions)	
Before derivatives	\$ (884)	\$ (654)
After derivatives	(135)	(18)
Effect of derivatives	749	636

⁽¹⁾ Measured on the last business day of each period presented.

Earnings Exposure to Interest-Rate Risk

While we manage the interest-rate risk of our net portfolio with the objective of remaining neutral to movements in interest rates and volatility on an economic basis, our earnings can experience volatility due to interest-rate changes and differing accounting treatments that apply to certain financial instruments on our balance sheet. Specifically, we have exposure to earnings volatility that is driven by changes in interest rates in two primary areas: our net portfolio and our consolidated MBS trusts. The exposure in the net portfolio is primarily driven by changes in the fair value of risk management derivatives, mortgage commitments, and certain assets, primarily securities, that are carried at fair value. The exposure related to our consolidated MBS trusts relates to changes in our credit loss reserves and to the amortization of cost basis adjustments resulting from changes in interest rates.

We apply fair value hedge accounting to address some of the exposure to interest rates, particularly the earnings volatility related to changes in benchmark interest rates. Our hedge accounting program is specifically designed to address the volatility of our financial results associated with changes in fair value related to changes in these benchmark interest rates. As such, earnings variability driven by other factors, such as spreads or changes in cost basis amortization recognized in net interest income, remains. In addition, our ability to effectively reduce earnings volatility is dependent upon the volume and type of interest-rate swaps available for hedging, which is driven by our interest-rate risk management strategy discussed above and in our 2024 Form 10-K. As our range of available interest-rate swaps varies over time, our ability to reduce earnings volatility through hedge accounting may vary as well. When the shape of the yield curve shifts significantly from period to period, hedge accounting may be less effective. In our current program, we establish new hedging relationships each business day to provide flexibility in our overall risk management strategy.

See “Note 1, Summary of Significant Accounting Policies” in our 2024 Form 10-K and “Note 9, Derivative Instruments” in this report for additional information on our fair value hedge accounting policy and related disclosures.

Critical Accounting Estimates

The preparation of financial statements in accordance with GAAP requires management to make a number of judgments, estimates and assumptions that affect the reported amount of assets, liabilities, income and expenses in our condensed consolidated financial statements. Understanding our accounting policies and the extent to which we use management judgment and estimates in applying these policies is integral to understanding our financial statements. We describe our most significant accounting policies in “Note 1, Summary of Significant Accounting Policies” in this report and in our 2024 Form 10-K.

We evaluate our critical accounting estimates and judgments required by our policies on an ongoing basis and update them as necessary based on changing conditions. Management has discussed any significant changes in judgments and assumptions in applying our critical accounting estimates with the Audit Committee of our Board of Directors. See “Risk Factors—General Risk” in our 2024 Form 10-K for a discussion of the risks associated with the need for management to make judgments and estimates in applying our accounting policies and methods. We have identified one of our accounting estimates, allowance for loan losses, as critical because it involves significant judgments and assumptions about highly complex and inherently uncertain matters, and the use of reasonably different judgments and assumptions could have a material impact on our reported results of operations or financial condition.

Allowance for Loan Losses

The allowance for loan losses is an estimate of single-family and multifamily HFI loan receivables that we expect will not be collected related to loans held by Fannie Mae or by consolidated Fannie Mae MBS trusts. The expected credit losses are deducted from the amortized cost basis of HFI loans to present the net amount expected to be received.

The allowance for loan losses involves substantial judgment on a number of matters including the development and weighting of macroeconomic forecasts, the reversion period applied, the assessment of similar risk characteristics, which determines the historic loss experience used to derive probability of loan default, the valuation of collateral, which includes judgments about the property condition at the time of foreclosure, and the determination of a loan's remaining expected life. Our most significant judgments involved in estimating our allowance for loan losses relate to the modeled macroeconomic data used to develop reasonable and supportable forecasts for key economic drivers, which are subject to significant inherent uncertainty. Most notably, for single-family, the model uses forecasted single-family home prices as well as a range of possible future interest rate environments. For multifamily, the model uses forecasted net operating income and property valuations. In developing a reasonable and supportable forecast, the model simulates multiple paths of interest rates, rental income and property values based on current market conditions.

Quantitative Component

We use a discounted cash flow method to measure expected credit losses on our single-family mortgage loans and an undiscounted loss method to measure expected credit losses on our multifamily mortgage loans.

Our modeled loan performance is based on our historical experience of loans with similar risk characteristics adjusted to reflect current conditions and reasonable and supportable forecasts. Our historical loss experience and our loan loss estimates capture the possibility of a multitude of events, including remote events that could result in credit losses on loans that are considered low risk. Our credit loss models, including the macroeconomic forecast data used as key inputs, are subject to our model oversight and review processes as well as other established governance and controls.

Qualitative Component

Our process for measuring expected credit losses is complex and involves significant management judgment, including a reliance on historical loss information and current economic forecasts that may not be representative of credit losses we ultimately realize. Management adjustments may be necessary to take into consideration external factors and current macroeconomic events that have occurred but are not yet reflected in the data used to derive the model outputs. Qualitative factors and events not previously observed by the models through historical loss experience may also be considered, as well as the uncertainty of their impact on credit loss estimates.

Macroeconomic Variables and Sensitivities

Our benefit or provision for credit losses can vary substantially from period to period based on forecasted macroeconomic inputs. For single-family, we have determined that our most significant macroeconomic inputs used in determining our allowance for loan losses consist of forecasted home price growth rates and interest rates. For multifamily, we have determined that our most significant macroeconomic inputs used in determining our allowance for loan losses consist of net operating income and property value growth rates.

In evaluating the sensitivities of our allowance to these macroeconomic inputs, it is difficult to estimate how potential changes in any one factor or input might affect the overall credit loss estimates, because management considers a wide variety of factors and inputs in estimating the allowance for loan losses. Changes in the factors and inputs considered may not occur at the same rate and may not be consistent across all geographies or loan types, and changes in factors and inputs may be directionally inconsistent, such that improvement in one factor or input may offset deterioration in others. Changes in our assumptions and forecasts of economic conditions could significantly affect our estimate of expected credit losses and lead to significant changes in the estimate from one reporting period to the next.

We provide more detailed information on our accounting for the allowance for loan losses in "Note 1, Summary of Significant Accounting Policies" in our 2024 Form 10-K. See "Note 5, Allowance for Loan Losses" for additional information about our current period (provision) benefit for loan losses.

Single-Family Sensitivities and Inputs

The table below provides information about our most significant macroeconomic inputs used in determining our single-family allowance for loan losses: forecasted home price growth rates and interest rates. Although the model consumes a wide range of possible regional home price forecasts and interest rate scenarios that take into account inherent uncertainty, the forecasts below represent the mean path of those simulations used in determining the single-family allowance for each quarter through the nine months ended September 30, 2025, and for each quarter during the year ended December 31, 2024, and how those forecasts have changed between periods of estimate. Below we present our home price growth and interest rate estimates used in our estimate of expected credit losses. Our forecasts include estimates for periods beyond 2027 that are not presented in the table below.

Select Single-Family Macroeconomic Model Inputs⁽¹⁾

Forecasted home price growth (decline) rate by period of estimate:⁽²⁾

	For the Full Year ending December 31,		
	2025	2026	2027
Third Quarter 2025	2.6 %	1.3 %	1.2 %
Second Quarter 2025	3.4	1.1	1.1
First Quarter 2025	4.2	2.0	1.3

	For the Full Year ending December 31,		
	2024	2025	2026
Fourth Quarter 2024	5.9 %	3.5 %	1.7 %
Third Quarter 2024	5.9	3.6	1.7
Second Quarter 2024	6.6	3.0	0.8
First Quarter 2024	4.8	1.5	*

Forecasted 30-year mortgage interest rates by period of estimate:⁽³⁾

	Through the end of December 31,	For the Full Year ending December 31,	
	2025	2026	2027
Third Quarter 2025	6.4 %	6.2 %	6.1 %
Second Quarter 2025	6.7	6.3	6.3
First Quarter 2025	6.6	6.3	6.3

	Through the end of December 31,	For the Full Year ending December 31,	
	2024	2025	2026
Fourth Quarter 2024	6.8 %	6.8 %	6.7 %
Third Quarter 2024	6.2	5.9	5.9
Second Quarter 2024	7.0	6.6	6.4
First Quarter 2024	6.8	6.4	6.2

* Represents less than 0.05% of home price growth (decline).

⁽¹⁾ These forecasts are provided solely for the purpose of providing insight into our credit loss model. Forecasts for future periods are subject to significant uncertainty, which increases for periods that are further in the future. We provide our most recent forecasts for certain macroeconomic and housing market conditions in "Key Market Economic Indicators." In addition, each month our Economic and Strategic Research Group provides its economic and housing outlook, which is available in the "Data and Insights" section of our website, www.fanniemae.com. Information on our website is not incorporated into this report.

⁽²⁾ These estimates are based on our national home price index, which is calculated differently from the S&P CoreLogic Case-Shiller U.S. National Home Price Index and therefore results in different percentages for comparable growth. We periodically update our home price growth estimates and forecasts as new data become available. The forecast data in this table may also differ from the forecasted home price growth rate presented in "Key Market Economic Indicators," because that section reflects our most recent forecast as of the filing date of this report, while this table reflects the quantitative forecast data we used in our model to estimate credit losses for the periods shown. Management continues to monitor macroeconomic updates to our inputs in our credit loss model from the time they are approved

as part of our established governance process to ensure the reasonableness of the inputs used to calculate estimated credit losses. The forecast data excludes the impact of any qualitative adjustments.

- (3) Forecasted 30-year interest rates represent the mean of possible future interest rate environments that are simulated by our interest rate model and used in the estimation of credit losses. Forecasts through the end of December 31, 2025 and 2024 represent the average forecasted rate from the quarter-end through the calendar year end of December 31st. The fourth quarter of 2024 interest rate represents the 30-year interest rate as of December 31, 2024. This table reflects the forecasted interest rate data we used in estimating credit losses for the periods shown and does not reflect changes in interest rates that occurred after the forecast date.

As noted above, our single-family allowance for loan losses is sensitive to changes in home prices and interest rate changes. We present in the table below the impact of hypothetical changes in home prices and 30-year interest rates, with all other factors held constant.

Single-Family Sensitivities - Hypothetical Changes to Model Inputs

Forecasted change to the first 12 months of the forecast: (In percentage points)	Allowance Impact	Approximate Change in Allowance as of September 30, 2025 ⁽¹⁾
Change in home prices growth rate: ⁽²⁾		
+1%	↓	4%
-1%	↑	4%
Change in 30-year interest rates:		
+0.5%	↑	4%
-0.5%	↓	5%

(1) Calculated as a percentage of our single-family allowance for loan losses.

(2) Change in home price shown on a normalized basis.

The above sensitivity analyses are hypothetical and are provided solely for the purpose of providing insight into our credit loss model inputs. In addition, sensitivities for home price and interest rate changes are non-linear. As a result, changes in these estimates are not always incrementally proportional. The purpose of this analysis is to provide an indication of the impact of changes in home prices and 30-year interest rates on the estimate of the single-family allowance for credit losses. This analysis is not intended to imply management's expectation of future changes in our forecasts or any other variables that may change as a result.

See "Key Market Economic Indicators" in our 2024 Form 10-K and in this report for additional information about how home prices and interest rates can affect our credit loss estimates, including a discussion of home price growth rates and our home price forecast. Also see "Consolidated Results of Operations—(Provision) Benefit for Credit Losses" for information on how our home price and interest rate forecasts impacted our single-family (provision) benefit for credit losses.

Multifamily Sensitivities and Inputs

The table below provides information about our most significant macroeconomic inputs used in determining our multifamily allowance for loan losses: multifamily property net operating income and property value growth rates. Although the model consumes a wide range of possible future economic scenarios, the forecasts below represent the mean path of those simulations used in determining the multifamily allowance for the quarter ended September 30, 2025, and for the quarter ended December 31, 2024, and how those forecasts have changed between periods of estimate. Our forecasts include estimates for periods beyond those presented below.

Select Multifamily Macroeconomic Model Inputs⁽¹⁾

Forecasted net operating income growth (decline) rate by period of estimate:

	For the Full Year ending December 31,			
	2024	2025	2026	2027
Third Quarter 2025	N/A	2.5 %	1.8 %	1.1 %
Fourth Quarter 2024	3.1 %	1.7 %	0.3 %	N/A

Forecasted property value growth (decline) rate by period of estimate:

	For the Full Year ending December 31,			
	2024	2025	2026	2027
Third Quarter 2025	N/A	(6.0)%	6.1 %	5.0 %
Fourth Quarter 2024	(8.7)%	(1.1)%	3.7 %	N/A

^{N/A} Not applicable. For purposes of this disclosure, we provide the forecasted net operating income growth rate and property value growth rate for the period of estimate and the two years following the period of estimate.

⁽¹⁾ These forecasts are provided solely for the purpose of providing insight into our credit loss model. Forecasts for future periods are subject to significant uncertainty, which increases for periods that are further in the future, and may not align to other market forecasts.

As noted above, our multifamily allowance for loan losses is sensitive to changes in net operating income and property value changes. We present in the table below the impact of hypothetical changes in net operating income and property value, with all other factors held constant.

Multifamily Sensitivities - Hypothetical Changes to Model Inputs

Forecasted change to the first 12 months of the forecast: (In percentage points)	Allowance Impact	Approximate Change in Allowance as of September 30, 2025 ⁽¹⁾
Change in net operating income growth rate:		
+1%	↓	2%
-1%	↑	2%
Change in property value growth rate:		
+1%	↓	3%
-1%	↑	3%

⁽¹⁾ Calculated as a percentage of our multifamily allowance for loan losses.

The above sensitivity analyses are hypothetical and are provided solely for the purpose of providing insight into our credit loss model inputs. In addition, sensitivities for net operating income and property value changes are non-linear. As a result, changes in these estimates are not always incrementally proportional. The purpose of this analysis is to provide an indication of the impact of net operating income and property value changes on the estimate of the multifamily allowance for credit losses. This analysis is not intended to imply management's expectation of future changes in our forecasts or any other variables that may change as a result.

