Executive Summary: Limited Lenders Apply Limited Credit Overlays

- Approximately 40 percent of lenders who deliver loans to the GSEs or Ginnie Mae reported applying credit overlays that are more stringent than what the GSEs or Ginnie Mae require. In addition, 60 percent of lenders reported that they apply credit overlays when originating loans through wholesale channels, such as correspondent lenders or mortgage brokers.

- Among lenders delivering loans to the GSEs or Ginnie Mae who reported applying credit overlays:
  - Most lenders (64 percent) say that credit overlays are applied on a limited basis – to 20 percent or less of their loan originations. Only 24 percent of lenders reported applying overlays across the board – to more than 90 percent of their loan originations.
  - The most common type of overlay applied in loan origination, as cited by lenders, is higher credit scores (47 percent), followed by additional documentation requirements (21 percent).

- Lenders reported a median loan denial rate of 10 percent for both the purchase and refinance markets over the past year.
  - Lenders cite high Debt-to-Income (DTI) ratios, low credit scores, and documentation quality as the most common reasons for purchase loan application denials. Denial reasons are similar across lender sizes and types.
  - Lenders cite high DTI ratios, low credit scores, and insufficient collateral (appraisal issues) as the most common reasons for refinance loan application details. Denial reasons are similar across lender sizes and types.
Business Context and Research Objectives

Business Context
The U.S. economy has improved significantly since the Great Recession, and mortgage underwriting credit standards are gradually loosening. Nevertheless, the homeownership rate continues to decline and remains currently at the lowest level since 1990. This situation has prompted policymakers, regulators, and industry participants to examine the appropriateness of credit standards and the availability of mortgage credit for American consumers. Better understanding lenders’ attitudes about the lending parameters they employ may shed additional light on factors that could make it more viable for lenders to do business within the full credit boxes of the GSEs.

Credit overlays, referring to stricter mortgage approval standards that lenders place above the guidelines set by investors (such as the GSEs), are a potential and often cited factor impacting consumers’ access to mortgage credit. Fannie Mae’s Economic & Strategic Research Group surveyed senior mortgage executives in May 2015 through its quarterly Mortgage Lender Sentiment Survey to examine the attitudes of lenders in relation to credit overlays.

Research Questions
1. To what extent do lenders apply credit overlays?
2. If applying credit overlays, what are lenders’ practices?
   • What types of credit overlays are more commonly applied? What are the primary reasons for applying credit overlays?
   • To what extent do lenders apply credit overlays to their loan originations?
   • Do lenders apply the same credit overlays across all investors, or do they apply different credit overlays for different investors?
3. What are lenders’ purchase and refinance loan-application denial rates? What are the major denial reasons?
4. To what extent do lenders plan to do business with three consumer segments: (1) consumers with mid-tier credit (680-740 credit scores), (2) consumers with lower-than-median income, and (3) consumers in rural areas?

For Q2 2015, a total of 258 senior executives completed the survey from May 7-17, representing 238 lending institutions.*

*The results of the Mortgage Lender Sentiment Survey are reported at the lending institutional parent-company level. If more than one individual from the same institution completes the survey, their responses are averaged to represent their parent institution.

**The 2013 total loan volume per lender used here includes the best available annual origination information from sources such as Home Mortgage Disclosure Act (HMDA), Fannie Mae, Freddie Mac, and Marketrac. The most recent loan volume data available when the survey was conducted was 2013.

***Lenders that are not classified into mortgage banks or depository institutions or credit unions are mostly housing finance agencies.
Credit Overlays

- Approximately 40 percent of lenders who deliver loans to the GSEs or Ginnie Mae reported applying credit overlays that are more stringent than what the GSEs or Ginnie Mae require. In addition, of lenders who originate or acquire loans through wholesale channels, such as mortgage brokers and correspondent lenders, about 60 percent said they apply credit overlays.