See "Consolidated Results of Operations—(Provision) Benefit for Credit Losses" for information on how our property valuations impacted our multifamily (provision) benefit for credit losses.

Impact of Future Adoption of New Accounting Guidance

We identify and discuss the expected impact on our condensed consolidated financial statements of recently issued accounting guidance in "Note 1, Summary of Significant Accounting Policies."

Forward-Looking Statements

This report includes statements that constitute forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934 (the “Exchange Act”). In addition, we and our senior management may from time to time make forward-looking statements in our other filings with the SEC, our other publicly available written statements, and orally to analysts, investors, the news media and others. Forward-looking statements often include words such as “expect,” “anticipate,” “intend,” “plan,” “believe,” “seek,” “estimate,” “forecast,” “project,” “would,” “should,” “could,” “likely,” “may,” “will” or similar words. Examples of forward-looking statements in this report include, among others, statements relating to our beliefs and expectations regarding the following matters:

- economic, mortgage market and housing market conditions (including expectations regarding economic growth, home price growth, multifamily property values, the unemployment rate, loan origination volumes, interest rates and multifamily property net operating income), the factors that will affect those conditions, and the impact of those conditions on our business and financial results;
- the impact of hedge accounting on the volatility of our financial results;
- the future aggregate liquidation preference of our senior preferred stock;
- our future dividend payments on the senior preferred stock;
- our business plans and strategies, and their impact, including our plans relating to new credit score models;
- the credit performance of loans in our guaranty book of business, future credit losses, and the factors that will affect them;
- how we intend to repay our debt obligations;
- the impact on our single-family guaranty book servicing concentration of Rocket Companies’ acquisition of Mr. Cooper Group;
- the impact of the adoption of new accounting guidance;
- our payments to specified U.S. Department of Housing and Urban Development (“HUD”) and Treasury funds in support of affordable housing under the GSE Act;
- legal and regulatory proceedings; and
- the risks to our business.

Forward-looking statements reflect our management’s current expectations, forecasts or predictions of future conditions, events or results based on various assumptions and management’s estimates of trends and economic conditions in the markets in which we are active and that otherwise impact our business plans. Forward-looking statements are not guarantees of future performance. By their nature, forward-looking statements are subject to significant risks and uncertainties and changes in circumstances. Our actual results and financial condition may differ, possibly materially, from the anticipated results and financial condition indicated in these forward-looking statements.

There are a number of factors that could cause actual conditions, events or results to differ materially from those described in our forward-looking statements, including, among others, the following:

- growth, deterioration and the overall health and stability of the U.S. economy, including GDP, unemployment rates, personal income, inflation and other indicators thereof;
- the impact of trade, fiscal, regulatory and immigration policies and the ongoing government shutdown;
- deterioration in a specific sector of the U.S. economy or in one or more regional areas of the United States;
- future interest rates and credit spreads;
- the timing and level of, as well as regional variation in, home price changes;
- the size and our share of the U.S. mortgage market (including the volume of mortgage originations) and the factors that affect them, including population growth and household formation;
- changes in fiscal or monetary policy of the U.S. or other countries, and the impact of such changes on domestic and international financial markets;
- domestic, regional and global political risks and uncertainties, including the impact of conflicts in the Middle East, the Russian war in Ukraine, and tensions between China and Taiwan;
- developments that may be difficult to predict, including: market conditions that result in changes in our deferred guaranty fee income or changes in net interest income from our portfolios; fluctuations in the estimated fair

value of our assets and liabilities; and developments that affect our loss reserves, such as changes in interest rates or home prices;

- disruptions or instability in the housing and credit markets;
- changes in the demand for Fannie Mae MBS, our debt securities or our credit risk transfer securities, in general or from one or more major groups of investors;
- constraints on our entry into new credit risk transfer transactions;
- a decrease in our credit ratings;
- limitations on our ability to access the debt capital markets;
- the size, composition, quality and performance of our guaranty book of business and retained mortgage portfolio;
- how long loans in our guaranty book of business remain outstanding;
- our and our competitors' future guaranty fee pricing and the impact of that pricing on our competitive environment and guaranty fee revenues;
- the competitive environment in which we operate, including the impact of legislative, regulatory or other developments on levels of competition in our industry and other factors affecting our market share;
- the impact of interdependence between the single-family mortgage securitization programs of Fannie Mae and Freddie Mac in connection with UMBS;
- significant challenges we face in retaining and hiring qualified executives and other employees;
- our conservatorship, including any changes to or termination (by receivership or otherwise) of the conservatorship and its effect on our business;
- the investment by Treasury, including the impact of past or potential future changes to the terms of the senior preferred stock purchase agreement, senior preferred stock or warrant, and their effect on our business, including restrictions imposed on us by the terms of the senior preferred stock purchase agreement, the senior preferred stock, or the warrant, as well as the extent that these or other restrictions on our business and activities are applied to us through other mechanisms even if we cease to be subject to these agreements and instruments;
- uncertainty regarding our future, our exit from conservatorship, and our ability to raise or earn the capital needed to meet our capital requirements;
- the impact of the enterprise regulatory capital framework on our business and financial results;
- future legislative and regulatory requirements or changes, governmental initiatives, or executive orders affecting us, such as the enactment of housing finance reform legislation, including changes that limit our business activities or our footprint, impose new mandates on us, or affect our ability to change our pricing;
- future legislative and regulatory requirements or changes, governmental initiatives, or executive orders affecting macroeconomic conditions, such as changes to trade, fiscal, tax or immigration policies;
- actions by FHFA, Treasury, the Federal Reserve, the Office of the Comptroller of the Currency ("OCC"), the Federal Deposit Insurance Corporation ("FDIC"), the Commodity Futures Trading Commission ("CFTC"), HUD, the Consumer Financial Protection Bureau, the SEC or other regulators, Congress, the Executive Branch, or state or local governments that affect our business;
- changes in the structure and regulation of the financial services industry;
- the possibility that changes in leadership at FHFA or the Administration will result in additional changes that affect our company or our business;
- actions we may be required to take by FHFA, in its role as our conservator or as our regulator, such as changes in the type of business we do, actions relating to UMBS or our resecuritization of Freddie Mac-issued securities, or credit risk management actions;
- limitations on our business imposed by FHFA, in its role as our conservator or as our regulator;
- adverse effects from activities we undertake to support the mortgage market and help borrowers, renters, lenders and servicers, including actions we may take to reach additional underserved borrowers, or from pursuing new business activities;
- a default by the United States government on its obligations;

- a future shutdown of the United States government;
- significant changes in forbearance, modification and foreclosure activity;
- the volume and pace of any future nonperforming and reperforming loan sales and their impact on our financial results and serious delinquency rates;
- changes in borrower behavior;
- actions we may take to mitigate losses, and the effectiveness of our loss mitigation strategies, management of our REO inventory and pursuit of contractual remedies;
- environmental disasters, terrorist attacks, widespread health emergencies or pandemics, infrastructure failures, or other disruptive or catastrophic events;
- the expiration of the National Flood Insurance Program (“NFIP”) on September 30, 2025, without re-authorization, including the impact of any disruptions in the payment of claims and of delays in obtaining or renewing coverage;
- earthquakes or other natural disasters, including those for which we may be uninsured or under-insured or that may affect our counterparties or the hazard insurers insuring properties underlying our guaranty book of business;
- severe weather events, fires, floods, wind or other climate-related events or impacts, including those for which we may be uninsured or under-insured or that may affect our counterparties or the hazard insurers insuring properties underlying our guaranty book of business, and other climate-related risks;
- defaults by one or more of our counterparties or by the hazard insurers insuring properties underlying our guaranty book of business;
- resolution or settlement agreements we may enter into with our counterparties;
- our need to rely on third parties to achieve some of our corporate objectives, including our reliance on mortgage servicers;
- our reliance on U.S. Financial Technology, LLC (“U.S. Fin Tech”), formerly named Common Securitization Solutions, LLC, and the common securitization platform U.S. Fin Tech operates for a majority of our single-family securitization activities; provisions in the limited liability company agreement with U.S. Fin Tech that permit FHFA to appoint members to the U.S. Fin Tech Board of Managers, which limit the ability of Fannie Mae and Freddie Mac to control decisions of the Board; and changes FHFA may require in our relationship with or in our support of U.S. Fin Tech;
- the effectiveness of our risk management processes and related controls;
- the effectiveness of our business resiliency plans and systems;
- the stability and adequacy of the systems and infrastructure that impact our operations, including ours and those of U.S. Fin Tech, our other counterparties and other third parties;
- our reliance on models and future updates we make to our models, including the data and assumptions used by these models;
- opportunities and risks presented by the use or anticipated use of artificial intelligence (“AI”) technologies or other emerging technologies by us or third parties, including generative AI and agentic AI;
- cyber attacks or other cybersecurity breaches or threats impacting us, the third parties with which we do business or our regulators;
- changes in GAAP, guidance by the Financial Accounting Standards Board (“FASB”), SEC guidance, and our accounting policies; and
- the other factors described in “Risk Factors” in our 2024 Form 10-K.

Readers are cautioned not to unduly rely on the forward-looking statements we make and to place these forward-looking statements into proper context by carefully considering the factors identified above and those discussed in “Risk Factors” in our 2024 Form 10-K. These forward-looking statements are representative only as of the date they are made, and we undertake no obligation to update any forward-looking statement as a result of new information, future events or otherwise, except as required under the federal securities laws.

FANNIE MAE

(In conservatorship)

Notes to Condensed Consolidated Financial Statements (Unaudited)

1. Summary of Significant Accounting Policies

Fannie Mae is a leading source of financing for residential mortgages in the United States. We are a government-sponsored, stockholder-owned corporation, chartered by Congress to provide liquidity and stability to the U.S. housing market and to promote access to mortgage credit. We primarily do this by buying residential mortgage loans that are originated by lenders. We place these loans into trusts and issue guaranteed mortgage-backed securities ("MBS") that global investors buy from us. We do not originate mortgage loans or lend money directly to borrowers.

We are currently operating under conservatorship, with the Federal Housing Finance Agency ("FHFA") acting as conservator. See "Note 2, Conservatorship, Senior Preferred Stock Purchase Agreement and Related Matters" below and in our annual report on Form 10-K for the year ended December 31, 2024 ("2024 Form 10-K") for information on our conservatorship, the senior preferred stock purchase agreement, the impact of U.S. government support of our business, and related party relationships.

Basis of Presentation

The accompanying unaudited interim condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and include our accounts as well as the accounts of other entities in which we have a controlling financial interest. All intercompany balances and transactions have been eliminated.

The accompanying financial statements should be read in conjunction with our audited consolidated financial statements and related notes included in our 2024 Form 10-K. Certain disclosures are condensed or omitted from the accompanying financial statements as they are not required for interim financial statements under GAAP. In the opinion of management, the accompanying financial statements contain all adjustments, which include only normal recurring adjustments, necessary for a fair presentation of our results. The nature of our business is such that the results of any interim period are not necessarily indicative of results for a full year. To conform to our current-period presentation, we have reclassified certain amounts reported in our prior period consolidated financial statements.

Changes in Presentation

Beginning in the first quarter of 2025, we changed our presentation on the condensed consolidated statements of cash flows for certain borrowings with original contractual maturities of three months or less such that the proceeds from the issuance of these borrowings and the related payments to redeem them are presented on a net basis. Previously, proceeds from the issuance of these borrowings and the related repayments to redeem them were presented separately (i.e., gross) on the condensed consolidated statements of cash flows. As a result of this change, we recast the prior periods presented to reflect the net presentation of cash flows on these borrowings. For borrowings with original contractual maturities greater than three months, we continue to present proceeds from issuance and payments to redeem the borrowings on a gross basis.

Beginning in the third quarter of 2025, we changed the presentation of interest income from reverse repurchase agreements to separately disclose interest income from securities purchased under agreements to resell on the condensed consolidated statements of operations and other comprehensive income. We also combined the remaining interest income previously classified as other with interest income from investments in securities. We recast the prior periods presented on the condensed consolidated statements of operations and comprehensive income for these changes.

Change in Accounting Principle

Beginning in the third quarter of 2025, we have changed which financial instruments are presented as cash equivalents and restricted cash equivalents. Previously, we presented U.S. Treasury securities that had a maturity of three months or less at acquisition and overnight reverse repurchase agreements as cash equivalents (both unrestricted and restricted, as appropriate). As a result of this change, all U.S. Treasury securities are presented as “Investments in securities” and all reverse repurchase agreements are presented as “Securities purchased under agreements to resell” on our condensed consolidated balance sheets. Additionally, as a result of this change, there are no financial instruments presented as cash equivalents or restricted cash equivalents as of September 30, 2025 or December 31, 2024.

We have concluded that the change in presentation of short-term U.S. Treasury securities and overnight reverse repurchase agreements is a change in accounting principle. Further, we concluded that the change is preferable because it provides consistency in the presentation of our holdings of investment securities and reverse repurchase agreements. Additionally, it more accurately reflects how these investments are managed within our corporate liquidity portfolio. Finally, the change aligns the presentation of short-term U.S. Treasury securities and overnight reverse repurchase agreements with the presentation used by other large financial institutions, increasing the comparability of our financial statements with the financial statements of those entities.

The change in accounting principle made in the third quarter of 2025 is reflected in our financial statements on a retrospective basis. The following tables display our changes to the condensed consolidated balance sheets and condensed consolidated statements of cash flows.

Condensed Consolidated Balance Sheets

	As of December 31, 2024		
	As Previously Reported	Adjustment for Change in Accounting Principle	As Adjusted
	(Dollars in millions)		
Cash	\$ 38,853	\$ (25,376)	\$ 13,477
Restricted cash	39,958	(14,899)	25,059
Securities purchased under agreements to resell	15,975	40,275	56,250

Condensed Consolidated Statements of Cash Flows

	For the Nine Months Ended September 30, 2024		
	As Previously Reported	Adjustment for Change in Accounting Principle	As Adjusted
	(Dollars in millions)		
Net change in securities purchased under agreements to resell	\$ 12,635	\$ (4,125)	\$ 8,510
Net cash provided by (used in) investing activities	115,608	(4,125)	111,483
Net increase (decrease) in cash and restricted cash	8,066	(4,125)	3,941
Cash and restricted cash at beginning of period	68,706	(34,725)	33,981
Cash and restricted cash at end of period	76,772	(38,850)	37,922

Use of Estimates

Preparing condensed consolidated financial statements in accordance with GAAP requires management to make estimates and assumptions that affect our reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the dates of our condensed consolidated financial statements, as well as our reported amounts of revenues and expenses during the reporting periods. Management has made significant estimates in a variety of areas including, but not limited to, the allowance for loan losses. Actual results could be different from these estimates.

Earnings per Share

Earnings per share (“EPS”) is presented for basic and diluted EPS. For the three months ended September 30, 2025 and 2024, the weighted average shares outstanding used in the computation of basic and diluted EPS includes 4.7

billion shares of common stock that would be issuable upon full exercise of the common stock warrant issued to the U.S. Department of the Treasury ("Treasury").

For the calculation of diluted EPS, the weighted average shares outstanding is increased to include the number of additional common shares that would have been outstanding if the dilutive potential common shares had been issued. For the three and nine months ended September 30, 2025, our diluted EPS weighted-average shares outstanding includes the 26 million shares issuable upon the conversion of convertible preferred stock. For the three months ended September 30, 2024, our diluted EPS weighted-average shares outstanding does not include the 26 million shares issuable upon the conversion of convertible preferred stock because it would have had an antidilutive effect due to the net losses attributable to common stockholders recognized in that period. For the nine months ended September 30, 2024, shares issuable upon the conversion of convertible preferred stock are included in the calculation.

Collateral

We enter into various transactions where we pledge and accept collateral, the most common of which are our derivative transactions. We also pledge and receive collateral under our repurchase and reverse repurchase agreements.

We posted U.S. Treasury securities of \$9.5 billion and \$8.9 billion as collateral as of September 30, 2025 and December 31, 2024, respectively. The fair value of non-cash collateral received was \$61.6 billion and \$56.3 billion, of which \$59.4 billion and \$49.0 billion could be sold or repledged as of September 30, 2025 and December 31, 2024, respectively. None of the underlying collateral we received was sold or repledged as of September 30, 2025 or December 31, 2024.

Foreclosed Property

We present foreclosed property in "Other assets" in our condensed consolidated balance sheets. We held \$1.8 billion and \$1.7 billion of acquired property, net as of September 30, 2025 and December 31, 2024, respectively.

New Accounting Guidance

Income Taxes

In December 2023, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2023-09, *Income Taxes (Topic 740): Improvements to Income Tax Disclosures*, which enhances the required disclosures primarily related to the income tax rate reconciliation and income taxes paid. The ASU requires an entity's income tax rate reconciliation to provide additional information for reconciling items meeting a quantitative threshold, and to disclose certain selected categories within the income tax rate reconciliation. The ASU also requires entities to disclose the amount of income taxes paid, disaggregated by federal, state and foreign taxes. The ASU is effective for annual periods beginning after December 15, 2024, though early adoption is permitted. The adoption of this guidance is not expected to have a material impact on our consolidated financial statements.

Disaggregation of Income Statement Expenses

In November 2024, the FASB issued ASU 2024-03, *Income Statement – Reporting Comprehensive Income – Expense Disaggregation Disclosures*. The guidance enhances the disclosures about an entity's expenses by requiring more detailed information about the types of expenses in commonly presented expense captions. This guidance is effective for fiscal years beginning after December 15, 2026 and interim periods beginning after December 15, 2027. The adoption of this guidance is not expected to have a material impact on our consolidated financial statements.

2. Conservatorship, Senior Preferred Stock Purchase Agreement and Related Matters

Conservatorship

We are currently operating under conservatorship, with FHFA acting as conservator. The conservatorship and related matters significantly affect our management, business activities, financial condition and results of operations.

Senior Preferred Stock Purchase Agreement

FHFA, as conservator, entered into a senior preferred stock purchase agreement with Treasury on our behalf in September 2008. In connection with that agreement, we issued Treasury one million shares of Variable Liquidation Preference Senior Preferred Stock, Series 2008-2, which we refer to as the "senior preferred stock," and a warrant to purchase shares equal to 79.9% of our common stock, on a fully diluted basis, for a nominal price of \$0.00001. This

agreement also provides funding to us under certain circumstances if we have a net worth deficit. Pursuant to the senior preferred stock purchase agreement, we have received a total of \$119.8 billion from Treasury as of September 30, 2025, and the amount of remaining funding available to us under the agreement is \$113.9 billion. We have not received any funding from Treasury under this commitment since the first quarter of 2018. We had a positive net worth of \$105.5 billion as of September 30, 2025.

The dividend provisions of the senior preferred stock permit us to retain increases in our net worth until our net worth exceeds the amount of adjusted total capital necessary for us to meet the capital requirements and buffers under the enterprise regulatory capital framework established by FHFA. As a result of our conservatorship status and the terms of the senior preferred stock, no amounts would be available to distribute as dividends to common or preferred stockholders (other than to Treasury as the holder of the senior preferred stock).

The aggregate liquidation preference of the senior preferred stock increased to \$223.1 billion as of September 30, 2025 from \$219.8 billion as of June 30, 2025, due to the increase in our net worth in the second quarter of 2025. The aggregate liquidation preference of the senior preferred stock will further increase to \$227.0 billion as of December 31, 2025, due to the increase in our net worth in the third quarter of 2025.

Impact of U.S. Government Support

We have been operating under the control of FHFA as conservator since 2008, which is a form of government support. We continue to rely on financial support from Treasury pursuant to our senior preferred stock purchase agreement to eliminate any net worth deficits we may experience in the future, which would otherwise trigger our being placed into receivership by FHFA. Treasury also has authority under the Charter Act to purchase up to \$2.25 billion of the debt obligations that we issue. We believe that continued support from Treasury and our status as a government-sponsored enterprise are essential to maintaining our access to debt funding and maintaining the liquidity necessary to conduct our normal business activities. Therefore, changes or perceived changes in (i) our status as a government-sponsored enterprise, (ii) our support from Treasury and/or (iii) the creditworthiness of the U.S. government could have a material adverse impact on our access to debt funding or the cost of debt funding. These events would have a negative impact on our liquidity, financial condition, and results of operations. Our reliance on support from the U.S. government is critical to keeping us operating as a going concern.

3. Consolidations and Transfers of Financial Assets

We have interests in various entities that are considered to be variable interest entities ("VIEs"). The primary types of VIEs are securitization and resecuritization trusts, limited partnerships and special purpose vehicles ("SPVs"). Variable interests from Freddie Mac and other issuers may include a guaranty that reduces our exposure to credit risk when we hold them as investments or resecuritize them in a resecuritization trust that issues MBS that are backed by our guaranty. We consolidate the substantial majority of our single-class securitization trusts because our role as guarantor and master servicer provides us with the power to direct activities (primarily the servicing of mortgage loans) that impact the credit risk to which we are exposed. In contrast, we do not consolidate single-class securitization trusts when other organizations have the power to direct these activities unless we have the unilateral ability to dissolve the trust. We also do not consolidate our resecuritization trusts unless we have the unilateral ability to dissolve the trust. We may include securities issued by Freddie Mac in some of our resecuritization trusts. The mortgage loans that serve as collateral for Freddie Mac-issued securities are not held in trusts that are consolidated by Fannie Mae.

Unconsolidated VIEs

The following table displays our maximum exposure to loss as a result of our involvement with unconsolidated VIEs and the total assets of the VIEs.

Our maximum exposure to loss generally represents the greater of our carrying amount related to our involvement with unconsolidated securitization and resecuritization trusts or the unpaid principal balance of the assets covered by our guaranty. Our involvement in unconsolidated resecuritization trusts may give rise to additional exposure to loss depending on the type of resecuritization trust. Fannie Mae resecuritization trusts that are backed entirely by Fannie Mae MBS are not consolidated and do not give rise to any additional exposure to loss as we already consolidate the underlying collateral. In contrast, Fannie Mae resecuritization trusts that are backed in whole or in part by Freddie Mac securities may increase our exposure to loss to the extent that we are providing a guaranty for the timely payment and interest on the underlying Freddie Mac securities that we have not previously guaranteed. Our maximum exposure to loss for these unconsolidated trusts is measured by the amount of Freddie Mac securities that are held in these resecuritization trusts.

	As of			
	September 30, 2025		December 31, 2024	
	Total Assets	Maximum Exposure to Loss	Total Assets	Maximum Exposure to Loss
	(Dollars in millions)			
Securitization and resecuritization trusts ⁽¹⁾	\$ 404,895	\$ 194,206	\$ 203,841	\$ 203,316
Credit risk transfer SPVs ⁽²⁾	24,490	24,499	23,222	23,224
Limited partnerships, including low income housing tax credit ("LIHTC") investments ⁽³⁾	6,602	727	6,428	669

⁽¹⁾ The net carrying amount of securitization and resecuritization trusts were \$5.2 billion and \$1.2 billion as of September 30, 2025 and December 31, 2024, respectively, which are primarily classified in Investments in securities, at fair value in our condensed consolidated balance sheets.

⁽²⁾ Maximum exposure to loss of credit risk transfer SPVs consists of the unpaid principal balance and accrued interest payable of obligations issued by Connecticut Avenue Securities® ("CAS") and Multifamily Connecticut Avenue Securities® ("MCAS") SPVs.

⁽³⁾ The net carrying value of LIHTC investments that represent VIEs was \$727 million and \$669 million as of September 30, 2025 and December 31, 2024, respectively. The net carrying value of all LIHTC investments was \$2.2 billion and \$2.0 billion as of September 30, 2025 and December 31, 2024, respectively. In our condensed consolidated balance sheets, the LIHTC investment assets and liabilities are classified as Other assets and Other liabilities, respectively.

As of September 30, 2025, the unpaid principal balance of our multifamily loan portfolio was \$511.9 billion. As our lending relationship does not provide us with a controlling financial interest in the borrower entity for loans in our multifamily loan portfolio, we do not consolidate these borrowers regardless of their status as either a VIE or a voting interest entity. We have excluded these entities from our VIE disclosures; however, the disclosures we have provided in "Note 4, Mortgage Loans," "Note 5, Allowance for Loan Losses" and "Note 7, Financial Guarantees" with respect to this population are consistent with the FASB's stated objectives for the disclosures related to unconsolidated VIEs.

Transfers of Financial Assets and Portfolio Securitizations

We issue single-class Fannie Mae MBS through portfolio securitization transactions by transferring pools of mortgage loans or mortgage-related securities to one or more trusts or special purpose entities. For the three months ended September 30, 2025 and 2024, the unpaid principal balance of portfolio securitizations was \$36.8 billion and \$35.3 billion, respectively. For the nine months ended September 30, 2025 and 2024, the unpaid principal balance of portfolio securitizations was \$103.2 billion and \$102.0 billion, respectively. We consolidate the substantial majority of these portfolio securitization transactions.

We retain interests from the transfer and sale of mortgage-related securities to unconsolidated single-class portfolio securitization trusts and unconsolidated single-class and multi-class portfolio resecuritization trusts. As of September 30, 2025, the unpaid principal balance of retained interests was \$678 million and its related fair value was \$1.0 billion. As of December 31, 2024, the unpaid principal balance of retained interests was \$661 million and its related fair value was \$1.0 billion. For the three months ended September 30, 2025 and 2024, the principal, interest and other fees received on retained interests was \$60 million and \$66 million, respectively. For the nine months ended September 30, 2025 and 2024, the principal, interest and other fees received on retained interests was \$183 million and \$193 million, respectively.

4. Mortgage Loans

We record on our consolidated balance sheets single-family mortgage loans, which are secured by four or fewer residential dwelling units, and multifamily mortgage loans, which are secured by five or more residential dwelling units. We classify these loans as either held for investment ("HFI") or held for sale ("HFS"). Unless otherwise noted, within "Note 4, Mortgage Loans," we report the amortized cost of HFI loans for which we have not elected the fair value option at the unpaid principal balance, adjusted for unamortized premiums and discounts, hedge-related basis adjustments, other cost basis adjustments, and accrued interest receivable. Within our condensed consolidated balance sheets, we present accrued interest receivable, net separately from the amortized cost of our loans held for investment. We report the carrying value of HFS loans at the lower of cost or fair value and record valuation changes in "Investment gains (losses), net" in our condensed consolidated statements of operations and comprehensive income.

Within our single-family mortgage loan disclosures below, we display loans by class of financing receivable type. Financing receivable classes used for disclosure consist of: "20- and 30-year or more, amortizing fixed-rate," "15-year or

less, amortizing fixed-rate,” “Adjustable-rate,” and “Other.” The “Other” class primarily consists of reverse mortgage loans, interest-only loans, negative-amortizing loans and second liens.

The following table displays the carrying value of our mortgage loans and allowance for loan losses.

	As of	
	September 30, 2025	December 31, 2024
	(Dollars in millions)	
Single-family	\$ 3,586,725	\$ 3,619,838
Multifamily	511,891	490,358
Total unpaid principal balance of mortgage loans	4,098,616	4,110,196
Cost basis and fair value adjustments, net	33,020	35,517
Allowance for loan losses for HFI loans	(8,246)	(7,707)
Total mortgage loans ⁽¹⁾	\$ 4,123,390	\$ 4,138,006

⁽¹⁾ Excludes \$11.4 billion and \$10.8 billion of accrued interest receivable as of September 30, 2025 and December 31, 2024, respectively.

The following table displays information about our purchase of HFI loans, redesignation of loans and sales of mortgage loans during the period.

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2025	2024	2025	2024
	(Dollars in millions)			
Purchase of HFI loans:				
Single-family unpaid principal balance	\$ 90,175	\$ 93,114	\$ 237,369	\$ 241,180
Multifamily unpaid principal balance	18,508	13,153	46,658	32,492
Single-family loans redesignated from HFI to HFS:				
Amortized cost	\$ 823	\$ 820	\$ 1,527	\$ 1,272
Lower of cost or fair value adjustment at time of redesignation ⁽¹⁾	(97)	(101)	(187)	(139)
Allowance reversed at time of redesignation	6	5	26	8
Single-family loans redesignated from HFS to HFI:				
Amortized cost	\$ —	\$ 77	\$ —	\$ 77
Single-family loans sold:				
Unpaid principal balance	\$ 309	\$ 14	\$ 969	\$ 2,345
Realized gains (losses), net	(7)	—	—	13

⁽¹⁾ Consists of the write-off against the allowance at the time of redesignation.