- Among lenders delivering loans to the GSEs or Ginnie Mae who reported applying credit overlays:
  - Most lenders (64 percent) say that credit overlays are applied on a limited basis -- to 20 percent or less of their loan originations. Only 24 percent of lenders reported applying overlays across the board -- to more than 90 percent of their loan originations.
  - Nearly 50 percent of lenders reported applying the same credit overlays across all investors, while about 40 percent of lenders reported applying different credit overlays for different investors.
  - Larger and mid-sized lenders as well as mortgage banks are more likely to report applying credit overlays.
  - Higher credit scores is the most common type of overlay applied in loan origination cited by lenders (47 percent), followed by additional documentation requirements (21 percent).

- Among lenders who reported applying credit overlays when originating loans through wholesale channels:
  - Higher credit scores is the most common type of credit overlay applied when acquiring loans through wholesale channels.
  - The primary reasons are to reduce default risks and repurchase risks.
Applying Credit Overlays Among Lenders Delivering to the GSEs or Ginnie Mae

A limited number of lenders (about 40%) reported that they apply credit overlays that are more stringent than what the GSEs or Ginnie Mae require. The overlay most often applied is higher credit scores, followed by additional documentation requirements.

[IF deliver loans to the GSEs or Ginnie Mae] You mentioned that your firm securitizes or sells mortgage loans with/to Fannie Mae, Freddie Mac, or Ginnie Mae. Does your firm apply credit overlays* that are more stringent than what Fannie Mae, Freddie Mac, or Ginnie Mae require? Showing Total (N=185)

Respondents saw the following definition when they hovered over “overlays” in the question text:
Lenders’ own underwriting guidelines that exceed requirements in the guides published by the investor to which the loan is being sold. Lender overlays can address various borrower and property attributes, including, but not limited to, credit score, debt-to-income ratio, amount of assets and the type of assets, minimum down payment, property type, and other attributes.

Due to small sample sizes, results should be interpreted with caution.
Applying Credit Overlays Among Lenders Delivering to the GSEs or Ginnie Mae

Most lenders (64%) say that credit overlays are applied on a limited basis, to 20 percent or less of their loan originations. Only 24 percent of lenders reported applying overlays across the board, more than 90 percent of their loan originations.

Results across subgroups can be found on pp. 30-31

Due to small sample sizes, results should be interpreted with caution

Respondents were asked this question if they responded “yes” to the preceding question: [IF deliver loans to the GSEs or Ginnie Mae] You mentioned that your firm securitizes or sells mortgage loans with/to Fannie Mae, Freddie Mac or Ginnie Mae. Does your firm apply credit overlays that are more stringent than what Fannie Mae, Freddie Mac or Ginnie Mae require?
Applying Credit Overlays by Lender Size and Lender Type

Larger and mid-sized lenders as well as mortgage banks are more likely to report applying credit overlays.

**[IF deliver loans to GSEs or Ginnie Mae]** You mentioned that your firm securitizes or sells mortgage loans with/to Fannie Mae, Freddie Mac, or Ginnie Mae. Does your firm apply credit overlays* that are more stringent than what Fannie Mae, Freddie Mac, or Ginnie Mae require?

Applying Credit Overlays Across Investors

Nearly 50 percent of lenders reported applying the same credit overlays across all investors, while about 40 percent of lenders reported applying different credit overlays, depending on the investor to which the loan will be sold.

![Credit Overlay Survey Results](image)

- **Total**: 49% apply the same credit overlays to make loans eligible for sale to all investors, 41% apply different credit overlays per intended investor, and 10% are not sure/don’t know.

**Distribution by Institution Size**:
- **Larger Institutions (N=20)**: 51% apply the same overlays, 36% apply different overlays per intended investor, and 13% are not sure/don’t know.
- **Mid-sized Institutions (N=23)**: 51% apply the same overlays, 40% apply different overlays per intended investor, and 9% are not sure/don’t know.
- **Smaller Institutions (N=10)**: 37% apply the same overlays, 63% apply different overlays per intended investor, and 0% are not sure/don’t know.

**Distribution by Institution Type**:
- **Mortgage Banks (N=30)**: 48% apply the same overlays, 40% apply different overlays per intended investor, and 12% are not sure/don’t know.
- **Depository Institutions (N=15)**: 53% apply the same overlays, 40% apply different overlays per intended investor, and 7% are not sure/don’t know.
- **Credit Unions (N=4)**: 100% apply the same overlays, 0% apply different overlays per intended investor, and 0% are not sure/don’t know.

*Due to small sample sizes, results should be interpreted with caution.*
Credit Overlays When Originating Loans Through Wholesale Channels

Higher credit scores is the most common type of credit overlay applied when originating loans through wholesale channels, and the primary reasons are to reduce default risks and repurchase risks.

[IF originate loans through wholesale channels such as mortgage brokers or correspondent channels] Does your firm apply credit overlays when originating or acquiring loans through wholesale channels? Showing Total (N=69)

- Yes: 60%
- No: 33%
- Not sure/don’t know: 7%

[IF apply credit overlays] What type of overlay does your firm apply most often when origination or acquiring loans through wholesale channels? Showing Total (N=38)

- Higher credit scores: 52%
- Restrictions on property type: 14%
- Additional documentation: 9%
- Lower LTV ratio: 6%
- Limitations on sources of funds permitted for down payment and closing costs: 3%
- Lower DTI ratio: 2%
- Other: 15%

[IF apply credit overlays] What is the primary reason your firm requires credit overlays when originating or acquiring loans through wholesale channels? Showing Total (N=38)

- To reduce risks or costs associated with purchasing and servicing loans that have higher default risks: 41%
- To reduce repurchase risks when selling to investors: 40%
- To reduce compliance risks: 7%
- To better manage operational complexity by focusing on certain credit segments: 3%
- Other: 9%

Results across subgroups can be found on pp. 33-35 due to small sample sizes, results should be interpreted with caution.
Loan Denial Rates & Reasons

- Lenders who originate single-family purchase mortgages reported a median loan denial rate of 10 percent over the past year.
  - High DTI ratios, low credit scores, and documentation quality are cited as the most common reasons for loan application denials.
  - Denial reasons are similar across lender sizes and types.

- Lenders who originate single-family refinance mortgages reported a median loan denial rate of 10 percent over the past year.
  - High DTI ratio, low credit scores, and insufficient collateral (appraisal issues) are the most common reasons for loan application denials.
  - Denial reasons are similar across lender sizes and types.
Purchase Mortgage Denial Rates and Reasons for Denial

Lenders who originate single-family purchase mortgages reported a median loan denial rate of 10 percent over the past year. High DTI ratios, low credit scores, and documentation quality are cited as the most common reasons for denying purchase loan applications.

**IF currently originate purchase mortgages** Approximately what was the loan denial (disqualify) rate of single-family purchase mortgage applications at your firm over the past year? [Open End] Showing Total (N=236)

**Mean:** 12.87% \[Median: 10\%\]

Results across subgroups can be found on pp. 37-38

**IF firm currently originates purchase mortgages** Listed below are some common reasons that lenders deny single-family purchase mortgage loan applications. Please select the two most common reasons at your firm. Showing Total (N=236)

- Borrower’s DTI (Debt-to-Income) ratio is too high or loans not eligible for QM (qualified mortgages) with a DTI ratio of 43% or less
- Borrower’s credit score is too low or borrower has credit issues
- Borrower could not provide acceptable documentation of income, assets, etc., or documentation is incomplete or with unverifiable information
- Insufficient collateral (appraisal issues)
- Borrower does not have enough cash or savings to cover down payments or closing costs
- LTV (Loan to Home Value) ratio is too high
- Loans not eligible to meet investors’ other product requirements such as loan limit or property type
- Borrower has temporary or irregular employment history
- Mortgage insurance is denied

Results across subgroups can be found on pp. 39-40
Refinance Mortgage Denial Rates and Reasons for Denial

Lenders who originate single-family refinance mortgages reported a median loan denial rate of 10 percent over the past year. High DTI ratios, low credit scores, and insufficient collateral are cited as the most common reasons for denying refinance loan applications.