Aging Analysis

The following tables display an aging analysis of the total amortized cost of our HFI mortgage loans by portfolio segment and class of financing receivable, excluding loans for which we have elected the fair value option.

As of September 30, 2025								
	30 - 59 Days Delinquent	60 - 89 Days Delinquent	Seriously Delinquent ⁽¹⁾	Total Delinquent	Current	Total	Loans 90 Days or More Delinquent and Accruing Interest	Nonaccrual Loans with No Allowance ⁽²⁾

Total	\$ 37,021	\$ 10,122	\$ 23,179	\$ 70,322	\$ 4,082,084	\$ 4,152,406	\$ 445	\$ 5,270

⁽¹⁾ Single-family seriously delinquent loans are loans that are 90 days or more past due or in the foreclosure process. Multifamily seriously delinquent loans are loans that are 60 days or more past due.

⁽²⁾ Primarily consists of loans for which we have recorded write-offs upon determining that amounts are uncollectible, resulting in the removal of the associated allowance for loan losses.

⁽³⁾ Reverse mortgage loans included in "Other" are not aged due to their nature and are included in the current column.

⁽⁴⁾ Multifamily loans 60-89 days delinquent are included in the seriously delinquent column.

The amortized cost of single-family mortgage loans for which formal foreclosure proceedings were in process was \$5.1 billion and \$4.7 billion as of September 30, 2025 and December 31, 2024, respectively. As a result of our various loss

mitigation and foreclosure prevention efforts, we expect that only a small portion of the loans in the process of formal foreclosure proceedings will ultimately foreclose.

Credit Quality Indicators and Write-offs by Year of Origination

The estimated mark-to-market loan-to-value (“LTV”) ratio is a primary factor we consider when estimating our allowance for loan losses for single-family loans. As LTV ratios increase, the borrower’s equity in the home decreases, which may negatively affect the borrower’s ability to refinance or to sell the property for an amount at or above the outstanding balance of the loan.

The following tables display information about the credit quality of our single-family HFI loans, based on total amortized cost. The tables below also include current year write-offs of our single-family HFI mortgage loans by class of financing receivable and year of origination, excluding loans for which we have elected the fair value option.

Total current-year write-offs	\$ 2	\$ 44	\$ 133	\$ 116	\$ 72	\$ 303	\$ 670

⁽¹⁾ Excludes amortized cost of \$3.0 billion and \$3.6 billion as of September 30, 2025 and December 31, 2024, respectively, of mortgage loans guaranteed or insured, in whole or in part, by the U.S. government or one of its agencies, which represents primarily reverse mortgages for which we do not calculate an estimated mark-to-market LTV ratio. For the nine months ended September 30, 2025 and year ended December 31, 2024, it also excludes write-offs of \$5 million and \$47 million, respectively, of mortgage loans guaranteed or insured, in whole or in part, by the U.S. government or one of its agencies. Year of loan origination may not be the same as the period in which we subsequently acquired the loan.

⁽²⁾ The aggregate estimated mark-to-market LTV ratio is based on the unpaid principal balance of the loan divided by the estimated current value of the property as of the end of each reported period, which we calculate using an internal valuation model that estimates periodic changes in home value.

The following tables display the total amortized cost of our multifamily HFI loans by year of origination and credit-risk rating, excluding loans for which we have elected the fair value option. Property rental income and property valuations are key inputs to our internally assigned credit risk ratings. The tables below also include current year write-offs of our multifamily HFI mortgage loans by year of origination, excluding loans for which we have elected the fair value option.

Current-year write-offs	\$ —	\$ 81	\$ 192	\$ 16	\$ 27	\$ 189	\$ 505

(1) Year of loan origination may not be the same as the period in which we subsequently acquired the loan.

(2) A loan categorized as "Pass" is current or adequately protected by the current financial strength and debt service capability of the borrower.

(3) "Special mention" refers to loans that are otherwise performing but have potential weaknesses that, if left uncorrected, may result in deterioration in the borrower's ability to repay in full.

(4) "Substandard" refers to loans that have a well-defined weakness that jeopardizes the timely full repayment.

(5) "Doubtful" refers to a loan with a weakness that makes collection or liquidation in full highly questionable and improbable based on existing conditions and values.

Loss Mitigation Options for Borrowers Experiencing Financial Difficulty

As part of our loss mitigation activities, we offer several types of loan restructurings to assist borrowers who experience financial difficulties. We do not typically offer principal forgiveness to our single-family or multifamily borrowers. Below we provide disclosures relating to loan restructurings where borrowers were experiencing financial difficulty, including restructurings that resulted in an insignificant payment delay. The disclosures exclude loans classified as HFS and those for which we have elected the fair value option. See "Note 1, Summary of Significant Accounting Policies" in our 2024 Form 10-K for additional information on our accounting policies for single-family and multifamily loans that have been restructured. Also see "Note 4, Mortgage Loans" in our 2024 Form 10-K for additional information about our single-family and multifamily loss mitigation options.

Restructurings for Borrowers Experiencing Financial Difficulty

The following tables display the amortized cost of HFI mortgage loans that were restructured, during the periods indicated, presented by portfolio segment and class of financing receivable.

* Represents less than 0.5% of total by financing class.

⁽¹⁾ Represents loans that received a contractual modification.

⁽²⁾ Based on the amortized cost basis as of period end, divided by the period-end amortized cost basis of the corresponding class of financing receivable.

⁽³⁾ Excludes \$341 million and \$1.2 billion for the three and nine months ended September 30, 2025, respectively, and \$269 million and \$1.0 billion for the three and nine months ended September 30, 2024, respectively, for loans that were the subject of loss mitigation activity during the period that paid off, were repurchased or were sold prior to period end. Also excludes loans that liquidated either through foreclosure, deed-in-lieu of foreclosure, or a short sale. Loans may move from one category to another, as a result of the restructuring(s) they received during the period.

The following tables summarize the financial impacts of loan modifications and payment deferrals made to single-family HFI loans presented by class of financing receivable. We discuss the qualitative impacts of forbearance plans, repayment plans, and trial modifications in our 2024 Form 10-K in "Note 4, Mortgage Loans." As a result, those loss mitigation options are excluded from the table below.

⁽¹⁾ Represents the average amount of delinquency-related amounts that were capitalized as part of the loan balance. Amounts are in whole dollars.

⁽²⁾ Excludes the financial effects of modifications for loans that were paid off or otherwise liquidated as of period end.

The following tables display the amortized cost of HFI loans that defaulted during the period and had received a completed modification or payment deferral in the twelve months prior to the payment default. For purposes of this disclosure, we define loans that had a payment default as single-family loans with completed modifications that are two or more months delinquent during the period; or multifamily loans with completed modifications that are one or more months delinquent during the period. For loans that receive a forbearance plan, repayment plan or trial modification, these loss mitigation options generally remain in default until the loan is no longer delinquent as a result of the payment of all past-due amounts or as a result of a loan modification or payment deferral. Therefore, forbearance plans, repayment plans and trial modifications are not included in default tables below.

For the Three Months Ended September 30, 2025

⁽¹⁾ As of September 30, 2025, the substantial majority of loans that received a completed modification or a payment deferral during the third quarter of 2025 were not delinquent as of September 30, 2025. As of September 30, 2024, the substantial majority of loans that received a completed modification or a payment deferral during the third quarter of 2024 were not delinquent as of September 30, 2024.

⁽²⁾ Multifamily loans 60-89 days delinquent are included in the seriously delinquent column.

⁽³⁾ Represents the amortized cost basis as of period end.

Nonaccrual Loans

We recognize interest income on an accrual basis except when we believe the collection of principal and interest is not reasonably assured, at which time a loan is placed on nonaccrual status. See “Note 1, Summary of Significant Accounting Policies” in our 2024 Form 10-K for additional information on our accounting policies for single-family and multifamily nonaccrual loans.

The table below displays the accrued interest receivable written off through the reversal of interest income from nonaccrual loans.

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2025	2024	2025	2024
(Dollars in millions)				
Accrued interest receivable written off through the reversal of interest income:				
Single-family	\$ 101	\$ 95	\$ 295	\$ 274
Multifamily	11	20	25	24

The tables below include the amortized cost of and interest income recognized on our HFI single-family and multifamily loans on nonaccrual status by class, excluding loans for which we have elected the fair value option.

	As of			For the Three Months Ended September 30, 2025	For the Nine Months Ended September 30, 2025
	September 30, 2025	June 30, 2025	December 31, 2024		
	Amortized Cost ⁽¹⁾			Total Interest Income Recognized ⁽²⁾	
	(Dollars in millions)

Total nonaccrual loans	\$ 26,215	\$ 25,336	\$ 25,205	\$ 39	\$ 311

⁽¹⁾ Amortized cost is presented net of any write-offs, which are recognized when a loan balance is deemed uncollectible.

⁽²⁾ Interest income recognized includes amortization of any deferred cost basis adjustments while the loan is performing and that is not reversed when the loan is placed on nonaccrual status. For single-family, interest income recognized includes payments received on nonaccrual loans held as of period end.

5. Allowance for Loan Losses

We maintain an allowance for loan losses for HFI loans held by Fannie Mae and by consolidated Fannie Mae MBS trusts, excluding loans for which we have elected the fair value option.

The following table displays changes in our allowance for single-family loans, multifamily loans and total allowance for loan losses.

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2025	2024	2025	2024
(Dollars in millions)				
Single-family allowance for loan losses:

Our single-family provision for loan losses for the three months ended September 30, 2025 was primarily driven by provision associated with loans that we acquired during the period, which primarily consisted of purchase loans. Purchase loans generally have higher original LTV ratios than refinance loans; therefore, purchase loans have a higher estimated risk of default and loss severity in the allowance than refinance loans and a correspondingly higher loan loss provision at the time of acquisition.

Our single-family provision for loan losses for the nine months ended September 30, 2025 was primarily driven by provision associated with loans that we acquired during the period, which primarily consisted of purchase loans, and by weaker-than-expected home price growth. Lower home prices increase the likelihood that loans will default and increase the amount of losses on loans that do default, which impacts our estimate of losses and ultimately increases our loss reserves and provision for loan losses.

Our single-family benefit for loan losses for the three months ended September 30, 2024 was primarily driven by a benefit from forecasted home price growth and a benefit from actual and projected interest rates, partially offset by a provision from changes in loan activity, as described below.

- Benefit from forecasted home price growth. During the three months ended September 30, 2024, our forecast of future home prices improved. Higher home prices decrease the likelihood that loans will default and reduce the amount of losses on loans that do default, which impacts our estimate of losses and ultimately reduces our loss reserves and provision for loan losses.
- Benefit from actual and projected interest rates. Actual and projected interest rates decreased in the third quarter of 2024, which reduced the probability of default, resulting in a benefit for loan losses.
- Provision from changes in loan activity. This includes provision on newly acquired loans and was primarily driven by the credit risk profile of our single-family acquisitions for the three months ended September 30, 2024, which primarily consisted of purchase loans. Purchase loans generally have higher original LTV ratios

than refinance loans; therefore, purchase loans have a higher estimated risk of default and loss severity in the allowance than refinance loans and a correspondingly higher loan loss provision at the time of acquisition.

Our single-family benefit for loan losses for the nine months ended September 30, 2024 was primarily driven by a benefit from actual and forecasted home price growth, partially offset by a provision from changes in loan activity.

- Benefit from actual and forecasted home price growth. During the nine months ended September 30, 2024 actual home prices appreciated more than originally projected and our forecast of future home prices also improved.
- Provision from changes in loan activity. This includes provision on newly acquired loans and was primarily driven by the credit risk profile of our single-family acquisitions for the nine months ended September 30, 2024, which primarily consisted of purchase loans.

Our multifamily provision for loan losses for the three and nine months ended September 30, 2025 was primarily driven by an increase in delinquencies including provision from seriously delinquent loans that were written down to the net recoverable amount of the loans' collateral during the period.

Our multifamily provision for loan losses for the three months ended September 30, 2024 was largely driven by certain adjustable-rate conventional loans that were written down during the period. We also recognized provision for loan losses because, compared to our previous forecast, our third quarter of 2024 forecast expected further slight decreases in projected multifamily property values and a longer period of time for projected multifamily property values to improve.

Our multifamily allowance and estimate for loan losses as of September 30, 2024 also considered uncertainty. This included uncertainty relating to multifamily property values, as well as uncertainty due to the investigation of multifamily lending transactions with suspected fraud, which may increase the risk of default.

Our multifamily provision for loan losses for the nine months ended September 30, 2024 was primarily driven by loan delinquencies in our multifamily guaranty book of business, including provision attributable to adjustable-rate conventional loans that became seriously delinquent and were written down to the net recoverable amount, declines in estimated actual and projected multifamily property values, and provision for uncertainty.

6. Investments in Securities

The following table displays our investments in securities.

	As of	
	September 30, 2025	December 31, 2024
	(Dollars in millions)	
Trading securities:		
Mortgage-related securities (includes \$265 million and \$300 million, respectively, related to consolidated trusts)	\$ 5,102	\$ 1,098
Non-mortgage-related securities	66,166	77,630
Total trading securities	71,268	78,728
Available-for-sale securities (amortized cost of \$412 million and \$487 million, respectively)	388	469
Total investments in securities	\$ 71,656	\$ 79,197

The following table displays information about our net trading gains (losses).

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2025	2024	2025	2024
	(Dollars in millions)			
Net trading gains (losses)	\$ 296	\$ 1,267	\$ 1,279	\$ 1,127
Net trading gains (losses) recognized in the period related to securities still held at period end	257	1,074	1,044	938

There were no significant gross unrealized gains or losses on our available-for-sale ("AFS") investment portfolio as of September 30, 2025 or December 31, 2024. Additionally, the allowance for credit losses on our AFS investment portfolio was not significant as of September 30, 2025 or December 31, 2024.

There were no sales of AFS securities in the first nine months of 2025 or the first nine months of 2024.