[IF currently originate refinance mortgages] Approximately what was the loan denial (disqualify) rate of single-family refinance mortgage applications at your firm over the past year? [Open End] Showing Total (N=232)

Results across subgroups can be found on pp. 41-42

![Graph showing loan denial rate of single-family refinance mortgage applications (%)](chart)

Mean: 11.38% Median: 10%

- Most Common Reason: Borrower’s DTI (Debt-to-Income) ratio is too high or loans not eligible for QM (qualified mortgages) with a DTI ratio of 43% or less
- 2nd Most Common Reason: Borrower’s credit score is too low or borrower has credit issues

Results across subgroups can be found on pp. 43-44
Consumer Segments

- For consumers with mid-tier credit (i.e., 680-740 credit scores), lenders cite unfavorable economic conditions as the most common reason for a relatively weak purchase mortgage demand from this consumer segment, followed by the lack of inventory and the difficulty to qualify for a mortgage.

- About 37 percent of lenders who interact directly with consumers when originating purchase mortgages indicated that they plan to do more business with the mid-tier consumer segment this year.

- Very few lenders reported plans to do less business with lower-than-median income consumers or consumers in rural areas this year. When asked why they do not plan to do more business with these three consumer segments, lenders cite “not a good fit for my firm’s business model or footprints” as the primary reason, followed by “limited resources in my firm’s marketing or outreach programs.”
Reasons for Weak Purchase Mortgage Demand among Mid-Tier Credit Consumers

Unfavorable economic conditions is the most common reason cited by lenders for a relatively weak purchase mortgage demand among consumers with mid-tier credit (i.e., 680-740 credit scores), followed by the lack of inventory and the difficulty to qualify for a mortgage.

Consumer Segments

About 37 percent of lenders who originate purchase mortgages directly with consumers indicated that they plan to do more business with the mid-tier consumer segment this year.

[IF originate purchase mortgages directly with consumers] Listed below are three common consumer segments. For each consumer segment, please indicate whether your firm plans to do more or do less business with each segment this year. (Showing Total N=223)

- Consumers with mid-tier credit (680 - 740 credit score)
- Consumers with lower than median income of the geographic area where they live
- Consumers in rural areas (places with a population less than 2,500)

[IF focus rarely/do less on any segment] Listed below are some possible reasons that lenders might NOT focus on the consumer segments listed above. Please select up to two of the most likely reasons for your firm and rank them in order of likelihood. (Showing Total N=54)

- Not a good fit for my firm’s business model or footprints
- Limited resources in my firm’s marketing or outreach programs
- Increased regulatory/compliance risk for these consumer segments
- Increased repurchase risk for these consumer segments
- Risk of decline in operating margin (profitability)
- Increased costs associated with servicing these consumer segments
- Increased marketplace competition in attracting these consumer segments
- Limited cross-sell opportunities
- Other

Results across subgroups can be found on pp. 48-49

Survey Background

- Fannie Mae’s Mortgage Lender Sentiment Survey™ is a quarterly online survey among senior executives of Fannie Mae’s lending institution partners to provide insights and benchmarks that help mortgage industry professionals understand industry and market trends and assess their own business practices.
- Each quarter, the survey covers both regular tracking questions and specific industry topic questions:

<table>
<thead>

Quarterly Reporting and Quarterly Special Topic Analyses

- Quarterly reports provide a timely view of trends on the topics listed above, such as consumer mortgage demand, lenders’ credit standards, and profit margin outlook.
- Quarterly Special Topic Analyses provide insights into industry important topics.

Reports can be found on the Mortgage Lender Sentiment Survey page on fanniemae.com:
Mortgage Lender Sentiment Survey™

Survey Methodology
- A quarterly, 10-15 minute online survey among senior executives such as CEOs and CFOs of Fannie Mae’s lending institution partners.
- To ensure that the survey results represent the behavior and output of organizations rather than individuals, the Fannie Mae Mortgage Lender Sentiment Survey is structured and conducted as an establishment survey.
- Each respondent is asked 40-75 questions.

Sample Design
- Each quarter, a random selection of approximately 2,000 senior executives among Fannie Mae’s approved lenders are invited to participate in the study.

Data Weighting
- The results of the Mortgage Lender Sentiment Survey are reported at the institutional parent-company level. If more than one individual from the same parent institution completes the survey, their responses are averaged to represent their parent institution.
Lending Institution Characteristics

Fannie Mae’s customers invited to participate in the Mortgage Lender Sentiment Survey represent a broad base of different lending institutions that conducted business with Fannie Mae in 2013. Institutions were divided into three groups based on their 2013 total industry loan volume - Larger (top 15%), Mid-sized (top 16%-35%), and Smaller (bottom 65%). The data below further describe the compositions and loan characteristics of the three groups of institutions.