7. Financial Guarantees

We recognize a guaranty obligation for our obligation to stand ready to perform on our guarantees to unconsolidated trusts and other guaranty arrangements. These off-balance sheet guarantees expose us to credit losses primarily relating to the unpaid principal balance of our unconsolidated Fannie Mae MBS and other financial guarantees. As of September 30, 2025, the maximum remaining contractual term of our guarantees is 29 years; however, the actual term of each guaranty may be significantly less than the contractual term based on the prepayment characteristics of the related mortgage loans. We measure our guaranty reserve for estimated credit losses for off-balance sheet exposures over the contractual period for which they are exposed to the credit risk, unless that obligation is unconditionally cancellable by the issuer.

As the guarantor of structured securities backed in whole or in part by Freddie Mac-issued securities, we extend our guaranty to the underlying Freddie Mac securities in our resecuritization trusts. However, Freddie Mac continues to guarantee the payment of principal and interest on the underlying Freddie Mac securities that we have resecuritized. When we began issuing UMBS, we entered into an indemnification agreement under which Freddie Mac agreed to indemnify us for losses caused by its failure to meet its payment or other specified obligations under the trust agreements pursuant to which the underlying resecuritized securities were issued. As a result, and due to the funding commitment available to Freddie Mac through its senior preferred stock purchase agreement with Treasury, we have concluded that the associated credit risk is negligible. Accordingly, we exclude from the following table Freddie Mac securities backing unconsolidated Fannie Mae-issued structured securities of \$187.9 billion and \$200.1 billion as of September 30, 2025 and December 31, 2024, respectively.

The following table displays our off-balance sheet maximum exposure, guaranty obligation recognized in our condensed consolidated balance sheets and the potential maximum recovery from third parties through available credit enhancements and recourse related to our financial guarantees.

	As of					
	September 30, 2025			December 31, 2024		
	Maximum Exposure	Guaranty Obligation	Maximum Recovery ⁽¹⁾	Maximum Exposure	Guaranty Obligation	Maximum Recovery ⁽¹⁾
	(Dollars in millions)					
Unconsolidated Fannie Mae MBS	\$ 2,295	\$ 13	\$ 2,251	\$ 2,484	\$ 13	\$ 2,432
Other guaranty arrangements ⁽²⁾	9,018	49	2,059	8,914	56	1,954
Total	\$ 11,313	\$ 62	\$ 4,310	\$ 11,398	\$ 69	\$ 4,386

⁽¹⁾ Recoverability of such credit enhancements and recourse is subject to, among other factors, the ability of our mortgage insurers and the U.S. government, as a financial guarantor, to meet their obligations to us.

⁽²⁾ Primarily consists of credit enhancements and long-term standby commitments.

8. Short-Term and Long-Term Debt

Short-Term Debt

The following table displays our outstanding short-term debt (debt with an original contractual maturity of one year or less) and weighted-average interest rates of this debt.

	As of			
	September 30, 2025		December 31, 2024	
	Outstanding	Weighted-Average Interest Rate ⁽¹⁾	Outstanding	Weighted-Average Interest Rate ⁽¹⁾
	(Dollars in millions)			
Short-term debt of Fannie Mae	\$ 19,922	4.16 %	\$ 11,188	4.33 %

⁽¹⁾ Includes the effects of discounts, premiums and other cost basis adjustments.

Long-Term Debt

Long-term debt represents debt with an original contractual maturity of greater than one year. The following table displays our outstanding long-term debt.

	As of					
	September 30, 2025			December 31, 2024		
	Maturities	Outstanding ⁽¹⁾	Weighted-Average Interest Rate ⁽²⁾	Maturities	Outstanding ⁽¹⁾	Weighted-Average Interest Rate ⁽²⁾
	(Dollars in millions)					
Senior fixed:						
Benchmark notes and bonds	2025 - 2030	\$ 30,304	3.89 %	2025 - 2030	\$ 44,655	2.87 %
Medium-term notes ⁽³⁾	2025 - 2035	35,351	2.92	2025 - 2034	42,208	2.21
Other ⁽⁴⁾	2026 - 2038	6,609	3.97	2025 - 2038	6,632	3.98
Total senior fixed		72,264	3.44		93,495	2.66
Senior floating:						
Medium-term notes ⁽³⁾	2026 - 2027	32,437	4.46	2026 - 2027	32,435	4.67
Connecticut Avenue Securities ⁽⁵⁾	2028 - 2031	1,509	11.54	2025 - 2031	2,055	10.99
Other ⁽⁶⁾	2037	258	8.95	2037	249	8.10
Total senior floating		34,204	4.81		34,739	5.07
Total long-term debt of Fannie Mae ⁽⁷⁾		106,468	3.87		128,234	3.30
Debt of consolidated trusts	2025 - 2064	4,076,945	3.10	2025 - 2063	4,088,675	2.96
Total long-term debt		\$ 4,183,413	3.12 %		\$ 4,216,909	2.97 %

⁽¹⁾ Outstanding debt balance consists of the unpaid principal balance, premiums and discounts, fair value adjustments, hedge-related basis adjustments, and other cost basis adjustments.

⁽²⁾ Excludes the effects of fair value adjustments and hedge-related basis adjustments.

⁽³⁾ Includes long-term debt with an original contractual maturity of greater than 1 year and up to 10 years, excluding zero-coupon debt.

⁽⁴⁾ Includes other long-term debt with an original contractual maturity of greater than 10 years and foreign exchange bonds.

⁽⁵⁾ Consists of CAS debt issued prior to November 2018, a portion of which is reported at fair value.

⁽⁶⁾ Consists of structured debt instruments that are reported at fair value.

⁽⁷⁾ Includes unamortized discounts and premiums, fair value adjustments, hedge-related cost basis adjustments, and other cost basis adjustments in a net discount position of \$2.7 billion and \$3.6 billion as of September 30, 2025 and December 31, 2024, respectively.

9. Derivative Instruments

Derivative instruments are an integral part of our strategy in managing interest-rate risk. Derivative instruments may be privately-negotiated, bilateral contracts or they may be listed and traded on an exchange. We refer to our derivative transactions made pursuant to bilateral contracts as our over-the-counter (“OTC”) derivative transactions and our derivative transactions accepted for clearing by a derivatives clearing organization as our cleared derivative transactions. We typically do not settle the notional amount of our risk management derivatives; rather, notional amounts provide the basis for calculating actual payments or settlement amounts. The derivative contracts we use for interest-rate risk management purposes consist primarily of interest-rate swaps and interest-rate options. See “Note 9, Derivative Instruments” in our 2024 Form 10-K for additional information on interest-rate risk management.

We account for certain forms of credit risk transfer transactions as derivatives. In our credit risk transfer transactions, a portion of the credit risk associated with losses on a reference pool of mortgage loans is transferred to a third party. We enter into derivative transactions that are associated with some of our credit risk transfer transactions, whereby we manage investment risk to guarantee that certain unconsolidated VIEs have sufficient cash flows to pay their contractual obligations.

We enter into forward purchase and sale commitments that lock in the future delivery of mortgage loans and mortgage-related securities at a fixed price or yield. Certain commitments to purchase mortgage loans and purchase or sell mortgage-related securities meet the criteria of a derivative. We typically settle the notional amount of our mortgage commitments that are accounted for as derivatives.

We recognize all derivatives as either assets or liabilities in our condensed consolidated balance sheets at their fair value on a trade date basis. See “Note 13, Fair Value” for additional information on derivatives recorded at fair value.

Fair Value Hedge Accounting

Pursuant to our fair value hedge accounting program, we may designate certain interest-rate swaps as hedging instruments in hedges of the change in fair value attributable to the designated benchmark interest rate for certain closed pools of fixed-rate, single-family mortgage loans or our funding debt. For hedged items in qualifying fair value hedging relationships, changes in fair value attributable to the designated risk are recognized as a basis adjustment to the hedged item. We also report changes in the fair value of the derivative hedging instrument in the same condensed consolidated statements of operations and comprehensive income line item used to recognize the earnings effect of the hedged item’s basis adjustment. We record all gains and losses, including accrued interest, on derivatives while they are not in a qualifying designated hedging relationship in “Fair value gains (losses), net” in our condensed consolidated statements of operations and comprehensive income. The objective of our fair value hedges is to reduce GAAP earnings volatility related to changes in benchmark interest rates.

Notional and Fair Value Position of our Derivatives

The following table displays the notional amount and estimated fair value of our asset and liability derivative instruments, including derivative instruments designated as hedges.

	As of September 30, 2025			As of December 31, 2024		
	Notional Amount	Estimated Fair Value		Notional Amount	Estimated Fair Value	
		Asset Derivatives	Liability Derivatives		Asset Derivatives	Liability Derivatives
(Dollars in millions)

Forward contracts to sell mortgage-related securities	83,975	11	(123)	78,934	108	(10)
Total mortgage commitment derivatives	129,798	62	(156)	113,451	112	(137)
Credit enhancement derivatives	29,547	31	(9)	28,775	28	(16)
Derivatives at fair value	\$ 545,366	\$ 144	\$ (179)	\$ 474,869	\$ 179	\$ (154)

⁽¹⁾ Centrally cleared derivatives have no ascribable fair value because the positions are settled daily.

⁽²⁾ The netting adjustment represents the effect of the legal right to offset under legally enforceable master netting arrangements to settle with the same counterparty on a net basis, including cash collateral posted and received. Cash collateral posted was \$1.1 billion and \$2.0 billion as of September 30, 2025 and December 31, 2024, respectively. Cash collateral received was \$79 million and \$3 million as of September 30, 2025 and December 31, 2024, respectively.

The following table displays, by type of derivative instrument, the fair value gains and losses, net on our derivatives.

Hedged Items in Fair Value Hedging Relationships

The following table displays the carrying amounts of the hedged items that have been in qualifying fair value hedges recorded in our condensed consolidated balance sheets, including the hedged item's cumulative basis adjustments and the closed portfolio balances under the portfolio layer method. The hedged item carrying amounts and total basis adjustments include both open and discontinued hedges. The amortized cost and designated unpaid principal balance ("UPB") consists only of open hedges as of September 30, 2025 and December 31, 2024.

As of September 30, 2025					
Carrying Amount Assets (Liabilities)	Cumulative Amount of Fair Value Hedging Basis Adjustments Included in the Carrying Amount		Closed Portfolio of Mortgage Loans Under Portfolio Layer Method		
	Total Basis Adjustments ⁽¹⁾	Remaining Adjustments - Discontinued Hedge (Dollars in millions)	Total Amortized Cost	Designated UPB	
Mortgage loans HFI	\$ 1,240,556	\$ (40)	\$ (40)	\$ 283,665	\$ 32,952
Debt of Fannie Mae	(32,642)	2,498	2,498	N/A	N/A
As of December 31, 2024					
Carrying Amount Assets (Liabilities)	Cumulative Amount of Fair Value Hedging Basis Adjustments Included in the Carrying Amount		Closed Portfolio of Mortgage Loans Under Portfolio Layer Method		
	Total Basis Adjustments ⁽¹⁾	Remaining Adjustments - Discontinued Hedge (Dollars in millions)	Total Amortized Cost	Designated UPB	
Mortgage loans HFI	\$ 1,109,445	\$ (816)	\$ (816)	\$ 813,536	\$ 26,825
Debt of Fannie Mae	(47,849)	3,390	3,390	N/A	N/A

⁽¹⁾ No basis adjustment associated with open hedges, as all hedges are designated at the close of business with a one-day term. Based on the unamortized balance of the hedge-related cost basis.

Derivative Counterparty Credit Exposure

Our derivative counterparty credit exposure relates principally to interest-rate derivative contracts. We are exposed to the risk that a counterparty in a derivative transaction will default on payments due to us, which may require us to seek a replacement derivative from a different counterparty. This replacement may be at a higher cost, or we may be unable to find a suitable replacement. We manage our derivative counterparty credit exposure relating to our risk management derivative transactions mainly through enforceable master netting arrangements, which allow us to net derivative assets and liabilities with the same counterparty or clearing organization and clearing member. For our OTC derivative transactions, we require counterparties to post collateral, which may include cash, U.S. Treasury securities, agency debt and agency mortgage-related securities. See "Note 12, Netting Arrangements" for information on our rights to offset assets and liabilities as of September 30, 2025 and December 31, 2024.

For certain OTC derivatives, the amount of collateral we pledge to counterparties related to our derivative instruments is determined after considering our credit ratings. Currently, our long-term senior debt is rated AA+ or above by S&P Global Ratings and Moody's Ratings. If our long-term senior debt credit ratings were downgraded to established thresholds in our OTC derivative contracts, which range from A3/A- to Baa2/BBB or below, we would be required to provide additional collateral to certain counterparties. The aggregate fair value of our OTC derivative instruments with credit-risk-related contingent features that were in a net liability position was \$682 million and \$1.3 billion, for which we posted collateral of \$573 million and \$948 million as of September 30, 2025 and December 31, 2024, respectively. If our credit ratings were downgraded to Baa2/BBB or below, the maximum additional collateral we would have been required to post to our counterparties as of September 30, 2025 and December 31, 2024 would have been \$337 million and \$725 million, respectively.

10. Segment Reporting

We have two reportable business segments, which are based on the type of business activities each perform: Single-Family and Multifamily. Results of our two business segments are intended to reflect each segment as if it were a stand-alone business. Ms. Almodovar, our former President and CEO, was the chief operating decision maker (“CODM”) for our two reportable business segments for the three and nine months ended September 30, 2025 and 2024. The CODM uses both net revenues and income before federal income taxes, on a quarterly basis, to assess the financial performance of the segments and for purposes of allocating resources. The accounting policies of our two reportable business segments are the same as those described in “Note 1, Summary of Significant Accounting Policies” in our 2024 Form 10-K. Also see “Note 11, Segment Reporting” in our 2024 Form 10-K for additional information related to our business segments, including basis of organization and other segment activities.

Segment Allocations and Results

The majority of our assets, revenues and expenses are directly associated with each respective business segment and are included in determining its asset balance and operating results. Those assets, revenues and expenses that are not directly attributable to a particular business segment are allocated based on the size of each segment’s guaranty book of business. As a result, the sum of each income statement line item for the two reportable segments is equal to that same income statement line item for the consolidated entity. In addition, the sum of the total assets for the two reportable segments is equal to the total assets of the consolidated entity.

The substantial majority of the gains and losses associated with our risk management derivatives, including the impact of hedge accounting, are allocated to our Single-Family business segment. In the current period, there were no significant changes to our segment allocation methodology.

The following table displays total assets by segment.

	As of	
	September 30, 2025	December 31, 2024
	(Dollars in millions)	
Single-Family	\$ 3,788,572	\$ 3,823,840
Multifamily	547,284	525,891
Total assets	<u>\$ 4,335,856</u>	<u>\$ 4,349,731</u>

We operate our business solely in the United States and its territories, and accordingly, we generate no revenue from and have no long-lived assets, other than financial instruments, in geographic locations other than the United States and its territories.

The below tables display our segment results.

	For the Three Months Ended September 30,					
	2025			2024		
	Single-Family	Multifamily	Total	Single-Family	Multifamily	Total
	(Dollars in millions)

Net income	\$ 8,739	\$ 2,098	\$ 10,837	\$ 10,976	\$ 1,872	\$ 12,848

- (1) Net interest income primarily consists of guaranty fees received as compensation for assuming the credit risk on loans underlying Fannie Mae MBS held by third parties for the respective business segment, and the difference between the interest income earned on the respective business segment's assets in our retained mortgage portfolio and our corporate liquidity portfolio and the interest expense associated with the debt funding those assets. Revenues from single-family guaranty fees include revenues generated by the 10 basis point increase in guaranty fees pursuant to the Temporary Payroll Tax Cut Continuation Act of 2011 ("TCCA"), the incremental revenue from which is paid to Treasury and not retained by us. Also includes yield maintenance revenue we recognized on the prepayment of multifamily loans.
- (2) (Provision) benefit for credit losses is based on loans underlying the segment's guaranty book of business.
- (3) Single-family fair value gains (losses) primarily consist of fair value gains and losses on risk management and mortgage commitment derivatives, trading securities, fair value option debt, and other financial instruments associated with our single-family guaranty book of business. Multifamily fair value gains (losses) primarily consist of fair value gains and losses on MBS commitment derivatives, trading securities and other financial instruments associated with our multifamily guaranty book of business.
- (4) Single-family investment gains (losses) primarily consist of gains and losses on the sale of mortgage assets. Multifamily investment gains (losses) primarily consist of gains and losses on securitization activity.
- (5) Consists of salaries and employee benefits and professional services, technology and occupancy expenses.
- (6) For single-family, consists of the portion of our single-family guaranty fees that is paid to Treasury pursuant to the TCCA, affordable housing allocations and FHFA assessments. For multifamily, consists of affordable housing allocations and FHFA assessments.
- (7) Single-family credit enhancement expense consists of costs associated with our freestanding credit enhancements, which include primarily costs associated with our Credit Insurance Risk Transfer™ ("CIRT™"), Connecticut Avenue Securities® ("CAS") and enterprise-paid mortgage insurance ("EPMI") programs. Multifamily credit enhancement expense primarily consists of costs associated with our Multifamily CIRT™ ("MCIRT™") and Multifamily Connecticut Avenue Securities® ("MCAS™") programs as well as amortization expense for certain lender risk-sharing programs. Excludes CAS transactions accounted for as debt instruments and credit risk transfer programs accounted for as derivative instruments.
- (8) Consists of change in benefits recognized from our freestanding credit enhancements, primarily from our CAS and CIRT programs, as well as certain lender risk-sharing arrangements, including our multifamily Delegated Underwriting and Servicing ("DUS®") program.
- (9) Primarily consists of debt extinguishment gains (losses), foreclosed property income (expense) and gains (losses) from partnership investments.

11. Concentrations of Credit Risk

Risk Characteristics of our Guaranty Book of Business

One of the measures by which management gauges our credit risk is the delinquency status of the mortgage loans in our guaranty book of business.

For single-family and multifamily loans, management uses this information, in conjunction with housing market data, other economic data, our capital requirements and our mission objectives, to help inform changes to our eligibility and underwriting criteria. Management also uses this data together with other credit risk measures to identify key trends that guide the development of our loss mitigation strategies.

We report the delinquency status of our single-family and multifamily guaranty book of business below.

Single-Family Credit Risk Characteristics

For single-family loans, management monitors the serious delinquency rate, which is the percentage of single-family loans, based on number of loans, that are 90 days or more past due or in the foreclosure process, and loans that have higher risk characteristics, such as high mark-to-market LTV ratios.

The following tables display the delinquency status and serious delinquency rates for specified loan categories of our single-family conventional guaranty book of business.

	As of					
	September 30, 2025			December 31, 2024		
	30 Days Delinquent	60 Days Delinquent	Seriously Delinquent	30 Days Delinquent	60 Days Delinquent	Seriously Delinquent
Percentage of single-family conventional guaranty book of business based on UPB	0.94 %	0.26 %	0.59 %	1.00 %	0.28 %	0.60 %
Percentage of single-family conventional loans based on loan count	1.00	0.27	0.54	1.05	0.29	0.56

	As of			
	September 30, 2025		December 31, 2024	
	Percentage of Single-Family Conventional Guaranty Book of Business Based on UPB	Serious Delinquency Rate	Percentage of Single-Family Conventional Guaranty Book of Business Based on UPB	Serious Delinquency Rate
Estimated mark-to-market LTV ratio:				
80.01% to 90%	7 %	0.94 %	6 %	0.97 %
90.01% to 100%	4	0.87	3	0.77
Greater than 100%	*	3.46	*	2.82
Geographical distribution:				
California	18	0.43	19	0.41
Florida	6	0.81	6	0.96
Illinois	3	0.68	3	0.69
New York	4	0.75	4	0.79
Texas	8	0.68	8	0.73
All other states	61	0.50	60	0.51

* Represents less than 0.5% of single-family conventional guaranty book of business.

Multifamily Credit Risk Characteristics

For multifamily loans, management monitors the serious delinquency rate, which is the percentage of multifamily loans, based on unpaid principal balance, that are 60 days or more past due, and loans with other higher risk characteristics to determine the overall credit quality of our multifamily book of business. Higher risk characteristics include, but are not limited to, current debt service coverage ratio ("DSCR") below 1.0 and original LTV ratio greater than 80%. We stratify multifamily loans into different internal risk categories based on the credit risk inherent in each individual loan.

The following tables display the delinquency status and serious delinquency rates for specified loan categories of our multifamily guaranty book of business.

	As of			
	September 30, 2025 ⁽¹⁾		December 31, 2024 ⁽¹⁾	
	30 Days Delinquent	Seriously Delinquent ⁽²⁾	30 Days Delinquent	Seriously Delinquent ⁽²⁾
Percentage of multifamily guaranty book of business	0.12 %	0.68 %	0.10 %	0.57 %

	As of			
	September 30, 2025		December 31, 2024	
	Percentage of Multifamily Guaranty Book of Business ⁽¹⁾	Serious Delinquency Rate ⁽²⁾⁽³⁾	Percentage of Multifamily Guaranty Book of Business ⁽¹⁾	Serious Delinquency Rate ⁽²⁾⁽³⁾
Original LTV ratio:				
Greater than 80%	1 %	0.11 %	1 %	0.12 %
Less than or equal to 80%	99	0.69	99	0.58
Current DSCR below 1.0⁽⁴⁾	4	5.43	6	4.94

⁽¹⁾ Calculated based on the aggregate unpaid principal balance of multifamily loans for each category divided by the aggregate unpaid principal balance of loans in our multifamily guaranty book of business.

⁽²⁾ Consists of multifamily loans that were 60 days or more past due as of the dates indicated.

⁽³⁾ Calculated based on the unpaid principal balance of multifamily loans that were seriously delinquent divided by the aggregate unpaid principal balance of multifamily loans for each category included in our multifamily guaranty book of business.

⁽⁴⁾ Our estimates of current DSCRs are based on the latest available income information, including the related debt service covering a 12-month period, from quarterly and annual statements for these properties.

Other Concentrations

For information on credit risk associated with our derivative transactions and repurchase agreements see “Note 9, Derivative Instruments” and “Note 12, Netting Arrangements.” For information on other concentrations related to mortgage insurers and mortgage servicers and sellers, see “Note 14, Concentrations of Credit Risk—Other Concentrations” in our 2024 Form 10-K.

12. Netting Arrangements

We use master netting arrangements, which allow us to offset certain financial instruments and collateral with the same counterparty, to minimize counterparty credit exposure. The tables below display information related to derivatives and securities purchased under agreements to resell, which are subject to an enforceable master netting arrangement or similar agreement that are either offset or not offset in our condensed consolidated balance sheets.

	As of September 30, 2025

⁽¹⁾ Represents the effect of the right to offset under legally enforceable master netting arrangements to settle with the same counterparty on a net basis, including cash collateral posted and received and accrued interest.

⁽²⁾ Mortgage commitment derivative amounts reflect where we have recognized both an asset and a liability with the same counterparty under an enforceable master netting arrangement but we have not elected to offset the related amounts in our condensed consolidated balance sheets.

⁽³⁾ Represents collateral received that has not been recognized and has not been offset in our condensed consolidated balance sheets, as well as collateral posted that has been recognized but not offset in our condensed consolidated balance sheets. Does not include collateral held or posted in excess of our exposure.

⁽⁴⁾ Excludes derivative assets of \$31 million and \$28 million as of September 30, 2025 and December 31, 2024, respectively, and derivative liabilities of \$9 million and \$16 million as of September 30, 2025 and December 31, 2024, respectively, recognized in our condensed consolidated balance sheets, that were not subject to enforceable master netting arrangements.

Derivative instruments are recorded at fair value and securities purchased under agreements to resell are recorded at amortized cost in our condensed consolidated balance sheets. For a discussion of how we determine our rights to offset the assets and liabilities presented above with the same counterparty, including collateral posted or received, see “Note 15, Netting Arrangements” in our 2024 Form 10-K.

13. Fair Value

We use fair value measurements for the initial recording of certain assets and liabilities and periodic remeasurement of certain assets and liabilities on a recurring or nonrecurring basis.

Fair Value Measurement

Fair value measurement guidance defines fair value, establishes a framework for measuring fair value and sets forth disclosures around fair value measurements. This guidance applies whenever other accounting guidance requires or permits assets or liabilities to be measured at fair value. The guidance establishes a three-level fair value hierarchy that prioritizes the inputs into the valuation techniques used to measure fair value as follows:

- Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2: Limited observable inputs or observable inputs for similar assets and liabilities.
- Level 3: Unobservable inputs.

We use valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. See “Note 16, Fair Value” in our 2024 Form 10-K for information on the valuation control processes and the valuation techniques we use for fair value measurement and disclosure as well as our basis for classifying these measurements as Level 1, Level 2 or Level 3 of the valuation hierarchy in more specific situations. If the inputs used to measure assets or liabilities at fair value change, it may also result in a change in classification between Levels 1, 2, and 3. We made no material changes to the valuation control processes or the valuation techniques for the nine months ended September 30, 2025.

Recurring Changes in Fair Value

The following tables display our assets and liabilities measured in our condensed consolidated balance sheets at fair value on a recurring basis subsequent to initial recognition, including instruments for which we have elected the fair value option.

Fair Value Measurements as of September 30, 2025					
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Netting Adjustment ⁽¹⁾	Estimated Fair Value

Mortgage-related ⁽¹⁾	\$ 26	Primarily Consensus	
Available-for-sale securities:			
Agency ⁽¹⁾	\$ 283	Consensus and Single Vendor	
Other mortgage-related	68	Primarily Single Vendor and Consensus	
Total available-for-sale securities	\$ 351		
Net derivatives	\$ 48	Dealer Mark and Discounted Cash Flow	

	Fair Value Measurements as of December 31, 2024		
	Fair Value	Significant Valuation Techniques	
		(Dollars in millions)	
Recurring fair value measurements:			
Trading securities:			
Mortgage-related ⁽¹⁾	\$	28	Primarily Consensus
Available-for-sale securities:			
Agency ⁽¹⁾	\$	301	Consensus
Other mortgage-related		126	Primarily Discounted Cash Flow, Single Vendor, and Consensus
Total available-for-sale securities	\$	427	
Net derivatives	\$	39	Dealer Mark and Discounted Cash Flow

⁽¹⁾ Includes Fannie Mae and Freddie Mac securities.

In our condensed consolidated balance sheets, certain assets and liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when we evaluate loans for impairment).

The following table displays valuation techniques for our Level 3 assets measured at fair value on a nonrecurring basis.

		Fair Value Measurements as of	
	Valuation Techniques	September 30, 2025	December 31, 2024
(Dollars in millions)			
Nonrecurring fair value measurements:			
Mortgage loans: ⁽¹⁾			
Mortgage loans held for sale, at lower of cost or fair value	Consensus	\$ 455	\$ 113
Single-family mortgage loans held for investment, at amortized cost	Internal Model	272	267
Multifamily mortgage loans held for investment, at amortized cost	Appraisal	259	448
	Asset Manager Estimate	71	—
	Broker Price Opinion	1,319	851
	Internal Model	176	172
Total multifamily mortgage loans held for investment, at amortized cost		1,825	1,471
Acquired property, net:			
Single-family	Accepted Offer and Appraisal	172	74
	Internal Model and Walk Forward	284	294
Total single-family		456	368
Multifamily	Broker Price Opinion and Appraisal	97	278
Total nonrecurring assets at fair value		\$ 3,105	\$ 2,497

⁽¹⁾ When we measure impairment, including recoveries, based on the fair value of the loan or the underlying collateral and impairment is recorded on any component of the mortgage loan, including accrued interest receivable and amounts due from the borrower for advances of taxes and insurance, we present the entire fair value measurement amount with the corresponding mortgage loan.

Fair Value of Financial Instruments

The following table displays the carrying value and estimated fair value of our financial instruments. The fair value of financial instruments we disclose includes commitments to purchase multifamily and single-family mortgage loans that we do not record in our condensed consolidated balance sheets. The fair values of these commitments are included as "Mortgage loans held for investment, net of allowance for loan losses." The disclosure excludes all non-financial instruments; therefore, the fair value of our financial assets and liabilities does not represent the underlying fair value of our total consolidated assets and liabilities.

For a detailed description and classification of our financial instruments, see “Note 16, Fair Value” in our 2024 Form 10-K.