How to Read Significance Testing

On slides where significant differences between three groups are shown:

- Each group is assigned a letter (L/M/S, M/D/C)
- If a group has a significantly higher % than another group at the 95% confidence level, a letter will be shown next to the % for that metric. The letter denotes which group the % is significantly higher than.

Example:

[IF deliver loans to the GSEs or Ginnie Mae] You mentioned that your firm securitizes or sells mortgage loans with/to Fannie Mae, Freddie Mac or Ginnie Mae. Does your firm apply credit overlays that are more stringent than what Fannie Mae, Freddie Mac or Ginnie Mae require?

- 56% is significantly higher than 17% (smaller institutions)
- 83% is significantly higher than 44% (larger institutions) and 50% (mid-sized institutions)
Calculation of the “Total”

The “Total” data presented in this report is an average of the means of the three loan origination volume groups (see an illustrated example below). Please note that percentages are based on the number of financial institutions that gave responses other than “Not Applicable.” Percentages may add to under or over 100% due to rounding.

Example:

“Total” of 78% is 
(79% + 81% + 75%) / 3

Listed below are some common reasons that lenders deny single-family purchase mortgage loan applications. Please select the two most common reasons at your firm.

### Reasons for Denying Single-Family Purchase Mortgage Loan Applications (by lender size)

**Larger Institutions (L)**
- Borrower’s DTI (Debt-to-Income) ratio is too high or loans not eligible for QM (qualified mortgages) with a DTI ratio of 43% or less: 31%
- Borrower’s credit score is too low or borrower has credit issues: 36%
- Insufficient collateral (appraisal issues): 9%
- Borrower could not provide acceptable documentation of income, assets, etc., or documentation is incomplete or with unverifiable information: 18%
- Borrower does not have enough cash or savings to cover down payments or closing costs: 2%
- LTV (Loan to Home Value) ratio is too high: 4%
- Loans not eligible to meet investors’ other product requirements such as loan limit or property type: 1%
- Mortgage insurance is denied: 11%

**Mid-sized Institutions (M)**
- Borrower’s DTI (Debt-to-Income) ratio is too high or loans not eligible for QM (qualified mortgages) with a DTI ratio of 43% or less: 35%
- Borrower’s credit score is too low or borrower has credit issues: 25%
- Insufficient collateral (appraisal issues): 13%
- Borrower could not provide acceptable documentation of income, assets, etc., or documentation is incomplete or with unverifiable information: 20%
- Borrower does not have enough cash or savings to cover down payments or closing costs: 2%
- LTV (Loan to Home Value) ratio is too high: 4%
- Loans not eligible to meet investors’ other product requirements such as loan limit or property type: 7%
- Mortgage insurance is denied: 5%

**Smaller Institutions (S)**
- Borrower’s DTI (Debt-to-Income) ratio is too high or loans not eligible for QM (qualified mortgages) with a DTI ratio of 43% or less: 30%
- Borrower’s credit score is too low or borrower has credit issues: 46%
- Insufficient collateral (appraisal issues): 3%
- Borrower could not provide acceptable documentation of income, assets, etc., or documentation is incomplete or with unverifiable information: 8%
- Borrower does not have enough cash or savings to cover down payments or closing costs: 4%
- LTV (Loan to Home Value) ratio is too high: 1%
- Loans not eligible to meet investors’ other product requirements such as loan limit or property type: 16%
- Mortgage insurance is denied: 2%

**L/M/S -** Denote a % is significantly higher than the annual loan origination volume group that the letter represents at the 95% confidence level.
## Reasons for Denying Single-Family Purchase Mortgage Loan Applications (by lender type)

CONSUMER SEGMENTS
There has been some discussion about "increasing access to credit" to mid-tier credit consumers with 680-740 credit scores. Which of the following factors do you think account for a relatively weak purchase mortgage demand among borrowers with mid-tier credit (680-740 credit scores)? Please select up to two of the most important factors and rank them in order of importance.

### Reasons for Weak Purchase Mortgage Demand Among Consumers with Mid-Tier Credit (by lender size)

**Consumer-Related Reasons**

- Consumers/borrowers with mid-tier credit are reluctant to apply because they do not think that they will be qualified: Larger Institutions (L) 19%, Mid-scaled Institutions (M) 11%, Smaller Institutions (S) 14%
- The mortgage process is too painful (such as documentation): Larger Institutions (L) 7%, Mid-scaled Institutions (M) 14%, Smaller Institutions (S) 16%
- There’s a lack of marketing outreach programs for consumers/borrowers with mid-tier credit: Larger Institutions (L) 3%, Mid-scaled Institutions (M) 3%, Smaller Institutions (S) 2%

**Market-Related Reasons**

- Economic conditions (e.g., wage growth or employment) are not favorable for consumers/borrowers with mid-tier credit: Larger Institutions (L) 30%, Mid-scaled Institutions (M) 19%, Smaller Institutions (S) 20%
- There’s a lack of supply or inventory of affordable housing stock: Larger Institutions (L) 11%, Mid-scaled Institutions (M) 16%, Smaller Institutions (S) 14%
- It is difficult for mid-tier credit consumers to qualify for a mortgage: Larger Institutions (L) 14%, Mid-scaled Institutions (M) 18%, Smaller Institutions (S) 17%
- Home prices are high: Larger Institutions (L) 4%, Mid-scaled Institutions (M) 5%, Smaller Institutions (S) 7%
- There’s a lack of mortgage products tailored to consumers/borrowers with mid-tier credit: Larger Institutions (L) 8%, Mid-scaled Institutions (M) 7%, Smaller Institutions (S) 3%
- Mortgage rates are not favorable: Larger Institutions (L) 2%, Mid-scaled Institutions (M) 4%, Smaller Institutions (S) 4%

**L/M/S** - Denote a % is significantly higher than the annual loan origination volume group that the letter represents at the 95% confidence level.
There has been some discussion about “increasing access to credit” to mid-tier credit consumers with 680-740 credit scores. Which of the following factors do you think account for a relatively weak purchase mortgage demand among borrowers with mid-tier credit (680-740 credit scores)? Please select **up to two** of the most important factors and rank them in order of importance.

### Consumer-Related Reasons

- **Consumers/borrowers with mid-tier credit are reluctant to apply because they do not think that they will be qualified** (19%\(\text{M}\), 8%\(\text{D}\), 13%\(\text{C}\), 1%)
- **The mortgage process is too painful (such as documentation)** (13%\(\text{M}\), 19%\(\text{D}\), 1%\(\text{C}\), 1%)
- **There’s a lack of marketing outreach programs for consumers/borrowers with mid-tier credit** (1%\(\text{M}\), 8%\(\text{D}\), 0%\(\text{C}\), 1%)

### Market-Related Reasons

- **Economic conditions (e.g., wage growth or employment) are not favorable for consumers/borrowers with mid-tier credit** (17%\(\text{M}\), 23%\(\text{D}\), 10%\(\text{C}\), 3%)
- **There’s a lack of supply or inventory of affordable housing stock** (10%\(\text{M}\), 12%\(\text{D}\), 0%\(\text{C}\), 8%)
- **It is difficult for mid-tier credit consumers to qualify for a mortgage** (14%\(\text{M}\), 10%\(\text{D}\), 0%\(\text{C}\), 3%)
- **Home prices are high** (3%\(\text{M}\), 8%\(\text{D}\), 0%\(\text{C}\), 8%)
- **There’s a lack of mortgage products tailored to consumers/borrowers with mid-tier credit** (8%\(\text{M}\), 7%\(\text{D}\), 4%\(\text{C}\), 0%)
- **Mortgage rates are not favorable** (6%\(\text{M}\), 4%\(\text{D}\), 0%\(\text{C}\), 0%)

**M/D/C** - Denote a % is significantly higher than the institution type group that the letter represents at the 95% confidence level.
### Consumer Segments (by lender size)

Listed below are three common consumer segments. For each consumer segment, please indicate whether your firm plans to do more or do less business with each segment this year.