Fair Value Option

We generally elect the fair value option on a financial instrument when the accounting guidance would otherwise require us to separately account for a derivative that is embedded in the instrument at fair value. Under the fair value option, we carry this type of instrument, in its entirety, at fair value instead of separately accounting for the derivative.

Interest income from the mortgage loans is recorded in “Interest income: Mortgage loans” and interest expense for the debt instruments is recorded in “Interest expense: Long-term debt” in our condensed consolidated statements of operations and comprehensive income.

The following table displays the fair value and unpaid principal balance of the financial instruments for which we have elected the fair value option.

As of						
	September 30, 2025			December 31, 2024		
	Loans ⁽¹⁾	Long-Term Debt of Fannie Mae	Long-Term Debt of Consolidated Trusts	Loans ⁽¹⁾	Long-Term Debt of Fannie Mae	Long-Term Debt of Consolidated Trusts
(Dollars in millions)						
Fair value	\$ 5,202	\$ 299	\$ 15,323	\$ 3,744	\$ 385	\$ 13,292
Unpaid principal balance	5,528	290	15,827	4,079	383	13,766

⁽¹⁾ Includes nonaccrual loans with a fair value of \$26 million and \$31 million as of September 30, 2025 and December 31, 2024, respectively. Includes loans that are 90 days or more past due with a fair value of \$22 million and \$25 million as of September 30, 2025 and December 31, 2024, respectively.

Changes in Fair Value under the Fair Value Option Election

We recorded gains of \$87 million and \$248 million for the three and nine months ended September 30, 2025, respectively, and gains of \$134 million and \$87 million for the three and nine months ended September 30, 2024, respectively, from changes in the fair value of loans recorded at fair value in “Fair value gains (losses), net” in our condensed consolidated statements of operations and comprehensive income.

We recorded losses of \$203 million and \$582 million for the three and nine months ended September 30, 2025, respectively, and losses of \$471 million and \$343 million for the three and nine months ended September 30, 2024, respectively, from changes in the fair value of long-term debt recorded at fair value in “Fair value gains (losses), net” in our condensed consolidated statements of operations and comprehensive income.

14. Commitments and Contingencies

We are party to various types of legal actions and proceedings, including actions brought on behalf of various classes of claimants. We also are subject to regulatory examinations, inquiries and investigations, and other information gathering requests. In some of the matters, indeterminate amounts are sought. Modern pleading practice in the U.S. permits considerable variation in the assertion of monetary damages or other relief. Jurisdictions may permit claimants not to specify the monetary damages sought or may permit claimants to state only that the amount sought is sufficient to invoke the jurisdiction of the trial court. This variability in pleadings, together with our and our counsel's actual experience in litigating or settling claims, leads us to conclude that the monetary relief that may be sought by plaintiffs bears little relevance to the merits or disposition value of claims.

Legal actions and proceedings of all types are subject to many uncertain factors that generally cannot be predicted with assurance. Accordingly, the outcome of any given matter and the amount or range of potential loss at particular points in time is frequently difficult to ascertain. Uncertainties can include how fact finders will evaluate documentary evidence and the credibility and effectiveness of witness testimony, and how the court will apply the law. Disposition valuations are also subject to the uncertainty of how opposing parties and their counsel may view the evidence and applicable law.

On a quarterly basis, we review relevant information about pending legal actions and proceedings for the purpose of evaluating and revising our contingencies, accruals and disclosures. We establish an accrual only for matters when the likelihood of a loss is probable and we can reasonably estimate the amount of such loss. We are often unable to estimate the possible losses or ranges of losses, particularly for proceedings that are in their early stages of development, where plaintiffs seek indeterminate or unspecified damages, where there may be novel or unsettled legal questions relevant to the proceedings, or where settlement negotiations have not occurred or progressed. Given the uncertainties involved in any action or proceeding, regardless of whether we have established an accrual, the ultimate resolution of certain of these matters may be material to our operating results for a particular period, depending on, among other factors, the size of the loss or liability imposed and the level of our net income or loss for that period.

In addition to the matters specifically described below, we are involved in a number of legal and regulatory proceedings that arise in the ordinary course of business that we do not expect will have a material impact on our business or financial condition.

Senior Preferred Stock Purchase Agreements Litigation

A consolidated class action (“*In re Fannie Mae/Freddie Mac Senior Preferred Stock Purchase Agreement Class Action Litigations*”) and a non-class action lawsuit, *Fairholme Funds v. FHFA*, filed by Fannie Mae and Freddie Mac stockholders against us, FHFA as our conservator, and Freddie Mac were filed in the U.S. District Court for the District of Columbia. The lawsuits challenge the August 2012 amendment to each company's senior preferred stock purchase agreement with Treasury.

Plaintiffs in these lawsuits allege that the net worth sweep dividend provisions of the senior preferred stock that were implemented pursuant to the August 2012 amendments nullified certain of the stockholders' rights and caused them harm. Plaintiffs in the class action represent a class of Fannie Mae preferred stockholders and classes of Freddie Mac common and preferred stockholders. The cases were tried before a jury at a trial that commenced on July 24, 2023. On August 14, 2023, the jury returned a verdict for the plaintiffs and awarded damages of \$299.4 million to Fannie Mae preferred stockholders. On October 24, 2023, the court held that these stockholders were entitled to receive prejudgment interest on the damage award. On March 20, 2024, the court entered final judgment and set the amount of prejudgment interest owed by Fannie Mae at \$199.7 million. On April 17, 2024, the defendants filed a motion for judgment as a matter of law, which the court denied on March 14, 2025. The defendants filed a notice of appeal on April

11, 2025. On April 25, 2025, plaintiffs filed a notice of cross-appeal challenging several of the court's pretrial rulings, which they contend prevented them from seeking the full measure of their alleged damages. Until the appeal is resolved and any final judgment amount has been paid, post-judgment interest on the damages and prejudgment interest awards will accrue at a rate of 5.01%, starting on March 20, 2024, to be computed daily and compounded annually. We recognized \$495 million in 2023 related to the jury verdict and estimated prejudgment interest through December 31, 2023 in "Other expenses, net." We recognized an additional \$24 million of expense through December 31, 2024, and \$7 million and \$20 million of expense for the three and nine months ended September 30, 2025, respectively, related to the prejudgment and post-judgment interest. Briefing on the appeal is currently scheduled to conclude in February 2026.

15. Regulatory Capital Requirements

The enterprise regulatory capital framework went into effect in February 2021; however, we are not required to hold capital according to the framework's requirements until the date of termination of our conservatorship, or such later date as may be ordered by FHFA. The following table displays our capital requirements under the standardized approach of the enterprise regulatory capital framework.

Capital Metrics under the Enterprise Regulatory Capital Framework as of September 30, 2025⁽¹⁾

(Dollars in billions)						
Adjusted total assets	\$	4,443				
Risk-weighted assets		1,372				
	Amounts			Ratios		
	Available Capital (Deficit) ⁽²⁾	Minimum Capital Requirement	Total Capital Requirement (including Buffers) ⁽³⁾	Available Capital (Deficit) Ratio	Minimum Capital Ratio Requirement	Total Capital Requirement Ratio (including Buffers)
Risk-based capital:						
Total capital (statutory)	\$ (7)	\$ 110	\$ 110	(0.5)%	8.0 %	8.0 %
Common equity tier 1 capital	(44)	62	142	(3.2)	4.5	10.3
Tier 1 capital	(25)	82	162	(1.8)	6.0	11.8
Adjusted total capital	(25)	110	190	(1.8)	8.0	13.8
Leverage capital:						
Core capital (statutory)	(15)	111	111	(0.3)	2.5	2.5
Tier 1 capital	(25)	111	134	(0.6)	2.5	3.0

Capital Metrics under the Enterprise Regulatory Capital Framework as of December 31, 2024⁽¹⁾

(Dollars in billions)						
Adjusted total assets	\$	4,460				
Risk-weighted assets		1,364				
	Amounts			Ratios		
	Available Capital (Deficit) ⁽²⁾	Minimum Capital Requirement	Total Capital Requirement (including Buffers) ⁽³⁾	Available Capital (Deficit) Ratio	Minimum Capital Requirement	Total Capital Requirement Ratio (including Buffers)
Risk-based capital:						
Total capital (statutory)	\$ (18)	\$ 109	\$ 109	(1.3)%	8.0 %	8.0 %
Common equity tier 1 capital	(56)	61	142	(4.1)	4.5	10.4
Tier 1 capital	(37)	82	163	(2.7)	6.0	11.9
Adjusted total capital	(37)	109	190	(2.7)	8.0	13.9
Leverage capital:						
Core capital (statutory)	(26)	111	111	(0.6)	2.5	2.5
Tier 1 capital	(37)	111	135	(0.8)	2.5	3.0

⁽¹⁾ Ratios are calculated as a percentage of risk-weighted assets for risk-based capital metrics and as a percentage of adjusted total assets for leverage capital metrics.

⁽²⁾ Available capital deficit for all line items excludes the stated value of the senior preferred stock (\$120.8 billion).

⁽³⁾ Prescribed capital conservation buffer amount, or PCCBA, for risk-based capital and prescribed leverage buffer amount, or PLBA, for leverage capital.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Information about market risk is set forth in “MD&A—Risk Management—Market Risk Management, including Interest-Rate Risk Management.”

Item 4. Controls and Procedures

Overview

We are required under applicable laws and regulations to maintain controls and procedures, which include disclosure controls and procedures as well as internal control over financial reporting, as further described below.

Evaluation of Disclosure Controls and Procedures

Disclosure Controls and Procedures

Disclosure controls and procedures refer to controls and other procedures designed to provide reasonable assurance that information required to be disclosed in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding our required disclosure. In designing and evaluating our disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management was required to apply its judgment in evaluating and implementing possible controls and procedures.

Evaluation of Disclosure Controls and Procedures

As required by Rule 13a-15 under the Exchange Act, management has evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures in effect as of September 30, 2025, the end of the period covered by this report. As a result of management’s evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were not effective at a reasonable assurance level as of September 30, 2025, or as of the date of filing this report.

Our disclosure controls and procedures were not effective as of September 30, 2025, or as of the date of filing this report because they did not adequately ensure the accumulation and communication to management of information known to FHFA that is needed to meet our disclosure obligations under the federal securities laws. As a result, we were not able to rely upon the disclosure controls and procedures that were in place as of September 30, 2025, or as of the date of this filing, and we continue to have a material weakness in our internal control over financial reporting. This material weakness is described in more detail below under “Description of Material Weakness.” Based on discussions with FHFA and the structural nature of this material weakness, we do not expect to remediate this material weakness while we are under conservatorship.

Description of Material Weakness

The Public Company Accounting Oversight Board’s Auditing Standard 2201 defines a material weakness as a deficiency, or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the company’s annual or interim financial statements will not be prevented or detected on a timely basis.

Management has determined that we continued to have the following material weakness as of September 30, 2025, and as of the date of filing this report:

- *Disclosure Controls and Procedures.* We have been under the conservatorship of FHFA since September 2008. Under the GSE Act, FHFA is an independent agency that currently functions as both our conservator and our regulator with respect to our safety, soundness, and mission. Because of the nature of the conservatorship under the GSE Act, which places us under the “control” of FHFA (as that term is defined by securities laws), some of the information that we may need to meet our disclosure obligations may be solely within the knowledge of FHFA. As our conservator, FHFA has the power to take actions without our knowledge that could be material to our stockholders and other stakeholders, and could significantly affect our financial performance or our continued existence as an ongoing business. Although we and FHFA attempted to design and implement

disclosure policies and procedures that would account for the conservatorship and accomplish the same objectives as a disclosure controls and procedures policy of a typical reporting company, there are inherent structural limitations on our ability to design, implement, operate, and test effective disclosure controls and procedures. As both our regulator and our conservator under the GSE Act, FHFA is limited in its ability to design and implement a complete set of disclosure controls and procedures relating to Fannie Mae, particularly with respect to current reporting pursuant to Form 8-K. Similarly, as a regulated entity, we are limited in our ability to design, implement, operate, and test the controls and procedures for which FHFA is responsible.

Due to these circumstances, we have not been able to update our disclosure controls and procedures in a manner that adequately ensures the accumulation and communication to management of information known to FHFA that is needed to meet our disclosure obligations under the federal securities laws, including disclosures affecting our condensed consolidated financial statements. As a result, we did not maintain effective controls and procedures designed to ensure complete and accurate disclosure as required by GAAP as of September 30, 2025, or as of the date of filing this report. Based on discussions with FHFA and the structural nature of this weakness, we do not expect to remediate this material weakness while we are under conservatorship.

Mitigating Actions Related to Material Weakness

We and FHFA have engaged in the following practices intended to permit accumulation and communication to management of information needed to meet our disclosure obligations under the federal securities laws:

- FHFA has established a process to facilitate operation of the company under the oversight of the conservator.
- FHFA personnel, including senior officials, have reviewed our quarterly and annual SEC filings prior to filing, including this quarterly report on Form 10-Q for the quarter ended September 30, 2025 ("Third Quarter 2025 Form 10-Q"), and engaged in discussions regarding issues associated with the information contained in those filings. Prior to filing our Third Quarter 2025 Form 10-Q, FHFA provided Fannie Mae management with written acknowledgment that it had reviewed the Third Quarter 2025 Form 10-Q, and it was not aware of any material misstatements or omissions in the Third Quarter 2025 Form 10-Q and had no objection to our filing the Third Quarter 2025 Form 10-Q.
- We have also provided FHFA personnel drafts of our Form 8-K filings, external press releases, statements, and speeches for their review prior to filing or release.
- Our senior management meets regularly with senior leadership at FHFA. In addition, the FHFA Director serves as Chairman of our Board of Directors.
- FHFA representatives attend meetings frequently with various groups within the company to enhance the flow of information and to provide oversight on a variety of matters, including accounting, credit and market risk management, external communications, and legal matters.
- Senior officials within FHFA's Office of the Chief Accountant have met frequently with our senior finance executives regarding our accounting policies, practices, and procedures.