**Larger Institutions (L)**
- **N=50**
  - **Do More**: 46% M, 29% L, 17% 2%
  - **Status Quo (no major changes)**: 54% M, 68% L, 62% 3%

**Mid-sized Institutions (M)**
- **N=66**
  - **Do More**: 27% M, 18% L, 13% 2%
  - **Status Quo (no major changes)**: 73% M, 74% L, 65% 3%

**Smaller Institutions (S)**
- **N=108**
  - **Do More**: 38% M, 24% L, 18% 1%
  - **Status Quo (no major changes)**: 61% M, 68% L, 57% 1%

**Consumers with mid-tier credit (680 - 740 credit score)**

**Consumers with lower than median income of the geographic area where they live**

**Consumers in rural areas (places with a population less than 2,500)**

L/M/S - Denote a % is significantly higher than the annual loan origination volume group that the letter represents at the 95% confidence level.

Loan Denial Rate and Reasons

qR72. Please indicate below whether your firm originates single-family purchase or refinance mortgages

qR73. [IF qR72a=Yes; firm originates purchase mortgages] Approximately what was the loan denial (disqualify) rate of single-family purchase mortgage applications at your firm over the past year?

qR74. [IF qR72a=Yes; firm originates purchase mortgages] Listed below are some common reasons that lenders deny single-family purchase mortgage loan applications. Please select the two most common reasons at your firm.
- LTV (Loan to Home Value) ratio is too high
- Insufficient collateral (appraisal issues)
- Borrowers’ DTI (Debt-to-Income) ratio is too high or loans not eligible for QM (qualified mortgages) with a DTI ratio of 43% or less
- Borrowers’ credit score is too low or borrower has credit issues
- Borrower has temporary or irregular employment history
- Borrower does not have enough cash or savings to cover down payments or closing costs
- Borrower could not provide acceptable documentation of income, assets, etc., or documentation is incomplete or with unverifiable information
- Mortgage insurance is denied
- Loans not eligible to meet investors’ other product requirements such as loan limit or property type
- Other

qR75. [IF qR72b=Yes; firm originates refinance mortgages] Approximately what was the loan denial (disqualify) rate of single-family refinance mortgage applications at your firm over the past year?

qR76. [IF qR72b=Yes; firm originates refinance mortgages] Listed below are some common reasons that lenders deny single-family refinance mortgage loan applications. Please select two most common reasons at your firm.
- LTV (Loan to Home Value) ratio is too high
- Insufficient collateral (appraisal issues)
- Borrower’s DTI (Debt-to-Income) ratio is too high or loans not eligible for QM (qualified mortgages) with a DTI ratio of 43% or less
- Borrower’s credit score is too low or borrower has credit issues
- Borrower has temporary or irregular employment history
- Borrower does not have enough cash or savings to cover down payments or closing costs
- Borrower could not provide acceptable documentation of income, assets, etc., or documentation is incomplete or with unverifiable information
- Mortgage insurance is denied
- Loans not eligible to meet investors’ other product requirements such as loan limit or property type
- Other
Credit Overlays

qR77. Does your firm securitize or sell mortgage loans with/to Fannie Mae, Freddie Mac or Ginnie Mae?
qR78. Does your firm securitize or sell mortgage loans to investors or aggregators other than the GSEs and Ginnie Mae?
qR79. [IF QR77=Yes; firm delivers loans to GSEs or Fannie Mae] You mentioned that your firm securitizes or sells mortgage loans with/to Fannie Mae, Freddie Mac or Ginnie Mae. Does your firm apply credit overlays that are more stringent than what Fannie Mae, Freddie Mac or Ginnie Mae require?
qR80. [IF QR79=Yes; firm applies credit overlays] Approximately what percent of your annual single-family mortgage origination loan count does your firm apply credit overlays?
qR81. [IF QR79=Yes; firm applies credit overlays] What type of overlay does your firm apply most often?
  – Higher credit scores
  – Lower LTV ratio
  – Lower DTI ratio
  – Additional documentation
  – Restrictions on property type
  – Limitations on sources of funds permitted for down payment and closing costs
  – Other
qR82. [IF QR79=Yes; firm applies credit overlays] Does your firm apply the same credit overlay criteria across investors so that all loans will be eligible for sale to all investors? Or does your firm apply specific credit overlays that depend on the investor to which your firm intends to sell the loan?
qR83. Does your firm originate or acquire loans through wholesale channels such as mortgage brokers or correspondent channels?
qR84. [IF QR83=Yes; firm originates loans through wholesale channels] Does your firm apply credit overlays when originating or acquiring loans through wholesale channels?
qR85. [IF QR84=Yes; firm applies credit overlays] What type of overlay does your firm apply most often?
  – Higher credit scores
  – Lower LTV ratio
  – Lower DTI ratio
  – Additional documentation
  – Restrictions on property type
  – Limitations on sources of funds permitted for down payment and closing costs
  – Other
qR86. [IF QR84=Yes; firm applies credit overlays] What is the primary reason your firm requires credit overlays when originating or acquiring loans through wholesale channels?
  – To reduce repurchase risks when selling to investors
  – To reduce compliance risks
  – To reduce risks or costs associated with purchasing and servicing loans that have higher default risks
  – To better manage operational complexity by focusing on certain credit segments
  – Other
Access to Credit

qR87. There has been some discussion about “increasing access to credit” to mid-tier credit consumers with 680-740 credit scores. Which of the following factors do you think account for a relatively weak purchase mortgage demand among borrowers with mid-tier credit (680-740 credit scores)? Please select up to two of the most important factors and rank them in order of importance.

- Consumers/borrowers with mid-tier credit are reluctant to apply because they do not think that they will be qualified.
- The mortgage process is too painful (such as documentation).
- There’s a lack of marketing outreach programs for consumers/borrowers with mid-tier credit.
- Economic conditions (e.g., wage growth or employment) are not favorable for consumers/borrowers with mid-tier credit.
- It is difficult for mid-tier credit consumers to qualify for a mortgage.
- Mortgage rates are not favorable.
- Home prices are high.
- There’s a lack of supply or inventory of affordable housing stock.
- There’s a lack of mortgage products tailored to consumers/borrowers with mid-tier credit.
- Other

qR88. Does your firm originate purchase mortgages directly with consumers or directly interact with borrowers/consumers when originating purchase mortgages?

qR89. [IF qR88=Yes; firm originates purchase mortgages directly with consumers] Listed below are three common consumer segments. For each consumer segment, please indicate whether your firm plans to do more or do less business with each segment this year.

- Consumers with mid-tier credit (680 - 740 credit score)
- Consumers with lower than median income of the geographic area where they live
- Consumers in rural areas (places with a population less than 2,500)

qR90. Listed below are some possible reasons that lenders might NOT focus on the consumer segments listed above. Please select up to two of the most likely reasons for your firm and rank them in order of likelihood.

- Risk of decline in operating margin (profitability)
- Increased repurchase risk for these consumer segments
- Increased marketplace competition in attracting these consumer segments
- Increased regulatory/compliance risk
- Increased costs associated with servicing these consumer segments
- Limited cross-sell opportunities
- Limited resources in my firm’s marketing or outreach programs
- Not a good fit for my firm’s business model or footprints
- Other

qR91. Please share any thoughts you have about what would make your firm or other firms more likely to do more business with the three consumer segments listed in the previous question.
Opinions, analyses, estimates, forecasts, and other views of Fannie Mae's Economic & Strategic Research (ESR) group or survey respondents included in these materials should not be construed as indicating Fannie Mae's business prospects or expected results, are based on a number of assumptions, and are subject to change without notice. How this information affects Fannie Mae will depend on many factors. Although the ESR group bases its opinions, analyses, estimates, forecasts, and other views on information it considers reliable, it does not guarantee that the information provided in these materials is accurate, current, or suitable for any particular purpose. Changes in the assumptions or the information underlying these views could produce materially different results. The analyses, opinions, estimates, forecasts, and other views published by the ESR group represent the views of that group or survey respondents as of the date indicated and do not necessarily represent the views of Fannie Mae or its management.