Changes in Internal Control Over Financial Reporting

Management has evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, whether any changes in our internal control over financial reporting that occurred during our last fiscal quarter have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. There were no changes in our internal control over financial reporting from July 1, 2025 through September 30, 2025 that management believes have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

In the ordinary course of business, we review our system of internal control over financial reporting and make changes that we believe will improve these controls and increase efficiency, while continuing to ensure that we maintain effective internal controls. Changes may include implementing new, more efficient systems, automating manual processes, changes in personnel performing controls, and updating existing systems.

PART II—OTHER INFORMATION

Item 1. Legal Proceedings

The information in this item supplements and updates information regarding certain legal proceedings set forth in “Legal Proceedings” in our 2024 Form 10-K, our First Quarter 2025 Form 10-Q, and our Second Quarter 2025 Form 10-Q. We also provide information regarding material legal proceedings in “Note 14, Commitments and Contingencies,” which is incorporated herein by reference. In addition to the matters specifically described or incorporated by reference in this item, we are involved in legal and regulatory proceedings that arise in the ordinary course of business that we do not expect will have a material impact on our business or financial condition. However, litigation claims and proceedings of all types are subject to many factors and their outcome and effect on our business and financial condition generally cannot be predicted accurately.

We establish an accrual for legal claims only when a loss is probable and we can reasonably estimate the amount of such loss. The actual costs of resolving legal claims may be substantially higher or lower than the amounts accrued for those claims. If certain of these matters are determined against us, FHFA or Treasury, it could have a material adverse effect on our results of operations, liquidity and financial condition, including our net worth.

Senior Preferred Stock Purchase Agreements Litigation

Since June 2013, preferred and common stockholders of Fannie Mae and Freddie Mac filed lawsuits in multiple federal courts against one or more of the United States, Treasury and FHFA, challenging actions taken by the defendants relating to the Fannie Mae and Freddie Mac senior preferred stock purchase agreements and the conservatorships of Fannie Mae and Freddie Mac. Some of these lawsuits also contain claims against Fannie Mae and Freddie Mac. The legal claims being advanced by one or more of these lawsuits include challenges to the net worth sweep dividend provisions of the senior preferred stock that were implemented pursuant to August 2012 amendments to the agreements, the payment of dividends to Treasury under the net worth sweep dividend provisions, and FHFA's decision to require Fannie Mae and Freddie Mac to draw funds from Treasury to pay dividends to Treasury prior to the August 2012 amendments. The plaintiffs seek various forms of equitable and injunctive relief as well as damages. The cases that remain pending or were terminated on or after June 30, 2025 are as follows:

District of Columbia (In re Fannie Mae/Freddie Mac Senior Preferred Stock Purchase Agreement Class Action Litigations and Fairholme Funds v. FHFA). Fannie Mae is a defendant in two cases filed in the U.S. District Court for the District of Columbia, including a consolidated class action. The cases were consolidated for trial, and on August 14, 2023, the jury returned a verdict for the plaintiffs and awarded damages of \$299.4 million to Fannie Mae preferred stockholders. On March 20, 2024, the court entered final judgment and set the amount of prejudgment interest owed by Fannie Mae at \$199.7 million. Defendants filed a notice of appeal on April 11, 2025, and plaintiffs filed a notice of cross-appeal on April 25, 2025. See “Note 14, Commitments and Contingencies” for additional information.

Western District of Michigan (Rop et al. v. FHFA et al.). On June 1, 2017, preferred and common stockholders of Fannie Mae and Freddie Mac filed a complaint for declaratory and injunctive relief against FHFA and Treasury in the U.S. District Court for the Western District of Michigan. FHFA and Treasury moved to dismiss the case on September 8, 2017, and plaintiffs filed a motion for summary judgment on October 6, 2017. On September 8, 2020, the court denied plaintiffs' motion for summary judgment and granted defendants' motion to dismiss. On October 4, 2022, the U.S. Court of Appeals for the Sixth Circuit reversed the dismissal and remanded the case to the district court to determine whether the stockholders suffered compensable harm. On February 2, 2023, plaintiffs filed a petition with the Supreme Court seeking review of the Sixth Circuit's decision, which the Supreme Court denied on June 12, 2023. On August 11, 2023, plaintiffs submitted a motion for leave to file an amended complaint in the district court, which the court denied on December 11, 2024. On March 27, 2025, FHFA filed a motion for judgment on the pleadings. Treasury likewise filed a motion for judgment on the pleadings on March 28, 2025. On April 1, 2025, plaintiffs filed a motion for leave to amend their complaint.

Eastern District of Pennsylvania (Wazee Street Opportunities Fund IV L.P. et al. v. FHFA et al.). On August 16, 2018, common stockholders of Fannie Mae and Freddie Mac filed a complaint for declaratory and injunctive relief against FHFA and Treasury in the U.S. District Court for the Eastern District of Pennsylvania. FHFA and Treasury moved to dismiss the case on November 16, 2018, and plaintiffs filed a motion for summary judgment on December 21, 2018. On April 30, 2025, the district court granted FHFA's and Treasury's motions and dismissed the case. The stockholders' time to seek further review expired on June 30, 2025, and the case is now concluded.

U.S. Court of Federal Claims (Fisher et al. v. United States of America). On December 2, 2013, common stockholders of Fannie Mae filed a lawsuit against the United States that listed Fannie Mae as a nominal defendant. The plaintiffs alleged that the net worth sweep dividend provisions of the senior preferred stock that were implemented pursuant to

the August 2012 amendment constituted a taking of Fannie Mae's property without just compensation in violation of the U.S. Constitution. On February 15, 2023, the court issued an order for plaintiffs to show cause why their claims should not be dismissed, as claims similar to theirs brought by other Fannie Mae stockholders in other cases against the United States had been dismissed by the court. On September 1, 2023, the court dismissed the case with prejudice. On August 12, 2025, the U.S. Court of Appeals for the Federal Circuit affirmed the trial court's order dismissing the case.

Item 1A. Risk Factors

In addition to the information in this report, you should carefully consider the risks relating to our business that we identify in "Risk Factors" in our 2024 Form 10-K. Also refer to "MD&A—Risk Management," "MD&A—Single-Family Business" and "MD&A—Multifamily Business" in our 2024 Form 10-K and in this report for more detailed descriptions of the primary risks to our business and how we seek to manage those risks.

The risks we face could materially adversely affect our business, results of operations, financial condition, liquidity and net worth, and could cause our actual results to differ materially from our past results or the results contemplated by any forward-looking statements we make. We believe the risks described in the sections of this report and our 2024 Form 10-K referenced above are the most significant we face; however, these are not the only risks we face. We face additional risks and uncertainties not currently known to us or that we currently believe are immaterial.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Common Stock

Our common stock is traded in the over-the-counter market and quoted on the OTCQB, operated by OTC Markets Group Inc., under the ticker symbol "FNMA."

Recent Sales of Unregistered Equity Securities

Under the terms of our senior preferred stock purchase agreement with Treasury, we are prohibited from selling or issuing our equity interests without the prior written consent of Treasury except under limited circumstances, which are described in "Business—Conservatorship and Treasury Agreements—Treasury Agreements—Covenants" in our 2024 Form 10-K. During the quarter ended September 30, 2025, we did not sell any equity securities.

Information about Certain Securities Issuances by Fannie Mae

Pursuant to SEC regulations, public companies are required to disclose certain information when they incur a material direct financial obligation or become directly or contingently liable for a material obligation under an off-balance sheet arrangement. The disclosure must be made in a current report on Form 8-K under Item 2.03 or, if the obligation is incurred in connection with certain types of securities offerings, in prospectuses for that offering that are filed with the SEC.

Because the securities we issue are exempted securities under the Securities Act of 1933, we do not file registration statements or prospectuses with the SEC with respect to our securities offerings. To comply with the disclosure requirements of Form 8-K relating to the incurrence of material financial obligations, in accordance with a "no-action" letter we received from the SEC staff in 2004, we report our incurrence of these types of obligations in offering circulars or prospectuses (or supplements thereto) that we post on our website within the same time period that a prospectus for a non-exempt securities offering would be required to be filed with the SEC. To the extent we incur a material financial obligation that is not disclosed in this manner, we would file a Form 8-K if required to do so under applicable Form 8-K requirements.

The website address for disclosure about our debt securities is www.fanniemae.com/debtsearch. From this address, investors can access the offering circular and related supplements for debt securities offerings under Fannie Mae's universal debt facility, including pricing supplements for individual issuances of debt securities.

Disclosure about our obligations pursuant to the MBS we issue, some of which may be off-balance sheet obligations, can be found at www.fanniemae.com/mbsdDisclosure. From this address, investors can access information and documents about our MBS, including prospectuses and related prospectus supplements.

We are providing our website address solely for your information. Information appearing on our website is not incorporated into this report.

Our Purchases of Equity Securities

We did not repurchase any of our equity securities during the third quarter of 2025.

Dividend Restrictions

Our payment of dividends is subject to the following restrictions:

Restrictions Relating to Conservatorship. Our conservator announced on September 7, 2008 that we would not pay any dividends on the common stock or on any series of preferred stock, other than the senior preferred stock. In addition, FHFA's regulations relating to conservatorship and receivership operations prohibit us from paying any dividends while in conservatorship unless authorized by the Director of FHFA. The Director of FHFA has directed us to make dividend payments on the senior preferred stock on a quarterly basis for every dividend period for which dividends were payable.

Restrictions Under Senior Preferred Stock Purchase Agreement and Senior Preferred Stock. The senior preferred stock purchase agreement prohibits us from declaring or paying any dividends on Fannie Mae equity securities (other than the senior preferred stock) without the prior written consent of Treasury. In addition, the provisions of the senior preferred stock provide for dividends each quarter through and including the capital reserve end date in the amount, if any, by which our net worth as of the end of the immediately preceding fiscal quarter exceeds an applicable capital reserve amount. The applicable capital reserve amount is the amount of adjusted total capital necessary for us to meet the capital requirements and buffers set forth in the enterprise regulatory capital framework. The capital reserve end date is defined as the last day of the second consecutive fiscal quarter during which we have had and maintained capital equal to, or in excess of, all of the capital requirements and buffers under the enterprise regulatory capital framework. After the capital reserve end date, the amount of quarterly dividends to Treasury will be equal to the lesser of any quarterly increase in our net worth and a 10% annual rate on the then-current liquidation preference of the senior preferred stock. As a result, our ability to retain earnings in excess of the capital requirements and buffers set forth in the enterprise regulatory capital framework will be limited. For more information on the terms of the senior preferred stock purchase agreement and senior preferred stock, see "Business—Conservatorship and Treasury Agreements" in our 2024 Form 10-K.

Additional Restrictions Relating to Preferred Stock. Payment of dividends on our common stock is also subject to the prior payment of dividends on our preferred stock and our senior preferred stock. Payment of dividends on all outstanding preferred stock, other than the senior preferred stock, is also subject to the prior payment of dividends on the senior preferred stock.

Statutory Restrictions. Under the GSE Act, we are not permitted to make a capital distribution (including the payment of dividends) if, after making the distribution, we would be undercapitalized. The Director of FHFA, however, may permit us to repurchase shares if the repurchase is made in connection with the issuance of additional shares or obligations in at least an equivalent amount and will reduce our financial obligations or otherwise improve our financial condition. The GSE Act also provides that: (1) if we are classified as undercapitalized, we may not make a capital distribution that would result in our reclassification as significantly or critically undercapitalized; and (2) if we are classified as significantly undercapitalized, we may not make a capital distribution that would result in our reclassification as critically undercapitalized and we may not make any other capital distribution without the approval of the Director of FHFA. Our capital classifications have been suspended during conservatorship. In addition, under the Charter Act, we must obtain the prior written approval of FHFA to make a capital distribution that would decrease our total capital to an amount less than the risk-based capital level or that would decrease our core capital to an amount less than the minimum capital level.

Restrictions Under Enterprise Regulatory Capital Framework. The enterprise regulatory capital framework rule establishes capital planning and prior notice and approval requirements for capital distributions. In addition, while not currently applicable, our payment of dividends and capital distributions will be subject to the following restrictions under the enterprise regulatory capital framework effective on the date of termination of our conservatorship:

During a calendar quarter, we will not be permitted to pay dividends or make any other capital distributions (or create an obligation to make such distributions) that, in the aggregate, exceed the amount equal to our eligible retained income for the quarter multiplied by our maximum payout ratio. The maximum payout ratio for a given quarter is the lowest of the payout ratios determined by our capital conservation buffer and our leverage buffer. We will not be subject to this limitation on distributions if we have a capital conservation buffer that is greater than our prescribed capital conservation buffer amount and a leverage buffer that is greater than our prescribed leverage buffer amount. Notwithstanding the above-described limitations, FHFA may permit us to make a distribution upon our request, if FHFA determines that the distribution would not be contrary to the purposes of this section of the enterprise regulatory capital framework or to our safety and soundness. We will not be permitted to make any distributions during a quarter if our eligible retained income is negative and either (a) our capital conservation buffer is less than our stress capital buffer or (b) our leverage buffer is less than our prescribed leverage buffer amount.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

Trading Arrangements

During the quarter ended September 30, 2025, no Fannie Mae director or officer (as that term is defined by the SEC in Rule 16a-1(f) under the Exchange Act) adopted or terminated a Rule 10b5-1 trading arrangement or a non-Rule 10b5-1 trading arrangement for transactions in Fannie Mae securities.

Item 6. Exhibits

The exhibits listed below are being filed or furnished with or incorporated by reference into this report.

Item	Description
3.1	Fannie Mae Charter Act (12 U.S.C. § 1716 et seq.) as amended through July 25, 2019 (Incorporated by reference to Exhibit 3.1 to Fannie Mae's Quarterly Report on Form 10-Q for the quarter ended September 30, 2019, filed October 31, 2019.)
3.2	Fannie Mae Bylaws, as amended through January 29, 2019 (Incorporated by reference to Exhibit 3.2 to Fannie Mae's Annual Report on Form 10-K for the year ended December 31, 2018, filed February 14, 2019.)
18.1	Letter from Deloitte & Touche LLP, Independent Registered Public Accounting Firm, Regarding Change in Accounting Principle for Cash Equivalents and Restricted Cash Equivalents
31.1	Certification of Chief Executive Officer pursuant to Securities Exchange Act Rule 13a-14(a)
